2005-06-16 Colin Walters <walters@verbum.org>

* tools/dbus-send.c (append_array): Use strtok.
(append_dict): New function.
(type_from_name): New function, extracted from main.
(main): Handle sending dicts.

* tools/dbus-print-message.c (print_iter): Print dict
entries.

2005-06-16 Colin Walters <walters@verbum.org>

* glib/dbus-gvalue.c (marshal_basic): Marshal NULL string
values as the empty string (#2948).

2005-06-16 Colin Walters <walters@verbum.org>

* dbus/Makefile.am:
* mono/doc/Makefile.am:
* test/glib/Makefile.am:

Fix srcdir != builddir issues (Patch from Chris Wilson, #3477)

2005-06-16 Colin Walters <walters@verbum.org>

* dbus/dbus-marshal-header.c (_dbus_header_load): Set
header byte order from expected byte order (Patch from Chris
Wilson, #3475).

* dbus/dbus-marshal-byteswap.c (byteswap_body_helper):
Increment pointer after swapping fixed array. Add assertion
for array length.

2005-06-15 Colin Walters <walters@verbum.org>

* dbus/dbus-sysdeps.c <HAVE_CMSGCRED>
(_dbus_read_credentials_unix_socket):
Fix call to dbus_set_error. (Patch from Michael Banck, #3461)

2005-06-15 John (J5) Palmieri <johnp@redhat.com>

* NEWS: Update to 0.34

2005-06-15 David Zeuthen <davidz@redhat.com>

* configure.in (LT_CURRENT): Revert back to 1 as the library hasn't changed and we've certainly not committed to protocol stability yet. All this does is to break ABI. See commit note from hp@redhat.com 2005-05-05 for details.

2005-06-15 John (J5) Palmieri <johnp@redhat.com>

* dbus/dbus-connection.c (_dbus_connection_peer_filter): New method
(_dbus_connection_run_builtin_filters): New method
(dbus_connection_dispatch): Run the builtin filters which in turn runs the peer filter which handles Ping messages.

* doc/TODO:
- Ping isn't handled: This patch fixes it

- Add a test case for the Ping message: added TODO item

2005-06-15 John (J5) Palmieri <johnp@redhat.com>

* dbus/dbus-message.c:
(dbus_message_has_path): New method
(dbus_message_has_interface): New method
(dbus_message_has_member): New method

* dbus/dbus/dbus-sysdeps.c (_dbus_check_dir_is_private_to_user):
New method

* dbus/dbus-keyring.c (_dbus_keyring_reload): Check to see that the keyring directory is private to the user

* doc/TODO:
- The convenience functions in dbus-bus.h should perhaps have the signatures that they would have if they were autogenerated stubs. e.g. the acquire service function. We should also evaluate
which of these functions to include, in light of the fact that GLib/Qt native stubs will probably also exist.: Punted

- add dbus_message_has_path(), maybe has_member/interface:
fixed in this patch

- in dbus-keyring.c, enforce that the keyring dir is not world readable/writable: Fixed in this patch

2005-06-15 John (J5) Palmieri <johnp@redhat.com>

* dbus/dbus-marshall-validate.h: Added a new validation error code DBUS_VALIDITY_UNKNOWN_OOM_ERROR = -4 for out of memory errors when validating signatures

* dbus/dbus-marshall-header.c: use DBUS_VALIDITY_UNKNOWN_OOM_ERROR in places where we previously used DBUS_VALID and a FALSE return value to indicate OOM

* dbus/dbus-marshall-validate.c
(_dbus_validate_signature_with_reason):
Use a stack to track the number of elements inside containers.
The stack values are then used to validate that dict entries have only two elements within them.
(validate_body_helper): check the reason for failure when validating variants

* dbus/dbus-message.c (load_message): use DBUS_VALIDITY_UNKNOWN_OOM_ERROR in places where we previously used DBUS_VALID and a FALSE return value to indicate OOM

* doc/TODO: remove "- validate dict entry number of fields" as this patch fixes it

2005-06-14 David Zeuthen <davidz@redhat.com>

* bus/bus.c (process_config_every_time): Drop existing conf-dir watches (if applicable) and add new watches

* bus/main.c (signal_handler): Handle SIGIO if using D_NOTIFY
(main): Setup SIGIO signal handler if using D_NOTIFY

* bus/config-parser.h: Add prototype
bus_config_parser_get_conf_dirs

* bus/config-parser.c (struct BusConfigParser): Add conf_dirs list
(merge_included): Also merge conf_dirs list
(bus_config_parser_unref): Clear conf_dirs list
(include_dir): Add directory to conf_dirs list
(bus_config_parser_get_conf_dirs): New function

* bus/dir-watch.[ch]: New files

* bus/Makefile.am (BUS_SOURCES): Add dir-watch.[ch]

* configure.in: Add checks for D_NOTIFY on Linux

2005-06-14 Colin Walters <walters@verbum.org>

* glib/dbus-binding-tool-glib.c:
* glib/dbus-gobject.c:

* glib/dbus-gvalue.c: Fix indentation and brace style.

2005-06-14 Ross Burton <ross@openedhand.com>.

* glib/dbus-glib.h: Make DBusGMethodInvocation a private structure. Rearrange prototypes a bit.

* glib/dbus-gproxy.c (dbus_g_proxy_invoke): Add documentation for first_arg_type.

* glib/dbus-gobject.c: Move DBusGMethodInvocation here, add documentation. Move dbus_g_method_return and dbus_g_method_return_error into public API section.

2005-06-14 Colin Walters <walters@verbum.org>

* glib/dbus-gobject.c (_dbus_gobject_lookup_marshall): Add missing return statements, noticed by Ross Burton.

2005-06-13 Ross Burton <ross@openedhand.com>.

* glib/dbus-gobject.c: Handle errors on message demarshalling by sending error message back.

* glib/dbus-gvalue.c: Initialize return variables.

2005-06-13 Colin Walters <walters@verbum.org>

* glib/Makefile.am: Fix thinko in last patch.

2005-06-13 Colin Walters <walters@verbum.org>

* glib/Makefile.am: Move dbus-gtype-specialized.c and dbus-gtype-specialized.h into a _HEADERS variable, install them.

2005-06-12 Colin Walters <walters@verbum.org>

Async signals and various bugfixes and testing by Ross Burton <ross@openedhand.com>.

* glib/dbus-gvalue.h: (struct DBusBasicGValue): Delete.
(dbus_gvalue_genmarshal_name_from_type)
(dbus_gvalue_ctype_from_type): Moved to dbus-binding-tool-glib.c.
(dbus_gtype_to_dbus_type): Renamed to dbus_gtype_from_signature.
(dbus_g_value_types_init, dbus_gtype_from_signature)
(dbus_gtype_from_signature_iter, dbus_gtype_to_signature)
(dbus_gtypes_from_arg_signature): New function prototypes.
(dbus_gvalue_demarshal): Take context and error arguments.
(dbus_gvalue_demarshal_variant): New function.
(dbus_gvalue_demarshal_message): New function.
(dbus_gvalue_store): Delete.

* glib/dbus-gvalue.c:

File has been almost entirely rewritten; now we special-case more types such as DBUS_TYPE_SIGNATURE, handle arrays and hash tables correctly, etc. Full support for recursive values is not yet complete.

* glib/dbus-gproxy.c (dbus_g_proxy_class_init): Change last argument of signal to G_TYPE_POINTER since we now pass a structure.

(lookup_g_marshall): Delete in favor of
_dbus_gobject_lookup_marshall.

(marshal_dbus_message_to_g_marshall): Use
_dbus_gobject_lookup_marshall and dbus_gvalue_demarshal_message
to handle remote signal callbacks.

(dbus_g_proxy_new_from_proxy): New function; creates a new
DBusGProxy by copying an existing one.

(dbus_g_proxy_get_interface, dbus_g_proxy_set_interface)

(dbus_g_proxy_get_path): New functions.

(dbus_g_proxy_marshal_args_to_message): New function;
factored out of existing code.

(DBUS_G_VALUE_ARRAY_COLLECT_ALL): Collect all arguments
from a varargs array.

(dbus_g_proxy_begin_call_internal): New function.

(dbus_g_proxy_end_call_internal): New function.

(dbus_g_proxy_begin_call): Take GTypes instead of DBus types
as arguments; simply invoke dbus_g_proxy_begin_call_internal
after collecting args into value array.

(dbus_g_proxy_end_call): Take GTypes instead of DBus types;
invoke dbus_g_proxy_end_call_internal.

(dbus_g_proxy_invoke): Simply invoke begin_call_interanl and
end_call_internal.

(dbus_g_proxy_call_no_reply): Take GTypes instead of DBus
types.

(array_free_all): New function.

(dbus_g_proxy_add_signal): Take GTypes.

* glib/dbus-gobject.h:

(_dbus_glib_marshal_dbus_message_to_gvalue_array): Delete.

(_dbus_gobject_get_path, _dbus_gobject_lookup_marshall):
Prototype.

* glib/dbus-gobject.c: Add a global marshal_table hash which
stores mappings from type signatures tomarshallers. Change lots
of invocations of dbus_gtype_to_dbus_type to
dbus_gtype_to_signature.

(_dbus_glib_marshal_dbus_message_to_gvalue_array): Delete.

(introspect_signals): Fix test for query.return_type.

(set_object_property): Update invocation of
dbus_gvalue_demarshal.

(invoke_object_method): Many changes. Handle asynchronous

invocations. Convert arguments with `dbus_gvalue_demarshal_message`. Handle errors. Use `DBusSignatureIter` instead of `strlen` on `args`. Handle all arguments generically. Special-case variants.

`(dbus_g_method_return, dbus_g_method_return_error)`: New function.

`(DBusGSignalClosure)`: New structure, closes over signal information.

`(dbus_g_signal_closure_new)`: New function.

`(dbus_g_signal_closure_finalize)`: New function.

`(signal_emitter_marshall)`: New function; is special marshaller which emits signals on bus.

`(export_signals)`: New function; introspects object signals and connects to them.

`(dbus_g_object_type_install_info)`: Take `GType` instead of `GObjectClass`.

`(dbus_g_connection_register_g_object)`: Invoke `export_signals`.

`(dbus_g_connection_lookup_g_object)`: New function.

`(DBusGFuncSignature)` New structure; used for mapping type signatures tomarshallers.

`(funcsig_hash)`: New function; hashes `DBusGFuncSignature`.

`(funcsig_equal)`: New function; compares `DBusGFuncSignature`.

`(_dbus_gobject_lookup_marshall)`: New function.

`(dbus_g_object_register_marshall)`: New function; used to register a marshaller at runtime for a particular signature.

* `glib/dbus-gmain.c` (`_dbus_gmain_test`): Add various tests.

* `glib/dbus-binding-tool-glib.h`: Add `DBUS_GLIB_ANNOTATION_ASYNC` which notes a server method implementation should be asynchronous.

* `glib/dbus-binding-tool-glib.c`

`(dbus_binding_tool_output_glib_server)`: Call `dbus_g_value_types_init`.

`(write_formal_parameters)`: Use `dbus_gtype_from_signature`. Handle variants specially.

`(dbus_g_type_get_lookup_function)`: Turn `GType` into an invocation of a lookup function.

`(write_args_for_direction)`: Use `dbus_g_type_get_lookup_function`.

`(write_untyped_out_args)`: New method; write output arguments.

`(write_formal_declarations_for_direction)`: Function for writing prototypes.

`(write_formal_parameters_for_direction)`: Function for writing implementations.

`(write_typed_args_for_direction)`: Function for writing arguments prefixed with `GTypes`.

`(write_async_method_client)`: Write out async version of method.

* `glib/dbus-binding-tool-glib.c`: Include `dbus-gvalue-utils.h`.

`(dbus_g_type_get_marshal_name)`: Move mapping from `GType` to marshal name into here.

```

(dbus_g_type_get_c_name): Move into here.
(compute_marshall): Convert signature to type with
dbus_gtype_from_signature, use dbus_g_type_get_marshall_name.
(compute_marshall_name): Ditto.
(compute_marshall): Handle async signal annotations.
(gather_marshallers): Return if we don't have a known
prefix.
(generate_glue): Collect introspection blob here, and
write all of the blob at the end. This allows an object
with multiple interfaces to work.
Mark async methods in introspection blob.

* glib/Makefile.am (libdbus_glib_1_la_SOURCES): Add
dbus-gtype-specialized.c, dbus-gtype-specialized.h,
dbus-gvalue-utils.h, dbus-gvalue-utils.c.

* dbus/dbus-glib.h: Don't include dbus-protocol.h; this
avoids people accidentally using DBUS_TYPE_* which should
not be necessary anymore.
Do include dbus-gtype-specialized.h, which are utilities
for GLib container types.
Add various #defines for types such as
DBUS_TYPE_G_BOOLEAN_ARRAY.
(DBusGValueIterator, DBusGValue): Define, not fully used
yet.
(dbus_g_value_get_g_type): Type for recursive value.
(dbus_g_value_open, dbus_g_value_iterator_get_value)
(dbus_g_value_iterator_get_values, dbus_g_value_iterator_recurse)
(dbus_g_value_free): Prototypes.
(dbus_g_object_register_marshall, dbus_g_proxy_new_from_proxy):
Prototype.
(dbus_g_proxy_set_interface): Prototype.
(dbus_g_proxy_begin_call, dbus_g_proxy_end_call)
(dbus_g_proxy_call_no_reply): Take GLib types instead of Dbus
types.
(dbus_g_proxy_get_path, dbus_g_proxy_get_interface):
Accessors.
(DBusGAsyncData, DBusGMethodInvocation): Structures for
doing async invocations.
(dbus_g_method_return, dbus_g_method_return_error):
Prototypes.
* doc/dbus-tutorial.xml: Update GLib section.

* tools/dbus-viewer.c (load_child_nodes): Update
for new invocation type of dbus_g_proxy_end_call.
(load_from_service_thread_func): Ditto.

* tools/print-introspect.c (main): Ditto.

* tools/dbus-names-model.c (have_names_notify)
(names_model_reload, names_model_set_connection)
Use GTypes.

```

- * python/Makefile.am (INCLUDES): Define DBUS_COMPILATION, needed since Python bindings use GLib bindings.
- * test/glib/Makefile.am (INCLUDES): Define DBUS_COMPILATION. Add --prefix argument.
- * tools/Makefile.am: Define DBUS_COMPILATION. Remove unneeded --ignore-unsupported arg.
- * test/glib/test-service-glib.c:
- * test/glib/test-service-glib.xml:
- * test/glib/test-dbus-glib.c: Add many more tests.

2005-06-06 David Zeuthen <davidz@redhat.com>

- * doc/TODO: Add item about need to remove deprecated functions.
- * dbus/dbus-connection.h: Add prototype for dbus_connection_disconnect
- * dbus/dbus-connection.c (dbus_connection_disconnect): New function to repair the ABI which was broken with the last commit.

2005-06-02 John (J5) Palmieri <johnp@redhat.com>

- * dbus/dbus-connection.c, dbus/dbus-connection.h (dbus_connection_disconnect): renamed to dbus_connection_close for API symmetry with dbus_connection_open (_dbus_connection_open_internal): s/dbus_connection_disconnect/dbus_connection_close
- * dbus/dbus-bus.c (dbus_bus_get): s/dbus_connection_disconnect/dbus_connection_close
- * bus/connection.c (bus_connections_unref, bus_connections_setup_connection, bus_connections_expire_incomplete): s/dbus_connection_disconnect/dbus_connection_close
- * bus/dispatch.c (bus_dispatch, kill_client_connection, kill_client_connection_unchecked, check_hello_connection): s/dbus_connection_disconnect/dbus_connection_close
- * bus/bus.c (new_connection_callback): s/dbus_connection_disconnect/dbus_connection_close
- * tools/dbus-send.c (main): s/dbus_connection_disconnect/dbus_connection_close

```
* test/glib/test-profile.c (no_bus_thread_func,
with_bus_thread_func):
  s/dbus_connection_disconnect/dbus_connection_close

* test/test-service.c (path_message_func, filter_func):
  s/dbus_connection_disconnect/dbus_connection_close

* doc/TODO: remove connection_open/connection_disconnect lacks
symmetry  item that was just fixed
```

2005-05-25 Colin Walters <walters@verbum.org>

```
* dbus/dbus-protocol.h: Move various bus service #defines such
as DBUS_SERVICE_DBUS and DBUS_NAME_FLAG_PROHIBIT_REPLACEMENT to
dbus/dbus-shared.h.
* dbus/dbus-shared.h: Various defines moved here.
* dbus/dbus-marshall-header.c: Include dbus-shared.h.
```

2005-05-25 John (J5) Palmieri <johnp@redhat.com>

```
* python/__init__.py: Python bindings deserve a minor version
update. Upped to (0, 40, 2)
```

2005-05-24 John (J5) Palmieri <johnp@redhat.com>

```
* python/decorators.py: add explicitly_pass_message decorator
for passing in the dbus message as keyword for edge case signal
handling

* python/matchrules.py (SignalMatchRule.__repr__): fix output
to conform with what dbus expects for match rules
(SignalMatchRule.execute): add the dbus message as a keyword
if the signal handler has requested it

* python/examples/example/signal-recipient.py: added some more
examples on how to hook up to signals
```

2005-05-23 John (J5) Palmieri <johnp@redhat.com>

```
* python/decorators.py: import dbus_bindings

* python/matchrules.py (SignalMatchRule, SignalMatchTree,
SignalMatchNode): new classes that implement wildcard signal
callback matching using a tree lookup. Heavily modified from a
patch sent by Celso Pinto (fd.o bug #3241)

* _dbus.py (add_signal_receiver, remove_signal_receiver,
_signal_func):
  use new match classes to handle signals.
```

2005-05-19 John (J5) Palmieri <johnp@redhat.com>

* python/dbus_bindings.pyx.in: s/TYPE_PATH/TYPE_OBJECT_PATH

2005-05-18 Havoc Pennington <hp@redhat.com>

* configure.in: use GLIB_GNU_GETTEXT to get INTLLIBS and require gettext. Not really worth requiring yet perhaps, but any production quality 1.0 would require it so we should go ahead and get things set up. We do have a couple token calls to bindtextdomain in the code already.

2005-05-16 John (J5) Palmieri <johnp@redhat.com>

* glib/dbus-gmain.c (io_handler_dispatch): fix deadlock when using recursive g_main_loops

* python/_dbus.py (class Bus): add the ProxyObjectClass alias for ProxyObject to make it easier for the Twisted networking framework to integrate dbus.

* python/proxies.py (class ProxyObject): add the ProxyMethodClass alias for ProxyMethod to make it easier for the Twisted networking framework to integrate dbus.

2005-05-11 Ross Burton <ross@openedhand.com>

* glib/dbus-glib-tool.c: Add --prefix argument.
* glib/dbus-binding-tool-glib.h: Add prefix argument.
* glib/dbus-binding-tool-glib.c (compute_marshall_name): Add prefix argument.
(generate_glue): Pass prefix argument down.
(dbus_binding_tool_output_glib_server): Pass prefix to glib-genmarshal.

2005-05-11 Colin Walters <walters@verbum.org>

* tools/dbus-send.c (append_array): New function.
(append_arg): Broken out from main.
(main): Add cheesy hack to send arrays and variants.
(usage): Update.
* tools/dbus-print-message.c (print_iter): Broken out from main.

2005-05-11 Colin Walters <walters@verbum.org>

* dbus/dbus-signature.c (dbus_signature_iter_get_signature): New function, returns signature string for signature iter.
* dbus/dbus-signature.h: Prototype it.
* dbus/dbus-message.c (dbus_message_iter_get_signature): New function, returns signature string for message iter.
(dbus_message_iter_get_array_len): New function, returns length of array.
(dbus_message_iter_get_fixed_array): Fix assertion; this

function should be used when the iter is pointing to the contents of an array

- * dbus/dbus-message.h: Prototypes.
- * dbus/dbus-marshal-recursive.c

(`_dbus_type_reader_get_array_length`):
New function; returns length of an array.

- * dbus/dbus-marshal-recursive.h: Prototype it.

2005-05-11 Colin Walters <walters@verbum.org>

- * dbus/dbus-sysdeps-util.c <!HAVE_POSIX_GETPWNAM_R>: Fix compilation error.

2005-05-08 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-sysdeps-util.c (`_dbus_become_daemon`): write the daemon's pid, not the parent's pid, to the file descriptor. Reported by Taj Morton.

2005-05-05 Havoc Pennington <hp@redhat.com>

- * configure.in (LT_*): add notes on how the libtool versioning works to save thinking. Increment soname to indicate protocol breakage (though really the library interface hasn't changed I guess)
- * dbus/dbus-transport.c (`_dbus_transport_get_is_authenticated`): verify the GUID received from server matches what we were expecting, if we had an expectation
- * dbus/dbus-auth.c (`send_ok`): send GUID along with the OK command
(`_dbus_auth_get_guid_from_server`): new function
(`send_begin`): parse the OK args
- * doc/dbus-specification.xml: add GUID to the auth protocol

2005-05-05 John (J5) Palmieri <johnp@redhat.com>

- * Fix my name in previous changelog ;)
- * python/proxies.py (`ProxyObject.__getattr__`): add further patch from Anthony Baxter to throw an `AttributeError` when python `__special__` functions are called instead of marshling them over the bus (Bug#1685 comment 3).

2005-05-04 John (J5) Palmieri <johnp@redhat.com>

- * python/Makefile.am: changed to use `pyexecdir` for the binding shared libraries (Bug#2494)
- * python/exceptions.py: bring exceptions over from the bindings so they can be used in applications (Bug#2036)

Make all exceptions derive from DBusException

* python/_dbus.py, python/proxies.py: implement __repr__ in a couple of classes so that print obj doesn't throw an exception (Bug #1685)

2005-05-03 Ross Burton <ross@openedhand.com>

* glib/dbus-gobject.c (dbus_g_connection_register_g_object): Return if we get an error during registration. Set up a weak reference on object to unregister if object is destroyed. (unregister_gobject): New function.

2005-05-01 John (J5) Palmieri <johnp@redhat.com>

* python/dbus_bindings.pyx.in:
- added new type classes for hinting to the marshaller what type to send over the wire
- added int16 and uint16 marshalers
- Fixed a bug in the type constants that caused int32 to go out as uint16 over the wire
* python/dbus.py: split up into different files and renamed _dbus.py
* python/__init__.py, python/_util.py, python/decorators.py, python/exceptions.py, python/proxies.py, python/services.py, python/types.py: new files split off from dbus.py
* python/Makefile.am: Add new files, remove dbus.py and install all python files to <python module dir>/dbus
* python/examples/*: Added #!/usr/bin/env python to the top of every example. Patch provided by Tatavarty Kalyan

2005-04-25 John (J5) Palmieri <johnp@redhat.com>

* NEWS: Update to 0.33

2005-04-25 John (J5) Palmieri <johnp@redhat.com>

* python/dbus_bindings.pyx.in (send_with_reply_handlers): New send method for doing async calls
(_pending_call_notification): New C function for handling pending call callbacks
(set_notify): New method for setting pending call notification

* python/dbus.py: new version tuple "version" is set at (0, 40, 0)
Async capabilities added to remote method calls
(Sender): class removed
(RemoteService): class removed
(ObjectTree): class removed for now

(RemoteObject): Renamed to ProxyObject
(RemoteMethod): Renamed to ProxyMethod
(method): Decorator added for decorating python methods as dbus methods
(signal): Decorator added for decorating python methods as signal emitters
(ObjectType): Metaclass added for generating introspection data and the method callback vtable
(Interface): Wrapper class added to wrap objects in a dbus interface
(Object): Uses ObjectType as its metaclass and exports Introspect of the org.freedesktop.DBus.Introspectable interface
(ValidationException, UnknownMethodException): new exceptions

* python/examples/*: Modified to fit with the new bindings

2005-04-23 Havoc Pennington <hp@redhat.com>

* dbus/dbus-message.c (dbus_message_append_args): fix doc comment, reported by Tony Houghton

* test/test-service.c (main): test dbus_connection_get_object_path_data()

* dbus/dbus-object-tree.c (find_handler): be sure we always init the exact_match
(_dbus_object_tree_get_user_data_unlocked): new function used by dbus_connection_get_object_path_data()
(do_register): add assertion test for get_user_data_unlocked
(object_tree_test_iteration): more tests

* dbus/dbus-connection.c (dbus_connection_get_object_path_data): new function from Dan Reed to let you get the user data from dbus_connection_register_object_path()

2005-04-23 John (J5) Palmieri <johnp@redhat.com>

* dbus/dbus-marshall-recursive-util.c: Fixed buffer overflow in numerous places that did not account for the NULL terminator (signature_from_seed): changed the manual string copy loop to just use strcpy instead
make check should now pass

2005-04-19 John (J5) Palmieri <johnp@redhat.com>

* dbus/dbus-marshall-header.c (_dbus_header_create): Fix assert so that it allows messages that are not signals to pass in NULL as the interface.

2005-04-18 David Zeuthen <davidz@redhat.com>

* glib/dbus-gmain.c (io_handler_destroy_source):
(timeout_handler_destroy_source, connection_setup_free):
Also unref the source to avoid memory leaks.

2005-04-13 David Zeuthen <davidz@redhat.com>

* bus/config-parser.c (bus_config_parser_new): Bump this to a
more reasonable, yet still totally arbitrary, value :-).

2005-04-13 David Zeuthen <davidz@redhat.com>

* doc/TODO: Added an "important for 1.0" item about selinux
allow/deny messages

2005-04-13 David Zeuthen <davidz@redhat.com>

* bus/selinux.c: Add c-file-style to top of file
(log_audit_callback): Don't free the data here anymore
(bus_selinux_check): Don't take spid and tpid since appending
that to auxdata may OOM.
(bus_selinux_allows_acquire_service): Handle OOM and signal back
to the caller if we are OOM by taking an error object.
(bus_selinux_allows_send): -do-

* bus/selinux.h: Fix prototypes for
bus_selinux_allows_acquire_service
and bus_selinux_allows_send

* bus/bus.c (bus_context_check_security_policy): Pass error and
pass on OOM thrown by bus_selinux_allows_send()

* bus/services.c (bus_registry_acquire_service): Pass error and
pass on OOM thrown by bus_selinux_allows_acquire_service()

2005-04-13 Havoc Pennington <hp@redhat.com>

* glib/dbus-gmain.c (message_queue_dispatch): only dispatch one
message at a time to avoid monopolizing the main loop, bug
#2953 from Benjamin Otte

2005-04-09 Havoc Pennington <hp@redhat.com>

* dbus/dbus-string.c (copy): change a memcpy to memmove due to
possible overlap, fix from Daniel Reed
(fixup_alignment): fix signedness warnings
(_dbus_string_append_unichar): ditto

2005-04-09 Havoc Pennington <hp@redhat.com>

* dbus/dbus-message-util.c (_dbus_message_test): fix signedness
warning

- * glib/dbus-glib-tool.c (main): fix warning
- * glib/dbus-binding-tool-glib.c (generate_glue): fix warning
- * dbus/dbus-connection.c (dbus_connection_read_write_dispatch): add a new function that can be used in simple applications that don't have a main loop and are willing to block

2005-04-05 David Zeuthen <davidz@redhat.com>

Fix https://bugs.freedesktop.org/show_bug.cgi?id=2889

- * glib/dbus-gmain.c:
 - (io_handler_destroy_source): Remove from list of IO handlers of the ConnectionSetup object
 - (timeout_handler_destroy_source): -do- for timeout handlers
 - (io_handler_source_finalized): Don't remove from list since we now do that in io_handler_destroy_source(). Renamed from io_handler_source_destroyed
 - (timeout_handler_source_destroyed): -do- for timeout handlers
 - (connection_setup_free): It is now safe to iterate over all IO and timeout handlers as the _destroy_source removes them from the list synchronously

2005-03-30 Havoc Pennington <hp@redhat.com>

- * configure.in: change check to gtk 2.4
- * tools/dbus-viewer.c (name_combo_changed_callback): remove gtk_combo_box_get_active_text() usage to decrement GTK requirement to 2.4

2005-03-29 John (J5) Palmieri <johnp@redhat.com>

- * News: Update 0.32
- * HACKING: Fixed realease instructions. configure.in should be updated to the next release by the person who made the last release.

2005-03-29 John (J5) Palmieri <johnp@redhat.com>

- * python/lvalue_cast_post_process.py - removed. Patch has been submitted to Pyrex maintainers that fixes gcc4.0 errors
- * python/Makefile.am: removed references to lvalue_cast_post_process.py

2005-03-24 Daniel Reed <n@ml.org>

* tools/Makefile.am: Make print-introspect and dbus-bus-introspect.xml building conditional on HAVE_GLIB.

2005-03-22 John (J5) Palmieri <johnp@redhat.com>

* tools/Makefile.am: Patch by Colin Walters that fixes distcheck

* dbus/dbus-userdb.c, dbus/dbus-userdb-util.c: Add patch we have had in Red Hat packages for a while but for some reason never got merged upstream

 (_dbus_is_a_number): New checks if a string can be converted to a number and does the conversion if it can

 (_dbus_user_database_lookup): Add check to see if the given username is a udi. This allows udi's to be used instead of usernames in the config file.

 (_dbus_user_database_lookup_group): Add check to see if the given groupname is a gdi. This allows gdi's to be used instead of groupnames in the config file.

2005-03-21 John (J5) Palmieri <johnp@redhat.com>

* python/lvalue_cast_post_process.py - added post processor to fix Pyrex code so that it compiles with gcc4.0

* python/Makefile.am: Added lvalue_cast_post_process.py to EXTRA_DIST

 run dbus_bindings.c through lvalue_cast_post_process.py and copy the results back to dbus_binding.c

2005-03-20 Colin Walters <walters@verbum.org>

Patch suggested by Inguva Rajasekhar <ringuva@novell.com>.

* configure.in: Require GTK+ 2.6.

2005-03-20 Colin Walters <walters@verbum.org>

* Makefile.am (SUBDIRS, DIST_SUBDIRS): Build tools before test.

2005-03-17 Tom Parker <palfrey@tevp.net>

* dbus/dbus-userdb.c (_dbus_user_database_lookup): Don't print DBUS_UID_UNSET; instead print passed username. Also be sure to actually use gid looked up in cache.

* dbus/dbus-userdb-util.c (_dbus_user_database_lookup_group):
Ditto
for DBUS_GID_UNSET and groupname.

2005-03-17 Colin Walters <walters@verbum.org>

- * bus/print-introspect.c: Move to tools/.
- * bus/run-with-tmp-session-bus.sh: Ditto.

- * glib/Makefile.am (dbus-glib-bindings.h): Move generation to tools/Makefile.am.

- * test/glib/run-test.sh: Update to handle move of run-with-tmp-session-bus.sh.

- * test/glib/test-service-glib.c: Update to handle move of dbus-glib-bindings.h.

- * tools/print-introspect.c: Moved here from bus/, and ported to GLib bindings.

- * tools/run-with-tmp-session-bus.sh: Moved here from bus/.

- * tools/Makefile.am: Generate dbus-glib-bindings.h and dbus-bus-introspect.xml here.

- * tools/.cvsignore, glib/.cvsignore, bus/.cvsignore: Update.

2005-03-17 Colin Walters <walters@verbum.org>

- * bus/driver.c (write_args_for_direction): Use _dbus_string_get_const_data to retrieve string; _dbus_string_get_const_data_len doesn't actually return a NULL-terminated substring.

- * test/glib/test-service-glib.c: Include dbus-glib-bindings.h. (main): Change to use org_freedesktop_DBus_request_name instead of using g_proxy_begin_call/end_call.

2005-03-15 Joe Shaw <joeshaw@novell.com>

- * mono/ProxyBuilder.cs (BuildFinalizer): Fix some invalid IL when generating the finalizer. Fixes from Ben Maurer.

2005-03-12 Joe Shaw <joeshaw@novell.com>

- * mono/BusDriver.cs: Update method names: ListServices becomes ListNames; GetOwner becomes GetNameOwner.

- * mono/ProxyBuilder.cs (BuildFinalizer): Need to load arg 0

onto the eval stack when removing the delegate.

2005-03-12 Joe Shaw <joeshaw@novell.com>

* mono/dbus-sharp.dll.config.in: Don't hardcode 0 for LT_CURRENT. Set it to the autoconf variable.

* mono/ProxyBuilder.cs: Add a finalizer to the generated proxy classes that disconnects the signal handler delegate from the service object. Fixes a big leak of proxy objects on the client side of things. Patch from Ben Maurer <bmaurer@ximian.com>

2005-03-12 Colin Walters <walters@verbum.org>

* bus/driver.c (write_args_for_direction): New function, parses a type signature into arguments and outputs to XML.

(bus_driver_handle_introspect): Use it instead of hardcoding XML for certain signatures.

* bus/Makefile.am (dbus-bus-introspect.xml): Add dependency on dbus-daemon.

* glib/dbus-glib-tool.c (main): Parse ignore_unsupported argument, pass it to dbus_binding_tool_output_glib_client.

* glib/dbus-binding-tool-glib.c
(generate_client_glue): Protect against multiple inclusion.
(dbus_binding_tool_output_glib_client): Add G_BEGIN_DECLS/G_END_DECLS.

* glib/dbus-binding-tool-glib.c (compute_client_method_name): Change to just take iface prefix directly.
(write_formal_parameters): Clarify error message.
(check_supported_parameters): New function; checks to see type signatures of method parameters are supported.
(generate_client_glue): Handle ignore_unsupported flag.
(dbus_binding_tool_output_glib_client): Handle ignore_unsupported parameter.

* glib/Makefile.am (dbus-glib-bindings.h): Pass --ignore-unsupported by default until glib bindings support arrays.

2005-03-11 Colin Walters <walters@verbum.org>

* glib/Makefile.am: Generate dbus-glib-bindings.h and install it.

* bus/print-introspect.c: New file; prints introspection data for a given name and object path.

- * bus/run-with-tmp-session-bus.sh: New file, refactored from test/glib/run-test.sh. Creates a temporary session bus and runs another program.
- * test/glib/run-test.sh: Refactor to invoke run-with-tmp-session-bus.sh.
- * bus/driver.c (bus_driver_handle_introspect): Fix to print new introspection format. Also change to use DBUS_TYPE_x_AS_STRING macros instead of hardcoding.
- * glib/.cvsignore, bus/.cvsignore, test/glib/.cvsignore: Update.

2005-03-11 Joe Shaw <joeshaw@novell.com>

- * dbus/dbus-connection.c (dbus_connection_send_with_reply):
Remove
this unref; it doesn't match up evenly in some codepaths.
(_dbus_connection_block_pending_call): Unref at every exitpoint;
this evenly matches with the ref near the top of this function.

2005-03-09 Joe Shaw <joeshaw@novell.com>

- * dbus/dbus-object-tree.c
(_dbus_object_tree_unregister_and_unlock): If checks are enabled and we try to unregister a path that's not registered, still go through the process of unlocking and don't just return.

2005-03-09 Colin Walters <walters@verbum.org>

- * glib/dbus-gproxy.c (dbus_g_proxy_invoke): New method; calls to this are generated for client-side wrappers. Invokes a D-BUS method and returns reply values.
- * glib/dbus-binding-tool-glib.c (write_args_sig_for_direction):
New
function; writes signature string for argument direction.
(write_args_for_direction): Change to pass input values directly instead of via address, and fix indentation.
(generate_client_glue): Change to invoke dbus_g_proxy_invoke.
- Also
make generated wrappers inlineable.
- * dbus/dbus-message.c (dbus_message_iter_get_fixed_array): Add note about using dbus_type_is_fixed.
- * dbus/dbus-marshal-basic.c (_dbus_type_is_fixed): Moved to dbus/dbus-signature.c as dbus_type_is_fixed.

All callers updated.

* dbus/dbus-signature.c (dbus_type_is_fixed): Moved here from dbus/dbus-marshal-basic.c:_dbus_type_is_fixed.

* dbus/dbus-signature.h: Prototype.

* glib/dbus-binding-tool-glib.c (compute_marshall_name): Fix error printf code.

* test/glib/test-dbus-glib.c (main): Be sure to clear error as appropriate instead of just freeing it.
(main): Free returned strings using g_free.

* test/glib/Makefile.am (test-service-glib-glue.h)
(test-service-glib-bindings.h): Add dependency on dbus-binding-tool.

* glib/dbus-gvalue.c (MAP_BASIC): Refactored from MAP_BASIC_INIT; simply maps a simple D-BUS type to GType.
(dbus_dbus_type_to_gtype): Function which maps D-BUS type to GType.
(dbus_gvalue_init): Just invoke dbus_dbus_type_to_gtype and initialize the value with it.
(dbus_gvalue_binding_type_from_type): Unused, delete.
(dbus_gvalue_demarshal): Switch to hardcoding demarshalling for various types instead of unmarshalling to value data directly. Remove can_convert boolean.
(dbus_gvalue_marshal): Remove duplicate initialization; switch to returning directly instead of using can_convert boolean.
(dbus_gvalue_store): New function; not related to D-BUS per-se. Stores a GValue in a pointer to a value of its corresponding C type.

* glib/dbus-gvalue.h: Remove dbus_gvalue_binding_type_from_type, add dbus_gvalue_store.

2005-03-08 Joe Shaw <joeshaw@novell.com>

Fix a bunch of lifecycle and memory management problems in the mono bindings.

* mono/Arguments.cs (Arguments): Implement IDisposable

* mono/Bus.cs (Bus): Don't allow public instantiation. This is strictly a static class.

* mono/Connection.cs: Move the DBusObjectPathVTable and associated delegates into this file.
(Connection): Implement IDisposable.
(Dispose): Disconnect the connection and set the raw connection pointer to IntPtr.Zero.
(~Connection): Call Dispose().

(RegisterObjectPath): Added. Manages the registration of object paths so we can cleanly disconnect them at dispose/finalize time.
(UnregisterObjectPath): Ditto.
(set_RawConnection): Unregister all of the object paths when changing the underlying DBusConnection. Add them back onto the new connection, if any.

* mono/Handler.cs: Don't implement IDisposable; it doesn't use any more unmanaged resources anymore, so it's not necessary. Move all the DBusObjectPathVTable stuff out of here.
(Handler): Save references to our delegates so that they don't get finalized. Call Connection.RegisterObjectPath() instead of dbus_connection_register_object_path() directly.
(Message_Called): Dispose the message after we're finished with it.

* mono/Message.cs (Message): Implement IDisposable.
(Dispose): Dispose the Arguments, and set the RawMessage to IntPtr.Zero.
(SendWithReplyAndBlock): We own the ref to the reply that comes back from dbus_connection_send_with_reply_and_block() so add a comment about that and unref it after we've constructed a managed MethodReturn class around it. Fixes a big, big leak.

* mono/ProxyBuilder.cs: Reflect into Message to get the Dispose method.
(BuildSignalHandler): After we've sent the Signal message, dispose of it.
(BuildMethod): Dispose of the method call and reply messages after we've sent the message and extracted the data we want from the reply.

* mono/Service.cs (UnregisterObject): Don't call handler.Dispose() anymore.
(Service_FilterCalled): Dispose of the message after we're finished with it.

2005-03-08 Joe Shaw <joeshaw@novell.com>

* dbus/dbus-connection.c (dbus_connection_send_with_reply): After we attach our pending call to the connection, unref it. Fixes a leak.

* mono/Connection.cs (set_RawConnection): Disconnect our filter and match callbacks from the old connection and reconnect them to the new connection, if any.

* mono/DBusType/Array.cs: "Code" is a static member, so don't use "this" to refer to it. Fix for stricter checking in Mono 1.1.4.

* mono/DBusType/ObjectPath.cs (Append): Don't leak the object path that we pass into unmanaged code.

* mono/DBusType/String.cs (Append): Don't leak the string that we pass into unmanaged code.

2005-03-07 John (J5) Palmieri <johnp@redhat.com>

* NEWS: Update for 0.31

* configure.in: Release 0.31
add LT_CURRENT, LT_REVISION, LT_AGE for easy soname bumping

* qt/Makefile.am: fixed build

* dbus/Makefile.am: soname bump for libdbus

* glib/Makefile.am: soname bump for libdbus-glib

2005-03-05 Havoc Pennington <hp@redhat.com>

* dbus/dbus-sysdeps.c:
(pseudorandom_generate_random_bytes_buffer): fix to have no
return
value

(_dbus_generate_random_bytes_buffer): fix return value

* dbus/dbus-sysdeps-util.c: s/GETPWNNAME/GETPWNAM/ so configure
checks actually work, from Tom Parker <fdo@tevp.net>

2005-03-01 Colin Walters <walters@verbum.org>

* test/glib/test-dbus-glib.c (lose, lose_gerror): Utility
functions copied from dbus-glib-tool.c.
(main): Convert lots of error code to use them.
Also add some testing for introspection bits.

2005-03-01 Colin Walters <walters@verbum.org>

* doc/TODO: Remove introspection signature TODO.

2005-02-27 Colin Walters <walters@verbum.org>

* glib/dbus-gidl.c (property_info_get_type, arg_info_get_type):
Change return value to const char * instead of int so we can do
full signatures.

(struct PropertyInfo, struct ArgInfo): Store char *.

(property_info_new, arg_info_new): Update parameters, strdup.

(property_info_unref, arg_info_unref): Free.

- * glib/dbus-gidl.h: Update prototypes.
- * glib/dbus-gparser.c (basic_type_from_string): Delete.
(validate_signature): New function, just validates signature and sets GError.
(parse_property, parse_arg): Invoke validate_signature. Store signature instead of just type code.
- * glib/dbus-gvalue.c (base_type_from_signature): New utility function to return a primary type for a signature, dropping information about types in container types.
(dbus_gvalue_genmarshal_name_from_type)
(dbus_gvalue_binding_type_from_type)
(dbus_gvalue_ctype_from_type): Update to take full signature instead of type code.
(dbus_gtype_to_dbus_type): Moved here from glib/dbus-gobject.c.
- * glib/dbus-gvalue.h: Update prototypes for above.
- * glib/dbus-gobject.c (gtype_to_dbus_type): Moved to glib/dbus-gvalue.c as dbus_gtype_to_dbus_type.
(introspect_properties, introspect_signals, write_interface): Update to handle signatures, and remove usage of _dbus_gutils_type_to_string.
(handle_introspect): Print out type codes instead of e.g. "string"
in hardcoded introspection XML; also use x_AS_STRING constants instead of hardcoding in string.
- * glib/dbus-glib-tool.c (pretty_print): Handle signature change to string. Remove usage of _dbus_gutils_type_to_string.
- * glib/dbus-gutils.c (_dbus_gutils_type_to_string): Delete.
- * glib/dbus-gutils.h (_dbus_gutils_type_to_string): Update for deletion.
- * glib/dbus-binding-tool-glib.c (compute_marshall)
(compute_marshall_name, generate_glue): Handle signature change to string.
(write_formal_parameters, write_args_for_direction): Ditto, and remove FIXME.
- * tools/dbus-tree-view.c (type_to_string): Delete.
(info_set_func_text): Update to print full signatures.
- * test/glib/test-service-glib.xml: Change types to new introspection format.

- * doc/TODO: remove the "guid" item
- * test/glib/test-profile.c (no_bus_thread_func): use open_private
(with_bus_thread_func): use open_private
- * dbus/dbus-connection.c (dbus_connection_open_private): new
function that works like the old dbus_connection_open()
(dbus_connection_open): now returns an existing connection if
possible
- * dbus/dbus-server-unix.c (handle_new_client_fd_and_unlock): pass
through the GUID to the transport
- * dbus/dbus-server.c (_dbus_server_init_base): keep around the
GUID in hex-encoded form.
- * dbus/dbus-server-debug-pipe.c (_dbus_transport_debug_pipe_new):
pass GUID argument in to the transport
- * dbus/dbus-transport-unix.c (_dbus_transport_new_for_fd): add
guid argument
- * dbus/dbus-transport.c (_dbus_transport_init_base): add guid
argument
- * dbus/dbus-auth.c (_dbus_auth_server_new): add guid argument

2005-02-25 Havoc Pennington <hp@redhat.com>

- * doc/dbus-specification.xml: document the GUID thing
- * dbus/dbus-server.c (_dbus_server_init_base): initialize a
globally unique ID for the server, and put a "guid=hexencoded"
field in the address
- * dbus/dbus-bus.c: fix missing #include of dbus-threads-
internal.h
- * dbus/dbus-message.c: ditto
- * dbus/dbus-dataslot.c: ditto
- * dbus/dbus-list.c: ditto
- * dbus/dbus-internals.h: wait, just include
dbus-threads-internal.h here
- * dbus/dbus-string.c (_dbus_string_copy_to_buffer): move back for
use in main library

* dbus/dbus-sysdeps.c (_dbus_generate_random_bytes_buffer): new function

2005-02-24 Colin Walters <walters@verbum.org>

* test/glib/Makefile.am (EXTRA_DIST): Add test-service-glib.xml

2005-02-24 John (J5) Palmieir <johnp@redhat.com>

* glib/Makefile.am: added dbus-gobject.h to sources list so distcheck doesn't fail

2005-02-24 Havoc Pennington <hp@redhat.com>

* dbus/dbus-server.c, dbus/dbus-server-unix.c: change semantics so

you must disconnect before unref, since locking and other things are screwed up otherwise. Fix assorted other locking stuff.

* dbus/dbus-signature.c (dbus_signature_iter_get_element_type): fix compilation

* dbus/dbus-threads-internal.h: move the mutex/condvar wrappers into a private header and don't export from the library

* throughout - call _dbus_thread_stuff vs. dbus_thread_stuff

2005-02-24 Colin Walters <walters@verbum.org>

* dbus/dbus-signature.c: New file; implements various functions related to type signatures. Includes an iterator for parsing, validation functions.

(dbus_type_is_basic): Moved here from dbus-marshal-basic.c:dbus_type_is_basic.

(dbus_type_is_container): Moved here from dbus-marshal-basic.c:_dbus_type_is_container.

All callers of _dbus_type_is_container and _dbus_type_is_basic updated, and include dbus-signature.h.

* dbus/dbus-signature.h: New file; prototypes for the above.

* dbus/Makefile.am (DBUS_LIB_SOURCES): Add dbus-signature.c, dbus-signature.h.

* dbus/dbus-marshal-basic.c (map_type_char_to_type): New utility function factored out of _dbus_first_type_in_signature.

first (_dbus_first_type_in_signature_c_str): New function; returns type code for a type signature character.

- * dbus/dbus-marshall-basic.h: Prototype `_dbus_first_type_in_signature_c_str`, handle function moves.
- * dbus/dbus-marshall-recursive.h: Export `_dbus_type_signature_next`.
- * dbus/dbus-marshall-recursive.c (`_dbus_type_signature_next`): New function; skips to next complete type in type signature. Implemented using previous `skip_one_complete_type`. Now `skip_one_complete_type` just delegates to `_dbus_type_signature_next`.
- * dbus/dbus-marshall-basic.c (`_dbus_type_is_basic`): Moved to `dbus-signature.c`
(`_dbus_type_is_container`): Ditto.
- * doc/dbus-specification.xml: Update introspection sample to use real type signatures.
- * dbus/dbus-test.h: Prototype signature test.
- * dbus/dbus-test.c (`dbus_internal_do_not_use_run_tests`): Run signature tests.
- * dbus/dbus-protocol.h (`DBUS_ERROR_INVALID_SIGNATURE`): New error.

2005-02-23 John (J5) Palmieri <johnp@redhat.com>

- * python/dbus_bindings.pyx.in (`PendingCall::get_reply`):
`s/dbus_pending_call_get_reply/dbus_pending_call_steal_reply`

2005-02-21 Colin Walters <walters@verbum.org>

- * dbus/dbus-test-main.c (`main`): Take optional specific test argument.
- * dbus/dbus-test.c (`run_test`): New function, runs a test function with no data directory.
(`run_data_test`): Like above, but takes data directory.
(`dbus_internal_do_not_use_run_tests`): Take specific test argument. Replace lots of cut n' paste code with `run_test` and `run_data_test`.
- * dbus/dbus-test.h: Update prototype for `dbus_internal_do_not_use_run_tests`.

2005-02-20 Havoc Pennington <hp@redhat.com>

Fix bugs reported by Daniel P. Berrange

- * dbus/dbus-server.c (`_dbus_server_unref_unlocked`): new function

(protected_change_watch): new function
(_dbus_server_toggle_watch, _dbus_server_remove_watch)
(_dbus_server_add_watch): change to work like the
dbus-connection.c equivalents; like those, probably kind of
busted, but should at least mostly work for now
(dbus_server_disconnect): drop the lock if we were already
disconnected, patch from Daniel P. Berrange

* dbus/dbus-server.c (_dbus_server_toggle_timeout)
(_dbus_server_remove_timeout, _dbus_server_add_timeout): all the
same stuff

* doc/TODO: todo about unscrewing this mess

2005-02-19 Colin Walters <walters@verbum.org>

* glib/dbus-binding-tool-glib.c
(dbus_binding_tool_output_glib_server): Fix iochannel
refcounting.

* glib/dbus-glib-tool.c: Include dbus-glib-tool.h, as well
as errno.h and sys/stat.h.
(lose): New function, prints error with
newline and exits.
(lose_gerror): Similar, but takes GError for message.
(main): Add --output argument to specify output file to write to,
instead of always printing to stdout. In this mode, determine
timestamps on source files to see whether any are newer than the
target file. If not, exit. Also convert a number of error
messages to use lose (since it's shorter), and switch to using
g_io_channel_shutdown.

2005-02-19 Havoc Pennington <hp@redhat.com>

* glib/dbus-gobject.c
(_dbus_glib_marshal_dbus_message_to_gvalue_array): add docs

* glib/dbus-glib.c: fix doxygen warnings

* glib/dbus-gparser.c (parse_annotation): error if an annotation
is found on an <arg>

2005-02-17 Colin Walters <walters@verbum.org>

* glib/dbus-gobject.h: Don't export
_dbus_glib_marshal_dbus_message_to_gvalue_array.

* glib/dbus-gobject.c
(_dbus_glib_marshal_dbus_message_to_gvalue_array): Do rename.
(invoke_object_method): Handle it.

* glib/dbus-gproxy.c (marshal_dbus_message_to_g_marshaller):

Handle rename.

2005-02-17 Colin Walters <walters@verbum.org>

- * bus/.cvsignore, doc/.cvsignore
- * test/data/valid-service-files/.cvsignore, test/glib/.cvsignore: Update.

2005-02-17 Colin Walters <walters@verbum.org>

- * dbus/dbus-protocol.h (DBUS_SERVICE_ORG_FREEDESKTOP_DBUS): Rename to DBUS_SERVICE_DBUS.
- (DBUS_PATH_ORG_FREEDESKTOP_DBUS): Rename to DBUS_PATH_DBUS.
- (DBUS_PATH_ORG_FREEDESKTOP_LOCAL): Rename to DBUS_PATH_LOCAL. Change the value from "org.freedesktop.Local" to "org.freedesktop.DBus.Local".
- (DBUS_INTERFACE_ORG_FREEDESKTOP_DBUS): Rename to DBUS_INTERFACE_DBUS.
- (DBUS_INTERFACE_ORG_FREEDESKTOP_INTROSPECTABLE): Rename to DBUS_INTERFACE_INTROSPECTABLE. Change the value from "org.freedesktop.Introspectable" to "org.freedesktop.DBus.Introspectable".
- (DBUS_INTERFACE_ORG_FREEDESKTOP_PROPERTIES): Rename to DBUS_INTERFACE_PROPERTIES. Change the value from "org.freedesktop.Properties" to "org.freedesktop.DBus.Properties".
- (DBUS_INTERFACE_ORG_FREEDESKTOP_PEER): Rename to DBUS_INTERFACE_PEER. Change the value from "org.freedesktop.Peer" to "org.freedesktop.DBus.Peer".
- (DBUS_INTERFACE_ORG_FREEDESKTOP_LOCAL): DBUS_INTERFACE_LOCAL. Change the value from "org.freedesktop.Local" to "org.freedesktop.DBus.Local".

All other users of those constants have been changed.

- * bus/driver.c (bus_driver_handle_introspect): Use constants.
- * glib/dbus-gobject.c (handle_introspect): Use constants.
- * doc/dbus-faq.xml, doc/dbus-specification.xml: Update for rename.

2005-02-17 Colin Walters <walters@verbum.org>

- * glib/dbus-gparser.c (struct Parser): Add in_annotation boolean. (parse_node, parse_interface, parse_method, parse_signal) (parse_property, parse_annotation): Lose if we're currently in an annotation.
- (parse_annotation): New function.
- (parser_start_element, parser_end_element): Handle annotation.

(parse_method, parse_interface): Remove support for c_name attribute, switch to annotations.

* glib/dbus-gidl.h (interface_info_get_binding_names) (method_info_get_binding_names) (interface_info_get_binding_name, method_info_get_binding_name) (interface_info_set_binding_name, method_info_set_binding_name): Remove. (interface_info_get_annotations, method_info_get_annotations) (interface_info_get_annotation, method_info_get_annotation) (interface_info_add_annotation, method_info_add_annotation): Prototype.

* glib/dbus-gidl.c (struct InterfaceInfo): Substitute "annotations" for "bindings". (struct MethodInfo): Ditto. Straightfoward conversion of binding methods into annotation methods as prototyped.

* glib/dbus-glib-tool.c (pretty_print): Print annotations.

* glib/dbus-binding-tool-glib.h (DBUS_GLIB_ANNOTATION_C_SYMBOL): Define.

* glib/dbus-binding-tool-glib.c (gather_marshallers, generate_glue): Use new annotation API.

* doc/introspect.dtd: Fix a number of DTD syntax errors. Add annotation element.

* doc/dbus-specification.xml: Discuss introspection annotations, include list of well-known annotations.

* test/glib/test-service-glib.xml: Make validate against new DTD.

2005-02-17 Colin Walters <walters@verbum.org>

This patch is based on initial work from Paul Kuliniewicz <kuliniew@purdue.edu>.

* glib/dbus-gvalue.c (dbus_gvalue_init): New function; move initialization of GValue from dbus type to here. (dbus_gvalue_genmarshal_name_from_type): New function; generates a string for the "glib-genmarshal" program from a DBus type. (dbus_gvalue_binding_type_from_type): New function; turns a DBus type into the C name for it we use in the glib bindings.

(dbus_gvalue_ctype_from_type): New function; maps a Dbus type into a glib C type (not GValue).
(dbus_gvalue_demarshal): invoke dbus_gvalue_init.

* glib/dbus-gutils.c (_dbus_gutils_wincaps_to_uscore): Moved here from dbus-gobject.c.

* glib/dbus-gutils.h: Prototype it.

* glib/dbus-gproxy.c: Include new dbus-gobject.h.
(marshal_dbus_message_to_g_marshaller): Use new shared function dbus_glib_marshal_dbus_message_to_gvalue_array.

* glib/dbus-gparser.c (parse_interface, parse_method): Handle c_name attribute.
Will be changed once we have annotations.

* glib/dbus-gobject.c: Change info_hash_mutex from GStaticMutex to GStaticRWLock. Callers updated.
(wincaps_to_uscore): Move to dbus-gutils.c. Callers updated.
(string_table_next): New function for iterating over zero-terminated string value array.
(string_table_lookup): New function; retrieves specific entry in array.
(get_method_data): New function; look up method data in object data chunk.
(object_error_domain_prefix_from_object_info)
(object_error_code_from_object_info): New functions, but not implemented yet.
(method_interface_from_object_info): New function; retrieve interface name.
(method_name_from_object_info): New function; retrieve method name.
(method_arg_info_from_object_info): New function; retrieve argument data.
(arg_iterate): New function; iterates over serialized argument data.
(method_dir_signature_from_object_info): New function; returns a GString holding type signature for arguments for just one direction (input or output).
(method_input_signature_from_object_info)
(method_output_signature_from_object_info): New functions.
(dbus_glib_marshal_dbus_message_to_gvalue_array): New shared function;
converts dbus message arguments into a GValue array. Used for both signal handling and method invocation.
(struct DbusGlibWriteInterfaceData): New utility structure.
(write_interface): New function; generate introspection XML for

```

    an interface.
    (introspect_interfaces): New function; gathers all interface-
>methods,
    generates introspection XML for them.
    (handle_introspect): Invoke introspect_interfaces.
    (get_object_property): Be sure to zero-initialize stack-allocated
GValue.
    (lookup_object_and_method): New function; examines an incoming
message
    and attempts to match it up (via interface, method name, and
argument
    signature) with a known object and method.
    (gerror_domaincode_to_dbus_error_name): New function; converts a
GError domain and code into a DBus error name. Needs GError data
added to object introspection to work well.
    (gerror_to_dbus_error_message): Creates a DBusMessage error
return from
    GError.
    (invoke_object_method): New function to invoke an object method
looked up via lookup_object_and_method. Parses the incoming
message, turns it into a GValue array, then invokes the
marshaller
    specified in the DBusGMethodInfo. Creates a new message with
either return values or error message as appropriate.
    (gobject_message_function): Invoke lookup_object_and_method and
invoke_object_method.

* glib/dbus-glib-tool.c: Include dbus-binding-tool-glib.h.
(enum DBusBindingOutputMode): New enum for binding output modes.
(pretty_print): Print binding names.
(dbus_binding_tool_error_quark): GError bits.
(version): Fix typo.
(main): Create GIOChannel for output. Parse new --mode argument,
possible values are "pretty-print", "glib-server", "glib-client".
Use mode to invoke appropriate function.

* glib/dbus-gobject.h: Prototype
dbus_glib_marshal_dbus_message_to_gvalue_array.

* glib/dbus-glib-tool.h: New header, just includes GError bits
for now.

* glib/dbus-gidl.c (struct InterfaceInfo): Add bindings
hashtable;
    maps binding style to name.
    (struct MethodInfo): Ditto.
    (get_hash_keys, get_hash_key): Utility function, returns keys for
a GHashTable.
    (interface_info_new, method_info_new): Initialize bindings.
    (interface_info_unref, method_info_unref): Destroy bindings.
    (method_info_get_binding_names, method_info_get_binding_name)

```

```
(interface_info_get_binding_names,  
interface_info_get_binding_name):  
    Functions for retrieving binding names.  
(method_info_set_binding_name, interface_info_set_binding_name):  
    Functions for setting binding names.  
  
* glib/dbus-binding-tool-glib.h: New file, has prototypes  
for glib binding generation.  
  
* glib/dbus-binding-tool-glib.c: New file, implements server-side  
and client-side glib glue generation.  
  
* glib/Makefile.am (dbus_binding_tool_SOURCES): Add  
dbus-binding-tool-glib.c, dbus-binding-tool-glib.h,  
dbus-glib-tool.h.  
  
* dbus/dbus-glib.h (struct DBusGMethodMarshaller): Remove in  
favor  
of using GClosureMarshal directly.  
(struct DBusGObjectInfo): Add n_infos member.  
  
* test/glib/test-service-glib.xml: New file; contains  
introspection data  
for MyTestObject used in test-service-glib.c.  
  
* test/glib/test-service-glib.c (enum MyObjectError): New GError  
enum.  
(my_object_do_nothing, my_object_increment,  
my_object_throw_error)  
(my_object_uppercase, my_object_many_args): New test methods.  
(main): Use dbus_g_object_class_install_info to include generated  
object  
info.  
  
* test/glib/Makefile.am: Generate server-side glue for test-  
service-glib.c,  
as well as client-side bindings.  
  
* test/glib/test-dbus-glib.c: Include test-service-glib-  
bindings.h.  
(main): Activate TestSuiteGLibService; test invoke a bunch of its  
methods  
using both the dbus_gproxy stuff directly as well as the  
generated bindings.
```

2005-02-15 Havoc Pennington <hp@redhat.com>

```
* dbus/dbus-connection.c (dbus_connection_dispatch): always  
complete a pending call, don't run filters first.  
  
* glib/dbus-gproxy.c (dbus_g_proxy_end_call): change to use  
dbus_pending_call_steal_reply
```

* dbus/dbus-pending-call.c (dbus_pending_call_block): just call
_dbus_connection_block_pending_call
(dbus_pending_call_get_reply): change to steal_reply and return a
ref

* dbus/dbus-connection.c
(dbus_connection_send_with_reply_and_block): port to work in
terms
of DbusPendingCall
(_dbus_connection_block_pending_call): replace block_for_reply
with this

2005-02-14 Havoc Pennington <hp@redhat.com>

* dbus/dbus-userdb-util.c (_dbus_user_database_lookup_group):
properly handle looking up group information by name; fix
from j@bootlab.org

2005-02-13 Havoc Pennington <hp@redhat.com>

* dbus/dbus-connection.c (dbus_connection_return_message)
(dbus_connection_borrow_message): hold dispatch lock while
message
is outstanding
(_dbus_connection_block_for_reply): hold dispatch lock while we
block for the reply, so nobody steals our reply
(dbus_connection_pop_message): hold the dispatch lock while we
pluck the message

2005-02-13 Havoc Pennington <hp@redhat.com>

* dbus/dbus-connection.c (_dbus_connection_acquire_dispatch)
(_dbus_connection_release_dispatch)
(_dbus_connection_acquire_io_path)
(_dbus_connection_release_io_path): make the mutex and condvar
control access to the "acquired" flag. Drop the connection lock
while waiting on the condvar. Hopefully these are baby steps in
roughly the right direction.

2005-02-13 Havoc Pennington <hp@redhat.com>

* dbus/dbus-connection.c: use separate mutexes for the condition
variables; this is some kind of baseline for sanity, but the
condition variables still aren't used correctly afaict

2005-02-13 Havoc Pennington <hp@redhat.com>

* dbus/dbus-object-tree.c (handle_default_introspect_and_unlock):
fix a double-unlock

* dbus/dbus-connection.c

(`_dbus_connection_detach_pending_call_unlocked`): add this

Initial semi-correct pass through to fix thread locking; there are

still some issues with the condition variable paths I'm pretty sure

* `dbus/dbus-server.c`: add a mutex on `DBusServer` and appropriate lock/unlock calls

* `dbus/dbus-connection.c`

(`_dbus_connection_do_iteration_unlocked`):

rename to add `_unlocked`

(`struct DBusConnection`): move "`dispatch_acquired`" and "`io_path_acquired`" to use only one bit each.

(`CONNECTION_LOCK`, `CONNECTION_UNLOCK`): add checks with

`!DBUS_DISABLE_CHECKS`

(`dbus_connection_set_watch_functions`): hacky fix to reentrancy

(`_dbus_connection_add_watch`, `_dbus_connection_remove_watch`)

(`_dbus_connection_toggle_watch`, `_dbus_connection_add_timeout`)

(`_dbus_connection_remove_timeout`)

(`_dbus_connection_toggle_timeout`): drop lock when calling out to user functions; done in a hacky/bad way.

(`_dbus_connection_send_and_unlock`): add a missing unlock

(`_dbus_connection_block_for_reply`): add a missing unlock

* `dbus/dbus-transport.c` (`_dbus_transport_get_is_authenticated`): drop lock in a hacky probably unsafe way to call out to user function

2005-02-12 Havoc Pennington <hp@redhat.com>

* `tools/dbus-tree-view.c` (`info_set_func_text`): display more details on args

* `bus/driver.c` (`bus_driver_handle_list_services`): list the bus driver

* `glib/dbus-gparser.c` (`parse_arg`): generate an arg name if none is supplied

* `glib/dbus-gidl.c` (`signal_info_get_n_args`): new function

(`method_info_get_n_args`): new function

2005-02-12 Havoc Pennington <hp@redhat.com>

* `bus/driver.c` (`bus_driver_handle_introspect`): add introspection for bus driver

2005-02-12 Havoc Pennington <hp@redhat.com>

* bus/driver.c: put the signature of each bus driver method in the table of handlers and check it on incoming calls; this isn't really useful, but going to add introspect support in a minute.

2005-02-11 Joe Shaw <joeshaw@novell.com>

* mono/Connection.cs: The unpredictability of finalizers in mono prevents us from deterministically disconnecting the filters from the Service class's finalizer, so move tracking of filters and matches here. Add API for that.

* mono/Service.cs: Remove the code, add code which calls the methods now on the Connection class.

2005-02-11 John (J5) Palmieri <johnp@redhat.com>

* python/dbus.py (class Sender): added to support dbus signals better
(Bus::add_signal_receiver): added expand_args parameter which defaults to True. When expand args is True the signal handler will pass the message arguments as parameters to the signal handler. If False revert to previous behavior where the signal handler must get the argument list from the message. This is to help port applications like HAL that have a tendency to send variable length argument lists.
self._match_rule_to_receivers is now a dict of dicts.
(Bus::remove_signal_receiver): pop handler off the dict instead of removing it from a list
(Bus::signal_func): change signal handlers so that interface, signal_name, service, path and message are packed into a Sender object and that is passed to the handler. If expand_args is True extract the args list from the message and append it to the parameter list

* python/dbus_bindings.pyx.in (class Signature): added to support signature types
(MessageIter::__init__): changed iteration limit to match D-BUS
(MessageIter::get*): added INT16, UINT16, SIGNATURE, DICT_ENTRY, STRUCT and VARIANT type support
(MessageIter::python_value_to_dbus_sig): made recursive to support recursive types
(MessageIter::append*): added Signature, dict, tuple support

* python/examples/example-client.py: added examples of getting tuples

and dicts

- * python/examples/example-service.py: added examples of sending tuples and dicts
- * python/examples/example-signal-recipient.py: Fixed to handle new signal callback format

2005-02-10 Havoc Pennington <hp@redhat.com>

- * test/glib/test-dbus-glib.c (main): fix so this test doesn't fail (call dbus_g_proxy_add_signal)
- * dbus/dbus-server-unix.c (_dbus_server_new_for_tcp_socket): escape the hostname (_dbus_server_new_for_domain_socket): escape the path
- * dbus/dbus-address.c (dbus_address_escape_value): new (dbus_address_unescape_value): new (dbus_parse_address): unescape values
- * dbus/dbus-string.c (_dbus_string_append_byte_as_hex): new function
- * doc/dbus-specification.xml: explain how to escape values in addresses

2005-02-10 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-message-factory.c (generate_special): modify test to avoid using a non-basic dict key
- * dbus/dbus-marshal-validate-util.c: add test for the below
- * doc/dbus-specification.xml: require that dict keys are a basic type
- * dbus/dbus-marshal-validate.c (_dbus_validate_signature_with_reason): require that dict key is a basic type

2005-02-10 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-object-tree.c (handle_default_introspect_and_unlock): change to be _and_unlock instead of _unlocked
- * dbus/dbus-connection.c

(`_dbus_connection_send_preallocated_unlocked_no_update`): rename to have `no_update` so we can find this bug quickly in future

2005-02-10 Havoc Pennington <hp@redhat.com>

* `dbus/dbus-message-util.c` (`verify_test_message`): tests for string array

* `dbus/dbus-message.c` (`dbus_message_append_args_valist`): add support for arrays of string/signature/path

2005-02-10 Joe Shaw <joeshaw@novell.com>

* `dbus/dbus-connection.c`
(`_dbus_connection_queue_received_message_link`, `_dbus_connection_message_sent`): Add the path to the verbose output.
(`_dbus_connection_send_preallocated_and_unlock`): Added. Calls `_dbus_connection_send_preallocated_unlocked()`, updated the dispatch status, and unlocks. Fixes a bug where certain situations (like a broken pipe) could cause a Disconnect message to not be sent, tricking the bus into thinking a service was still there when the process had quit.
(`_dbus_connection_send_preallocated`): Call `_dbus_connection_send_preallocated_and_unlock()`.
(`_dbus_connection_send_and_unlock`): Added. Calls `_dbus_connection_send_preallocated_and_unlock()`.
(`dbus_connection_send`): Call `_dbus_connection_send_and_unlock()`.
(`dbus_connection_send_with_reply`): Update the dispatch status and unlock.

* `mono/Service.cs` (`~Service`): Added. Removes the filter so that we don't get unmanaged code calling back into a GCed delegate.
(`RemoveFilter`); Added.

2005-02-09 John (J5) Palmieri <johnp@redhat.com>

* `dbus/dbus-message.c` (`dbus_message_iter_open_container`):
- Removed check for iterator type being an array because `get_arg_type` does not work with writer iterators
- Pass NULL to `_dbus_type_writer_recurse` if signature is NULL

2005-02-07 Havoc Pennington <hp@redhat.com>

* `doc/dbus-specification.xml`: some more language cleanups; add stuff about how to deal with invalid protocol and extension points; add `_` to allowed chars in auth commands; add `EXTENSION_` auth command prefix

2005-02-06 Havoc Pennington <hp@redhat.com>

- * s/expected/required/ in a couple places for clarity

2005-02-07 Colin Walters <walters@verbum.org>

- * bus/selinux.c (bus_selinux_allows_send): Handle NULL for sender or proposed_recipient.

2005-02-06 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-message-factory.c (generate_special): more tests

- * dbus/dbus-marshall-validate.c (validate_body_helper): detect array length that exceeds the maximum

2005-02-05 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-message-factory.c (generate_special): more test cases, increasing coverage

- * dbus/dbus-marshall-validate.c (validate_body_helper): return the reason why a signature was invalid

- * dbus/dbus-marshall-header.c (load_and_validate_field): fix to skip the length of the string before we look at it in validation

- * dbus/dbus-string-util.c (_dbus_string_test): add tests for equal_substring

- * dbus/dbus-message.c (_dbus_message_loader_new): default max_message_length to DBUS_MAXIMUM_MESSAGE_LENGTH

2005-02-05 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-marshall-validate.c (validate_body_helper): fix crash if the signature of a variant was empty
(_dbus_validate_signature_with_reason): catch "(a)" (array inside struct with no element type)

- * dbus/dbus-message-factory.c (generate_uint32_changed): add more mangled messages to break things

2005-02-04 Havoc Pennington <hp@redhat.com>

- * glib/dbus-gproxy.c (dbus_g_proxy_disconnect_signal): use g_quark_try_string() so it actually can return 0
(dbus_g_proxy_connect_signal): ditto

2005-02-04 Havoc Pennington <hp@redhat.com>

* glib/dbus-gproxy.c (dbus_g_proxy_emit_remote_signal): fix a bogus warning
(tristring_from_message): assert cleanly on null path/interface (should not be possible though I decided later)
(dbus_g_proxy_dispose): move proxy manager unregistration here
(DBUS_G_PROXY_DESTROYED): add this macro, and use it in a bunch of
g_return_if_fail() checks

2005-02-04 Havoc Pennington <hp@redhat.com>

* doc/Makefile.am (EXTRA_DIST): add DTDs to makefile
* doc/introspect.dtd: add introspect.dtd from David A. Wheeler (with some minor changes)
* doc/dbus-specification.xml: add deprecated attribute to introspection format

2005-01-31 Havoc Pennington <hp@redhat.com>

* glib/dbus-gproxy.c: rewrite how signals work again, this time I think it's sort of right

2005-01-30 Havoc Pennington <hp@redhat.com>

* tools/dbus-viewer.c: kind of half-ass hook up the option menu.

2005-01-30 Havoc Pennington <hp@redhat.com>

* tools/dbus-names-model.c: dynamically watch NameOwnerChanged
* autogen.sh: change to autotools 1.9
* glib/dbus-gproxy.c: completely change how signals work
(dbus_g_proxy_add_signal): new function to specify signature of a signal
(dbus_g_proxy_emit_received): marshal the dbus message to GValues,
and g_warning if the incoming message has the wrong signature.

2005-01-30 Havoc Pennington <hp@redhat.com>

* tools/dbus-names-model.c (have_names_notify): fix this
* dbus/dbus-message.c (_dbus_message_iter_get_args_valist): clean up the string array handling a bit

2005-01-30 Havoc Pennington <hp@redhat.com>

* glib/dbus-glib.c (dbus_g_pending_call_set_notify): new function
(dbus_g_pending_call_cancel): new function

- * dbus/dbus-glib.h: move GType decls for connection/message here;
- * dbus/dbus-glib.c: move all the g_type and ref/unref stuff in here, just kind of rationalizing how we handle all that

- * tools/dbus-names-model.c: new file for a tree model listing the services on a bus

- * tools/dbus-tree-view.c (model_new): use proper typing on the model rows

2005-01-30 Havoc Pennington <hp@redhat.com>

- * glib/dbus-gmain.c: add a custom GSource back that just checks whether the message queue has anything in it; otherwise, there are cases where we won't see messages in the queue since there was no IO visible to the glib main loop

- * dbus/dbus-connection-internal.h (_DBUS_DEFAULT_TIMEOUT_VALUE): increase default message timeout to 25 seconds

2005-01-30 Havoc Pennington <hp@redhat.com>

- * test/glib/test-profile.c (no_bus_stop_server): remove the warning about the g_warning that I just fixed

- * glib/dbus-gmain.c: rewrite the main loop stuff to avoid the custom source, seems to be a lot easier to understand and work better.

2005-01-30 Havoc Pennington <hp@redhat.com>

I think this main loop thing is conceptually broken, but here are some band aids. I'll maybe rewrite it in a minute.

- * glib/dbus-gmain.c (add_timeout): timeout stuff doesn't use the custom GSource, so don't pass it in; confusing (gsource_server_finalize, gsource_connection_finalize): add finalize handlers that remove all the watches.

2005-01-30 Havoc Pennington <hp@redhat.com>

- * glib/dbus-gobject.c (introspect_properties): fix the XML generated

- * dbus/dbus-message.c (dbus_message_unref): add an in_cache flag which effectively detects the use of freed messages

- * glib/dbus-gobject.c (handle_introspect): modify and return the reply message instead of the incoming message

* dbus/dbus-object-tree.c (handle_default_introspect_unlocked):
gee, maybe it should SEND THE XML instead of just making a string
and freeing it again ;-)

* tools/dbus-print-message.c (print_message): improve printing of
messages

* configure.in: add debug-glib.service to the output

2005-01-30 Havoc Pennington <hp@redhat.com>

dbus-viewer introspected and displayed the bus driver

* dbus/dbus-object-tree.c
(object_tree_test_iteration): add tests for a handler registered
on "/"

* dbus/dbus-object-tree.c
(_dbus_decompose_path): fix to handle path "/" properly
(run_decompose_tests): add tests for path decomposition

* glib/dbus-gutils.c (_dbus_gutils_split_path): fix to handle "/"
properly

* glib/dbus-gobject.c (handle_introspect): fix quotes

* test/glib/run-test.sh: support launching the bus, then running
dbus-viewer

* test/glib/test-service-glib.c (main): put in a trivial gobject
subclass and register it on the connection

* bus/driver.c (bus_driver_handle_introspect): implement
introspection of the bus driver service

* dbus/dbus-protocol.h: add #defines for the XML namespace,
identifiers, doctype decl

* bus/driver.c (bus_driver_handle_get_service_owner): handle
attempts to get owner of DBUS_SERVICE_ORG_FREEDESKTOP_DBUS by
returning the service unchanged.
(bus_driver_handle_message): remove old check for reply_serial in
method calls, now the message type deals with that
(bus_driver_handle_message): handle NULL interface

* glib/dbus-gproxy.c (dbus_g_proxy_get_bus_name): new function

* glib/dbus-gloader-expat.c (description_load_from_string): allow
-1 for len

* tools/dbus-viewer.c: add support for introspecting a service on

a bus

- * glib/dbus-gproxy.c (dbus_g_pending_call_ref): add
(dbus_g_pending_call_unref): add

2005-01-29 Havoc Pennington <hp@redhat.com>

- * tools/dbus-tree-view.c: add support for displaying properties.
(run dbus-viewer with an introspect xml file as arg, then resize
the window so the tree elements show up, not sure what that is)

- * glib/dbus-gobject.c (handle_introspect): return
org.freedesktop.Properties and org.freedesktop.Introspectable
interfaces when we are introspected.

- * doc/dbus-specification.xml: allow empty interface name when
Get/Set a property

2005-01-29 Havoc Pennington <hp@redhat.com>

- * glib/Makefile.am: rename dbus-glib-tool to dbus-binding-tool;
though it uses glib, it could be extended for any binding in
principle

- * glib/dbus-gobject.c (gobject_message_function): change to the
new way properties work

- * dbus/dbus-protocol.h: add the new interfaces

- * doc/dbus-specification.xml: document the introspection format,
Introspectable interface, and add an org.freedesktop.Properties
interface.

- * glib/dbus-gparser.c: add support for a <property> element

- * glib/dbus-gidl.c: add PropertyInfo

- * glib/dbus-gobject.c (handle_introspect): put the outermost
<node> outside the signal and property descriptions.
(introspect_properties): export properties as <property> rather
than as method calls

2005-01-28 Havoc Pennington <hp@redhat.com>

- * doc/TODO, doc/dbus-specification.xml: spec and TODO tweaks
related to authentication protocol

2005-01-28 John (J5) Palmieri <johnp@redhat.com>

- * python/dbus_bindings.pyx.in: Updated to handle new D-BUS type
system

 - BUS_ACTIVATION -> BUS_STARTER

```

- DBUS_BUS_ACTIVATION -> DBUS_BUS_STARTER
- class MessageIter (__init__): Added recursion checking
  so we throw a nice error instead of just disconnecting from
the
  bus.
  (get): Added arg_type parameter for recursion.
  Removed the nil type
  Added signiture type placeholder (not implemented)
  Added struct type placeholder (not implemented)
  Added varient type placeholder (not implemented)
  Commented out dict type for now
  (get_element_type): renamed from get_array_type
  (get_*): changed to use the dbus_message_iter_get_basic API
  (get_*_array): removed in favor of recursive get_array
method
  (get_array): new recursive method which calls get to
marshal
  the elements of the array
  (value_to_dbus_sig): New method returns the corrasponding
  dbus signiture to a python value
  (append): Comment out dict handling for now
  Handle lists with the new recursive API
  Comment out None handling for now
  (append_nil): removed
  (append_*): changed to use dbus_message_iter_append_basic
API
  (append_*_array): removed in favor of recursive
append_array
  method
  (__str__): Make it easier to print out recursive iterators
  for debugging
  - class Message (__str__): moved type inspection to the
  MessageIter class' __str__ method
  (get_iter): Added an append parameter wich defaults to
False
  If True use the new API's to create an append iterator

* python/dbus.py: Update to use new bindings API
  - TYPE_ACTIVATION -> TYPE_STARTER
  - class Bus (_get_match_rule): GetServiceOwner ->
GetNameOwner
  - class ActivationBus -> class StarterBus
  - class RemoteObject (__call__): get an append iterator
  - (_dispatch_dbus_method_call): get an append iterator
  - class Object (emit_signal): get an append iterator

* python/examples/: Fixed up the examples to work with the new
API

2005-01-28 Joe Shaw <joeshaw@novell.com>

* configure.in: Bump version up to 0.30.

```

* HACKING: Add a release item to bump the version number up after a release.

2005-01-28 Havoc Pennington <hp@redhat.com>

* doc/dbus-specification.xml: update to describe 16-bit types and dict entries

* dbus/dbus-marshal-basic.c (_dbus_unpack_uint16): fix broken assertion

* dbus/dbus-protocol.h (DBUS_TYPE_DICT_ENTRY): add DICT_ENTRY as
a
type

* dbus/dbus-marshal-recursive.c: implement

2005-01-27 Havoc Pennington <hp@redhat.com>

* dbus/dbus-arch-deps.h.in: add 16/32-bit types

* configure.in: find the right type for 16 and 32 bit ints as
well
as 64

* dbus/dbus-protocol.h (DBUS_TYPE_INT16, DBUS_TYPE_UINT16): add the 16-bit types so people don't have to stuff them in 32-bit or byte arrays.

2005-01-27 Havoc Pennington <hp@redhat.com>

* dbus/dbus-message.c: byteswap the message if you init an iterator to read/write from it

* dbus/dbus-marshal-byteswap.c: new file implementing
_dbus_marshal_byteswap()

* dbus/dbus-marshal-basic.c: add _dbus_swap_array()

2005-01-26 Havoc Pennington <hp@redhat.com>

* dbus/dbus-marshal-validate-util.c: break this out (and fix build, apparently - nobody noticed?)

2005-01-26 Havoc Pennington <hp@redhat.com>

* dbus/dbus-marshal-recursive.h: remove todo comment

2005-01-25 Joe Shaw <joeslaw@novell.com>

* Land the mono binding changes to conform to the new APIs.

* mono/Makefile.am: Remove Custom.cs, DBusType/Custom.cs, DBusType/Dict.cs, and DBusType/Nil.cs from the build.

* mono/Arguments.cs (GetCodeAsString): Added. Returns the dbus type code as a string.
(InitAppending): Rename dbus_message_append_iter_init() to dbus_message_iter_init_append().

* mono/BusDriver.cs: Rename ServiceEventHandler to NameOwnerChangedHandler. Rename GetServiceOwner to GetOwner. Rename ServiceOwnerChanged to NameOwnerChanged.

* mono/Connection.cs: Rename BaseService to UniqueName, and the underlying C call.

* mono/Custom.cs: Removed. The CUSTOM type has been removed.

* mono/Service.cs: Rename Exists to HasOwner, internally rename dbus_bus_acquire_service() to dbus_bus_request_name().

* mono/DBusType/Array.cs (ctor): Use Type.GetElementType() instead of Type.UnderlyingSystemType to get the correct element type for the array.
(ctor): Update code for new APIs: use
dbus_message_iter_recurse(),
dbus_message_get_{element|arg}_type() instead of
dbus_message_iter_init_array_iterator().
(Append): Replace dbus_message_iter_append_array() with
dbus_message_iter_open_container() and
dbus_message_iter_close_container().

* mono/DBusType/Custom.cs, mono/DBusType/Nil.cs: Removed. These types have been removed.

* mono/DBusType/*.cs: Replace calls of
dbus_message_iter_get_[type]() to dbus_message_iter_get_basic(),
but specify the type in the DllImport extern declaration. Ditto
for dbus_message_iter_append_[type]() ->
dbus_message_iter_append_basic().

* mono/example/BusListener.cs: Update for ServiceEventHandler -> NameOwnerChangedHandler.

2005-01-25 John (J5) Palmieri <johnp@redhat.com>

* python/dbus_bindings.pyx.in: Rename of methods and bindings
- get_base_service -> get_unique_name
- bus_get_base_service -> bus_get_unique_name
- dbus_bus_get_base_service -> dbus_bus_get_unique_name
- ACTIVATION_REPLY_ACTIVATED -> DBUS_START_REPLY_SUCCESS

```
    - ACTIVATION_REPLY_ALREADY_ACTIVE ->
DBUS_START_REPLY_ALREADY_RUNNING
    - bus_activate_service -> bus_start_service_by_name
    - dbus_bus_activate_service ->
dbus_bus_start_service_by_name
    - bus_acquire_service -> bus_request_name
    - dbus_bus_acquire_service -> dbus_bus_request_name
    - bus_service_exists -> bus_name_has_owner
    - dbus_bus_service_exists -> dbus_bus_name_has_owner

* python/dbus.py: Rename of methods
    - activate_service -> start_service_by_name
    - bus_acquire_service -> bus_request_name
    - ACTIVATION_REPLY_ACTIVATED -> START_REPLY_SUCCESS
    - ACTIVATION_REPLY_ALREADY_ACTIVE ->
START_REPLY_ALREADY_RUNNING
```

2005-01-24 Joe Shaw <joeshaw@novell.com>

* dbus/dbus-connection.c (dbus_connection_dispatch): Print out the signature for the method that can't be found.

* dbus/dbus-message.c (dbus_message_iter_init): To check to see if the message has any arguments, we need to call `_dbus_type_reader_get_current_type()`, not `_dbus_type_reader_has_next()`.

2005-01-24 Havoc Pennington <hp@redhat.com>

* dbus/dbus-message-factory.c: more testing of message validation

* dbus/dbus-protocol.h (DBUS_MINIMUM_HEADER_SIZE): move to this header

2005-01-23 Havoc Pennington <hp@redhat.com>

* dbus/dbus-message-factory.c, dbus/dbus-message-util.c: get this all working, not many tests in the framework yet though

2005-01-22 Havoc Pennington <hp@redhat.com>

* doc/dbus-faq.xml, doc/dbus-tutorial: add a FAQ and update tutorial, based on work from David Wheeler.

2005-01-21 Havoc Pennington <hp@redhat.com>

* dbus/dbus-bus.c: add more `return_if_fail` checks

* dbus/dbus-message.c (load_message): have the "no validation"

mode (have to edit the code to toggle the mode for now though)

- * dbus/dbus-marshal-header.c (_dbus_header_load): have a mode that skips all validation; I want to use this at least for benchmark baseline, I'm not sure if it should be a publicly-available switch.

2005-01-21 Havoc Pennington <hp@redhat.com>

- * glib/dbus-gmain.c: don't put the GLib bindings in the same toplevel doxygen group as the low-level API stuff
- * dbus/dbus.h: note that libdbus is the low-level API

2005-01-20 Havoc Pennington <hp@redhat.com>

- * update-dbus-docs.sh: script to update docs on the web site, only works for me though. neener.

2005-01-20 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-sysdeps.c (_dbus_poll): amazingly, trying to compile code can reveal bugs in it

2005-01-20 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-sysdeps.c (_dbus_poll): fix several bugs in the select() version, patches from Tor Lillqvist

2005-01-20 Havoc Pennington <hp@redhat.com>

- * doc/dbus-tutorial.xml: replace > with >
- * bus/services.c (bus_registry_acquire_service): validate the name and return a better error if it's no good.
- * doc/dbus-specification.xml: note NO_AUTO_START change
- * dbus/dbus-protocol.h (DBUS_HEADER_FLAG_NO_AUTO_START): change from AUTO_START, we're toggling the default
- * bus/dispatch.c: adapt the tests to change of auto-start default

2005-01-18 Havoc Pennington <hp@redhat.com>

- * rename dbus-daemon-1 to dbus-daemon throughout

2005-01-18 Havoc Pennington <hp@redhat.com>

* Throughout, grand renaming to strip out the use of "service", just say "name" instead (or "bus name" when ambiguous). Did not change the internal code of the message bus itself, only the programmer-facing API and messages.

* doc/dbus-specification.xml: further update the message bus section

* bus/config-parser.c (all_are_equiv): fix bug using freed string in error case

2005-01-17 Havoc Pennington <hp@redhat.com>

* dbus/dbus-types.h: remove 16-bit types since we don't use them ever

* dbus/dbus-marshall-validate.c (_dbus_validate_path): disallow any "invalid name character" not only non-ASCII

* doc/dbus-specification.xml: further update spec, message bus parts are still out-of-date but the marshaling etc. stuff is now accurate-ish

2005-01-17 Havoc Pennington <hp@redhat.com>

* doc/dbus-specification.xml: partially update spec

2005-01-17 Havoc Pennington <hp@redhat.com>

* Throughout, align variant bodies according to the contained type, rather than always to 8. Should save a fair bit of space in message headers.

* dbus/dbus-marshall-validate.c (_dbus_validate_body_with_reason): fix handling of case where p == end

* doc/TODO: remove the dbus_bool_t item and variant alignment items

2005-01-17 Havoc Pennington <hp@redhat.com>

* dbus/dbus-types.h: hardcode dbus_bool_t to 32 bits

* Throughout: modify DBUS_TYPE_BOOLEAN to be a 32-bit type instead of an 8-bit type. Now dbus_bool_t is the type to use whenever you are marshaling/unmarshaling a boolean.

2005-01-16 Havoc Pennington <hp@redhat.com>

This is about it on what can be disabled/deleted from libdbus easily, back below 150K anyhow. Deeper cuts are more work than just turning the code off as I've done here.

- * dbus/dbus-marshal-basic.c (`_dbus_pack_int32`): we don't need the signed int convenience funcs

- * dbus/dbus-internals.c (`_dbus_verbose_real`): omit when not in verbose mode

- * dbus/dbus-string-util.c, dbus/dbus-string.c: more breaking things out of libdbus

- * dbus/dbus-sysdeps.c, dbus/dbus-sysdeps-util.c: same

- * dbus/dbus-hash.c: purge the `TWO_STRINGS` crap (well, make it tests-enabled-only, though it should probably be deleted)

- * dbus/dbus-message-util.c: same stuff

- * dbus/dbus-auth-util.c: same stuff

2005-01-16 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-userdb-util.c: split out part of dbus-userdb.c

- * dbus/dbus-sysdeps.c (`_dbus_uid_from_string`): move here to pave way for stripping down dbus-userdb.c stuff included in libdbus. Rename `_dbus_parse_uid` for consistency.

2005-01-16 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-internals.c (`_dbus_real_assert`): print the function name the assertion failed in

- * dbus/dbus-internals.h (`_dbus_return_if_fail`)
(`_dbus_return_val_if_fail`): assert that the name of the function containing the check doesn't start with `'_'`, since we only want

to

use checks on public functions

- * dbus/dbus-connection.c (`_dbus_connection_ref_unlocked`): change checks to assertions

- * dbus/dbus-marshal-header.c (`_dbus_header_set_field_basic`): change checks to asserts for private function

- * dbus/dbus-message.c (`_dbus_message_set_serial`): checks to asserts for private function

- * dbus/dbus-marshal-recursive.c (`skip_one_complete_type`): remove broken assertion that was breaking make check

(`_dbus_type_reader_array_is_empty`): remove this rather than fix it, was only used in assertions

2005-01-16 Havoc Pennington <hp@redhat.com>

* `test/unused-code-gc.py`: hacky script to find code that's used only by the bus (not `libdbus`) or used only by tests or not used at all. It has some false alarms, but looks like we can clean up a lot of size from `libdbus`.

* `dbus/dbus-sysdeps.c`, `dbus/dbus-sysdeps-utils.c`, `dbus/Makefile.am`: initially move 10K of binary size out of `libdbus`

2005-01-16 Havoc Pennington <hp@redhat.com>

* Add and fix docs according to Doxygen warnings throughout source.

* `dbus/dbus-marshal-recursive.c`
(`_dbus_type_reader_array_is_empty`): change this to just call `array_reader_get_array_len()` and make it static

* `dbus/dbus-message.c` (`dbus_message_iter_get_element_type`):
rename
from `get_array_type`
(`dbus_message_iter_init_append`): rename from `append_iter_init`

* `dbus/dbus-marshal-recursive.c`
(`_dbus_type_reader_get_element_type`): rename from
`_dbus_type_reader_get_array_type`

2005-01-15 Havoc Pennington <hp@redhat.com>

* `test/glib/test-profile.c` (`with_bus_server_filter`): fix crash

* `dbus/dbus-marshal-basic.c` (`_dbus_unpack_uint32`): inline as
macro
when `DBUS_DISABLE_ASSERT`
(`_dbus_marshall_set_basic`): be sure we align for the string length

* `dbus/dbus-marshal-recursive.c` (`skip_one_complete_type`): make this look faster

* `dbus/dbus-string.c` (`_dbus_string_get_const_data_len`): add an inline macro version
(`_dbus_string_set_byte`): provide inline macro version

2005-01-15 Havoc Pennington <hp@redhat.com>

* Land the new message args API and type system.

This patch is huge, but the public API change is not really large. The set of D-BUS types has changed somewhat, and the arg "getters" are more geared toward language bindings; they don't make a copy, etc.

There are also some known issues. See these emails for details on this huge patch:

<http://lists.freedesktop.org/archives/dbus/2004-December/001836.html>

<http://lists.freedesktop.org/archives/dbus/2005-January/001922.html>

- * dbus/dbus-marshal-*: all the new stuff
- * dbus/dbus-message.c: basically rewritten
- * dbus/dbus-memory.c (check_guards): with "guards" enabled, init freed blocks to be all non-nul bytes so using freed memory is less likely to work right
- * dbus/dbus-internals.c (_dbus_test_oom_handling): add DBUS_FAIL_MALLOC=N environment variable, so you can do DBUS_FAIL_MALLOC=0 to skip the out-of-memory checking, or DBUS_FAIL_MALLOC=10 to make it really, really, really slow and thorough.
- * qt/message.cpp: port to the new message args API (operator<<): use str.utf8() rather than str.unicode() (pretty sure this is right from the Qt docs?)
- * glib/dbus-gvalue.c: port to the new message args API
- * bus/dispatch.c, bus/driver.c: port to the new message args API
- * dbus/dbus-string.c (_dbus_string_init_const_len): initialize the "locked" flag to TRUE and align_offset to 0; I guess we never looked at these anyhow, but seems cleaner.
- * dbus/dbus-string.h (_DBUS_STRING_ALLOCATION_PADDING): move allocation padding macro to this header; use it to implement (_DBUS_STRING_STATIC): ability to declare a static string.
- * dbus/dbus-message.c (_dbus_message_has_type_interface_member): change to return TRUE if the interface is not set.
- * dbus/dbus-string.[hc]: move the D-BUS specific validation stuff to dbus-marshal-validate.[hc]

from * dbus/dbus-marshall-basic.c (_dbus_type_to_string): move here
dbus-internals.c

* dbus/Makefile.am: cut over from dbus-marshall.[hc]
to dbus-marshall-*. [hc]

* dbus/dbus-object-tree.c (_dbus_decompose_path): move this
function here from dbus-marshall.c

2005-01-12 Joe Shaw <joeshaw@novell.com>

* NEWS: Update for 0.23.

* configure.in: Release 0.23.

2005-01-12 Joe Shaw <joeshaw@novell.com>

* mono/Makefile.am, mono/example/Makefile.am: Always build the
dbus DLL with --debug. Clean up after the .mdb files this leaves
behind.

* mono/doc/Makefile.am: Need to uninstall the docs on "make
uninstall"

* mono/Arguments.cs (GetDBusTypeConstructor): If the type
is an enum, get the enum's underlying type. Another mono
1.1.3 fix.

2005-01-11 Joe Shaw <joeshaw@novell.com>

Patch from Sjoerd Simons <sjoerd@luon.net>

* mono/Makefile.am, mono/example/Makefile.am: Don't redefine
DESTDIR. It breaks stuff.

2005-01-11 Joe Shaw <joeshaw@novell.com>

Patch from Tabet Ingo <tabet@ximian.com>

* mono/DBusType/Array.cs (Get): Get the underlying element type
by calling type.GetElementType(). The code previously depended on
broken Mono behavior, which was fixed in Mono 1.1.3.

* mono/DBusType/Dict.cs (constructor): Fix the parameters for
Activator.CreateInstance() so that the class's constructor is
called with the right parameters.

2005-01-11 Joe Shaw <joeshaw@novell.com>

Patch from Timo Teras <ext-timo.teras@nokia.com>

* dbus/dbus-connection.c
(_dbus_connection_queue_received_message_link): Call
_dbus_connection_remove_timeout() instead of the _locked()
variant, since it's always called from
_dbus_connection_handle_watch(), which handles the locking.
Removed the _locked() variant since it's no longer used.

2005-01-03 Havoc Pennington <hp@redhat.com>

* dbus/dbus-internals.h: I'm an idiot, _dbus_assert certainly can
return

2004-12-26 Havoc Pennington <hp@redhat.com>

* dbus/dbus-internals.h: add _DBUS_GNUC_NORETURN to _dbus_assert

2005-01-03 Havoc Pennington <hp@redhat.com>

* dbus/dbus-sysdeps.c (_dbus_sysdeps_test): fix using == on
floating point

* dbus/dbus-string.c (_dbus_string_insert_alignment): new
function

2005-01-02 Havoc Pennington <hp@redhat.com>

* dbus/dbus-internals.h (_DBUS_ALIGN_OFFSET): new macro

2005-01-01 Havoc Pennington <hp@redhat.com>

* configure.in: add -Wfloat-equal

2005-01-01 Havoc Pennington <hp@redhat.com>

* dbus/dbus-sysdeps.h: add _DBUS_DOUBLES_BITWISE_EQUAL macro,
for a variety of reasons '==' doesn't do this.

2004-12-31 Havoc Pennington <hp@redhat.com>

* dbus/dbus-string.c (_dbus_string_equal_substrings): new
function
I keep wishing I had

2004-12-30 John (J5) Palmieri <johnp@redhat.com>

* python/dbus.py:
s/ACTIVATION_REPLY_ACTIVE/ACTIVATION_REPLY_ACTIVATED

2004-12-30 John (J5) Palmieri <johnp@redhat.com>

* python/dbus_bindings.pyx.in: Change
DBUS_ACTIVATION_REPLY_ACTIVATED
and DBUS_ACTIVATION_REPLY_ALREADY_ACTIVE to match the values in
dbus-protocol.h. Because they are defines and not enums they are
not
autogenerated.

2004-12-26 John (J5) Palmieri <johnp@redhat.com>

* python/dbus_bindings.pyx.in (bus_activate_service): Bind
dbus_bus_activate_service

* python/dbus.py (Bus.activate_service): activate a service on
the
bus.

2004-12-24 Havoc Pennington <hp@redhat.com>

* test/decode-gcov.c: change to use .gcno and .gcda files, but
the
file format has also changed and I haven't adapted to that yet

* Makefile.am: load .gcno files from latest gcc

2004-12-23 John (J5) Palmieri <johnp@redhat.com>

* Patch from Rob Taylor <robtaylor@fastmail.fm>

* python/dbus_bindings.pyx.in (bus_get_unix_user): New
lowlevel binding

* python/dbus.py (get_unix_user): Added binding to
call dbus_bindings.bus_get_unix_user

* python/extract.py: Modified the proto_pat regex to
handle unsigned long

2004-12-21 Olivier Andrieu <oliv__a@users.sourceforge.net>

* dbus/make-dbus-glib-error-enum.sh: omit the function keyword
for
better POSIX compliance.

2004-12-19 Havoc Pennington <hp@redhat.com>

* dbus/dbus-string.c (_dbus_string_insert_4_aligned)
(_dbus_string_insert_8_aligned): new functions

* dbus/dbus-string.c (_dbus_string_alloc_space): new function

2004-12-18 Havoc Pennington <hp@redhat.com>

* dbus/dbus-string.c (_dbus_string_validate_ascii): use ISASCII

macro

* dbus/dbus-message.c: fix a comment, and add a still-unused not-implemented function

* dbus/dbus-marshal.h: fix comment

* dbus/dbus-internals.h (_DBUS_ISASCII): new macro

2004-12-17 Joe Shaw <joeshaw@novell.com>

* mono/DBusType/Byte.cs, mono/DBusType/Int32.cs, mono/DBusType/Int64.cs, mono/DBusType/UInt32.cs, mono/DBusType/UInt64.cs: Use Enum.GetUnderlyingType() instead of Type.UnderlyingSystemType to get the actual system type underneath. This code previously depended on the broken Mono behavior, which was fixed in 1.1.3.

2004-11-27 Havoc Pennington <hp@redhat.com>

* dbus/dbus-string.h (_dbus_string_get_byte): inline when asserts are disabled

(_dbus_string_get_const_data): inline when asserts are disabled

* dbus/dbus-message.c: record the _dbus_current_generation of creation so we can complain if dbus_shutdown() is used improperly.

Do this only if checks are enabled.

* dbus/dbus-connection.c: ditto

2004-11-26 Havoc Pennington <hp@redhat.com>

* test/glib/test-profile.c: add with_bus mode to profile echoes that go through the bus.

* test/glib/run-test.sh: add ability to run test-profile

* bus/dbus-daemon-1.1.in: fix to say that SIGHUP causes partial config file reload.

2004-11-26 Havoc Pennington <hp@redhat.com>

* test/glib/test-profile.c: clean up how the fake_malloc_overhead thing was implemented

2004-11-26 Havoc Pennington <hp@redhat.com>

* test/glib/test-profile.c: tweak a bit, add support for some made-up minimal malloc overhead with plain sockets, since in real life some sort of buffers are unavoidable thus we could count them in the theoretical best case

2004-11-26 Havoc Pennington <hp@redhat.com>

* dbus/dbus-message.c (dbus_message_cache_or_finalize): fix bug where I was trying to cache one too many messages

2004-11-26 Havoc Pennington <hp@redhat.com>

* dbus/dbus-message.c: reimplement message cache as an array which makes the cache about twice as fast and saves maybe 1.5% overall

2004-11-26 Havoc Pennington <hp@redhat.com>

* dbus/dbus-threads.c (init_global_locks): forgot to put the message cache lock here

2004-11-26 Havoc Pennington <hp@redhat.com>

* dbus/dbus-message.c (struct DBusMessage): put the locked bit and the "char byte_order" next to each other to save 4 bytes (dbus_message_new_empty_header): reduce preallocation, since the message cache should achieve a similar effect (dbus_message_cache_or_finalize, dbus_message_get_cached): add a message cache that keeps a few DBusMessage around in a pool, another 8% speedup or so.
* dbus/dbus-dataslot.c (_dbus_data_slot_list_clear): new function

2004-11-25 Havoc Pennington <hp@redhat.com>

* dbus/dbus-transport-unix.c (unix_do_iteration): if we're going to write, without reading or blocking, try it before the poll() and skip the poll() if nothing remains to write. This is about a 3% speedup in the echo client/server

2004-11-25 Havoc Pennington <hp@redhat.com>

The primary change here is to always write() once before adding the write watch, which gives us about a 10% performance increase.

* dbus/dbus-transport-unix.c: a number of modifications to cope with removing messages_pending (check_write_watch): properly handle DBUS_AUTH_STATE_WAITING_FOR_MEMORY; adapt to removal of messages_pending stuff (check_read_watch): properly handle WAITING_FOR_MEMORY and AUTHENTICATED cases (unix_handle_watch): after writing, see if the write watch can be removed

```

(unix_do_iteration): assert that write_watch/read_watch are
non-NULL rather than testing that they aren't, since they
aren't allowed to be NULL. check_write_watch() at the end so
we add the watch if we did not finish writing (e.g. got EAGAIN)

* dbus/dbus-transport-protected.h: remove messages_pending call,
since it resulted in too much inefficient watch adding/removing;
instead we now require that the transport user does an iteration
after queueing outgoing messages, and after trying the first
write() we add a write watch if we got EAGAIN or exceeded our
max bytes to write per iteration setting

* dbus/dbus-string.c (_dbus_string_validate_signature): add this
function

* dbus/dbus-server-unix.c (unix_finalize): the socket name was
freed and then accessed, valgrind flagged this bug, fix it

* dbus/dbus-message.c: fix several bugs where HEADER_FIELD_LAST
was taken
as the last valid field plus 1, where really it is equal to the
last valid field. Corrects some message corruption issues.

* dbus/dbus-mainloop.c: verbosity changes

* dbus/dbus-keyring.c (_dbus_keyring_new_homedir): handle OOM
instead of aborting in one of the test codepaths

* dbus/dbus-internals.c (_dbus_verbose_real): fix a bug that
caused not printing the pid ever again if a verbose was missing
the newline at the end
(_dbus_header_field_to_string): add HEADER_FIELD_SIGNATURE

* dbus/dbus-connection.c: verbosity changes;
(dbus_connection_has_messages_to_send): new function
(_dbus_connection_message_sent): no longer call transport-
>messages_pending
(_dbus_connection_send_preallocated_unlocked): do one iteration
to
try to write() immediately, so we can avoid the write watch. This
is the core purpose of this patchset
(_dbus_connection_get_dispatch_status_unlocked): if disconnected,
dump the outgoing message queue, so nobody will get confused
trying to send them or thinking stuff is pending to be sent

* bus/test.c: verbosity changes

* bus/driver.c: verbosity/assertion changes

* bus/dispatch.c: a bunch of little tweaks to get it working
again
because this patchset changes when/where you need to block.

```

2004-11-23 Havoc Pennington <hp@redhat.com>

* test/glib/test-profile.c: modify to accept a plain_sockets argument in which case it will bench plain sockets instead of libdbus, for comparison purposes.

2004-11-22 Havoc Pennington <hp@redhat.com>

* test/glib/test-profile.c (N_CLIENT_THREADS): run multiple threads for more time, so sysprof can get a grip on it.

* dbus/dbus-string.c (_dbus_string_validate_utf8): remove pointless variable

2004-11-13 Havoc Pennington <hp@redhat.com>

* test/glib/test-profile.c: fix this thing up a bit

* dbus/dbus-message.c (dbus_message_new_empty_header): increase preallocation sizes by a fair bit; not sure if this will be an overall performance win or not, but it does reduce reallocs.

* dbus/dbus-string.c (set_length, reallocate_for_length): ignore the test hack that forced constant realloc if asserts are disabled, so we can profile sanely. Sprinkle in some _DBUS_UNLIKELY() which are probably pointless, but before I noticed the real performance problem I put them in.

(_dbus_string_validate_utf8): micro-optimize this thing a little bit, though callgrind says it didn't help; then special-case ascii, which did help a lot; then be sure we detect nul bytes as invalid, which is a bugfix.

(align_length_then_lengthen): add some more _DBUS_UNLIKELY superstition; use memset to nul the padding instead of a manual loop.

(_dbus_string_get_length): inline this as a macro; it showed up in the profile because it's used for loop tests and so forth

2004-11-10 Colin Walters <walters@verbum.org>

* dbus/dbus-spawn.c (check_babysit_events): Handle EINTR, for extra paranoia.

2004-11-09 Colin Walters <walters@verbum.org>

* dbus/dbus-string.c (_dbus_string_get_length): New function, writes DBusString to C buffer.

* dbus/dbus-string.h: Prototype it.

* dbus/dbus-message.c (dbus_message_type_to_string): New

function, converts message type into C string.

* dbus/dbus-message.h: Prototype it.

* bus/selinux.c (bus_selinux_check): Take source pid, target pid, and audit data. Pass audit data to avc_has_perm.

(log_audit_callback): New function, appends extra audit information.

(bus_selinux_allows_acquire_service): Also take service name, add it to audit data.

(bus_selinux_allows_send): Also take message type, interface, method member, error name, and destination, and add them to audit data.

(log_cb): Initialize func_audit.

* bus/selinux.h (bus_selinux_allows_acquire_service) (bus_selinux_allows_send): Update prototypes

* bus/services.c (bus_registry_acquire_service): Pass service name to bus_selinux_allows_acquire_service.

* bus/bus.c (bus_context_check_security_policy): Pass additional audit data. Move assignment of dest to its own line.

2004-11-07 Colin Walters <walters@verbum.org>

* dbus/dbus-transport-unix.c (do_authentication): Always initialize auth_completed.

2004-11-07 Colin Walters <walters@verbum.org>

* bus/bus.c (load_config): Break into three separate functions: process_config_first_time_only, process_config_every_time, and process_config_postinit.

(process_config_every_time): Move call of bus_registry_set_service_context_table into process_config_postinit.

(process_config_postinit): New function, does any processing that needs to happen late in initialization (and also on reload).

(bus_context_new): Instead of calling load_config, open config parser here and call process_config_first_time_only and process_config_every_time directly. Later, after we have forked but before changing UID, invoke bus_selinux_full_init, and then call process_config_postinit.

(bus_context_reload_config): As in bus_context_new, load parse file inside here, and call process_config_every_time and process_config_postinit.

* bus/services.h, bus/services.c
(bus_registry_set_service_context_table): Rename from bus_registry_set_sid_table. Take string hash from config parser, and convert them here into SIDs.

* bus/config-parser.c (struct BusConfigParser): Have config parser only store a mapping of service->context string.
(merge_service_context_hash): New function.
(merge_included): Merge context string hashes instead of using bus_selinux_id_table_union.
(bus_config_parser_new): Don't use bus_selinux_id_table_new; simply create a new string hash.
(bus_config_parser_unref): Unref it.
(start_selinux_child): Simply insert strings into hash, don't call bus_selinux_id_table_copy_over.

* bus/selinux.h, bus/selinux.c (bus_selinux_id_table_union)
(bus_selinux_id_table_copy_over): Delete.

2004-11-03 Colin Walters <walters@verbum.org>

* bus/selinux.c (bus_selinux_pre_init): Kill some unused variables.

2004-11-03 Colin Walters <walters@verbum.org>

* bus/test-main.c (test_pre_hook): Fix test logic, thanks Joerg Barfurth <Joerg.Barfurth@Sun.COM>.

2004-11-02 Colin Walters <walters@redhat.com>

* bus/selinux.c (bus_selinux_init): Split into two functions, bus_selinux_pre_init and bus_selinux_post_init.
(bus_selinux_pre_init): Just determine whether SELinux is enabled.
(bus_selinux_post_init): Do everything else.

* bus/main.c (main): Call bus_selinux_pre_init before parsing config file, and bus_selinux_post_init after. This ensures that we don't lose the policyreload notification thread that bus_selinux_init created before forking previously.

* bus/test-main.c (test_pre_hook): Update for split.

2004-10-31 Owen Fraser-Green <owen@discobabe.net>

Patch from Johan Fischer <linux@fischaz.com>

* mono/doc/Makefile.am (install-data-local): Added directory install for DESTDIR

2004-10-29 Colin Walters <walters@redhat.com>

* dbus/dbus-sysdeps.h (_dbus_become_daemon): Also take parameter for fd to write pid to.

* dbus/dbus-sysdeps.c (_dbus_become_daemon): Implement it.

* bus/bus.c (bus_context_new): Pass print_pid_fd to _dbus_become_daemon (bug #1720)

2004-10-29 Colin Walters <walters@redhat.com>

Patch from Ed Catmur <ed@catmur.co.uk>

* mono/doc/Makefile.am (install-data-local): Handle DESTDIR.

2004-10-29 Colin Walters <walters@redhat.com>

* bus/.cvsignore, qt/.cvsignore: Update.

2004-10-29 Colin Walters <walters@redhat.com>

Patch from Kristof Vansant <de_lupus@pandora.be>

* configure.in: Detect Slackware.

* bus/Makefile.am (SCRIPT_IN_FILES): Add rc.messagebus.in.

* bus/rc.messagebus.in: New file.

2004-10-29 Colin Walters <walters@redhat.com>

* tools/dbus-monitor.c (filter_func): Return DBUS_HANDLER_RESULT_HANDLED in filter function for now. See:

<http://freedesktop.org/pipermail/dbus/2004-August/001433.html>

2004-10-29 Colin Walters <walters@redhat.com>

Patch from Matthew Rickard <mjricka@epoch.ncsc.mil>

* bus/services.c (bus_registry_acquire_service): Correctly retrieve service name from DBusString for printing.

2004-10-29 Colin Walters <walters@redhat.com>

* dbus/dbus-glib.h: Update documentation to not refer to internal APIs.

2004-10-27 Joe Shaw <joesshaw@novell.com>

* mono/Arguments.cs (GetDBusTypeConstructor):

type.UnderlyingSystemType will return "System.Byte" if you do it on "byte[]", which is not what we want. So check the type.IsArray property and use System.Array instead.

2004-10-25 John (J5) Palmieri <johnp@redhat.com>

* dbus/dbus-sysdeps.c (fill_user_info): On errors do not free the DBusUserInfo structure since this is passed into the function.

This would cause a double free when the function that allocated the structure would try to free it when an error occurred.

* (bus/session.conf.in, bus/Makefile.am, dbus/configure.in): use /usr/share/dbus-1/services instead of /usr/lib/dbus-1.0/services for service activation to avoid 32bit/64bit parallel install issues

2004-10-21 Colin Walters <walters@verbum.org>

* AUTHORS: Fix my email address, the @gnu.org one has been bouncing for some time. Also add J5.

2004-10-21 Colin Walters <walters@verbum.org>

* dbus/dbus-transport-unix.c (do_authentication): Return authentication status to callers.
(unix_handle_watch): If we completed authentication this round, don't do another read. Instead wait until the next iteration, after we've read any pending data in the auth buffer.
(unix_do_iteration): Ditto.
(unix_handle_watch): Updated for new do_authentication prototype.

2004-10-18 Colin Walters <walters@verbum.org>

* bus/selinux.c (bus_selinux_enabled): Handle --disable-selinux case.

2004-10-18 Colin Walters <walters@verbum.org>

* bus/selinux.h: Add bus_selinux_enabled.

* bus/selinux.c (bus_selinux_enabled): Implement it.

* bus/config-parser.c (struct include): Add if_selinux_enabled member.
(start_busconfig_child): Parse if_selinux_enabled attribute for include.
(bus_config_parser_content): Handle it.

* bus/session.conf.in, bus/system.conf.in: Add

inclusion of context mapping to default config files;
conditional on SELinux being enabled.

* doc/busconfig.dtd: Add to if_selinux_enabled to default DTD.

* test/data/invalid-config-files/badselinux-1.conf,
test/data/invalid-config-files/badselinux-2.conf:
Test files for bad syntax.

2004-10-17 Colin Walters <walters@verbum.org>

* dbus/dbus-memory.c (_dbus_initialize_malloc_debug,
check_guards)
(dbus_malloc, dbus_malloc0, dbus_realloc): Fix up printf
format specifier mismatches.

2004-10-07 Olivier Andrieu <oliv__a@users.sourceforge.net>

* dbus/dbus-sysdeps.c (_dbus_file_get_contents): fix an incorrect
format string.

* glib/dbus-dbus-gmain.c (dbus_g_bus_get): do not mangle NULL
pointer (bug #1540, Leonardo Boiko).

2004-09-28 Jon Trowbridge <trow@ximian.com>

* mono/BusDriver.cs: Changed BusDriver struct to remove
the ServiceCreated and ServiceDeleted events and replace them
with the new ServiceOwnerChanged event.

* mono/example/BusListener.cs: Added a new example program,
which listens for and reports any ServiceOwnerChanged events
on the bus driver.

* mono/example/Makefile.am (DESTDIR): Build changes for the
new BusListener.cs example.

2004-09-27 Olivier Andrieu <oliv__a@users.sourceforge.net>

* bus/signals.c (bus_match_rule_parse): validate the components
of
match rules (bug #1439).

* dbus/dbus-bus.c (dbus_bus_add_match): add a missing OOM test.

2004-09-24 Olivier Andrieu <oliv__a@users.sourceforge.net>

* doc/dbus-specification.xml: document ServiceOwnerChanged
signal.

* bus/driver.c, bus/driver.h, bus/services.c: Use
ServiceOwnerChanged signal instead of ServiceCreated and

ServiceDeleted.

* bus/dispatch.c: update testcase for the new signal.

2004-09-20 Jon Trowbridge <trow@ximian.com>

Patch from Nat Friedman <nat@novell.com>

* mono/Makefile.am: A number of small build fixes to allow "make distcheck" to succeed.

* mono/example/Makefile.am: "make distcheck" fixes.

* mono/AssemblyInfo.cs.in: When signing the assembly, look for the key in @srcdir@.

* test/Makefile.am: "make distcheck" fixes.

2004-09-17 Olivier Andrieu <oliv__a@users.sourceforge.net>

* dbus/dbus-sysdeps.c (_dbus_user_at_console): fix memleak in OOM.

* doc/busconfig.dtd: update the DTD for the at_console attribute.

* bus/driver.c (bus_driver_handle_hello): correctly handle Hello messages after the first one (bug #1389).

* bus/dispatch.c (check_double_hello_message): add a test case for the double hello message bug.
(check_existent_service_activation): fix check of spawning error.

2004-09-16 David Zeuthen <david@fubar.dk>

* python/dbus_bindings.pyx.in: Add support for int64 and uint64

2004-09-12 David Zeuthen <david@fubar.dk>

Patch from Kay Sievers <kay.sievers@vrfy.org>

* bus/bus.c (bus_context_new):

* bus/bus.h:

* bus/main.c (usage)

(main):

Add commandline option --nofork to override configuration file setting.

2004-09-09 Olivier Andrieu <oliv__a@users.sourceforge.net>

C * dbus/dbus-*.h: remove the ; after DBUS_(BEGIN|END)_DECLS. Some compilers don't like it (bug #974).

2004-09-04 Harald Fernengel <harry@kdevelop.org>

* qt/connection.*: Applied patch by JÃ©rÃ©me Lodewyck <lodewyck@clipper.ens.fr> to integrate an existing connection into the Qt eventloop

2004-08-30 Jon Trowbridge <trow@ximian.com>

* mono/BusDriver.cs: Added. This is a class for interacting with the org.freedesktop.DBus service.

is * mono/Message.cs: Added a mechanism to expose the message that currently being dispatched via the static Message.Current property. Added Message.Sender and Message.Destination properties.

* mono/Handler.cs: Expose the dispatched message via Message.Current when handling method calls.

* mono/Service.cs: Expose the dispatched message via Message.Current when handling signal emissions.

* mono/Connection.cs: Bind dbus_bus_get_base_service via the Connection.BaseService property.

2004-08-28 Havoc Pennington <hp@redhat.com>

* dbus/dbus-userdb.c (_dbus_is_console_user): remove unused variable

More fixes from Steve Grubb

* dbus/dbus-sysdeps.c (_dbus_connect_tcp_socket): fix fd leak (_dbus_listen_tcp_socket): fix fd leak

* dbus/dbus-spawn.c (read_pid, read_ints): move the "again:" for EINTR to a bit lower in the code

2004-08-26 Jon Trowbridge <trow@ximian.com>

* bus/driver.c (bus_driver_handle_service_exists): Respond with TRUE if we are inquiring about the existence of the built-in org.freedesktop.DBus service.

2004-08-25 John Palmieri <johnp@redhat.com>

* bus/config-parser.c: (struct PolicyType): Add POLICY_CONSOLE

(struct Element.d.policy): s/gid_or_uid/gid_uid_or_at_console
(start_busconfig_child): Sets up console element when
<policy at_console=""> is encountered in a policy file
(append_rule_from_element): Convert console elements to console
rules.

* bus/policy.c:

(bus_policy_create_client_policy): Add console rules to the
client

policy based on if the client is at the console

(bus_policy_append_console_rule): New function for adding a
console rule to a policy

(bus_policy_merge): Handle console rule merging

* dbus/dbus-sysdeps.h: Added the DBUS_CONSOLE_DIR constant
where we check for console user files

* dbus/dbus-sysdeps.c:

(_dbus_file_exists): New function which checks if the given
file exists

(_dbus_user_at_console): New function which does the system
specific process of checking if the user is at the console

* dbus/dbus-userdb.c:

(_dbus_is_console_user): New function converts a UID to user name
and then calls the system specific _dbus_user_at_console to
see if the user is at the console and therefor a console user

2004-08-25 Olivier Andrieu <oliv__a@users.sourceforge.net>

* bus/config-parser.c (set_limit):

* bus/dbus-daemon-1.1.in:

* test/data/valid-config-files/many-rules.conf: set the
max_match_rules_per_connection limit from the config file.

* doc/busconfig.dtd: update the DTD.

* bus/driver.c: remove some unused variables.

2004-08-24 Mikael Hallendal <micke@imendio.com>

* dbus/dbus-glib-lowlevel.h: Removed dbus_bus_get_with_g_main
since

it's been replaced by dbus_g_bus_get

2004-08-23 Colin Walters <walters@redhat.com>

Updated SELinux support from Matthew Rickard
<mjricka@epoch.ncsc.mil>

* bus/selinux.h: Prototype bus_selinux_get_policy_root.

* bus/selinux.c: Create a thread for policy reload notification.
(bus_selinux_get_policy_root): Implement.

* bus/config-parser.c (start_busconfig_child)
(bus_config_parser_content): Support SELinux-root relative
inclusion.

* configure.in <HAVE_SELINUX>: Add -lpthread.

* bus/test-main.c (test_pre_hook, test_post_hook): New.
(test_post_hook): Move memory checking into here.
(test_pre_hook, test_post_hook): Move SELinux checks in
here, but conditional on a DBUS_TEST_SELINUX environment
variable. Unfortunately we can't run the SELinux checks
as a normal user, since they won't have any permissions
for /selinux. So this will have to be tested manually
for now, until we have virtualization for most of
libselinux.

2004-08-23 Havoc Pennington <hp@redhat.com>

* dbus/dbus-sysdeps.c (_dbus_change_identity): add setgroups() to
drop supplementary groups, suggested by Steve Grubb

2004-08-20 Colin Walters <walters@redhat.com>

* bus/config-parser.c (start_busconfig_child): Remove some unused
variables.

* bus/selinux.c (bus_selinux_id_table_insert): Avoid compiler
warning.

2004-08-17 Joe Shaw <joeshaw@novell.com>

* configure.in: If --enable-mono is passed in, if we can't find
mono error out.

* mono/Makefile.am: Use /gacutil to install assemblies into the
GAC and not /root.

2004-08-12 Havoc Pennington <hp@redhat.com>

* NEWS: update for 0.22

* configure.in: release 0.22

2004-08-11 Colin Walters <walters@redhat.com>

* tools/dbus-send.c (main, usage): Add --reply-timeout
argument.

2004-08-10 Olivier Andrieu <oliv__a@users.sourceforge.net>

* bus/bus.c (process_config_first_time_only): get rid of an unused
DBusError that was causing a memory leak (bug #989).

* dbus/dbus-keyring.c, dbus/dbus-message.c:
fix compilation on Solaris/Forte C (bug #974)

* bus/main.c (main): plug two minuscule memleaks.

2004-08-10 Havoc Pennington <hp@redhat.com>

* doc/dbus-tutorial.xml: add some more info on GLib bindings

2004-08-09 Havoc Pennington <hp@redhat.com>

* COPYING: switch to Academic Free License version 2.1 instead of
2.0, to resolve complaints about patent termination clause.

2004-07-31 John (J5) Palmieri <johnp@redhat.com>

* README: added documentation for the --enable-python
configure switch.

2004-07-31 Olivier Andrieu <oliv__a@users.sourceforge.net>

* bus/config-parser.c (bus_config_parser_new): fix an invalid
_unref in the SELinux support.

* doc/busconfig.dtd: update DTD for SELinux support.

* bus/config-loader-libxml.c: fix error handler and parser
initialisation/cleanup. OOM test now works with libxml2 HEAD.

* configure.in: remove the warning about libxml2.

* dbus/dbus-bus.c: silence doxygen warning.

2004-07-31 Colin Walters <walters@redhat.com>

* configure.in: Move #error in SELinux check to its own line.

2004-07-31 Olivier Andrieu <oliv__a@users.sourceforge.net>

* dbus/dbus-internals.h (_DBUS_SET_OOM):
* bus/utls.h (BUS_SET_OOM): use dbus_error_set_const instead of
dbus_error_set.

* bus/dispatch.c (check_send_exit_to_service): fix the test case,
broken by the change in the _SET_OOM macros.

2004-07-31 Colin Walters <walters@redhat.com>

* bus/selinux.c <HAVE_SELINUX>: Include utils.h to get BUS_SET_OOM.

2004-07-31 Colin Walters <walters@redhat.com>

* configure.in: Use AC_TRY_COMPILE instead of AC_EGREP_HEADER to correctly detect DBUS__ACQUIRE_SVC. Also add an AC_MSG_CHECKING.

2004-07-24 Havoc Pennington <hp@redhat.com>

SELinux support from Matthew Rickard <mjricka@epoch.ncsc.mil>

* bus/selinux.c, bus/selinux.h: new file encapsulating selinux functionality

* configure.in: add --enable-selinux

* bus/policy.c (bus_policy_merge): add FIXME to a comment

* bus/main.c (main): initialize and shut down selinux

* bus/connection.c: store SELinux ID on each connection, to avoid repeated getting of the string context and converting it into an ID

* bus/bus.c (bus_context_get_policy): new accessor, though it isn't used
(bus_context_check_security_policy): check whether the security context of sender connection can send to the security context of recipient connection

* bus/config-parser.c: add parsing for <selinux> and <associate>

* dbus/dbus-transport.c (_dbus_transport_get_unix_fd): to implement dbus_connection_get_unix_fd()

* dbus/dbus-connection.c (dbus_connection_get_unix_fd): new function, used by the selinux stuff

2004-07-29 Olivier Andrieu <oliv__a@users.sourceforge.net>

* bus/config-loader-libxml.c: complete the implementation of libxml backend for config file loader. Doesn't work with full OOM test yet.

* configure.in: change error when selecting libxml into a warning.

* test/data/invalid-config-files: add two non-well-formed XML files.

- * glib/Makefile.am: libdbus_gtool always uses expat, not libxml.
- * dbus/dbus-transport-unix.c (unix_handle_watch): do not disconnect in case of DBUS_WATCH_HANGUP, several do_reading() may be necessary to read all the buffer. (bug #894)
- * bus/activation.c (bus_activation_activate_service): fix a potential assertion failure (bug #896). Small optimization in the case of auto-activation messages.
- * dbus/dbus-message.c (verify_test_message, _dbus_message_test): add test case for byte-through-vararg bug (#901). patch by Kimmo Härmäläinen.

2004-07-28 Anders Carlsson <andersca@gnome.org>

- * python/dbus.py:
- * python/dbus_bindings.pyx.in:
Add dbus.init_gthreads (), allow emit_signal to pass arguments to the signal.

2004-07-24 Havoc Pennington <hp@redhat.com>

- * AUTHORS: add some people, not really comprehensively, let me know if I missed you

2004-07-24 Havoc Pennington <hp@redhat.com>

- * Makefile.am (DIST_SUBDIRS): add DIST_SUBDIRS, problem solved by Owen
- * test/Makefile.am (DIST_SUBDIRS): here also

2004-07-22 Olivier Andrieu <oliv__a@users.sourceforge.net>

- * dbus/dbus-sysdeps.c (fill_user_info): fix inexistent label name,
breaking build on Solaris, reported by Farhad Saberi on the ML.
- * dbus/dbus-message.c (dbus_message_append_args_valist): fix the va_arg invocation to account for integer promotion in the case of DBUS_TYPE_BYTE (unsigned char is promoted to int). (bug #901)
- * bus/services.c (bus_service_remove_owner): fix bug #902, use _dbus_list_get_first_link, not _dbus_list_get_first.
- * dbus/dbus-bus.c (dbus_bus_service_exists): plug a memory leak.
- * dbus/dbus-object-tree.c (free_subtree_recurse): always null handler functions so that the asserts in _dbus_object_subtree_unref

do not fail.

* dbus/dbus-transport-unix.c (do_reading):
_dbus_transport_queue_messages return value is of type
dbus_bool_t, not DBusDispatchStatus.

2004-07-19 David Zeuthen <david@fubar.dk>

* dbus/dbus-protocol.h: Add DBUS_ERROR_UNIX_PROCESS_ID_UNKNOWN

* bus/dispatch.c:
(check_get_connection_unix_user): Debug says GetProperty; but the
method is called GetConnectionUnixUser
(check_get_connection_unix_process_id): New function
(bus_dispatch_test): Actually call
check_get_connection_unix_user();
also call check_get_connection_unix_process_id()

* bus/driver.c:
(bus_driver_handle_get_connection_unix_process_id): New function,
handles GetConnectionUnixProcessID on the org.freedesktop.DBus
interface

* dbus/dbus-auth.c:
(handle_server_data_external_mech): Set pid from the credentials
obtained from the socket

* dbus/dbus-connection.c:
(dbus_connection_get_unix_process_id): New function

* dbus/dbus-connection.h:
Add prototype for dbus_connection_get_unix_process_id

* dbus/dbus-transport.c:
(_dbus_transport_get_unix_process_id): New function

* dbus/dbus-transport.h:
Add prototype for _dbus_transport_get_unix_process_id

2004-07-19 Olivier Andrieu <oliv__a@users.sourceforge.net>

* dbus/dbus-message.c: Message counter fix, patch by Christian
Hammond <chipx86@gnupdate.org>

2004-07-18 Seth Nickell <seth@gnome.org>

* python/dbus.py:
* python/dbus_bindings.pyx.in:
* python/tests/test-client.py:

Add dbus.ByteArray and dbus_bindings.ByteArray
types so that byte streams can be passed back.

Give jdahlin the heaps of credit that are so rightfully his.

2004-07-12 Seth Nickell <seth@gnome.org>

* python/dbus.py:

Add message argument to the default object_method_handler function.

* python/dbus_bindings.pyx.in:

Automatically return NIL when passed an empty list (we can't pass back a list since lists are typed and we don't have any idea what type the the client intended the list to be... :- ()

2004-07-10 Seth Nickell <seth@gnome.org>

* python/examples/Makefile.am:

Fix distcheck breakage caused by new examples.

2004-07-10 Seth Nickell <seth@gnome.org>

* python/dbus.py:

Add "message" argument to service-side dbus.Object methods. This will break existing services written using the python bindings, but will allow extraction of all the message information (e.g. who its from).

Add improved "object oriented" signal handling/emission.

* python/examples/example-service.py:

Nix this example.

* python/examples/example-signal-emitter.py:

* python/examples/example-signal-recipient.py:

Two new examples that show how to emit and receive signals using the new APIs.

* python/examples/example-signals.py:

* python/examples/gconf-proxy-service.py:

* python/examples/gconf-proxy-service2.py:

Add "message" argument to service methods.

2004-06-28 Kay Sievers <kay.sievers@vrfy.org>

- * bus/driver.c (bus_driver_handle_get_connection_unix_user)
- * dbus/bus.c (dbus_bus_get_unix_user)
- * doc/dbus-specification.xml: implement GetConnectionUnixUser method of org.freedesktop.DBus interface.

- * bus/dispatch.c: test case

2004-06-23 John (J5) Palmieri <johnp@redhat.com>

- * python/Makefile.am: switched include directory from glib/ to dbus/
since dbus-glib.h moved

2004-06-22 Olivier Andrieu <oliv__a@users.sourceforge.net>

- * configure.in: prevent building the gcj stuff and libxml loader since they are broken.

2004-06-20 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-glib-error-enum.h: autogenerate the GError enum codes from the dbus error names

- * glib/dbus-glib.h: move to subdir dbus/ since it's included as dbus/dbus-glib.h and that breakage is now visible due to including dbus/dbus-glib.h in dbus-glib-lowlevel.h

- * glib/dbus-glib.h: s/gproxy/g_proxy/

- * dbus/dbus-shared.h: new header to hold stuff shared with binding APIs

- * dbus/dbus-protocol.h (DBUS_ERROR_*): move errors here rather than dbus-errors.h

- * glib/dbus-glib.h (dbus_set_g_error): move to dbus-glib-lowlevel.h

- * glib/dbus-glib.h: remove dbus/dbus.h from here; change a bunch of stuff to enable this

- * dbus/dbus-glib-lowlevel.h: put dbus/dbus.h here

- * a bunch of other changes with the same basic "separate glib bindings from dbus.h" theme

2004-06-10 Owen Fraser-Green <owen@discobabe.net>

- * dbus-sharp.pc.in: Removed glib-sharp inclusion in Libs.

- * python/examples/Makefile.am: Fixed typo in EXTRA_DIST.

2004-06-09 Olivier Andrieu <oliv__a@users.sourceforge.net>

* bus/driver.c, dbus/dbus-bus.c: use BOOLEAN instead of UINT32 for the reply value of the ServiceExists message.

2004-06-07 John (J5) Palmieri <johnp@redhat.com>

* python/dbus_bindings.pyx.in: No longer need to parse path elements and pass them as arrays of strings. The C API now accepts plain path strings.
(_build_parsed_path): removed

2004-06-07 Havoc Pennington <hp@redhat.com>

* doc/TODO: remove auto-activation item since it's done; sort items by importance/milestone

2004-06-07 Havoc Pennington <hp@redhat.com>

* dbus/dbus-message-builder.c (_dbus_message_data_load): append random signature when using REQUIRED_FIELDS (this hack won't work in the long term)

* dbus/dbus-message.c: change the signature to be a header field, instead of message->signature special-case string. Incremental step forward. Then we can fix up code to send the signature in the message, then fix up code to validate said signature, then fix up code to not put the typecodes inline, etc.
(load_one_message): don't make up the signature after the fact
(decode_header_data): require signature field for the known message types

* dbus/dbus-marshal.c (_dbus_marshall_string_len): new

* dbus/dbus-protocol.h: add DBUS_HEADER_FIELD_SIGNATURE

2004-06-07 Owen Fraser-Green <owen@discobabe.net>

* mono/DBusType/ObjectPath.cs: Renamed PathName argument to Path

* mono/Handler.cs: Updated to follow new path argument for (un-)registering objects.

* mono/example/Makefile.am:

* mono/Makefile.am:

* configure.in: Bumped required version for mono and use new -pkg syntax for deps

2004-06-05 Olivier Andrieu <oliv__a@users.sourceforge.net>

* dbus/dbus-connection.h, dbus/dbus-connection.c: have object path registration functions take the path argument as char* instead of char**.

* dbus/dbus-marshal.h, dbus/dbus-marshal.c
(_dbus_decompose_path):
split off the path decomposition part of
_dbus_demarshal_object_path. Some misc. fixes to silence compiler warnings.

* glib/dbus-gobject.c, test/test-service.c: update accordingly.

2004-06-02 Kristian HÃ¸gsberg <krh@redhat.com>

* dbus/dbus-auth.c: Rewrite auth protocol handling to use a state machine approach. A state is implemented as a function that handles incoming events as specified for that state.

* doc/dbus-specification.xml: Update auth protocol state machine specification to match implementation. Remove some leftover base64 examples.

2004-06-02 Kristian HÃ¸gsberg <krh@redhat.com>

* glib/dbus-gproxy.c, glib/dbus-gmain.c, dbus/dbus-string.c, dbus/dbus-object-tree.c, dbus/dbus-message.c: add comments to quiet doxygen.

* Doxyfile.in: remove deprecated options.

* dbus/dbus-message-handler.c, dbus/dbus-message-handler.h, glib/test-thread.h, glib/test-thread-client.c, glib/test-thread-server.c, glib/test-profile.c, glib/test-dbus-glib.c: remove these unused files.

2004-06-01 Olivier Andrieu <oliv__a@users.sourceforge.net>

* dbus/dbus-object-tree.c
(_dbus_object_tree_dispatch_and_unlock): fix dispatch for non-fallback handlers (bug #684).
(_dbus_object_subtree_new): initialize invoke_as_fallback field.
(find_subtree_recurse): report whether the returned subtree is an exact match or a "fallback" match higher up in the tree.
(object_tree_test_iteration): update test case.

2004-06-01 Seth Nickell <seth@gnome.org>

* python/dbus_bindings.pyx.in:
* python/tests/test-client.py:

Round off basic type support. Add dicts (yay!), and remaining array types.

Make MessageIter more general so it works for dicts too.

Mark all loop variables as C integers.

2004-05-31 Havoc Pennington <hp@redhat.com>

* glib/dbus-gidl.c (method_info_add_arg): keep args sorted with "in" before "out"

* glib/dbus-gobject.c (dbus_type_to_string): move to dbus-gutils.c

* glib/dbus-glib-tool.c (main): set up to have a --self-test option that runs the tests, and start filling in some code including for starters just dumping the interfaces to stdout

* glib/Makefile.am (INCLUDES): define DBUS_LOCALEDIR

* test/data/valid-introspection-files/lots-of-types.xml: test of an example introspection file

* glib/dbus-gparser.c (parser_check_doctype): doctype should be "node" (I think...)

2004-05-31 Seth Nickell <seth@gnome.org>

* python/dbus_bindings.pyx.in:
* python/tests/test-client.py:

Test Suite: 1
Python Bindings: 0

Fix string array memory trashing bug... oops...

2004-05-30 Seth Nickell <seth@gnome.org>

* python/dbus.py:

Add a nicer-but-less-flexible alternate API for handling calls to virtual objects in dbus.ObjectTree.

Screw up the argument order to the dbus.Object constructor for consistency with dbus.ObjectTree (and to make dbus_methods optional for future extension)

* python/examples/Makefile.am:
* python/examples/gconf-proxy-service.py:
* python/examples/gconf-proxy-service2.py:

Alternate implementation of gconf-proxy-service using the nicer dbus.ObjectTree API.

- * python/examples/example-service.py:
- * python/tests/test-server.py

Reverse the argument order to deal with dbus.Object constructor changes.

2004-05-30 Seth Nickell <seth@gnome.org>

- * python/examples/example-client.py:
- * python/examples/example-service.py:

Take it back. Lists seem to work but they're broken in the test suite. Make the base examples use lists (works fine).

2004-05-30 Seth Nickell <seth@gnome.org>

- * python/dbus_bindings.pyx.in:
- * python/tests/test-client.py:

Add some more tests and fix errors that crop up. Unfortunately, currently it seems like marshalling and unmarshalling of lists is completely broken :-)

2004-05-30 Seth Nickell <seth@gnome.org>

- * python/dbus_bindings.pyx.in:

Add support for ObjectPath type.

- * python/dbus.py:

Refactor message handling code to a common function.

- * python/tests/test-client.py:
- * python/tests/test-server.py:

Add tests that check to make sure values of all types can be echoed from a service w/o mangling.

2004-05-29 Seth Nickell <seth@gnome.org>

- * python/dbus.py:

Add ObjectTree class which allows implementation of trees of "virtual" objects. Basically the python wrapper for "register_fallback".

- * python/examples/Makefile.am

- * python/examples/gconf-proxy-client.py:
- * python/examples/gconf-proxy-service.py:

Implement a simple GConf proxy service that supports get/set on string and int GConf keys using the ObjectTree.

2004-05-29 Seth Nickell <seth@gnome.org>

- * python/dbus.py:
- * python/examples/example-client.py:
- * python/examples/example-service.py:
- * python/examples/list-system-services.py:

Add SessionBus, SystemBus and ActivationBus classes so you don't need to know the special little BUS_TYPE flag.

2004-05-29 Havoc Pennington <hp@redhat.com>

* bus/config-parser.c (process_test_valid_subdir): temporarily stop testing config parser OOM handling, since expat has issues <http://freedesktop.org/pipermail/dbus/2004-May/001153.html>

* bus/dbus-daemon-1.1.in: change requested_reply to send_requested_reply/receive_requested_reply so we can send the replies, not just receive them.

* bus/config-parser.c: parse the new send_requested_reply/receive_requested_reply

* bus/policy.c (bus_client_policy_check_can_send): add requested_reply argument and use it

* bus/bus.c (bus_context_check_security_policy): pass through requested_reply status to message send check

* bus/system.conf.in: adapt to requested_reply change

2004-05-28 Havoc Pennington <hp@redhat.com>

* test/glib/test-service-glib.c (main): remove unused variable

* glib/dbus-gidl.c (base_info_ref): fix a silly compiler warning

* dbus/dbus-auth.h (enum): remove AUTHENTICATED_WITH_UNUSED_BYTES from the enum, no longer in use.

* dbus/dbus-sysdeps.h: include config.h so DBUS_VA_COPY actually works right.

* dbus/dbus-message.c: add various _dbus_return_val_if_fail for whether error_name passed in is a valid error name.

2004-05-28 John (J5) Palmieri <johnp@redhat.com>

* dbus/dbus-message.c (dbus_message_get_args): Added support for OBJECT_PATH and OBJECT_PATH_ARRAY

2004-05-28 Seth Nickell <seth@gnome.org>

* python/examples/Makefile.am:

Forget to add Makefile.am. Do not pass go.

2004-05-28 Michael Meeks <michael@ximian.com>

* glib/dbus-gvalue.c (dbus_gvalue_marshal, dbus_gvalue_demarshal):
fix no int64 case.

* dbus/dbus-string.c (_dbus_string_parse_basic_type): impl.

* dbus/dbus-message.c (_dbus_message_iter_get_basic_type),
(_dbus_message_iter_get_basic_type_array): impl.
drastically simplify ~all relevant _get methods to use these.
(_dbus_message_iter_append_basic_array),
(dbus_message_iter_append_basic): impl
drastically simplify ~all relevant _append methods to use these.

* dbus/dbus-message-builder.c (parse_basic_type)
(parse_basic_array, lookup_basic_type): impl.
(_dbus_message_data_load): prune scads of duplicate /
cut & paste coding.

* dbus/dbus-marshal.c (_dbus_demarshal_basic_type_array)
(_dbus_demarshal_basic_type): implement,
(demarshal_and_validate_len/arg): beef up debug.
(_dbus_marshal_basic_type, _dbus_marshal_basic_type_array): impl.

2004-05-27 Seth Nickell <seth@gnome.org>

* configure.in:
* python/Makefile.am:

Include the example python apps in the tarball.

* python/examples/list-system-services.py

Add a python new example that fetches the list of services
from the system bus.

2004-05-27 Seth Nickell <seth@gnome.org>

* python/dbus.py:

* python/dbus_bindings.pyx.in:

Fix failure to notify that a signal was not handled,
resulted in hung functions.

2004-05-25 Colin Walters <walters@redhat.com>

* tools/dbus-monitor.c (main): Monitor all types of messages.

2004-05-23 Owen Fraser-Green <owen@discobabe.net>

* mono/Handler.cs, mono/Service.cs: Added UnregisterObject method
which unregisters the object path and disposes the handler.

2004-05-23 Kristian HÃgsberg <krh@redhat.com>

Patch from Timo TerÃs <ext-timo.teras@nokia.com> (#614):

* dbus/dbus-message.c (dbus_message_iter_get_args_valist): Swap
operands to && so we call dbus_message_iter_next () for the
last
argument also.

2004-05-21 Olivier Andrieu <oliv__a@users.sourceforge.net>

* dbus/dbus-object-tree.c
(_dbus_object_tree_list_registered_unlock, lookup_subtree):
return
children even if the requested path isn't registered.
(object_tree_test_iteration): test object_tree_list_registered.

* configure.in: undefine HAVE_ABSTRACT_SOCKETS instead of
defining
it to 0.

2004-05-20 Kristian HÃgsberg <krh@redhat.com>

* doc/TODO: Remove resolved items.

* bus/expirelist.h (struct BusExpireList): remove unused n_items
field.

* bus/connection.c (bus_connections_expect_reply): Enforce the
per-connection limit on pending replies.

Patch from Jon Trowbridge <trow@ximian.com>:

* bus/main.c (setup_reload_pipe): Added. Creates a pipe and sets
up a watch that triggers a config reload when one end of the pipe
becomes readable.

(signal_handler): Instead of doing the config reload in our
SIGHUP

handler, just write to the reload pipe and let the associated watch handle the reload when control returns to the main loop.

* bus/driver.c (bus_driver_handle_reload_config): Added. Implements a ReloadConfig method for requesting a configuration file reload via the bus driver.

2004-05-19 Owen Fraser-Green <owen@discobabe.net>

* HACKING: Updated release instructions concerning the wiki page.

2004-05-18 Kristian HÃ,gsberg <krh@redhat.com>

* dbus/dbus-auth.c (client_try_next_mechanism): Remove logic to filter against auth->allowed_mechs; we only add allowed mechs in record_mechanisms().

* dbus/dbus-auth-script.c (_dbus_auth_script_run): Add an ALLOWED_MECHS to auth-script format so we can set the list of allowed mechanisms.

* data/auth/client-out-of-mechanisms.auth-script: New test to check client disconnects when it is out of mechanisms to try.

* dbus/dbus-auth.c (process_command): Remove check for lines longer than 1 MB; we only buffer up maximum 16 kB.

* dbus/dbus-transport.c, dbus/dbus-transport-unix.c, dbus/dbus-auth-script.c, dbus/dbus-auth.c, dbus/dbus-auth.h: Remove auth state AUTHENTICATED_WITH_UNUSED_BYTES, instead always assume there might be unused bytes.

* dbus/dbus-auth.c (_dbus_auth_do_work): Remove check for client-out-of-mechs, it is handled in process_reject(). Move check for max failures to send_rejected(), as it's a server-only thing.

* dbus/dbus-auth.c: Factor out protocol reply code into functions send_auth(), send_data(), send_rejected(), send_error(), send_ok(), send_begin() and send_cancel().

2004-05-17 Kristian HÃ,gsberg <krh@redhat.com>

Remove base64 encoding, replace with hex encoding. Original patch from trow@ximian.com, added error handling.

* dbus/dbus-string.c (_dbus_string_base64_encode) (_dbus_string_base64_decode): Remove. (_dbus_string_hex_decode): Add end_return argument so we can distinguish between OOM and invalid hex encoding. (_dbus_string_test): Remove base64 tests and add test case for invalid hex.

* dbus/dbus-keyring.c, dbus/dbus-auth-script.c, dbus/dbus-auth.c:
Replace base64 with hex.

* test/data/auth/invalid-hex-encoding.auth-script: New test case
for invalid hex encoded data in auth protocol.

2004-05-17 Olivier Andrieu <oliv__a@users.sourceforge.net>

* dbus/dbus-connection.c (check_for_reply_unlocked): plug a
memory
leak.

2004-05-15 Owen Fraser-Green <owen@discobabe.net>

* mono/dbus-sharp.dll.config.in: Added for GAC
* mono/dbus-sharp.snk: Added for GAC
* mono/Assembly.cs.in: Added for GAC
* mono/Makefile.am: Changes for GAC installation
* configure.in: Added refs for dbus-sharp.dll.config.in and
Assembly.cs.in. More fixes for mono testing
* mono/example/Makefile.am: Changed var to CSC
* Makefile.am: Changed flag name to DBUS_USE_CSC

2004-05-15 Owen Fraser-Green <owen@discobabe.net>

* mono/Makefile.am: Added SUBDIRS for docs. Changed SUBDIRS order
* mono/doc/*: Added documentation framework
* configure.in: Added monodoc check
* README: Added description of mono configure flags

2004-05-11 John (J5) Palmieri <johnp@redhat.com>:

* doc/dbus-specification.xml: Added a "Required" column to the
header fields table and changed the "zero or more" verbage in
the above paragraph to read "The header must contain the required
named header fields and zero or more of the optional named header
fields".
* test/data/invalid-messages/*.message: Added the required PATH
named header field to the tests so that they don't fail on
'Missing path field'

2004-05-07 John (J5) Palmieri <johnp@redhat.com>

* python/dbus-bindings.pyx.in: Stopped the bindings from trashing
the stack by implicitly defining variable and parameter types and
removing the hack of defining C pointers as python objects and
later
casting them.

2004-05-02 Owen Fraser-Green <owen@discobabe.net>

* mono/Makefile.am: Removed test-dbus-sharp.exe from all target

2004-05-01 Owen Fraser-Green <owen@discobabe.net>

- * mono/DBusType/Dict.cs: Handle empty dicts
- * mono/DBusType/Array.cs: Handle empty arrays
- * mono/Arguments.cs: Handle empty arguments

2004-04-30 Owen Fraser-Green <owen@discobabe.net>

- * dbus-sharp.pc.in: Modified to include include Libs and Requires field

2004-04-25 Kristian HÃ,gsberg <krh@redhat.com>

- * test/data/valid-messages/standard-*.message: Update message test scripts to new header field names.

2004-04-22 John (J5) Palmieri <johnp@redhat.com>

- * test/break-loader.c (randomly_do_n_things): tracked down buffer overflow to times_we_did_each_thing array which would chop off the first character of the failure_dir string. Increased the size of the array to 7 to reflect the number of random mutation functions we have.

2004-04-21 Kristian HÃ,gsberg <krh@redhat.com>

- * dbus/dbus-server-unix.c (unix_finalize): Don't unref unix_server->watch here, it is unreffed in disconnect. (_dbus_server_new_for_tcp_socket): convert NULL host to "localhost" here so we don't append NULL to address.
- * dbus/dbus-server.c (_dbus_server_test): Add test case for various addresses, including tcp with no explicit host.

2004-04-21 Olivier Andrieu <oliv__a@users.sourceforge.net>

- * dbus/dbus-message.c (decode_header_data, decode_string_field): fix incorrect setting of .name_offset in the HeaderField (it was off by two bytes, positioned right after the name and typecode)
- * bus/bus.c (bus_context_new, bus_context_unref): test before calling dbus_server_free_data_slot and _dbus_user_database_unref in case of an error.
- * tools/Makefile.am: add \$(DBUS_GLIB_TOOL_LIBS), xml libs needed by libdbus-gtool.

2004-04-19 Kristian HÃ,gsberg <krh@redhat.com>

* dbus/dbus-transport-unix.c (unix_do_iteration): Rewrite to use _dbus_poll() instead of select().

2004-04-15 Jon Trowbridge <trow@ximian.com>

* bus/main.c (signal_handler): Reload the configuration files on SIGHUP.
(main): Set up our SIGHUP handler.

* bus/bus.c (struct BusContext): Store the config file, user and fork flag in the BusContext.
(process_config_first_time_only): Added. Contains the code (previously in bus_context_new) for setting up the BusContext

from

the BusConfigParser that should only be run the first time the config files are read.

(process_config_every_time): Added. Contains the code (previously in bus_context_new) for setting up the BusContext from the BusConfigParser that should be run every time the config files are read.

(load_config): Added. Builds a BusConfigParser from the config files and passes the resulting structure off to process_config_first_time_only (assuming this is the first time) and process_config_every_time.

(bus_context_new): All of the config-related code has been moved to process_config_first_time_only and process_config_every_time. Now this function just does the non-config-related initializations

and calls load_config.

(bus_context_reload_config): Added.

2004-04-15 Olivier Andrieu <oliv__a@users.sourceforge.net>

* bus/driver.c (bus_driver_handle_get_service_owner): implement a GetServiceOwner method.

* doc/dbus-specification.xml: document it.

* dbus/dbus-errors.h: add a 'ServiceHasNoOwner' error.

* glib/dbus-gproxy.c (dbus_gproxy_new_for_service_owner): implement, using the bus GetServiceOwner method.

* test/glib/test-dbus-glib.c:

use dbus_gproxy_new_for_service_owner so that we can receive the signal.

2004-04-15 John (J5) Palmieri <johnp@redhat.com>

* dbus/dbus-internals.c, dbus/dbus-message-builder.c, dbus/dbus-message.c, dbus/dbus-protocol.h

(DBUS_HEADER_FIELD_SERVICE): renamed
DBUS_HEADER_FIELD_DESTINATION

* dbus/dbus-internals.c, dbus/dbus-message-builder.c,
dbus/dbus-message.c, dbus/dbus-protocol.h
(DBUS_HEADER_FIELD_SENDER_SERVICE): renamed
DBUS_HEADER_FIELD_SENDER

* dbus/dbus-internals.c (_dbus_header_field_to_string):
DBUS_HEADER_FIELD_DESTINATION resolves to "destination"
DBUS_HEADER_FIELD_SENDER resolves to "sender"

* doc/dbus-specification.xml (Header Fields Table):
s/SERVICE/DESTINATION
s/SENDER_SERVICE/SENDER

2004-04-14 Olivier Andrieu <oliv__a@users.sourceforge.net>

* test/glib/test-dbus-glib.c (timed_exit): fail the test after
a few seconds.

2004-04-13 Michael Meeks <michael@ximian.com>

* glib/dbus-gobject.c (handle_introspect): split out
(introspect_properties): this.
(handle_introspect): implement this.

* test/glib/Makefile.am: use the absolute path so the bus
daemon's chdir ("/") doesn't kill us dead.

* configure.in: subst ABSOLUTE_TOP_BUILDDIR

2004-04-12 Jon Trowbridge <trow@ximian.com>

* bus/config-parser.c (struct BusConfigParser): Added
included_files field.
(seen_include): Added. Checks whether or not a file has already
been included by any parent BusConfigParser.
(bus_config_parser_new): Copy the parent's included_files.
(include_file): Track which files have been included, and fail on
circular inclusions.
(process_test_valid_subdir): Changed printf to report if we are
testing valid or invalid conf files.
(all_are_equiv): Changed printf to be a bit clearer about
what we are actually doing.
(bus_config_parser_test): Test invalid configuration files.

2004-04-09 Jon Trowbridge <trow@ximian.com>

* bus/config-parser.c (bus_config_parser_new): Added a 'parent'

argument. If non-null, the newly-constructed BusConfigParser will be initialized with the parent's BusLimits instead of the default values.

(include_file): When including a config file, pass in the current parser as the parent and then copy the BusLimits from the included BusConfigParser pack to the current parser.
(process_test_valid_subdir): Renamed from process_test_subdir.
(process_test_equiv_subdir): Added. Walks through a directory, descending into each subdirectory and loading the config files it finds there. If any subdirectory contains two config files that don't produce identical BusConfigParser structs, fail. For now, the BusConfigParser's BusPolicies are not compared.
(bus_config_parser_test): Call both process_test_valid_subdir and process_test_equiv_subdir.

* bus/config-loader-libxml.c (bus_config_load): Take a parent argument and pass it along to the call to bus_config_parser_new. Also made a few small changes to allow this code to compile.

* bus/config-loader-expat.c (bus_config_load): Take a parent argument and pass it along to the call to bus_config_parser_new.

* bus/bus.c (bus_context_new): Load the config file with a NULL parent argument.

2004-03-29 Michael Meeks <michael@ximian.com>

* glib/dbus-gobject.c (introspect_properties): split out, fix mangled 'while' flow control.
(introspect_signals): implement.
(handle_introspect): update.

2004-03-29 Michael Meeks <michael@ximian.com>

* glib/dbus-gobject.c (set_object_property): split out / re-work, use the property type, and not the message type(!)
(get_object_property): ditto.

* glib/dbus-gvalue.c (dbus_gvalue_demarshal),
(dbus_gvalue_marshal): make this code re-usable, needed for signals too, also on both proxy and server side. Re-write for more efficiency / readability.

2004-03-29 Michael Meeks <michael@ximian.com>

* dbus/dbus-message.c
(dbus_message_new_error_printf): impl.

* dbus/dbus-connection.c
(dbus_connection_unregister_object_path): fix warning.

* configure.in: fix no-mono-installed situation.

2004-03-27 Havoc Pennington <hp@redhat.com>

Patch from Timo Teräs:

* tools/dbus-send.c (main): if --print-reply, assume type is method call; support boolean type args

* dbus/dbus-connection.c (dbus_connection_send_with_reply): fix a bunch of memleak and logic bugs

2004-03-23 Owen Fraser-Green <owen@discobabe.net>

* mono/Arguments.cs:
* mono/Introspector.cs:
* mono/Handler.cs:
* mono/InterfaceProxy.cs:
* mono/Message.cs
* mono/ProxyBuilder.cs:
* mono/Service.cs:

Added InterfaceProxy class to avoid building proxies for every object.

* dbus-message.h:
* dbus-message.c (dbus_message_append_args_valist)
(dbus_message_iter_get_object_path)
(dbus_message_iter_get_object_path_array)
(dbus_message_iter_append_object_path)
(dbus_message_iter_append_object_path_array):
Added object_path iter functions to handle OBJECT_PATH arguments

2004-03-23 Owen Fraser-Green <owen@discobabe.net>

First checkin of mono bindings.

* configure.in:

* Makefile.am:

Build stuff for the bindings

* dbus-sharp.pc.in: Added for pkgconfig

2004-03-21 Havoc Pennington <hp@redhat.com>

* test/test-service.c (main): remove debug spew

2004-03-21 Olivier Andrieu <oliv__a@users.sourceforge.net>

* dbus/dbus-marshal.c (_dbus_marshal_validate_arg): accept empty arrays

* dbus/dbus-message.h, bus/dbus-message.c
(dbus_message_iter_init)
(dbus_message_iter_init_array_iterator)

(dbus_message_iter_init_dict_iterator): return a dbus_bool_t to indicate whether the iterator is empty

* dbus/dbus-pending-call.c, dbus/dbus-server.c: silence compiler warnings

2004-03-19 Havoc Pennington <hp@redhat.com>

* NEWS: 0.21 updates

* configure.in: 0.21

* doc/Makefile.am: add all XMLTO usage to DBUS_XML_DOCS_ENABLED

* python/Makefile.am: change to avoid dist of dbus_bindings.c so you don't need pyrex to make dist

* qt/Makefile.am (libdbus_qt_1_la_SOURCES): add integrator.h to sources; run moc

2004-03-18 Richard Hult <richard@imendio.com>

* dbus/dbus-message.c (dbus_message_get_auto_activation), (dbus_message_set_auto_activation): Add doxygen docs.

2004-03-16 Richard Hult <richard@imendio.com>

* bus/activation.c: (bus_activation_service_created), (bus_activation_send_pending_auto_activation_messages), (bus_activation_activate_service):
* bus/activation.h:
* bus/dispatch.c: (bus_dispatch), (check_nonexistent_service_auto_activation), (check_service_auto_activated), (check_segfault_service_auto_activation), (check_existent_service_auto_activation), (bus_dispatch_test):
* bus/driver.c: (bus_driver_handle_activate_service):
* bus/services.c: (bus_registry_acquire_service):
* dbus/dbus-message.c: (dbus_message_set_auto_activation), (dbus_message_get_auto_activation):
* dbus/dbus-message.h:
* dbus/dbus-protocol.h: Implement auto-activation.

* doc/dbus-specification.xml: Add auto-activation to the spec.

2004-03-12 Olivier Andrieu <oliv__a@users.sourceforge.net>

* dbus/dbus-marshal.c (_dbus_marshal_get_arg_end_pos): fix a bug with CUSTOM types.

* dbus/dbus-message.c (message_iter_test, _dbus_message_test):

add

a unit test for this bug (used to fail).

2004-03-12 Mikael Hallendal <micke@imendio.com>

```
* bus/activation.c:
(babysitter_watch_callback): notify all pending activations
waiting for
    the same exec that the activation failed.
(bus_activation_activate_service): shortcut the activation if we
    already waiting for the same executable to start up.
```

2004-03-12 Mikael Hallendal <micke@imendio.com>

```
* bus/activation.c:
- Added service file reloading.
  Each service files directory is kept in an hash table in
  BusActivation and each BusActivationEntry knows what .service-
file it
  was read from. So when you try to activate a service the bus
will
  check if it's been updated, removed or if new .service-files
has
  been installed.
- Test code at the bottom for the service file reloading.
* bus/test-main.c: (main):
* bus/test.h:
- added service reloading test.
* dbus/dbus-sysdeps.c:
* dbus/dbus-sysdeps.h: (_dbus_delete_directory): Added.
```

2004-03-08 Michael Meeks <michael@ximian.com>

```
* dbus/dbus-connection.c (_dbus_connection_block_for_reply):
bail immediately if disconnected, to avoid busy loop.

* dbus/dbus-message.c (dbus_message_iter_get_args_valist):
cleanup cut/paste/inefficiency.
```

2004-03-01 David Zeuthen <david@fubar.dk>

```
* dbus/dbus-string.c (_dbus_string_append_printf_valist): Fix a
bug where args were used twice. This bug resulted in a segfault
on a Debian/PPC system when starting the messagebus daemon.
Include
  dbus-sysdeps.h for DBUS_VA_COPY

* dbus/dbus-sysdeps.h: Define DBUS_VA_COPY if neccessary. From
GLib

* configure.in: Check for va_copy; define DBUS_VA_COPY to the
appropriate va_copy implementation. From GLib
```

2004-02-24 Joe Shaw <joe@ximian.com>

* bus/services.c (bus_registry_acquire_service): We need to pass in the service name to dbus_set_error() to prevent a crash.

2003-12-26 Anders Carlsson <andersca@gnome.org>

* AUTHORS: Reveal my True identity.

2003-12-17 Mikael Hallendal <micke@imendio.com>

* dbus/dbus-message.c: (dbus_message_append_args_valist):
- Added case for DBUS_TYPE_BYTE, patch from Johan Hedberg.

2003-12-13 Mikael Hallendal <micke@imendio.com>

* doc/TODO: Added not about better error check of configuration files.

2003-12-02 Richard Hult <richard@imendio.com>

* Update AFL version to 2.0 throughout the source files to reflect the update that was done a while ago.

2003-12-02 Richard Hult <richard@imendio.com>

* dbus/dbus-message.c (dbus_message_iter_append_dict): Set wrote_dict_key to FALSE on the iter that the dict is appended to, just like when appending other types. Fixes a bug where a dict couldn't be put inside a dict.
(dbus_message_iter_append_dict_key): Fix typo in warning message.
(message_iter_test, _dbus_message_test): Add test case for dict inside dict.

2003-12-01 David Zeuthen <david@fubar.dk>

* python/dbus.py: Add the actual message when calling the reciever of a signal such that parameters can be inspected. Add the method remove_signal_receiver

2003-11-26 Mikael Hallendal <micke@imendio.com>

* bus/*.ch:
* dbus/*.ch:
* glib/*.ch: Made ref functions return the pointer

2003-11-25 Zack Rusin <zack@kde.org>

* qt/integrator.h, qt/integrator.cpp: Adding handling of DBusServer,

* qt/server.h, qt/server.cpp, qt/Makefile.am: Adding DBusServer wrappers,

* qt/connection.h, qt/connection.cpp: Adjusting to changes in the Integrator and to better fit with the server,

2003-11-24 Zack Rusin <zack@kde.org>

* qt/connection.h, qt/connection.cpp: removing initDbus method since the integrator handles it now

* qt/integrator.h, qt/integrator.cpp: reworking handling of timeouts, since QTimer wasn't really meant to be used the way DBusTimeout is

2003-11-24 Zack Rusin <zack@kde.org>

* qt/integrator.h, qt/integrator.cpp, Makefile.am: Adding Integrator class which integrates D-BUS with the Qt event loop,

* qt/connection.h, qt/connection.cpp: Move all the code which was dealing with D-BUS integration to the Integrator class, and start using Integrator,

2003-11-23 Zack Rusin <zack@kde.org>

* qt/connection.h, qt/connection.cpp: Adding the DBusConnection wrapper

* qt/message.h, qt/message.cpp: updating to the current D-BUS api, switching namespaces to DBusQt, reworking the class,

* Makefile.cvs: switching dependencies so that it matches KDE schematics,

* qt/Makefile.am: adding connection.{h,cpp} and message.{h,cpp} to the library

2003-11-19 Havoc Pennington <hp@redhat.com>

* NEWS: update

* configure.in: bump version to 0.20

* configure.in (have_qt): add yet another place to look for qt (someone hand trolltech a .pc file...)

2003-11-01 Havoc Pennington <hp@redhat.com>

* doc/dbus-specification.xml: add state machine docs on the auth protocol; just a first draft, I'm sure it's wrong.

2003-10-28 David Zeuthen <david@fubar.dk>

* python/dbus_bindings.pyx.in: add get_dict to handle dictionaries
return types. Fixup TYPE_* to reflect changes in dbus/dbus-protocol.h

2003-10-28 Havoc Pennington <hp@redhat.com>

* dbus/dbus-message.c (get_next_field): delete unused function

2003-10-28 Havoc Pennington <hp@redhat.com>

* bus/expirelist.c (do_expiration_with_current_time): detect failure of the expire_func due to OOM

* bus/connection.c (bus_pending_reply_expired): return FALSE on OOM

* bus/dispatch.c (check_send_exit_to_service): fix to handle the NoReply error that's now created by the bus when the service exits

2003-10-28 Havoc Pennington <hp@redhat.com>

* dbus/dbus-message.c (_dbus_message_test): enable and fix the tests for set_path, set_interface, set_member, etc.

* dbus/dbus-string.c (_dbus_string_insert_bytes): allow 0 bytes

* dbus/dbus-message.c (set_string_field): always just delete and re-append the field; accept NULL for deletion
(re_align_fields_recurse): reimplement

2003-10-26 Havoc Pennington <hp@redhat.com>

* dbus/dbus-connection.c: fix docs to properly describe the disconnected message
(_dbus_connection_notify_disconnected): remove this function; we can't synchronously add the disconnected message, we have to do it after we've queued any remaining real messages
(_dbus_connection_get_dispatch_status_unlocked): queue the disconnect message only if the transport has finished queueing all
its real messages and is disconnected.
(dbus_connection_disconnect): update the dispatch status here

2003-10-22 Havoc Pennington <hp@redhat.com>

- * bus/bus.c (bus_context_check_security_policy): fix up assertion
- * bus/connection.c (bus_transaction_send_from_driver): set the destination to the connection's base service

2003-10-20 Havoc Pennington <hp@redhat.com>

hmm, make check is currently not passing.

- * doc/dbus-specification.xml: add requirement that custom type names follow the same rules as interface names.
- * dbus/dbus-protocol.h: change some of the byte codes, to avoid duplication and allow 'c' to be 'custom'; dict is now 'm' for 'map'
- * doc/dbus-specification.xml: update type codes to match dbus-protocol.h, using the ASCII byte values. Rename type NAMED to
CUSTOM. Add type OBJECT_PATH to the spec.

2003-10-17 Havoc Pennington <hp@redhat.com>

- * bus/driver.c (create_unique_client_name): use "." as separator in base service names instead of '-'
- * dbus/dbus-string.c (_dbus_string_get_byte): allow getting nul byte at the end of the string
- * dbus/dbus-internals.h (_DBUS_LIKELY, _DBUS_UNLIKELY): add optimization macros since string validation seems to be a slow point.
- * doc/dbus-specification.xml: restrict valid service/interface/member/error names. Add test suite code for the name validation.
- * dbus/dbus-string.c: limit service/interface/member/error names to [0-9][A-Z][a-z]_
- * dbus/dbus-connection.c (dbus_connection_dispatch): add missing format arg to verbose spew
- * glib/dbus-gproxy.c (dbus_gproxy_call_no_reply): if not out of memory, return instead of g_error
- * test/test-service.c (path_message_func): support emitting a signal on request
- * dbus/dbus-bus.c (init_connections_unlocked): only fill in

activation bus type if DBUS_BUS_ACTIVATION was set; default to assuming the activation bus was the session bus so that services started manually will still register.

(init_connections_unlocked): fix so that in OOM situation we get the same semantics when retrying the function

* test/test-service.c (main): change to use path registration, to test those codepaths; register with DBUS_BUS_ACTIVATION rather than DBUS_BUS_SESSION

2003-10-16 Havoc Pennington <hp@redhat.com>

* glib/dbus-gtest-main.c: bracket with #ifdef DBUS_BUILD_TESTS

* Makefile.am (GCOV_DIRS): remove "test", we don't care about test

coverage of the tests

(coverage-report.txt): don't move the .da and .bbg files around

2003-10-16 Havoc Pennington <hp@redhat.com>

* bus/bus.c (struct BusContext): remove struct field I didn't mean

to put there

2003-10-16 Havoc Pennington <hp@redhat.com>

* bus/connection.c (bus_pending_reply_expired): either cancel or execute, not both

(bus_connections_check_reply): use unlink, not remove_link, as we don't want to free the link; fixes double free mess

* dbus/dbus-pending-call.c (dbus_pending_call_block): fix in case where no reply was received

* dbus/dbus-connection.c

(_dbus_pending_call_complete_and_unlock):

fix a refcount leak

* bus/signals.c (match_rule_matches): add special cases for the bus driver, so you can match on sender/destination for it.

* dbus/dbus-sysdeps.c (_dbus_abort): print backtrace if DBUS_PRINT_BACKTRACE is set

* dbus/dbus-internals.c: add pid to assertion failure messages

* dbus/dbus-connection.c: add message type code to the debug spew

* glib/dbus-gproxy.c (gproxy_get_match_rule): match rules want sender=foo not service=foo

- * dbus/dbus-bus.c (dbus_bus_get): if the activation bus is the session bus but DBUS_SESSION_BUS_ADDRESS isn't set, use DBUS_ACTIVATION_ADDRESS instead
- * bus/activation.c: set DBUS_SESSION_BUS_ADDRESS, DBUS_SYSTEM_BUS_ADDRESS if appropriate
- * bus/bus.c (bus_context_new): handle OOM copying bus type into context struct
- * dbus/dbus-message.c (dbus_message_iter_get_object_path): new function
(dbus_message_iter_get_object_path_array): new function (half finished, disabled for the moment)
- * glib/dbus-gproxy.c (dbus_gproxy_end_call): properly handle DBUS_MESSAGE_TYPE_ERROR
- * tools/dbus-launch.c (babysit): support DBUS_DEBUG_OUTPUT to avoid redirecting stderr to /dev/null
(babysit): close stdin if not doing the "exit_with_session" thing
- * dbus/dbus-sysdeps.c (_dbus_become_daemon): delete some leftover debug code; change DBUS_DEBUG_OUTPUT to only enable stderr, not stdout/stdin, so things don't get confused
- * bus/system.conf.in: fix to allow replies, I modified .conf instead of .conf.in again.

2003-10-14 David Zeuthen <david@fubar.dk>

- * python/dbus_bindings.pyx.in (MessageIter.get): fixed typo in argtype to arg_type when raising unknown arg type exception. Changed type list to reflect the changes in dbus-protocol.h so the bindings actually work.

2003-10-14 Havoc Pennington <hp@redhat.com>

- * test/decode-gcov.c: support gcc 3.3 also, though gcc 3.3 seems to have a bug keeping it from outputting the .da files sometimes
(string_get_string): don't append garbage nul bytes to the string.

2003-10-15 Seth Nickell <seth@gnome.org>

- * python/Makefile.am:
Include dbus_h_wrapper.h in the dist tarball.

2003-10-14 Havoc Pennington <hp@redhat.com>

- * bus/bus.c (bus_context_check_security_policy): revamp this to

work more sanely with new policy-based requested reply setup

- * bus/connection.c (bus_transaction_send_from_driver): set bus driver messages as no reply

- * bus/policy.c (bus_client_policy_check_can_receive): handle a requested_reply attribute on allow/deny rules

- * bus/system.conf: add <allow requested_reply="true"/>

- * bus/driver.c (bus_driver_handle_message): fix check for replies sent to the bus driver, which was backward. How did this ever

work

at all though? I think I'm missing something.

- * dbus/dbus-message.c (decode_header_data): require error and method return messages to have a reply serial field to be valid
- (_dbus_message_loader_queue_messages): break up this function; validate that reply serial and plain serial are nonzero; clean up the OOM/error handling.

- (get_uint_field): don't return -1 from this

- (dbus_message_create_header): fix signed/unsigned bug

- * bus/connection.c (bus_connections_expect_reply): save serial of the incoming message, not reply serial

2003-10-14 Havoc Pennington <hp@redhat.com>

- * bus/connection.c: implement pending reply tracking using BusExpireList

- * bus/bus.c (bus_context_check_security_policy): verify that a reply is pending in order to allow a reply to be sent. Deny messages of unknown type.

- * bus/dbus-daemon-1.1.in: update to mention new resource limits

- * bus/bus.c (bus_context_get_max_replies_per_connection): new
- (bus_context_get_reply_timeout): new

2003-10-13 Seth Nickell <seth@gnome.org>

- * python/Makefile.am:

- Pass "make distcheck": remove a couple files from DIST_FILES that weren't included in the final version.

2003-10-12 Havoc Pennington <hp@pobox.com>

Added test code that 1) starts an actual bus daemon and 2) uses

DBusGProxy; fixed bugs that were revealed by the test. Lots

more testing possible, but this is the basic framework.

* glib/dbus-gproxy.c (dbus_gproxy_manager_unregister): remove empty proxy lists from the proxy list hash

* dbus/dbus-message.c (dbus_message_iter_get_args_valist): add a couple of return_if_fail checks

* dbus/dbus-pending-call.c (_dbus_pending_call_new): use dbus_new0 to allocate, so everything is cleared to NULL as it should be.

* glib/dbus-gmain.c (dbus_connection_setup_with_g_main): pass source as data to dbus_connection_set_timeout_functions() as the timeout functions expected

* test/glib/run-test.sh: add a little script to start up a message bus and run tests using it

* tools/dbus-launch.1: updates

* tools/dbus-launch.c (main): add --config-file option

* tools/dbus-launch.c (main): remove confusing else if (runprog) that could never be reached.

* dbus/dbus-message.c (dbus_message_new_method_return) (dbus_message_new_error, dbus_message_new_signal): set the no-reply-expected flag on all these. Redundant, but may as well be consistent.

2003-10-11 Havoc Pennington <hp@pobox.com>

* test/decode-gcov.c (function_solve_graph): make broken block graph a nonfatal error since it seems to be broken. Need to debug this.

* dbus/dbus-marshal.c (_dbus_type_is_valid): new function since we can't just check type > INVALID < LAST anymore

* dbus/dbus-message.c (dbus_message_get_signature): new function (dbus_message_has_signature): new function (struct DBusMessage): add signature field (right now it isn't sent over the wire, just generated on the fly) (dbus_message_copy): copy the signature, and init strings to proper length to avoid some reallocs (dbus_message_iter_init_array_iterator): return void, since it can't fail

(dbus_message_iter_init_dict_iterator): return void since it
can't fail
(_dbus_message_loader_queue_messages): add silly temporary hack
to
fill in message->signature on load

- * dbus/dbus-protocol.h: change DBUS_TYPE_* values to be ASCII characters, so they are relatively human-readable.

2003-10-11 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-message.c (_dbus_message_test): add more test coverage, but #if 0 for now since they uncover a bug not fixed yet; I think in re_align_field_recurse()
(re_align_field_recurse): add FIXME about broken assertion
- * dbus/dbus-sysdeps.c (_dbus_sysdeps_test): add more test coverage
- * bus/connection.c: share a couple code bits with expirelist.c
- * bus/expirelist.h, bus/expirelist.c: implement a generic expire-items-after-N-seconds facility, was going to share between expiring connections and replies, decided not to use for expiring connections for now.
- * COPYING: include AFL 2.0 (still need to change all the file headers)

2003-10-09 Havoc Pennington <hp@redhat.com>

- * configure.in: define DBUS_HAVE_GCC33_GCOV if we have gcc 3.3. Not that we do anything about it yet.
- * bus/signals.c (bus_match_rule_parse): impose max length on the match rule text
- * dbus/dbus-protocol.h: add DBUS_MAXIMUM_MATCH_RULE_LENGTH

2003-10-09 Havoc Pennington <hp@redhat.com>

Make matching rules theoretically work (add parser).

- * bus/bus.c (bus_context_check_security_policy): fix up to handle the case where destination is explicitly specified as bus driver and someone else is eavesdropping.
- * bus/policy.c (bus_client_policy_check_can_receive): fix up definition of eavesdropping and assertion
- * tools/dbus-send.c (main): use dbus_message_type_from_string

- * bus/signals.c (bus_match_rule_parse): implement
- * dbus/dbus-message.c (dbus_message_type_from_string): new
- * dbus/dbus-errors.h (DBUS_ERROR_MATCH_RULE_INVALID): add

2003-10-02 Havoc Pennington <hp@pobox.com>

- * glib/dbus-gproxy.c (dbus_gproxy_call_no_reply): rename from dbus_gproxy_oneway_call
- * glib/dbus-gmain.c (dbus_connection_setup_with_g_main) (dbus_server_setup_with_g_main): fix to allow calling them more than once on the same args
- (dbus_bus_get_with_g_main): new function

2003-10-02 Havoc Pennington <hp@redhat.com>

- * doc/dbus-tutorial.xml: write some stuff

2003-09-29 Havoc Pennington <hp@pobox.com>

- * configure.in: split checks for Doxygen from XML docs, check for xmlto
- * doc/Makefile.am: XML-ify all the docs, and add a blank dbus-tutorial.xml

2003-09-29 Havoc Pennington <hp@pobox.com>

- * Merge dbus-object-names branch. To see the entire patch do `cvs diff -r DBUS_OBJECT_NAMES_BRANCHPOINT -r dbus-object-names`, it's huuuuge though.
- To revert, I tagged `DBUS_BEFORE_OBJECT_NAMES_MERGE`.

2003-09-28 Havoc Pennington <hp@pobox.com>

- * HACKING: update to reflect new server

2003-09-26 Seth Nickell <seth@gnome.org>

- * python/dbus.py:
- * python/examples/example-signals.py:

Start implementing some notions of signals. The API is really terrible, but they sort of work (with the exception of being able to filter by service, and to transmit signals *as* a particular service). Need to figure out how to make messages come from the service we registered :-(

* python/dbus_bindings.pyx.in:

Removed duplicate message_handler callbacks.

2003-09-25 Havoc Pennington <hp@redhat.com>

* bus/session.conf.in: fix my mess

2003-09-25 Havoc Pennington <hp@pobox.com>

* bus/session.conf.in: fix security policy, reported by Seth Nickell

2003-09-25 Seth Nickell <seth@gnome.org>

* python/examples/example-service.py:

Johan notices complete wrong code in example-service, but completely wrong in a way that works exactly the same (!). Johan is confused, how could this possibly work? Example code fails to serve purpose of making things clear. Seth fixes.

2003-09-25 Mark McLoughlin <mark@skynet.ie>

* doc/dbus-specification.sgml: don't require header fields to be 4-byte aligned and specify that fields should be distinguished from padding by the fact that zero is not a valid field name.

* doc/TODO: remove re-alignment item and add item to doc the OBJECT_PATH type.

* dbus/dbus-message.c:

(HeaderField): rename the original member to value_offset and introduce a name_offset member to keep track of where the field actually begins.
(adjust_field_offsets): remove.
(append_int_field), (append_uint_field),
(append_string_field): don't align the start of the header field to a 4-byte boundary.
(get_next_field): impl finding the next marshalled field after a given field.
(re_align_field_recurse): impl re-aligning a number of already marshalled fields.
(delete_field): impl deleting a field of any type and re-aligning any following fields.
(delete_int_or_uint_field), (delete_string_field): remove.
(set_int_field), (set_uint_field): no need to re-check that we have the correct type for the field.
(set_string_field): ditto and impl re-aligning any following fields.

(decode_header_data): update to take into account that the fields aren't 4-byte aligned any more and the new way to distinguish padding from header fields. Also, don't exit when there is too much header padding.
(process_test_subdir): print the directory.
(_dbus_message_test): add test to make sure a following field is re-aligned correctly after field deletion.

* dbus/dbus-string.[ch]:
(_dbus_string_insert_bytes): rename from insert_byte and allow the insert of multiple bytes.
(_dbus_string_test): test inserting multiple bytes.

* dbus/dbus-marshal.c: (_dbus_marshal_set_string): add warning note to docs about having to re-align any marshalled values following the string.

* dbus/dbus-message-builder.c:
(append_string_field), (_dbus_message_data_load): don't align the header field.

* dbus/dbus-auth.c: (process_test_subdir): print the directory.

* test/break-loader.c: (randomly_add_one_byte): upd. for insert_byte change.

* test/data/invalid-messages/bad-header-field-alignment.message: new test case.

* test/data/valid-messages/unknown-header-field.message: shove a dict in the unknown field.

2003-09-25 Seth Nickell <seth@gnome.org>

* python/dbus.py:
* python/dbus_bindings.pyx.in:

Handle return values.

* python/examples/example-client.py:
* python/examples/example-service.py:

Pass back return values from the service to the client.

2003-09-24 Seth Nickell <seth@gnome.org>

* python/dbus.py:

Connect Object methods (when you are sharing an object) up...

pass

in a list of methods to be shared. Sharing all the methods just

worked out too weird. You can now create nice Services over the DBus in Python. :-)

- * python/dbus_bindings.pyx.in:

Keep references to user_data tuples passed into C functions so Python doesn't garbage collect on us.

Implement MethodReturn and Error subclasses of Message for creating DBusMessage's of those types.

- * python/examples/example-client.py:
- * python/examples/example-service.py:

Simple example code showing both how create DBus services and objects, and how to use them.

2003-09-23 Havoc Pennington <hp@pobox.com>

- * glib/dbus-gproxy.c (dbus_gproxy_manager_filter): implement

2003-09-23 Havoc Pennington <hp@redhat.com>

- * glib/dbus-gproxy.c (dbus_gproxy_connect_signal): implement
- (dbus_gproxy_disconnect_signal): implement
- (dbus_gproxy_manager_remove_signal_match): implement
- (dbus_gproxy_manager_add_signal_match): implement
- (dbus_gproxy_oneway_call): implement

2003-09-23 Havoc Pennington <hp@pobox.com>

- * glib/dbus-gproxy.c (struct DBusGProxy): convert to a GObject subclass. This means dropping the transparent thread safety of the proxy; you now need a separate proxy per-thread, or your own locking on the proxy. Probably right anyway.
- (dbus_gproxy_ref, dbus_gproxy_unref): nuke, just use g_object_ref

2003-09-22 Havoc Pennington <hp@redhat.com>

- * glib/dbus-gproxy.c (dbus_gproxy_manager_get): implement

2003-09-21 Seth Nickell <seth@gnome.org>

First checkin of the Python bindings.

- * python/.cvsignore:
- * python/Makefile.am:
- * python/dbus_bindings.pyx.in:
- * python/dbus_h_wrapper.h:

Pieces for Pyrex to operate on, building a `dbus_bindings.so` python module for low-level access to the Dbus APIs.

- * `python/dbus.py`:

High-level Python module for accessing Dbus objects.

- * `configure.in`:

- * `Makefile.am`:

Build stuff for the python bindings.

- * `acinclude.m4`:

Extra macro needed for finding the Python C header files.

2003-09-21 Havoc Pennington <hp@pobox.com>

- * `glib/dbus-gproxy.c` (`dbus_gproxy_manager_new`): start implementing the proxy manager, didn't get very far.

- * `dbus/dbus-bus.c` (`dbus_bus_add_match`): new
(`dbus_bus_remove_match`): new

- * `glib/dbus-gproxy.c` (`dbus_gproxy_new_for_service`): add a `path_name` argument; adjust the other not-yet-implemented gproxy constructors to be what I think they should be.

2003-09-21 Havoc Pennington <hp@pobox.com>

- * `dbus/dbus-bus.c` (`dbus_bus_get`): set `exit_on_disconnect` to TRUE by default for message bus connections.

- * `dbus/dbus-connection.c` (`dbus_connection_dispatch`): exit if `exit_on_disconnect` flag is set and we process the disconnected signal.
(`dbus_connection_set_exit_on_disconnect`): new function

2003-09-21 Havoc Pennington <hp@pobox.com>

Get matching rules mostly working in the bus; only actually parsing the rule text remains. However, the client side of "signal connections" hasn't been started, this patch is only the bus side.

- * `dbus/dispatch.c`: fix for the matching rules changes

- * `bus/driver.c` (`bus_driver_handle_remove_match`)
(`bus_driver_handle_add_match`): send an ack reply from these method calls

- * glib/dbus-gproxy.c (dbus_gproxy_begin_call): fix order of arguments, reported by Seth Nickell
- * bus/config-parser.c (append_rule_from_element): support eavesdrop=true|false attribute on policies so match rules can be prevented from snooping on the system bus.
- * bus/dbus-daemon-1.1.in: consistently use terminology "sender" and "destination" in attribute names; fix some docs bugs; add eavesdrop=true|false attribute
- * bus/driver.c (bus_driver_handle_add_match) (bus_driver_handle_remove_match): handle AddMatch, RemoveMatch messages
- * dbus/dbus-protocol.h (DBUS_SERVICE_ORG_FREEDESKTOP_BROADCAST):
get rid of broadcast service concept, signals are just always broadcast
- * bus/signals.c, bus/dispatch.c, bus/connection.c, bus/bus.c: mostly implement matching rules stuff (currently only exposed as signal connections)

2003-09-21 Mark McLoughlin <mark@skynet.ie>

- * doc/dbus-specification.sgml: Change the header field name to be an enum and update the rest of the spec to reference the fields using the conventional name.
- * dbus/dbus-protocol.h: update to reflect the spec.
- * doc/TODO: add item to remove the 4 byte alignment requirement.
- * dbus/dbus-message.c: Remove the code to generalise the header/body length and serial number header fields as named header fields so we can reference field names using the protocol values.
(append_int_field), (append_uint_field), (append_string_field): Append the field name as a byte rather than four chars.
(delete_int_or_uint_field), (delete_string_field): reflect the fact that the field name and typecode now occupy 4 bytes instead of 8.
(decode_string_field), (decode_header_data): update to reflect protocol changes and move the field specific encoding from decode_string_field() back into decode_header_data().
- * dbus/dbus-internals.[ch]: (_dbus_header_field_to_string): Add utility to aid debugging.
- * dbus/dbus-message-builder.c:

(append_string_field), (_dbus_message_data_load): Update to reflect protocol changes; Change the FIELD_NAME directive to HEADER_FIELD and allow it to take the field's conventional name rather than the actual value.

* test/data/*/*.message: Update to use HEADER_FIELD instead of FIELD_NAME; Always align the header on an 8 byte boundary *before* updating the header length.

2003-09-15 Havoc Pennington <hp@pobox.com>

* dbus/dbus-pending-call.c: add the get/set object data boilerplate as for DBusConnection, etc. Use generic object data for the notify callback.

* glib/dbus-gparser.c (parse_node): parse child nodes

* tools/dbus-viewer.c: more hacking on the dbus-viewer

* glib/dbus-gutils.c (_dbus_gutils_split_path): add a file to contain functions shared between the convenience lib and the installed lib

* glib/Makefile.am (libdbus_glib_1_la_LDFLAGS): add -export-symbols-regex to the GLib library

* dbus/dbus-object-tree.c
(_dbus_object_tree_dispatch_and_unlock):
fix the locking in here, and add a default handler for Introspect() that just returns sub-nodes.

2003-09-14 Havoc Pennington <hp@pobox.com>

* glib/dbus-gthread.c (dbus_g_thread_init): rename to make g_foo rather than gfoo consistent

* glib/dbus-gproxy.h: delete for now, move contents to dbus-glib.h, because the include files don't work right since we aren't in the dbus/ subdir.

* glib/dbus-gproxy.c (dbus_gproxy_send): finish implementing
(dbus_gproxy_end_call): finish
(dbus_gproxy_begin_call): finish

* glib/dbus-gmain.c (dbus_set_g_error): new

* glib/dbus-gobject.c (handle_introspect): include information about child nodes in the introspection

* dbus/dbus-connection.c (dbus_connection_list_registered): new function to help in implementation of introspection

* dbus/dbus-object-tree.c
(_dbus_object_tree_list_registered_and_unlock): new function

2003-09-12 Havoc Pennington <hp@pobox.com>

* glib/dbus-gidl.h: add common base class for all the foo_info types

* tools/dbus-viewer.c: add GTK-based introspection UI thingy similar to kdcop

* test/Makefile.am: try test srcdir -ef . in addition to test srcdir = ., one of them should work (yeah lame)

* glib/Makefile.am: build the "idl" parser stuff as a convenience library

* glib/dbus-gparser.h: make description_load routines return NodeInfo* not Parser*

* Makefile.am (SUBDIRS): build test dir after all library dirs

* configure.in: add GTK+ detection

2003-09-07 Havoc Pennington <hp@pobox.com>

* Make Doxygen contented.

2003-09-07 Havoc Pennington <hp@pobox.com>

* doc/dbus-specification.sgml: more updates

2003-09-06 Havoc Pennington <hp@pobox.com>

* doc/dbus-specification.sgml: partial updates

* bus/dbus-daemon-1.1.in: fix the config file docs for the zillionth time; hopefully I edited the right file this time.

* bus/config-parser.c (append_rule_from_element): support send_type, send_path, receive_type, receive_path

* bus/policy.c: add message type and path to the list of things that can be "firewalled"

2003-09-06 Havoc Pennington <hp@pobox.com>

* dbus/dbus-connection.c (dbus_connection_register_fallback): add this

(dbus_connection_register_object_path): make this not handle messages to paths below the given path

2003-09-03 Havoc Pennington <hp@pobox.com>

- * test/glib/Makefile.am: add this with random glib-linked test programs

- * glib/Makefile.am: remove the random test programs from here, leave only the unit tests

- * glib/dbus-gobject.c (_dbus_gobject_test): add test for uscore/javacaps conversion, and fix (get_object_property, set_object_property): change to .NET convention for mapping props to methods, set_FooBar/get_FooBar, since one language has such a convention we may as well copy it. Plus real methods in either getFooBar or get_foo_bar style won't collide with this convention.

2003-09-01 Havoc Pennington <hp@pobox.com>

- * glib/dbus-gparser.c: implement

- * glib/dbus-gobject.c: start implementing skeletons support

- * configure.in: when disabling checks/assert, also define G_DISABLE_ASSERT and G_DISABLE_CHECKS

2003-09-01 Havoc Pennington <hp@pobox.com>

- * glib/Makefile.am: rearrange a bunch of files and get "make check" framework set up

2003-08-31 Havoc Pennington <hp@pobox.com>

- * fix build with --disable-tests

2003-08-30 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-connection.c: purge DBusMessageHandler

- * dbus/dbus-message-handler.c: remove DBusMessageHandler, just use callbacks everywhere

2003-08-30 Havoc Pennington <hp@pobox.com>

- * test/data/valid-config-files/system.d/test.conf: change to root for the user so warnings don't get printed

- * dbus/dbus-message.c: add dbus_message_get_path, dbus_message_set_path

- * dbus/dbus-object-tree.c (do_test_dispatch): add test of dispatching to a path

* dbus/dbus-string.c (_dbus_string_validate_path): add

* dbus/dbus-marshal.c (_dbus_demarshal_object_path): implement
(_dbus_marshal_object_path): implement

* dbus/dbus-protocol.h (DBUS_HEADER_FIELD_PATH): new header field
to contain the path to the target object
(DBUS_HEADER_FIELD_SENDER_SERVICE): rename
DBUS_HEADER_FIELD_SENDER to explicitly say it's the sender
service

2003-08-30 Havoc Pennington <hp@pobox.com>

* dbus/dbus-object-tree.c: write tests and fix the discovered
bugs

2003-08-29 Havoc Pennington <hp@pobox.com>

* dbus/dbus-object-tree.c: modify to allow overlapping paths to
be
registered
(struct DBusObjectSubtree): shrink this
a lot, since we may have a lot of them
(_dbus_object_tree_free_all_unlocked): implement
(_dbus_object_tree_dispatch_and_unlock): implement

2003-08-29 Havoc Pennington <hp@pobox.com>

* dbus/dbus-internals.h: fix _DBUS_N_GLOBAL_LOCKS

2003-08-28 Havoc Pennington <hp@pobox.com>

purge DBusObjectID

* dbus/dbus-connection.c: port to no ObjectID, create a
DBusObjectTree, rename ObjectTree to ObjectPath in public API

* dbus/dbus-connection.h (struct DBusObjectTreeVTable): delete
everything except UnregisterFunction and MessageFunction

* dbus/dbus-marshal.c: port away from DBusObjectID,
add DBUS_TYPE_OBJECT_PATH

* dbus/dbus-object-registry.[hc], dbus/dbus-object.[hc],
dbus/dbus-objectid.[hc]: remove these, we are moving to
path-based object IDs

2003-08-25 Havoc Pennington <hp@pobox.com>

Just noticed that dbus_message_test is hosed, I wonder when I
broke that. I thought make check was passing earlier...

- * dbus/dbus-object-tree.c: add new "object tree" to match DCOP container tree, will replace most of dbus-object-registry
- * dbus/dbus-string.c (_dbus_string_append_printf_valist): fix C99 screwup

2003-08-19 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-message.c (decode_string_field): support FIELD_SENDER (dbus_message_is_error): fix this function
- * bus/dbus-daemon-1.1: clarify logic on when <deny>/<allow> rules match
- * bus/policy.c (bus_client_policy_check_can_receive): fix code to reflect clarified man page (bus_client_policy_check_can_send): ditto
- * bus/session.conf.in: fixup
- * bus/system.conf.in: fixup

2003-08-18 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-hash.c (_dbus_hash_table_insert_two_strings): fix
- * dbus/dbus-message.c (_dbus_message_loader_queue_messages): fix dumb bug created earlier (wrong order of args to decode_header_data())
- * tools/dbus-send.c: port
- * tools/dbus-print-message.c (print_message): port
 - * test/data/*messages: port all messages over
 - * dbus/dbus-message-builder.c: support including message type
 - * bus/driver.c: port over
- * bus/dispatch.c: port over to new stuff
- * dbus/dbus-connection.c (_dbus_connection_new_for_transport): rename disconnect signal to "Disconnected"

2003-08-17 Havoc Pennington <hp@pobox.com>

This doesn't compile yet, but syncing up so I can hack on it from work. What are branches for if not broken code? ;-)

* dbus/dbus-protocol.h: remove DBUS_HEADER_FIELD_NAME, add DBUS_HEADER_FIELD_INTERFACE, DBUS_HEADER_FIELD_MEMBER, DBUS_HEADER_FIELD_ERROR_NAME

* dbus/dbus-hash.c: Introduce DBUS_HASH_TWO_STRINGS as hack to use

for the interface+member pairs
(string_hash): change to use g_str_hash algorithm
(find_direct_function, find_string_function): refactor these to share most code.

* dbus/dbus-message.c: port all of this over to support interface/member fields instead of name field

* dbus/dbus-object-registry.c: port over

* dbus/dbus-string.c (_dbus_string_validate_interface): rename from _dbus_string_validate_name

* bus/dbus-daemon-1.1: change file format for the <deny>/<allow> stuff to match new message naming scheme

* bus/policy.c: port over

* bus/config-parser.c: parse new format

2003-08-16 Havoc Pennington <hp@pobox.com>

* dbus/dbus-object-registry.c (add_and_remove_objects): remove broken assertion

* glib/dbus-gproxy.c: some hacking

2003-08-15 Havoc Pennington <hp@redhat.com>

* dbus/dbus-pending-call.c (dbus_pending_call_block): implement

* dbus/dbus-connection.c
(dbus_connection_send_with_reply_and_block): factor out
internals;
change to convert any error replies to DBusError instead of
returning them as a message

2003-08-15 Havoc Pennington <hp@pobox.com>

* dbus/dbus-connection.c,
dbus/dbus-pending-call.c: Finish the pending call stuff

2003-08-14 Havoc Pennington <hp@redhat.com>

* dbus/dbus-pending-call.c: start on new object that will replace
DBusMessageHandler and ReplyHandlerData for tracking outstanding

replies

- * dbus/dbus-gproxy.c: start on proxy object used to communicate with remote interfaces

- * dbus/dbus-gidl.c: do the boring boilerplate in here

2003-08-12 Havoc Pennington <hp@pobox.com>

- * bus/dispatch.c (bus_dispatch): make this return proper DBusHandlerResult to avoid DBUS_ERROR_UNKNOWN_METHOD

- * dbus/dbus-errors.c (dbus_set_error): use _dbus_string_append_printf_valist

- * dbus/dbus-string.c (_dbus_string_append_printf_valist) (_dbus_string_append_printf): new

- * dbus/dbus-errors.h (DBUS_ERROR_UNKNOWN_MESSAGE): change to UNKNOWN_METHOD

- * dbus/dbus-connection.c (dbus_connection_dispatch): handle DBUS_HANDLER_RESULT_NEED_MEMORY; send default error reply if a message is unhandled.

2003-08-11 Havoc Pennington <hp@pobox.com>

- * bus/test.c (client_disconnect_handler): change to return HANDLED (would have been REMOVE_MESSAGE)

- * dbus/dbus-object.h (enum DBusHandlerResult): rename to HANDLED/NOT_YET_HANDLED instead of REMOVE_MESSAGE/ALLOW_MORE_HANDLERS to make it clearer how it should be used.

2003-08-10 Havoc Pennington <hp@pobox.com>

- * tools/dbus-send.c (main): add --type argument, for now supporting only method_call and signal types.

- * tools/dbus-print-message.c: print message type

- * dbus/dbus-connection.c (_dbus_connection_new_for_transport): init connection->objects

- * doc/dbus-specification.sgml: fix sgml

- * bus/*.c: port over to object-instance API changes

- * test/test-service.c: ditto

- * dbus/dbus-message.c (dbus_message_create_header): allow #NULL

name, we will have to fix up the rest of the code to also handle this
(dbus_message_new): generic message-creation call
(set_string_field): allow appending name field

2003-08-06 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-object-registry.c: implement signal connection and dispatch
- * dbus/dbus-connection.c (_dbus_connection_unref_unlocked): new
- * dbus/dbus-internals.c (_dbus_memdup): new function

2003-08-02 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-message.c (dbus_message_get_no_reply) (dbus_message_set_no_reply): add these and remove set_is_error/get_is_error
- * dbus/dbus-protocol.h, doc/dbus-specification.sgml: remove the ERROR flag, since there's now an ERROR type

2003-08-01 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-object-registry.c (_dbus_object_registry_handle_and_unlock): implement
- * dbus/dbus-message.c (dbus_message_get_type): new function
- * doc/dbus-specification.sgml: add "type" byte to messages

2003-08-01 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-protocol.h (DBUS_MESSAGE_TYPE_*): introduce a message type enum to distinguish kinds of message (DBUS_HEADER_FLAG_NO_REPLY_EXPECTED): flag for a message that need not be replied to

2003-08-01 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-marshal.c: adapt to DBusObjectID changes (unpack_8_octets): fix no-64-bit-int bug
- * dbus/dbus-object-registry.c (validate_id): validate the connection ID bits, not just the instance ID.
- * dbus/dbus-connection.c (_dbus_connection_init_id): initialize the connection-global 33 bits of the object ID
- * dbus/dbus-object-registry.c (info_from_entry): fill in

object ID in the new way

* dbus/dbus-objectid.h: rather than high/low bits, specifically define server/client/instance bits.

2003-07-30 Havoc Pennington <hp@pobox.com>

* dbus/dbus-connection.c (dbus_connection_register_object): fix build

2003-07-13 Havoc Pennington <hp@pobox.com>

* dbus/dbus-object.h (struct DBusObjectVTable): add padding fields to DBusObjectVTable and DBusObjectInfo

2003-07-12 Havoc Pennington <hp@pobox.com>

* dbus/dbus-object-registry.c: implement unit test, fix bugs discovered in process

* dbus/dbus-connection.c: remove handler_table and register_handler(), add DBusObjectRegistry usage

* dbus/dbus-objectid.c (dbus_object_id_is_null) (dbus_object_id_set_null): new functions

2003-07-08 Havoc Pennington <hp@pobox.com>

* dbus/dbus-object.c: implement some of this

* dbus/dbus-object-registry.c
(_dbus_object_registry_add_and_unlock): fill in the object_id out param
(_dbus_object_registry_new): handle OOM

2003-07-08 Havoc Pennington <hp@pobox.com>

* dbus/dbus-object.h: sketch out an API for registering objects with a connection, that allows us to use as little as 24 bytes per object and lets application code represent an object in any conceivable way.

* dbus/dbus-object-registry.c: implement the hard bits of the DBusConnection aspect of object API. Not yet wired up.

2003-07-06 Havoc Pennington <hp@pobox.com>

* dbus/dbus-marshal.c (_dbus_marshal_set_object_id): new function
(_dbus_marshal_object_id): new
(_dbus_demarshal_object_id): new
(_dbus_marshal_get_arg_end_pos): support object ID type, and consolidate identical switch cases. Don't conditionalize handling

of DBUS_TYPE_UINT64, need to handle the type always.
(_dbus_marshall_validate_arg): consolidate identical cases, and
handle DBUS_TYPE_OBJECT_ID

* dbus/dbus-objectid.c: new file with DBusObjectID data type.

* dbus/dbus-protocol.h: add DBUS_TYPE_OBJECT_ID

2003-09-28 Havoc Pennington <hp@pobox.com>

* real 0.13 release

2003-09-28 Havoc Pennington <hp@pobox.com>

* doc/Makefile.am (dbus-specification.html): testing a funky hack
to work with Debian db2html

2003-09-28 Havoc Pennington <hp@pobox.com>

* configure.in: 0.13

* doc/Makefile.am (dbus-test-plan.html): accept nonexistence of
stylesheet-images for benefit of Debian

Change back to using filesystem-linked sockets for the system
bus, so only root can create the default system bus address.

* bus/system.conf.in: change to use
DBUS_SYSTEM_BUS_DEFAULT_ADDRESS

* dbus/Makefile.am (INCLUDES): remove DBUS_SYSTEM_BUS_PATH define
from here.

* configure.in: define DBUS_SYSTEM_BUS_DEFAULT_ADDRESS
here, and AC_DEFINE DBUS_SYSTEM_PATH

2003-08-09 Anders Carlsson <andersca@codefactory.se>

* doc/TODO:
* doc/busconfig.dtd:
Add busconfig DTD.

2003-08-09 Anders Carlsson <andersca@codefactory.se>

* doc/dbus-specification.sgml:
Add activation reply values.

2003-08-05 Havoc Pennington <hp@redhat.com>

* configure.in: 0.12

2003-08-05 Anders Carlsson <andersca@codefactory.se>

* glib/dbus-gmain.c: (watch_fd_new), (watch_fd_ref),
(watch_fd_unref), (dbus_gsource_check), (dbus_gsource_dispatch),
(add_watch), (remove_watch), (create_source):
RefCount fds, fixes some reentrancy issues.

2003-07-30 Havoc Pennington <hp@redhat.com>

* dbus/dbus-bus.c (init_connections_unlocked): fix default system
bus address to be abstract if we have abstract sockets

* NEWS: update

2003-07-28 Havoc Pennington <hp@redhat.com>

* bus/messagebus.in: fix to avoid processname/servicename
confusion, from Michael Kearey
https://bugzilla.redhat.com/bugzilla/show_bug.cgi?id=100965

2003-07-23 Havoc Pennington <hp@pobox.com>

* dbus/dbus-message.c (dbus_message_iter_get_named):
fix from Andy Hanton to remove broken "+1"

2003-07-16 Havoc Pennington <hp@pobox.com>

* tools/dbus-launch.c (babysit): close stdout/stderr in the
babysitter process, as suggested by Thomas Leonard, so
an "eval `dbus-launch --exit-with-session`" will actually
return

2003-07-16 Havoc Pennington <hp@pobox.com>

* configure.in: print out EXPANDED_* variables in the summary at
the end; clean up the code that computes EXPANDED_ variables and
get the ones using exec_prefix right. Should make things work
when you build without --prefix

2003-06-29 Havoc Pennington <hp@pobox.com>

* mono/Test.cs (class Test): fire up a main loop and run it

* mono/DBus.cs (DBus): don't g_thread_init since it can only be
done once, the app has to do it

2003-06-26 Havoc Pennington <hp@pobox.com>

* mono/Connection.cs: set up connection with the glib main loop

2003-07-01 Havoc Pennington <hp@redhat.com>

* doc/dbus-specification.sgml: clarify the format of a type code,

change suggested by Jim Blandy

2003-06-29 Miloslav Trmac <mitr@volny.cz>

```
* doc/Makefile.am:
* tools/Makefile.am: Don't assume srcdir == builddir.

* dbus/dbus-memory.c (dbus_realloc): Don't check guards after
shrinking
the allocated block.
(_dbus_memory_test): New function.
* dbus/dbus-test.h: Add _dbus_memory_test ().
* dbus/dbus-test.c (dbus_internal_do_not_use_run_tests): Call it.

* dbus/dbus-message.c (decode_header_data): Use %.4s instead
of %c%c%c%c.
(dbus_message_new): Remove obsolete @todo.

* dbus/dbus-marshal.c (_dbus_marshal_set_int64)
(_dbus_marshal_set_uint64): Fix comment.

* dbus/dbus-message.c (append_int_field, append_uint_field):
Don't
hardcode FIELD_REPLY_SERIAL.

* dbus/dbus-mainloop.c (_dbus_loop_remove_watch)
(_dbus_loop_remove_timeout): Cast function pointers to (void *)
for %p

* configure.in: Add -D_POSIX_C_SOURCE=199309L -DBSD_SOURCE to
CFLAGS
and disable DBUS_USE_ATOMIC_INT_486 when --enable-ansi is used
```

2003-06-24 Havoc Pennington <hp@pobox.com>

```
* mono/*.cs: Use IntPtr.Zero instead of ((IntPtr) 0)
```

2003-06-23 Anders Carlsson <andersca@codefactory.se>

```
* configure.in:
* gcj/.cvsignore:
* gcj/Hello.java:
* gcj/Makefile.am:
* gcj/TestMessage.java: (TestMessage), (TestMessage.main):
* gcj/org/.cvsignore:
* gcj/org/Makefile.am:
* gcj/org/freedesktop/.cvsignore:
* gcj/org/freedesktop/Makefile.am:
* gcj/org/freedesktop/dbus/.cvsignore:
* gcj/org/freedesktop/dbus/Makefile.am:
* gcj/org/freedesktop/dbus/Message.java: (Message),
(Message.Message):
```

* gcj/org/freedesktop/dbus/natMessage.cc:
Fix the build system.

2003-06-22 Havoc Pennington <hp@pobox.com>

* mono/Connection.cs: add more bindings
* dbus/dbus-threads.c (dbus_threads_init): allow calling this more than once.

2003-06-22 Havoc Pennington <hp@pobox.com>

* mono/Connection.cs, mono/DBus.cs, mono/Error.cs:
Start wrapping more stuff.

2003-06-22 Havoc Pennington <hp@pobox.com>

* mono/Message.cs: implement Message.Wrap() that ensures we only have a single C# wrapper per DBusMessage, assuming it works which it probably doesn't.
* dbus/dbus-message.c (dbus_message_allocate_data_slot): new
(dbus_message_free_data_slot): new
(dbus_message_set_data): new
(dbus_message_get_data): new

2003-06-22 Havoc Pennington <hp@pobox.com>

* dbus/dbus-dataslot.c (_dbus_data_slot_allocator_unref)
(_dbus_data_slot_allocator_alloc): rework these to keep a reference count on each slot and automatically manage a global slot ID variable passed in by address
* bus/bus.c: convert to new dataslot API
* dbus/dbus-bus.c: convert to new dataslot API
* dbus/dbus-connection.c: convert to new dataslot API
* dbus/dbus-server.c: convert to new dataslot API
* glib/dbus-gmain.c: ditto
* bus/test.c: ditto
* bus/connection.c: ditto

2003-06-22 Anders Carlsson <andersca@codefactory.se>

* configure.in: Add AM_PROG_GCJ and move AM_PROG_LIBTOOL after the gcj checks so that the correct configuration tags will be added to libtool.

* dbus-glib-1.pc.in: No need to specify any includes since dbus-1.pc.in has those.

2003-06-22 Havoc Pennington <hp@pobox.com>

* mono/*, gcj/*, configure.in, Makefile.am:
Check in makefiles and subdirs for mono and gcj bindings.
Neither binding actually exists, just trying to get through
all the build and other boring bits.

2003-06-21 Philip Blundell <philb@gnu.org>

* tools/dbus-monitor.1: Updated.
* tools/dbus-send.1: Likewise.

2003-06-20 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-transport-unix.c (unix_handle_watch): Check
for hangup and error after checking read so we won't discard
pending data if both hangup and read are set.

2003-06-19 Philip Blundell <philb@gnu.org>

* tools/dbus-print-message.c (print_message): Handle BOOLEAN.
* tools/dbus-send.c: Accept both --system and --session.
* tools/dbus-monitor.c: Same here.

2003-06-19 Anders Carlsson <andersca@codefactory.se>

* glib/dbus-glib.h: Fix so that dbus-glib.h can be used
from C++ (Patch by Miloslav Trmac).

2003-06-15 Joe Shaw <joe@assbarn.com>

* configure.in: Check for socklen_t.
* dbus/dbus-sysdeps.c: Define socklen_t if it's not defined.
* test/test-segfault.c: Add #include <sys/time.h>
* tools/Makefile.am: Add DBUS_X_CFLAGS to the INCLUDES since
dbus-launch needs it.

2003-06-09 Havoc Pennington <hp@redhat.com>

* dbus/dbus-sysdeps.c (_dbus_listen_unix_socket): don't use
SUN_LEN, it breaks abstract socket usage

* dbus/dbus-internals.c (_dbus_verbose_real): only print PID at starts of lines.

2003-06-04 Havoc Pennington <hp@pobox.com>

* dbus/dbus-server.c (dbus_server_listen): allow abstract sockets using unix:abstract=/foo, and when listening in a tmpdir i.e. unix:tmpdir=/tmp, always use abstract sockets if we can.

* dbus/dbus-transport.c (_dbus_transport_open): support unix:abstract=/foo

* dbus/dbus-server-unix.c (_dbus_server_new_for_domain_socket): support abstract sockets

* dbus/dbus-transport-unix.c (_dbus_transport_new_for_domain_socket): support abstract sockets

* dbus/dbus-sysdeps.c (_dbus_connect_unix_socket): add "abstract" toggle as an argument, implement abstract namespace support (_dbus_listen_unix_socket): ditto

* configure.in: add --enable-abstract-sockets and implement a configure check for autodetection of the right value.

2003-06-01 Havoc Pennington <hp@pobox.com>

* tools/dbus-cleanup-sockets.c: add utility to clean up sockets in /tmp (though on Linux this will end up being useless, when we add abstract namespace support)

* configure.in: define DBUS_SESSION_SOCKET_DIR in addition to subst'ing it

2003-05-28 Colin Walters <walters@verbum.org>

* tools/dbus-monitor.c (main): Fix silly typo (s/--session/--system/).

2003-05-18 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-message.c (dbus_message_new): Remove @todo.

2003-05-17 Colin Walters <walters@gnu.org>

* tools/dbus-send.c: Don't exit with an error code if --help was passed. Default to using the session bus instead of the system one.

* tools/dbus-launch.c: Ditto.

* tools/dbus-monitor.c: Ditto.

- * tools/dbus-send.1: Update with new arguments.
- * tools/dbus-launch.c: Emit code to export variables. New arguments -s and -c to specify shell syntax, and a bit of code to autodetect syntax. Also, allow specifying a program to run.
- * tools/dbus-launch.1: Update with new arguments.
- * tools/dbus-send.1: Ditto.
- * tools/dbus-monitor.1: Ditto.

2003-05-17 Havoc Pennington <hp@pobox.com>

- * bus/config-parser.c (merge_included): merge in policies from child configuration file.
- * bus/policy.c (bus_policy_merge): function to merge two policies together

2003-05-16 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-connection.c: disable verbose lock spew
- * tools/dbus-send.c: add --print-reply command line option
- * tools/dbus-print-message.h (print_message): new util function shared by dbus-send and dbus-monitor
- * tools/dbus-monitor.c (handler_func): exit on disconnect
- * dbus/dbus-transport-unix.c (do_reading): if the transport is disconnected, don't try to use the read_watch
- * dbus/dbus-watch.c (dbus_watch_get_enabled): assert watch != NULL
so we can find this bug more easily

2003-05-16 Havoc Pennington <hp@redhat.com>

- * bus/policy.c (free_rule_list_func): avoid a crash when passed NULL as DBusHashTable is annoyingly likely to do.

2003-05-16 Colin Walters <walters@verbum.org>

- * tools/dbus-monitor.c: Add --session argument and usage() function.
- * tools/dbus-monitor.1: Update with new --session arg.
- * bus/Makefile.am (install-data-hook): Create

`$(libdir)/dbus-1.0/services` so that the session bus is happy.

2003-05-15 Havoc Pennington <hp@redhat.com>

* `dbus/dbus-sysdeps.c` (`_dbus_atomic_dec`, `_dbus_atomic_inc`): work on non-x86. `ifdef`'s are evil.

2003-05-15 Havoc Pennington <hp@redhat.com>

* `configure.in`: 0.11

* NEWS: update

* `bus/Makefile.am` (`initddir`): apparently we are supposed to put `init` scripts in `/etc/rc.d/init.d` not `/etc/init.d`

* `bus/Makefile.am`: remove the "you must `--enable-tests` to make check" as it broke `distcheck`

* `bus/Makefile.am` (`install-data-hook`): create `/etc/dbus-1/system.d`

2003-05-13 James Willcox <jwillcox@gnome.org>

* `configure.in`:

* `bus/activation.c`: (`bus_activation_service_created`), (`bus_activation_activate_service`):

* `bus/driver.c`: (`bus_driver_send_service_deleted`), (`bus_driver_send_service_created`), (`bus_driver_send_service_lost`),

(`bus_driver_send_service_acquired`),

(`bus_driver_send_welcome_message`),

(`bus_driver_handle_list_services`):

* `bus/session.conf.in`:

* `dbus/dbus-bus.c`: (`dbus_bus_acquire_service`),

(`dbus_bus_service_exists`), (`dbus_bus_activate_service`):

* `dbus/dbus-bus.h`:

Add some convenience API which lets you activate a service, and did a

bunch of `s/0/DBUS_TYPE_INVALID/` in calls to

`dbus_message_append_args()`

and `dbus_message_get_args()`

2003-05-11 Havoc Pennington <hp@pobox.com>

* `dbus/dbus-marshal.c` (`_dbus_marshal_validate_arg`): fix to avoid calling `_dbus_marshal_validate_arg()` for every byte in a byte array, etc.

* `dbus/dbus-message-handler.c`: use atomic reference counting to reduce number of locks slightly; the global lock in here sucks

```

* dbus/dbus-connection.c
  (_dbus_connection_update_dispatch_status_and_unlock): variant of
update_dispatch_status that can be called with lock held; then
use
in a couple places to reduce locking/unlocking
(dbus_connection_send): hold the lock over the whole function
instead of acquiring it twice.

* dbus/dbus-timeout.c (_dbus_timeout_new): handle OOM

* bus/connection.c (bus_connections_setup_connection): fix access
to already-freed memory.

* dbus/dbus-connection.c: keep a little cache of linked list
nodes, to avoid using the global linked list alloc lock in the
normal send-message case. Instead we just use the connection lock
that we already have to take.

* dbus/dbus-list.c (_dbus_list_find_last): new function

* dbus/dbus-sysdeps.c (_dbus_atomic_inc, _dbus_atomic_dec):
change to use a struct for the atomic type; fix docs,
they return value before increment, not after increment.

* dbus/dbus-string.c (_dbus_string_append_4_aligned)
(_dbus_string_append_8_aligned): new functions to try to
microoptimize this operation.
(reallocate_for_length): break this out of set_length(), to
improve profile info, and also so we can consider inlining the
set_length() part.

* dbus/dbus-message.c (dbus_message_new_empty_header): init data
strings with some preallocation, cuts down on our calls to
realloc
a fair bit. Though if we can get the "move entire string to empty
string" optimization below to kick in here, it would be better.

* dbus/dbus-string.c (_dbus_string_move): just call
_dbus_string_move_len
(_dbus_string_move_len): add a special case for moving
an entire string into an empty string; we can just
swap the string data instead of doing any reallocs.
(_dbus_string_init_preallocated): new function

```

2003-05-11 Havoc Pennington <hp@pobox.com>

Write a "test-profile" that does echo client-server with threads; profile reveals lock contention, memcpy/realloc of buffers, and UTF-8 validation as hot spots. 20% of lock contention eliminated with dbus_atomic_inc/dec implementation on x86. Much remaining contention is global mempool locks for GList and DBusList.

- * dbus/dbus-sysdeps.c (`_dbus_atomic_inc`, `_dbus_atomic_dec`): add x86 implementation
- * dbus/dbus-connection.c (struct `DBusConnection`): use `dbus_atomic_t` for the reference count
- * dbus/dbus-message.c (struct `DBusMessage`): declare `dbus_atomic_t` values as volatile
- * configure.in: code to detect ability to use atomic integer operations in assembly, from GLib patch
- * dbus/dbus-internals.c (`_dbus_verbose_real`): call `getpid` every time, tired of it being wrong in threads and forked processes
- * glib/test-profile.c: a little program to bounce messages back and forth between threads and eat CPU
- * dbus/dbus-connection.c: add debug spew macros for debugging thread locks; include `config.h` at top; fix deadlock in `dbus_connection_flush()`

2003-05-08 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-spawn.c: s/_exit/exit/ because it was keeping gcov data from getting written, and there wasn't a good reason to use `_exit` really.
- * test/decode-gcov.c (`mark_inside_dbus_build_tests`): don't count `dbus_verbose` lines in test coverage
(main): add list of functions sorted by # of untested blocks to the coverage report
- * dbus/dbus-mempool.c: put some test-only code in `DBUS_BUILD_TESTS`
- * dbus/dbus-marshal.c (`_dbus_marshall_test`): extend test coverage
- * dbus/dbus-message-handler.c (`_dbus_message_handler_test`): extend test coverage
- * test/data/auth/cancel.auth-script: test canceling an authentication
- * dbus/Makefile.am: remove `dbus-server-debug.[hc]` for now, as they aren't used. in CVS history if we end up needing them.

2003-05-04 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-message-handler.c (`_dbus_message_handler_test`): add

unit test

* dbus/dbus-marshal.c (dbus_demarshal_string_array): fix this function, which assumed length was in # of strings, not bytes

* dbus/dbus-message.c (dbus_message_test): add tests for some missing coverage

* dbus/dbus-connection.c (dbus_connection_queue_received_message): disable function for now, we are only using it in test mode

* dbus/dbus-message.c (dbus_message_loader_queue_messages): remove a mistaken FIXME

2003-05-04 Havoc Pennington <hp@pobox.com>

* dbus/dbus-connection.c (dbus_connection_preallocate_send): unlock mutex on successful return, patch from Anders Gustafsson

2003-05-04 Havoc Pennington <hp@pobox.com>

* dbus-glib-1.pc.in (Requires): fix dependencies, from Anders Gustafsson

2003-05-04 Havoc Pennington <hp@pobox.com>

* tools/dbus-launch.c: implement

* bus/main.c (main), bus/bus.c (bus_context_new): implement --print-pid and --fork

2003-05-03 Havoc Pennington <hp@redhat.com>

* dbus/dbus-address.c (dbus_parse_address): fix bug when a key in the address had no value, and add to test suite. Fix and regression test from Miloslav Trmac

2003-05-03 Havoc Pennington <hp@pobox.com>

* dbus/dbus-watch.c (dbus_watch_handle): warn and return if a watch is invalid when handled

* tools/Makefile.am, tools/dbus-launch.c, tools/dbus-launch.1:
add
dbus-launch utility to launch the bus from a shell script.
Didn't
actually implement dbus-launch yet, it's just a placeholder
still.

2003-05-03 Havoc Pennington <hp@pobox.com>

* bus/Makefile.am, bus/dbus-daemon-1.1.in: man page for the daemon; also documents daemon config file, so replaces doc/config-file.txt. Corrected some stuff from config-file.txt in the process of moving it.

2003-05-03 Havoc Pennington <hp@pobox.com>

* tools/Makefile.am, tools/dbus-send.1, tools/dbus-monitor.1: add some man pages

2003-05-03 Colin Walters <walters@verbum.org>

* dbus/dbus-sysdeps.c (fill_user_info): Test against DBUS_UID_UNSET to determine whether to do a uid lookup or not.

* Makefile.am: Update to use new .pc versioning scheme.

2003-05-02 Havoc Pennington <hp@redhat.com>

* bus/system.conf.in: allow send/receive to/from message bus service

2003-04-30 Havoc Pennington <hp@redhat.com>

* configure.in: print a note when building with unit tests and without assertions

2003-04-30 Havoc Pennington <hp@redhat.com>

* Makefile.am: add a check-local that complains if you didn't configure with --enable-tests

2003-04-29 Havoc Pennington <hp@redhat.com>

* glib/dbus-gmain.c: docs cleanups

* dbus/dbus-types.h: add docs on int64 types

* dbus/dbus-memory.c: fix docs to avoid putting private API in public API docs section

2003-04-29 Havoc Pennington <hp@redhat.com>

* dbus-1.pc.in, dbus-glib-1.pc.in: rename these from dbus-1.0.pc.in, dbus-glib-1.0.pc.in. As these change with the parallel install API version, not with the D-BUS package version.

* HACKING: move some of README over here

* README: updates, and document API/ABI policy

* configure.in: reindentation

2003-04-29 Havoc Pennington <hp@redhat.com>

- * dbus/dbus.h: add "you have to define DBUS_API_SUBJECT_TO_CHANGE to use this library" to be sure people have the right expectations.

2003-04-28 Havoc Pennington <hp@redhat.com>

- * configure.in: add --enable-docs which by default is auto yes if doxygen and db2html found, no otherwise; but can be forced on/off

- * doc/Makefile.am: conditionalize whether to build docs on --enable-docs

2003-04-28 Havoc Pennington <hp@redhat.com>

- * configure.in: 0.10

- * NEWS: update

- * bus/system.conf.in: add <includedir>system.d</includedir>

- * dbus/dbus-userdb.c (_dbus_user_database_lookup): fix bug when username was provided but not uid

- * bus/config-parser.c (struct BusConfigParser): keep track of whether the parser is toplevel or was included; change some of the error handling if it's included.

2003-04-27 Havoc Pennington <hp@pobox.com>

Unbreak my code...

- * dbus/dbus-transport.c (_dbus_transport_get_dispatch_status): report correct status if we finish processing authentication inside this function.

- * bus/activation.c (try_send_activation_failure): use bus_transaction_send_error_reply

- * bus/connection.c (bus_connection_get_groups): return an error explaining the problem

- * bus/bus.c (bus_context_check_security_policy): implement restriction here that inactive connections can only send the hello message. Also, allow bus driver to send anything to any recipient.

- * bus/connection.c (bus_connection_complete): create the BusClientPolicy here instead of on-demand.

- (bus_connection_get_policy): don't return an error

* dbus/dbus-message.c (dbus_message_new_error_reply): allow NULL sender field in message being replied to

* bus/bus.c (bus_context_check_security_policy): fix silly typo causing it to return FALSE always

* bus/policy.c (bus_client_policy_check_can_send): fix bug where we checked sender rather than destination

2003-04-25 Havoc Pennington <hp@redhat.com>

test suite is slightly hosed at the moment, will fix soon

* bus/connection.c (bus_connections_expire_incomplete): fix to properly disable the timeout when required
(bus_connection_set_name): check whether we can remove incomplete connections timeout after we complete each connection.

* dbus/dbus-mainloop.c (check_timeout): fix this up a bit, probably still broken.

* bus/services.c (bus_registry_acquire_service): implement max number of services owned, and honor allow/deny rules on which services a connection can own.

* bus/connection.c (bus_connection_get_policy): report errors here

* bus/activation.c: implement limit on number of pending activations

2003-04-25 Havoc Pennington <hp@redhat.com>

* dbus/dbus-transport.c (_dbus_transport_get_unix_user): fix bug where we used >= 0 instead of != DBUS_UID_UNSET.

2003-04-25 Havoc Pennington <hp@redhat.com>

* glib/dbus-gmain.c (remove_watch): fix for a crash when watches were toggled without add/remove, fix from Anders Gustafsson

2003-04-24 Havoc Pennington <hp@redhat.com>

* test/data/valid-config-files/basic.conf: add <limit> tags to this test

* bus/config-parser.h, bus/config-parser.c, bus/bus.c: Implement <limit> tag in configuration file.

2003-04-24 Havoc Pennington <hp@redhat.com>

* bus/dispatch.c: somehow missed some name_is

* dbus/dbus-timeout.c (_dbus_timeout_set_enabled)
(_dbus_timeout_set_interval): new

* bus/connection.c (bus_connections_setup_connection): record
time
when each connection is first set up, and expire them after the
auth timeout passes.

2003-04-24 Havoc Pennington <hp@redhat.com>

* dbus/dbus-message.c (dbus_message_name_is): rename
(dbus_message_service_is): rename
(dbus_message_sender_is): rename
(dbus_message_get_service): rename

2003-04-24 Havoc Pennington <hp@redhat.com>

* configure.in: add --enable-checks

* dbus/dbus-message.c (dbus_message_new): reverse name/service
arguments

* dbus/dbus-connection.c (dbus_connection_preallocate_send): fix
to use thread locks.
(_dbus_connection_handler_destroyed_locked): move some private
functions into proper docs group

* dbus/dbus-internals.h: add _dbus_return_if_fail,
_dbus_return_val_if_fail

Throughout: use dbus_return_if_fail

2003-04-23 James Willcox <jwillcox@gnome.org>

* glib/dbus-glib.h:
* glib/dbus-gmain.c: (add_timeout), (wakeup_main),
(create_source),
(dbus_connection_setup_with_g_main),
(dbus_server_setup_with_g_main):
* glib/test-dbus-glib.c: (main):
* glib/test-thread-client.c: (main):
* glib/test-thread-server.c: (new_connection_callback), (main):
* tools/dbus-monitor.c: (main):

Added a GMainContext argument to
dbus_connection_setup_with_g_main()
and dbus_server_setup_with_g_main().

2003-04-20 Havoc Pennington <hp@pobox.com>

* doc/dbus-specification.sgml: document the restrictions on message and service names

2003-04-22 Havoc Pennington <hp@redhat.com>

* dbus/dbus-message.c, dbus/dbus-marshal.c: add 64-bit integer support, and do some code cleanups to share more code and speed up array marshal/demarshal.

* dbus-1.0.pc.in (Cflags): put libdir include file in cflags

* configure.in: generate dbus-arch-deps.h

* dbus/dbus-protocol.h (DBUS_TYPE_INT64, DBUS_TYPE_UINT64): add 64-bit typecodes

2003-04-22 Havoc Pennington <hp@redhat.com>

* test/data/valid-messages/opposite-endian.message: fix test to use proper type for rply field

* test/data/invalid-messages: add tests for below validation

* dbus/dbus-message.c (decode_header_data): validate field types, and validate that named fields are valid names (decode_name_field): consider messages in the org.freedesktop.Local. namespace to be invalid.

* dbus/dbus-string.c (_dbus_string_validate_name): new

2003-04-19 Havoc Pennington <hp@pobox.com>

* bus/driver.c (bus_driver_handle_hello): check limits and return an error if they are exceeded.

* bus/connection.c: maintain separate lists of active and inactive connections, and a count of each. Maintain count of completed connections per user. Implement code to check connection limits.

* dbus/dbus-list.c (_dbus_list_unlink): export

* bus/bus.c (bus_context_check_security_policy): enforce a maximum number of bytes in the message queue for a connection

2003-04-18 Havoc Pennington <hp@pobox.com>

* dbus/dbus-auth.c (record_mechanisms): memleak fixes

* dbus/dbus-sysdeps.c (_dbus_string_save_to_file): fix some memleaks

- * dbus/dbus-keyring.c (add_new_key): fix a memleak, and on realloc be sure to update the pointer in the keyring
- * dbus/dbus-string.c (_dbus_string_zero): compensate for align offset to avoid writing to unallocated memory
- * dbus/dbus-auth.c (process_rejected): return FALSE if we fail to try the next mechanism, so we properly handle OOM
- * dbus/dbus-keyring.c (_dbus_keyring_new_homedir): fix double-free on OOM.
- (_dbus_keyring_new): fix OOM bug
- (_dbus_keyring_new_homedir): always set error; impose a maximum number of keys we'll load from the file, mostly to speed up the test suite and make its OOM checks more useful, but also for general sanity.
- * dbus/dbus-auth.c (process_error_server): reject authentication if we get an error from the client
- (process_cancel): on cancel, send REJECTED, per the spec
- (process_error_client): send CANCEL if we get an error from the server.

2003-04-18 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-mainloop.c (_dbus_loop_iterate): fix UMR in verbose debug spew
- * dbus/dbus-auth.c (handle_client_data_cookie_shal_mech): fix OOM handling problem
- * dbus/dbus-keyring.c (_dbus_keyring_new_homedir): only whine about DBUS_TEST_HOMEDIR once
- * bus/Makefile.am (TESTS_ENVIRONMENT): put DBUS_TEST_HOMEDIR in the environment
- * bus/dispatch.c (bus_dispatch_shal_test): actually load shal config file so we test the right thing

Throughout: assorted docs improvements

2003-04-18 Havoc Pennington <hp@pobox.com>

- * glib/dbus-gmain.c: adapt to watch changes
- * bus/bus.c, bus/activation.c, etc.: adjust to watch changes
- * dbus/dbus-server.h: remove dbus_server_handle_watch

- * dbus/dbus-connection.h: remove dbus_connection_handle_watch
- * dbus/dbus-watch.c (dbus_watch_handle): change DBusWatch to work like DBusTimeout, so we don't need dbus_connection_handle_watch etc.

2003-04-17 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-userdb.c, dbus/dbus-sysdeps.c: redo all the passwd database usage so it all goes via the DBusUserDatabase cache.

2003-04-17 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-mainloop.c (_dbus_loop_iterate): fix logic so that if there was an OOM watch we skipped, we always return TRUE so we iterate again to have a look at it again. Fixes test suite hang. Code rearrangement also lets us lose some memset and only iterate over callbacks once.

- * bus/driver.c (bus_driver_handle_message): sense of test for reply was backward

2003-04-16 Havoc Pennington <hp@pobox.com>

- * doc/dbus-specification.sgml: make spec say serials are unsigned
- * dbus/dbus-message.h: change message serials to unsigned
- * dbus/dbus-connection.c: adapt to message serials being unsigned

2003-04-15 Havoc Pennington <hp@pobox.com>

- * bus/bus.c: create and keep around a shared DBusUserDatabase object.

- * bus/connection.c (bus_connection_get_groups): don't cache groups for user in the connection object, since user database object now does that.

2003-04-16 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-message.c (_dbus_message_add_size_counter): keep a list of size counters
- (_dbus_message_loader_putback_message_link): put back a popped link

- * dbus/dbus-connection.c (dbus_connection_set_max_live_messages_size): rename max_received_size
- (dbus_connection_get_outgoing_size): get size of outgoing queue
- (_dbus_connection_set_connection_counter): remove this cruft

2003-04-14 Havoc Pennington <hp@redhat.com>

* dbus/dbus-userdb.c: user database abstraction, mostly to get caching, but at some point we might want to be able to use a different database.

* bus/dispatch.c (bus_dispatch_shal_test): add a test that uses SHA1 conf file to test the shal auth mechanism, since the regular test always uses EXTERNAL when available.

* configure.in,
test/data/valid-config-files/debug-allow-all-shal.conf.in:
add conf file that requires use of shal auth

2003-04-13 Havoc Pennington <hp@pobox.com>

* tools/dbus-send.c, tools/dbus-monitor.c: two utility programs
from Philip Blundell to send messages and monitor them.

2003-04-13 Havoc Pennington <hp@pobox.com>

* dbus/dbus-mainloop.c: fix some reentrancy issues by recounting callbacks

* test/data/valid-config-files/debug-allow-all.conf.in: allow all users

* dbus/dbus-transport.c (_dbus_transport_get_dispatch_status):
fix to only recover unused bytes if we're already authenticated
(_dbus_transport_get_is_authenticated): fix to still mark us
authenticated if there are unused bytes.

* bus/dispatch.c: implement security policy checking

* bus/connection.c (bus_transaction_send_from_driver): new

* bus/bus.c (bus_context_check_security_policy): new

* bus/dispatch.c (send_service_nonexistent_error): delete this,
now we just set the DBusError and it gets converted to an error
reply.

* bus/connection.c (allow_user_function): enable code using
actual data from the config file

* bus/policy.c (list_allows_user): handle wildcard rules for
user/group connection perms

2003-04-13 Havoc Pennington <hp@pobox.com>

- * bus/config-parser.c: Load up the BusPolicy and BusPolicyRules
- * dbus/dbus-sysdeps.c (_dbus_get_user_id): new function
- * bus/policy.c (bus_policy_append_mandatory_rule)
(bus_policy_append_default_rule, bus_policy_append_user_rule)
(bus_policy_append_group_rule): new functions

2003-04-12 Havoc Pennington <hp@pobox.com>

- * bus/config-parser.c (bus_config_parser_new): fix a memleak
- * dbus/dbus-sysdeps.c: change DBusCredentials to use longs for the pid/gid/uid, just for paranoia.
- * test/break-loader.c (randomly_do_n_things): find a byte containing a type code, and randomly change it to a different type code.

2003-04-12 Havoc Pennington <hp@pobox.com>

- * bus/policy.h: change BusPolicy to be the thing from the config file, and rename old BusPolicy to BusClientPolicy
- * bus/bus.c, bus/connection.c, bus/config-parser.c: change to match change in how policy works
- * dbus/dbus-internals.h: mark assert_not_reached as __attribute__((noreturn))__

2003-04-11 Havoc Pennington <hp@redhat.com>

- * doc/dbus-specification.sgml: fix a spot with the wrong name for the broadcast service. Use boolean return for ServiceExists.

2003-04-11 Havoc Pennington <hp@redhat.com>

- * configure.in: add another directory to look for qt in.

2003-04-11 Havoc Pennington <hp@redhat.com>

- * AUTHORS: add Colin Walters

2003-04-11 Havoc Pennington <hp@redhat.com>

- * NEWS: update
- * configure.in: 0.9

2003-04-11 Havoc Pennington <hp@redhat.com>

* bus/messagebus.in: remove pid file when stopping the message bus, since the bus won't have privileges to remove it itself.

2003-04-11 Havoc Pennington <hp@redhat.com>

* bus/bus.c (bus_context_new): move credentials change after creating pidfile

2003-04-11 Havoc Pennington <hp@pobox.com>

* test/decode-gcov.c: add "below average functions" to the coverage report, and change how some of the code works.

* bus/test-main.c: bracket some stuff in DBUS_BUILD_TESTS so it's not in the coverage stats.

* test/test-service.c (main): use _dbus_verbose not fprintf in a couple places so running the test suite doesn't result in megaspan.

2003-04-11 Havoc Pennington <hp@pobox.com>

* bus/dispatch.c (check_existent_service_activation): accept a no memory error in a place we didn't before

* bus/test.c (bus_test_run_everything): remove hacky "do it twice in case the first one failed," since the test suite is less broken now.

2003-04-10 Havoc Pennington <hp@pobox.com>

* bus/dispatch.c (check_segfault_service_activation): add test for launching an executable that just crashes.

* test/test-segfault.c (main): try setting coredumpsize to 0 so we don't leave a million cores. We'll see how portable this is.

2003-04-10 Havoc Pennington <hp@pobox.com>

* dbus/dbus-spawn.c (_dbus_spawn_async_with_babysitter): move all the possible parent failures before we fork, so that we don't fail to create a babysitter after creating the child.

* bus/activation.c (bus_activation_activate_service): kill child if we don't successfully complete the activation.

2003-04-10 Havoc Pennington <hp@redhat.com>

* dbus/dbus-connection.c (dbus_connection_flush): don't spin on the connection if it's disconnected

```
* bus/activation.c (bus_activation_service_created): use new
transaction features to roll back removal of pending activation
if
we don't successfully create the service after all. Don't remove
pending activation if the function fails.

* dbus/dbus-list.c (_dbus_list_insert_before_link)
(_dbus_list_insert_after_link): new code to facilitate
services.c fixes

* dbus/dbus-hash.c (_dbus_hash_table_insert_string_preallocated):
new functionality, so we can preallocate the ability to insert
into a hash table.

* bus/connection.c (bus_transaction_add_cancel_hook): new
function
allowing us to put custom hooks in a transaction to be used for
cancelling said transaction

* doc/dbus-specification.sgml: add some discussion of secondary
service owners, and disallow zero-length service names

* bus/services.c (bus_registry_acquire_service): new function,
splits out part of bus_driver_handle_acquire_service() and fixes
a bug where we didn't remove the service doing the acquiring
from the secondary queue if we failed to remove the current owner
from the front of the queue.
```

2003-04-10 Alexander Larsson <alexl@redhat.com>

```
* doc/dbus-specification.sgml:
s/org.freedesktop.Broadcast/org.freedesktop.DBus.Broadcast/
```

2003-04-10 Alexander Larsson <alexl@redhat.com>

```
* bus/.cvsignore:
* glib/.cvsignore:
* test/.cvsignore:
Added files to cvsignore

* dbus/dbus-message.h:
* dbus/dbus-message.c: (dbus_message_iter_get_named):
Make get_named() take two out argument and return a boolean.
(dbus_message_iter_get_args_valist):
Update usage of get_named().
(dbus_message_iter_append_byte):
Fix typo
(dbus_message_iter_append_named)
Fix typo
(message_iter_test), (check_message_handling_type),
(_dbus_message_test):
```

More tests.

2003-04-10 Alexander Larsson <alexl@redhat.com>

- * dbus/dbus-marshal.[ch]:
Add array_type_pos argument to _dbus_marshal_validate_arg.
Let you pass a NULL end_pos to _dbus_marshal_validate_type.
- * dbus/dbus-message.[ch]:
Multi-dimensional arrays have full type specification in the
outermost array. Iter code re-arranged to handle this.
Added some more iter tests.
- * doc/dbus-specification.sgml:
Add me to authors.
Remove old FIXME.
Update new array encoding description.
Correct DBUS_SERVICE_FLAGS_REPLACE_EXISTING description.
- * test/data/invalid-messages/array-with-mixed-types.message:
* test/data/valid-messages/array-of-array-of-uint32.message:
Change to the new array format.
- * test/data/invalid-messages/too-short-dict.message:
Fix bug in test.
- * test/data/valid-messages/recursive-types.message:
Fix up and extend test.

2003-04-10 Havoc Pennington <hp@pobox.com>

- * bus/dispatch.c: lots of fixes
- * dbus/dbus-mainloop.c (_dbus_loop_dispatch): export
(_dbus_loop_iterate): remove old "quit if no callbacks" code,
that was crack, broke the test service.
- * dbus/dbus-transport.c (_dbus_transport_open): fix error
handling to avoid piling up errors if we get a failure on the
first address.
- * dbus/dbus-internals.c (_dbus_real_assert_not_reached): include
pid in assertion failures.
- * dbus/dbus-mainloop.c (_dbus_loop_iterate): use static arrays up
to some fixed size of file descriptor array. Don't return TRUE
anytime a timeout exists, that led to lots of busy loop silliness
in the tests.

2003-04-09 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-mainloop.c (check_timeout): fix timeouts, I thought

I'd checked this in earlier but hadn't.

2003-04-09 Havoc Pennington <hp@redhat.com>

- * bus/dispatch.c (bus_dispatch_test): get a bit further through the activation test (man this is getting old!)

2003-04-09 Havoc Pennington <hp@redhat.com>

- * test/test-utils.c: use dispatch status function to fix this up
- * bus/connection.c (connection_watch_callback): don't dispatch from here
(connection_timeout_callback): don't dispatch from here
(bus_connections_setup_connection): set the dispatch status function
(bus_connection_disconnected): unset it
- * dbus/dbus-mainloop.c (_dbus_loop_queue_dispatch): new function used to add a connection to be dispatched
(_dbus_loop_iterate): do the dispatching at the end of each iteration
- * dbus/dbus-connection.c
(dbus_connection_set_dispatch_status_function): new function allowing us to fix up main loop usage
(_dbus_connection_last_unref): free all the various function user data
(dbus_connection_dispatch): call the DispatchStatusFunction whenever this function returns
(dbus_connection_handle_watch): call DispatchStatusFunction
(dbus_connection_send_with_reply_and_block): call DispatchStatusFunction
(reply_handler_timeout): call DispatchStatusFunction
(dbus_connection_flush): call DispatchStatusFunction

2003-04-09 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-bus.c (dbus_bus_register): fix up error handling and a memory leak
- * bus/dispatch.c (check_service_activated): fix bug in test
- * dbus/dbus-mainloop.c (check_timeout): fix this up
- * dbus/dbus-internals.c (_dbus_verbose_real): include PID in verbose output so we can sort out output from different processes,
e.g. in the activation case.

2003-04-08 Colin Walters <walters@gnu.org>

- * bus/bus.c (struct BusContext) [pidfile]: New member, to store the pid file.
- (bus_context_new): Set it.
- (bus_context_unref): Use it to delete the pid file.

2003-04-08 Havoc Pennington <hp@redhat.com>

- * test/data/invalid-messages/array-with-mixed-types.message: regression test that fails for the moment
- * dbus/dbus-test.c (dbus_internal_do_not_use_run_tests): reorder tests for convenience
- * dbus/dbus-marshal.c (_dbus_marshal_validate_arg): don't allow array of nil, it broke things.
- * test/data/invalid-messages/array-of-nil.message: regression test
- * test/data/valid-messages/array-of-array-of-uint32.message: happened to write this so added it to suite

2003-04-08 Havoc Pennington <hp@redhat.com>

- * bus/driver.c (bus_driver_handle_acquire_service): init retval/reply before checking name
- * dbus/dbus-marshal.c (_dbus_marshal_validate_arg): add a recursion depth argument
- * dbus/dbus-message.h (struct DBusMessageIter): put some padding in the public struct for future extension
- * dbus/dbus-message-builder.c (_dbus_message_data_load): fix typo
- * dbus/dbus-marshal.c (_dbus_marshal_validate_arg): fix a verbose message
- * doc/dbus-specification.sgml: fix typo

2003-04-08 Alexander Larsson <alexl@redhat.com>

Implemented recursive types, named types and new-style iters

- * bus/driver.c:
- * glib/test-thread-client.c: (thread_func):
- * glib/test-thread-server.c: (handle_test_message):
- * test/test-service.c: (handle_echo):

Update to new api

- * dbus/Makefile.am:

- * dbus/dbus-dict.c:
- * dbus/dbus-dict.h:
- * dbus/dbus.h
- Remove DBusDict

- * dbus/dbus-internals.c: (_dbus_type_to_string):
- Update for new types.

- * dbus/dbus-marshal.[ch]:
- Implement recursive types and the new marshalling format.
- Remove hardcoded dict marshalling.
- Marshal named types.

- * dbus/dbus-message-builder.c:
- Add BYTE_ARRAY.
- Remove references to old types

- * dbus/dbus-message.[ch]:
- New non-refcounted iter API that supports recursive iters.
- Use iters for appending, including support for recursive iters.
- Add byte and named type support.
- Update everything to new marshalling formats.
- Add tests for new API.

- * dbus/dbus-protocol.h:
- Remove old array types.
- Add types: BYTE, ARRAY, DICT, NAMED

- * dbus/dbus-string.c:
- * dbus/dbus-sysdeps.c:
- Make parse_double locale safe.

- * dbus/dbus-test-main.c:
- Call setlocale.

- * dbus/dbus-test.c:
- Kill dict test

- * doc/dbus-specification.sgml:
- Update spec

- * test/data/incomplete-messages/missing-body.message:
- * test/data/invalid-messages/bad-boolean.message:
- * test/data/invalid-messages/bad-boolean-array.message:
- * test/data/invalid-messages/boolean-array-length-too-long.message-raw:
- * test/data/invalid-messages/boolean-has-no-value.message-raw:
- * test/data/invalid-messages/too-short-dict.message:
- * test/data/valid-messages/dict-simple.message:
- * test/data/valid-messages/dict.message:
- * test/data/valid-messages/emptiness.message:

- * test/data/valid-messages/lots-of-arguments.message:
- * test/data/valid-messages/no-padding.message:
- * test/data/valid-messages/recursive-types.message:

Add missing NAME fields
Fix up dicts & arrays

- * test/data/invalid-messages/dict-with-nil-value.message:

Removed, this is not invalid anymore.

- * test/data/valid-messages/recursive-types.message:

Add new test for deeply recursive types.

2003-04-07 Havoc Pennington <hp@pobox.com>

- * bus/driver.c (bus_driver_handle_acquire_service): return an error if you try to acquire a service that starts with ':'

2003-04-07 Havoc Pennington <hp@redhat.com>

- * doc/dbus-specification.sgml: require that base service names start with ':' and that the base service is created/deleted as first and last things a connection does on the bus

- * bus/dispatch.c (check_existent_service_activation): lots more work on the activation test; it doesn't fully pass yet...

- * test/test-service.c (main): fix so we don't memleak the connection to the message bus
(filter_func): accept a message asking us to exit

2003-04-06 Havoc Pennington <hp@pobox.com>

- * qt/Makefile.am (dbusinclude_HEADERS): install dbus-qt.h, from Colin Walters

- * configure.in: fixes to Qt detection from Colin Walters

- * doc/Makefile.am: Only remove generated docbook dirs if they exist, from Colin Walters

- * dbus/dbus-bus.c: change how we set well-known connections to NULL, so that it works if a single connection is stored in two well-known array slots.

- * test/Makefile.am: remove a lot of stuff that isn't immediately useful, it's in CVS history if we want it.

- * test/test-service.c: use dbus-mainloop instead of that watch.[hc] crack

2003-04-06 Havoc Pennington <hp@pobox.com>

in

- * dbus/Makefile.am: split lists of sources into stuff that goes in the library, util functions that go in the lib and are also used elsewhere, and util functions that are used in tests/daemon but don't go in the lib.

- * dbus/dbus-mainloop.h, dbus/dbus-mainloop.c: move bus/loop.[hc] here so it can be used in test binaries also

2003-04-06 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-sysdeps.c (_dbus_become_daemon): write the pidfile here in the parent process, so we can return an error if it fails. Also, move some of the code into the child so the parent is less hosed if we fail midway through.

- * bus/bus.c (bus_context_new): move pidfile detection further up in the function, before we start overwriting sockets and such.

- * bus/messagebus.in: adjust this a bit, not sure if it will work.

- * configure.in: add --with-system-pid-file and --with-system-socket

2003-04-06 Colin Walters <walters@verbum.org>

- * configure.in (DBUS_SYSTEM_PID_FILE): New variable.

- * bus/system.conf.in: Declare a pidfile.

- * bus/bus.c (bus_context_new): Test for an existing pid file, and create one (if appropriate).

- * bus/config-parser.c (enum ElementType) [ELEMENT_PIDFILE]: New.
(struct BusConfigParser) [pidfile]: New.
(element_type_to_name, merge_included, start_busconfig_child)
(bus_config_parser_end_element, bus_config_parser_content):

Handle it.

- (bus_config_parser_unref): Free it.

- (bus_config_parser_get_pidfile): New function.

- * bus/config-parser.h (_dbus_write_pid_file): Prototype.

- * dbus/dbus-errors.h (DBUS_ERROR_PIDFILE_EXISTS): New error.

- * dbus/dbus-sysdeps.c (_dbus_write_pid_file): New function.

- * dbus/dbus-sysdeps.h: Prototype it.

2003-04-06 Havoc Pennington <hp@pobox.com>

- * bus/bus.c (bus_context_new): print the address in here, rather

than in main(), because we need to do it before forking the daemon

- * bus/dispatch.c (send_service_nonexistent_error): set the sender on the service nonexistent error

- * bus/driver.c (bus_driver_handle_acquire_service): set the sender on the AcquireService reply

- * test/data/valid-config-files/debug-allow-all.conf.in: Make test server also listen on a UNIX socket so services can connect to it.

2003-04-06 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-threads.c: Redo how the fake debug mutexes are done so it detects deadlocks and also we actually init threads when debugging.

2003-04-06 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-server-unix.c (_dbus_server_new_for_domain_socket): save the domain socket name, and unlink it when we disconnect the server. Means that at least when we exit normally, we won't leave a bunch of junk in /tmp

- * dbus/dbus-transport-unix.c (_dbus_transport_new_for_domain_socket): code cleanup (nicer memory management). (I was making a real change here but then didn't)

2003-04-06 Havoc Pennington <hp@pobox.com>

- * bus/bus.c (bus_context_new): fix wrong handling of server_data_slot_unref() in the error case.

- * dbus/dbus-internals.h (_dbus_assert): change so it passes "(condition) != 0" to _dbus_real_assert so that "_dbus_assert (pointer)" doesn't cause a warning

- * bus/main.c (main): accept --print-address option to print out the message bus address

- * dbus/dbus-sysdeps.c (_dbus_generate_random_ascii): export this

- * dbus/dbus-transport.c (_dbus_transport_open): special error for "tmpdir" option to unix: address on client side

- * dbus/dbus-server.c (dbus_server_listen): handle "tmpdir" option to unix: address

- * configure.in (TEST_SOCKET_DIR): locate a temporary directory

we can use to create sockets in the test suite.

* bus/main.c (signal_handler): on SIGTERM, exit the daemon cleanly. To be used for testing.

* dbus/dbus-spawn.c (babysit): use _dbus_set_signal_handler()

* dbus/dbus-sysdeps.c (_dbus_set_signal_handler): new

* dbus/dbus-server-debug-pipe.c (_dbus_transport_debug_pipe_new): handle trying to call this when there's no servers active

2003-04-05 Havoc Pennington <hp@pobox.com>

* NEWS: update

* configure.in: 0.8

2003-04-05 Havoc Pennington <hp@pobox.com>

* bus/bus.c (setup_server): fix this so dbus-daemon-1 doesn't crash on startup. Need to get "try starting the daemon" in the test suite I guess. ;-)

* dbus/dbus-server.h, dbus/dbus-server.c: remove the stuff that tracked the number of open connections; it's better done in application-specific code as you want it to span all servers etc.

2003-04-05 Havoc Pennington <hp@pobox.com>

* bus/Makefile.am (install-data-hook): add missing DESTDIR, patch from Colin Walters

2003-04-05 Havoc Pennington <hp@pobox.com>

* doc/config-file.txt (Elements): fix docs of <auth> to reflect reality; in fact multiple mechanisms are allowed.

* dbus/dbus-internals.c (_dbus_real_assert) (_dbus_real_assert_not_reached): move guts of _dbus_assert() and _dbus_assert_not_reached() into functions, so that they don't

show

up in basic block counts for test coverage, and don't use up as much disk space. Does mean slower execution speed though, so assumes --disable-asserts is the normal production case.

2003-04-05 Havoc Pennington <hp@pobox.com>

* test/Makefile.am (dist-hook): also dist *.in files

* NEWS: update

* configure.in: 0.7

2003-04-05 Havoc Pennington <hp@pobox.com>

* dbus/dbus-string.c: docs warning

* dbus/dbus-spawn.c: missing docs

* dbus/dbus-memory.c (struct ShutdownClosure): missing docs

2003-04-05 Havoc Pennington <hp@pobox.com>

* bus/loop.c (bus_loop_iterate): fix the timeout code, using magic from GLib

* dbus/dbus-spawn.c (_dbus_babysitter_unref): set sitter_pid to -1 once we've reaped the babysitter
(_dbus_babysitter_handle_watch): do as much work as we can, not just one go of it

* bus/activation.c: add code using DBusBabysitter so that we handle it when a service fails to start up properly.
(bus_activation_service_created): don't remove the activation entries as we go, just let them get removed when we free the pending activation. Unref reply messages after sending them.

2003-04-05 Havoc Pennington <hp@pobox.com>

* test/decode-gcov.c (main): print per-directory stats in the report

* Makefile.am (coverage-report.txt): don't include test/* in gcov stats

2003-04-05 Havoc Pennington <hp@pobox.com>

* Makefile.am (coverage-report.txt): add target "coverage-report.txt"

* test/decode-gcov.c: hack up a little program to suck data out of gcov files. Yes this is sort of silly.

* configure.in: define something in config.h and do an AM_CONDITIONAL when gcov is enabled

2003-04-04 Havoc Pennington <hp@redhat.com>

* dbus/dbus-spawn.c, dbus/dbus-spawn.h: Change dbus_spawn to return a "babysitter" object that is used to monitor the status of the spawned process and reap it when required.

* test/test-segfault.c, test/test-exit.c,
test/test-sleep-forever.c: binaries that do various lame things,
used in the test suite.

* dbus/dbus-sysdeps.c: kill _dbus_errno_to_string()

2003-04-03 Havoc Pennington <hp@pobox.com>

* dbus/dbus-spawn.c: Move dbus-spawn into a separate file
in preparation for modifying it, dbus-sysdeps is getting
a bit unmanageable.

2003-04-03 Havoc Pennington <hp@redhat.com>

* bus/loop.h, bus/loop.c: make the mainloop an object so we can
have multiple ones

* bus/*. [hc]: adapt to mainloop change

2003-04-03 Havoc Pennington <hp@redhat.com>

* bus/activation.c (load_directory): fix up memleaks
(bus_activation_entry_free): free the entry

* dbus/dbus-bus.c (dbus_bus_acquire_service): return an error if
we get one from the message bus; fix memleaks.

* dbus/dbus-message.c (dbus_set_error_from_message): new function

2003-04-03 Havoc Pennington <hp@pobox.com>

* bus/config-parser.c (bus_config_parser_unref): free
list of mechanisms, bug discovered by test suite enhancements
(putting system.conf and session.conf into suite)

* test/Makefile.am, test/test-service.c: add placeholder for a
test service that we'll activate as part of test suite. Doesn't
do anything yet.

* dbus/dbus-sysdeps.c (_dbus_setenv): support unsetenv by
setting NULL value, and use system malloc not dbus_malloc()
when we have unavoidable memleakage.

* dbus/dbus-bus.c (dbus_bus_get): fix bug where bus type of 0
didn't work, and support DBUS_BUS_ACTIVATION.

* bus/activation.c (child_setup): pass our well-known bus type to
the child

* bus/config-parser.c: support <type> to specify well-known type

* doc/dbus-specification.sgml: document the env variables to locate well-known buses and find service activator

2003-04-02 Havoc Pennington <hp@redhat.com>

* test/Makefile.am (all-local): add a rule to copy tests to builddir, so we can have generated tests. Use this to remove the silly hack for testing system.conf and session.conf. Will use this shortly to generate .service files pointing to test binaries.

2003-04-02 Havoc Pennington <hp@redhat.com>

* dbus/dbus-string.c (set_length): fix a bug - we allocated max of current alloc and needed new length, not max of the doubled allocation and needed new length. Also, when building tests, don't do the double-allocation stuff, just realloc every time.

2003-04-02 Havoc Pennington <hp@redhat.com>

* dbus/dbus-sysdeps.c (_dbus_file_get_contents): include filenames in error messages
(_dbus_string_get_dirname): new
(_dbus_sysdeps_test): new
(_dbus_directory_open): include dirnames in error messages

* bus/config-parser.c: interpret <include> and <includedir> and <servicedir> relative to config file location if the given filename is not absolute.

* dbus/dbus-string.c (_dbus_string_find_byte_backward): new

2003-04-02 Havoc Pennington <hp@redhat.com>

* bus/connection.c (bus_transaction_send_error_reply): set sender service for the error, and unref the reply on success

* bus/activation.c: convert to use BusTransaction so OOM can be handled correctly
(bus_activation_service_created): set sender of the message

2003-04-01 Havoc Pennington <hp@redhat.com>

* bus/config-parser.c, bus/bus.c: implement <servicedir> and <includedir> (at least mostly)

* dbus/dbus-sysdeps.c (_dbus_change_identity): set the group ID first, then the user ID

2003-04-01 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-server.c (dbus_server_set_auth_mechanisms): new function
- * dbus/dbus-auth.c (_dbus_auth_set_mechanisms): new
- * dbus/dbus-internals.c (_dbus_dup_string_array): new function
- * dbus/dbus-sysdeps.c (_dbus_listen_unix_socket): chmod the socket 0777, and unlink any existing socket.
- * bus/bus.c (bus_context_new): change our UID/GID and fork if the configuration file so specifies; set up auth mechanism restrictions
- * bus/config-parser.c (bus_config_parser_content): add support for <fork> option and fill in code for <auth>
- * bus/system.conf.in: add <fork/> to default configuration, and limit auth mechanisms to EXTERNAL
- * doc/config-file.txt (Elements): add <fork>
- * dbus/dbus-sysdeps.c (_dbus_become_daemon): new function
(_dbus_change_identity): new function

2003-03-31 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-sysdeps.c (_dbus_connect_unix_socket)
(_dbus_listen_unix_socket): fix off-by-one error in null termination spotted by Nalin

2003-03-31 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-keyring.c (_dbus_keyring_new_homedir): allow setting DBUS_TEST_HOMEDIR when tests are enabled, so we can test without having a real home directory available.

2003-03-31 Havoc Pennington <hp@redhat.com>

- * bus/Makefile.am (install-data-hook): create /var/run/dbus
- * bus/messagebus.in: add init script for Red Hat /etc/init.d
- * configure.in: add support for specifying a style of init script to install

2003-03-31 Havoc Pennington <hp@redhat.com>

- Fix some annoying DbusString API and fix all affected code.
- * dbus/dbus-string.c (_dbus_string_init): get rid of annoying

max_length argument
(_dbus_string_get_data): change to return string instead of using
an out param
(_dbus_string_get_const_data): ditto
(_dbus_string_get_data_len): ditto
(_dbus_string_get_const_data_len): ditto

2003-03-31 Havoc Pennington <hp@redhat.com>

* bus/main.c (main): fix up the command line arguments to be
nicer

2003-03-31 Havoc Pennington <hp@redhat.com>

* dbus/Makefile.am (INCLUDES): use EXPANDED_LOCALSTATEDIR to
define DBUS_SYSTEM_BUS_PATH as we want to compile in the same
final location that lands in the config file

* bus/config-loader-expat.c (bus_config_load): fix type of
XML_Parser variable

* doc/TODO: remove TODO item for dbus_bus_get()

* dbus/dbus-bus.c (bus_data_free): add missing lock/unlock

2003-03-31 Havoc Pennington <hp@pobox.com>

* dbus/dbus-transport-unix.c
(_dbus_transport_new_for_domain_socket)
(_dbus_transport_new_for_tcp_socket): these didn't need the
"server"
argument since they are always client side

* dbus/dbus-server.c (dbus_server_get_address): new function

* bus/main.c (main): take the configuration file as an argument.

* test/data/valid-config-files/debug-allow-all.conf: new file to
use with dispatch.c tests for example

* bus/test-main.c (main): require test data dir

* bus/bus.c (bus_context_new): change this to take a
configuration file name as argument

* doc/config-file.txt (Elements): add <servicedir>

* bus/system.conf, bus/session.conf: new files

* dbus/dbus-bus.c (dbus_bus_get): look for system bus on
well-known socket if none set

* configure.in: create system.conf and session.conf

2003-03-30 Havoc Pennington <hp@pobox.com>

* bus/config-parser.c: hacking

* dbus/dbus-memory.c: don't use DBusList for the list of stuff to shut down, since it could cause weirdness with the DBusList lock

* dbus/dbus-list.c (_dbus_list_test): add tests for the link-oriented stack routines
(alloc_link): free the mempool if the first alloc from it fails

* dbus/dbus-mempool.c (struct DBusMemBlock): fix alignment issue

* dbus/dbus-string.c (UNICODE_VALID): sync new version of this from GLib
(_dbus_string_skip_white): new

* doc/config-file.txt (Elements): add <includedir>

2003-03-28 Havoc Pennington <hp@pobox.com>

* dbus/dbus-string.c (_dbus_string_copy_data_len)
(_dbus_string_copy_data): new functions

2003-03-28 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-bus.c: (bus_data_free), (dbus_bus_get):
* dbus/dbus-bus.h:
Add dbus_bus_get.

* dbus/dbus-memory.c:
Fix a doc comment.

2003-03-28 Havoc Pennington <hp@pobox.com>

* bus/test.c (bus_test_flush_bus): remove the sleep from here, I think it may have just been superstition. Not sure.

* dbus/dbus-string.c (_dbus_string_base64_decode): catch some OOM failures that were not being handled.

* dbus/dbus-auth.c (process_auth): fix a memleak in OOM handling

* dbus/dbus-memory.c: add ability to set number of mallocs in a row that will fail on out-of-memory.

* dbus/dbus-internals.c (_dbus_test_oom_handling): convenience function for testing out-of-memory handling.

* bus/config-loader-expat.c (memsuite): don't wrap the dbus allocation functions, they do map exactly to the expat ones.

2003-03-27 Havoc Pennington <hp@redhat.com>

* bus/config-loader-libxml.c (bus_config_load): add another error check

2003-03-26 Anders Carlsson <andersca@codefactory.se>

* doc/TODO:
Add note about automatic service activation.

* doc/dbus-specification.sgml:
Rename the specification and clarify a few things.

2003-03-26 Anders Carlsson <andersca@codefactory.se>

* Doxyfile.in:
* dbus/dbus-address.c:
* dbus/dbus-dict.c:
* dbus/dbus-marshal.c:
* dbus/dbus-server-debug-pipe.c:
* dbus/dbus-transport-unix.c:
Fix documentation warnings.

2003-03-26 Havoc Pennington <hp@pobox.com>

* bus/test-main.c, dbus/dbus-test.c (main): check memleaks after every test so it's quick and easy to see which leaked, and so we test multiple dbus_shutdown() calls

* configure.in: change configure.in XML stuff to also support expat

* config-loader-libxml.c: some hacking

* config-loader-expat.c: some hacking

* config-parser.c: some hacking, plus tests

2003-03-25 Havoc Pennington <hp@redhat.com>

* throughout - add more _DBUS_ASSERT_ERROR_IS_CLEAR

* configure.in: add --with-xml option to specify XML library, right now only libxml is supported.

* bus/config-loader-libxml.c, config-parser.c: sync some minor nonworking code between home and work, still just stubs

2003-03-24 Havoc Pennington <hp@redhat.com>

* dbus/dbus-sysdeps.c (_dbus_set_fd_nonblocking): move to this file

* dbus/dbus-errors.c (dbus_set_error, dbus_set_error_const):
allow
NULL argument for "message" if the error is a well-known one,
fill in a generic message in this case.

* dbus/dbus-errors.h (DBusResultCode): Kill DBusResultCode in
favor of DBusError

* bus/test.c (bus_test_flush_bus): add

* bus/policy.c (bus_policy_test): test code stub

2003-03-24 Havoc Pennington <hp@pobox.com>

* bus/connection.c (bus_connections_setup_connection): set up
the "can this user connect" function, but it always returns
TRUE until we have a config file parser so we can have a config
file that allows connections.

2003-03-23 Havoc Pennington <hp@pobox.com>

* dbus/dbus-threads.c (dbus_mutex_new, dbus_condvar_new): with
DBUS_BUILD_TESTS, actually alloc/free a block of memory for
the mutex, so we can check for proper memory management
and OOM handling.

* dbus/dbus-dataslot.c: remove the mutex from
DBusDataSlotAllocator and lock it manually when using it,
to simplify fitting it into the global slots framework.

* dbus/dbus-threads.c (init_static_locks): rework how we're
handling global locks so they are easily shut down.

* bus/policy.c (bus_policy_append_rule): fix

* bus/test-main.c (main): check for memleaks

* dbus/dbus-test.c (dbus_internal_do_not_use_run_tests): make
test suite check for memleaks

* dbus/dbus-memory.c: add support in test mode for tracking
number of outstanding blocks

2003-03-23 Havoc Pennington <hp@pobox.com>

* bus/policy.c, bus/bus.c, bus/connection.c: implement allow/deny
policies code

- * dbus/dbus-hash.h: add ULONG hash keys
- * dbus/dbus-sysdeps.c (_dbus_get_groups): new
(_dbus_get_group_id): new function

2003-03-20 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-connection.c
(dbus_connection_set_unix_user_function):
new function
(dbus_connection_get_unix_user): new function

2003-03-20 Havoc Pennington <hp@pobox.com>

- * bus/connection.c (bus_connection_send_oom_error): assert that
message has a sender
(connection_execute_transaction): ditto
(bus_connection_preallocate_oom_error): fix to set the sender,
and
set recipient to the destination service, not the bus driver
- * bus/policy.c: hacking
- * dbus/dbus-message.c (dbus_message_service_is): new function
(dbus_message_sender_is): new

2003-03-19 Havoc Pennington <hp@redhat.com>

- * bus/policy.c: start sketching code for policy restrictions on
what connections can do.

2003-03-18 Havoc Pennington <hp@redhat.com>

- * doc/TODO: some notes on high-level todo items. Little nitpick
stuff is all in @todo, so no need to add it here.
- * doc/config-file.txt: some notes on how config file might look

2003-03-18 Anders Carlsson <andersca@codefactory.se>

- * configure.in: 0.6
- * NEWS: Update.

2003-03-17 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-internals.h: add gcc attributes so that
our printf-style functions warn on bad arguments to
format
- * dbus/dbus-sysdeps.c (_dbus_connect_tcp_socket): fix printf
format bug

* dbus/dbus-message.c (_dbus_message_loader_queue_messages): fix printf format bug

2003-03-17 Havoc Pennington <hp@redhat.com>

* bus/test-main.c (main): make it print something as it runs so make check doesn't look stuck

* doc/negotiation.txt, doc/dbus-sasl-profile.txt: remove from CVS, now obsolete

2003-03-17 Anders Carlsson <andersca@codefactory.se>

* bus/dispatch.c: (bus_dispatch):
Refetch the service name since it may have been reallocated when dbus_message_set_sender was called.

* dbus/dbus-sysdeps.c: (_dbus_accept):
Add address and address length variables and use them to stop valgrind from complaining.

2003-03-17 Havoc Pennington <hp@pobox.com>

All tests pass, no memleaks, no valgrind complaints.

* bus/test.c: refcount handler_slot

* bus/connection.c (bus_connections_new): refcount connection_data_slot

* dbus/dbus-auth-script.c (_dbus_auth_script_run): delete unused bytes so that auth scripts pass.

* bus/dispatch.c: init message_handler_slot so it gets allocated properly

* bus/dispatch.c (message_handler_slot_ref): fix memleak

* dbus/dbus-server-debug-pipe.c (_dbus_server_debug_pipe_new): dealloc server_pipe_hash when no longer used for benefit of leak checking

* dbus/dbus-auth.c (process_command): memleak fix

* bus/dispatch.c (check_hello_message): memleak fix

2003-03-16 Havoc Pennington <hp@pobox.com>

* dbus/dbus-bus.c (ensure_bus_data): fix double-unref of the data slot

2003-03-17 Anders Carlsson <andersca@codefactory.se>

- * bus/activation.c (bus_activation_activate_service): Append the pending activation entry to the list of pending activations.

2003-03-16 Havoc Pennington <hp@pobox.com>

- * bus/dispatch.c (bus_dispatch_test): remove double-unrefs of connections

- * dbus/dbus-address.c (create_entry): fix OOM handling when failing to alloc entry->method

2003-03-16 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-watch.c (_dbus_watch_new): handle failure to malloc the watch

- * dbus/dbus-server-debug-pipe.c (_dbus_transport_debug_pipe_new): add some missing dbus_set_result

- * bus/dispatch.c (bus_dispatch_add_connection): handle failure to alloc the DBusMessageHandler

- * dbus/dbus-transport.c (_dbus_transport_disconnect): don't ref the transport here, since we call this from the finalizer; it resulted in a double-finalize.

- * dbus/dbus-transport.c (_dbus_transport_disconnect): fix a bug where we tried to use transport->connection that was NULL, happened when transport was disconnected early on due to OOM

- * bus/*.c: adapt to handle OOM for watches/timeouts

- * dbus/dbus-transport-unix.c: port to handle OOM during watch handling

- * dbus/dbus-auth.c (_dbus_auth_get_unused_bytes): return a reference to unused bytes instead of a copy

- * dbus/dbus-server.c (dbus_server_handle_watch): return FALSE for out of memory

- * dbus/dbus-connection.c (dbus_connection_handle_watch): return FALSE on OOM

- * dbus/dbus-timeout.c (dbus_timeout_handle): return FALSE for out of memory

2003-03-16 Anders Carlsson <andersca@codefactory.se>

- * doc/dbus-specification.sgml:

Document reply message for ActivateService.

2003-03-16 Anders Carlsson <andersca@codefactory.se>

- * bus/activation.c: (bus_pending_activation_entry_free), (bus_pending_activation_free), (bus_activation_new), (bus_activation_unref), (bus_activation_service_created), (bus_activation_activate_service):
- * bus/activation.h:
- * bus/bus.c: (bus_context_new):
- * bus/desktop-file.c: (new_section):
- * bus/driver.c: (bus_driver_send_service_deleted), (bus_driver_handle_activate_service):
- * bus/services.c: (bus_registry_new), (bus_registry_ensure):
- * bus/services.h:
- * dbus/dbus-connection.c: (dbus_connection_send_with_reply_and_block):
- * dbus/dbus-message.c: (dbus_message_append_args_valist):
- * dbus/dbus-protocol.h:

Make activation work better. Now pending activations will be queued

and the daemon won't try to activate services that are already registered.

2003-03-16 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-bus.c (ensure_bus_data): handle failure to set connection data
- * dbus/dbus-memory.c (_dbus_initialize_malloc_debug): support DBUS_MALLOC_BACKTRACES to print trace when failing an alloc

2003-03-16 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-string.c (_dbus_string_validate_utf8): oops, unbreak this. always run the test suite before commit...

- * bus/*: adapt to DBusConnection API changes

- * glib/dbus-gmain.c: adapt to DBusConnection API changes, requires renaming stuff to avoid dbus_connection_dispatch name conflict.

- * dbus/dbus-transport.c (_dbus_transport_queue_messages): new function

- * dbus/dbus-message.c (_dbus_message_loader_queue_messages): separate from _dbus_message_loader_return_buffer()

- * dbus/dbus-connection.c (dbus_connection_get_n_messages): remove this, because it's now always broken to use; the number of messages in queue vs. the number still buffered by the message

loader is undefined/meaningless. Should use
dbus_connection_get_dispatch_state().
(dbus_connection_dispatch): rename from
dbus_connection_dispatch_message

2003-03-16 Havoc Pennington <hp@pobox.com>

* dbus/dbus-string.c (_dbus_string_validate_utf8): copy in a real
implementation

2003-03-16 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-connection.c:
(dbus_connection_send_with_reply_and_block):
Decrease connection->n_incoming when removing an entry
from the list.
* dbus/dbus-dict.c: (dbus_dict_entry_free),
(dbus_dict_set_boolean_array), (dbus_dict_set_int32_array),
(dbus_dict_set_uint32_array), (dbus_dict_set_double_array),
(dbus_dict_set_byte_array), (dbus_dict_set_string_array),
(dbus_dict_get_boolean_array), (dbus_dict_get_double_array),
(dbus_dict_get_byte_array):
Handle NULL arrays and strings. Also add support for byte arrays.

* dbus/dbus-marshal.c: (_dbus_marshall_byte_array),
(_dbus_marshall_dict), (_dbus_demarshal_byte_array),
(_dbus_demarshal_int32_array), (_dbus_demarshal_uint32_array),
(_dbus_demarshal_double_array), (_dbus_demarshal_string_array),
(_dbus_demarshal_dict), (demarshal_and_validate_len),
(_dbus_marshall_validate_arg), (_dbus_marshall_test):
* dbus/dbus-marshal.h:
Add support for marshalling and demarshalling empty arrays and
strings.

* dbus/dbus-message.c: (dbus_message_append_args_valist),
(dbus_message_append_string_array),
(dbus_message_iter_get_boolean),
(dbus_message_iter_get_boolean_array),
(dbus_message_iter_get_int32_array),
(dbus_message_iter_get_uint32_array),
(dbus_message_iter_get_double_array),
(dbus_message_iter_get_byte_array),
(dbus_message_iter_get_string_array),
(dbus_message_iter_get_dict),
(check_message_handling):
Add support for getting empty arrays and dicts.

* dbus/dbus-string.c: (_dbus_string_validate_utf8):
Don't do any validation at all for now, that's better than just
checking
for ASCII.

* test/data/valid-messages/emptiness.message:
New test message with lots of empty arrays.

2003-03-16 Havoc Pennington <hp@pobox.com>

* dbus/dbus-connection.c
(_dbus_connection_queue_received_message_link): new function that
can't fail due to OOM

* dbus/dbus-message.c (_dbus_message_loader_pop_message_link):
new function pops a message together with a list link
containing it.

* dbus/dbus-transport-unix.c (queue_messages): use new link-based
message queuing functions to avoid needing to alloc memory

2003-03-16 Havoc Pennington <hp@pobox.com>

Oops - test code was only testing failure of around 30 of the
mallocs in the test path, but it turns out there are 500+
mallocs. I believe this was due to misguided linking setup such
that there was one copy of dbus_malloc etc. in the daemon and one
in the shared lib, and only daemon mallocs were tested. In any
case, the test case now tests all 500+ mallocs, and doesn't pass
yet, though there are lots of fixes in this patch.

* dbus/dbus-connection.c (dbus_connection_dispatch_message): fix
this so that it doesn't need to allocate memory, since it
has no way of indicating failure due to OOM (and would be
annoying if it did).

* dbus/dbus-list.c (_dbus_list_pop_first_link): new function

* bus/Makefile.am: rearrange to create two self-contained
libraries, to avoid having libraries with overlapping symbols.
that was resulting in weirdness, e.g. I'm pretty sure there
were two copies of global static variables.

* dbus/dbus-internals.c: move the malloc debug stuff to
dbus-memory.c

* dbus/dbus-list.c (free_link): free list mempool if it becomes
empty.

* dbus/dbus-memory.c (_dbus_disable_mem_pools): new function

* dbus/dbus-address.c (dbus_parse_address): free list nodes
on failure.

* bus/dispatch.c (bus_dispatch_add_connection): free
message_handler_slot when no longer using it, so
memory leak checkers are happy for the test suite.

* dbus/dbus-server-debug-pipe.c (debug_finalize): free server name

* bus/bus.c (new_connection_callback): disconnect in here if bus_connections_setup_connection fails.

* bus/connection.c (bus_connections_unref): fix to free the connections
(bus_connections_setup_connection): if this fails, don't disconnect the connection, just be sure there are no side effects.

* dbus/dbus-string.c (undo_alignment): unbreak this

* dbus/dbus-auth.c (_dbus_auth_unref): free some stuff we were leaking
(_dbus_auth_new): fix the order in which we free strings on OOM failure

* bus/connection.c (bus_connection_disconnected): fix to not send ServiceDeleted multiple times in case of memory allocation failure

* dbus/dbus-bus.c (dbus_bus_get_base_service): new function to get the base service name
(dbus_bus_register_client): don't return base service name, instead store it on the DBusConnection and have an accessor function for it.
(dbus_bus_register_client): rename dbus_bus_register()

* bus/dispatch.c (check_hello_message): verify that other connections on the bus also got the correct results, not just the one sending hello

2003-03-15 Havoc Pennington <hp@pobox.com>

Make it pass the Hello handling test including all OOM codepaths. Now to do other messages...

* bus/services.c (bus_service_remove_owner): fix crash when removing owner from an empty list of owners
(bus_registry_ensure): don't leave service in the list of a connection's owned services if we fail to put the service in the hash table.

* bus/connection.c (bus_connection_preallocate_oom_error): set error flag on the OOM error.

* dbus/dbus-connection.c (_dbus_connection_new_for_transport): handle _dbus_transport_set_connection failure

* dbus/dbus-transport-unix.c (`_dbus_transport_new_for_fd`): modify to create watches up front and simply enable/disable them as needed.

(`unix_connection_set`): this can now fail on OOM

* dbus/dbus-timeout.c, dbus/dbus-watch.c: add concept of enabling/disabling a watch or timeout.

* bus/loop.c (`bus_loop_iterate`): don't touch disabled watches/timeouts

* glib/dbus-gmain.c: adapt to enable/disable watches and timeouts

2003-03-15 Havoc Pennington <hp@pobox.com>

* bus/dispatch.c (`bus_dispatch_test`): OK, now finally actually write useful test code, after all that futzing around ;-)

Test does not yet pass because we can't handle OOM in `_dbus_transport_messages_pending` (basically, `dbus_connection_preallocate_send()` does not prealloc the write watch). To fix this, I think we need to add new stuff to `set_watch_functions`, namely a `SetEnabled` function so we can alloc the watch earlier, then enable it later.

* dbus/Makefile.am (`libdbus_convenience_la_SOURCES`): move `dbus-memory.c` to the convenience lib

* bus/test.c: rename some static functions to keep them clearly distinct from stuff in `connection.c`. Handle client disconnection.

2003-03-14 Havoc Pennington <hp@pobox.com>

* bus/dispatch.c (`bus_dispatch_test`): do test using debug-pipe transport, tests more of the real codepath. Set up clients with `bus_setup_debug_client`.

* bus/test.c (`bus_setup_debug_client`): function to set up debug "clients" on the main loop

* dbus/dbus-transport.c (`_dbus_transport_open`): add debug-pipe support

* dbus/dbus-server.c (`dbus_server_listen`): add debug-pipe server type

* dbus/dbus-server-debug.c: support a debug server based on pipes

* dbus/dbus-sysdeps.c (`_dbus_full_duplex_pipe`): new function
(`_dbus_close`): new function

* `configure.in`: check for `socketpair`

2003-03-14 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-memory.c: add a "detect buffer overwrites on free" cheesy hack
- * dbus/dbus-transport-debug.c: rework this a good bit to be less complicated. hopefully still works.
- * dbus/dbus-server-debug.c (handle_new_client): remove timeout manually
- * glib/dbus-gmain.c (timeout_handler): don't remove timeout after running it
- * dbus/dbus-message.c (dbus_message_copy): rename from dbus_message_new_from_message, fix it up to copy all the message fields, add test case
- * bus/dispatch.c (bus_dispatch_test): add some more test code, not quite passing yet

2003-03-14 Havoc Pennington <hp@pobox.com>

- * bus/loop.c (bus_loop_iterate): add this so we can "run loop until no work remains" in test code. (the large diff here is just code movement, no actual changes)
- * dbus/dbus-server-debug.c (DEFAULT_INTERVAL): change interval to 1, no point waiting around for test code. (_dbus_server_debug_accept_transport): unref the timeout after adding it (right?)
- * dbus/dbus-transport-debug.c (DEFAULT_INTERVAL): ditto

2003-03-13 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-timeout.c (_dbus_timeout_list_set_functions): handle out of memory
- * dbus/dbus-watch.c (_dbus_watch_list_set_functions): handle out of memory
- * dbus/dbus-connection.h: Make AddWatchFunction and AddTimeoutFunction return a bool so they can fail on out-of-memory
- * bus/bus.c (bus_context_new): set up timeout handlers
- * bus/connection.c (bus_connections_setup_connection): set up timeout handlers

- * glib/dbus-gmain.c: adapt to the fact that set_functions stuff can fail
- * bus/bus.c (bus_context_new): adapt to changes
- * bus/connection.c: adapt to changes
- * test/watch.c: adapt to DbusWatch changes
- * bus/dispatch.c (bus_dispatch_test): started adding this but didn't finish

2003-03-14 Anders Carlsson <andersca@codefactory.se>

- * bus/dispatch.c (send_service_nonexistent_error): Fix typo.

2003-03-13 Havoc Pennington <hp@pobox.com>

- * bus/test.c, bus/test.h, bus/Makefile.am, bus/test-main.c: set up a test framework as for the library

2003-03-12 Havoc Pennington <hp@pobox.com>

Throughout: purge global variables, introduce BusActivation, BusConnections, BusRegistry, etc. objects instead.

- * bus/bus.h, bus/bus.c: introduce BusContext as a global message bus object
- * test/Makefile.am (TEST_BINARIES): disable bus-test for now, going to redo this a bit differently I think

2003-03-12 Havoc Pennington <hp@redhat.com>

Mega-patch that gets the message bus daemon initially handling out-of-memory. Work still needed. Also lots of random moving stuff to DBusError instead of ResultCode.

- * dbus/dbus-list.c (_dbus_list_length_is_one): new function
 - * dbus/dbus-connection.c (dbus_connection_send_with_reply_and_block): use DBusError
 - * dbus/dbus-bus.c: adapt to API changes, make it use DBusError
- not
DBusResultCode
- * dbus/dbus-connection.c (dbus_connection_send): drop the result code here, as the only failure possible is OOM.
 - * bus/connection.c (bus_connection_disconnect): rename bus_connection_disconnected as it's a notification only

```

* bus/driver.c (bus_driver_handle_acquire_service): don't free
"name" on get_args failure, should be done by get_args;
don't disconnect client for bad args, just return an error.
(bus_driver_handle_service_exists): ditto

* bus/services.c (bus_services_list): NULL-terminate returned
array

* bus/driver.c (bus_driver_send_service_lost)
(bus_driver_send_service_acquired): send messages from driver to
a
specific client to the client's unique name, not to the broadcast
service.

* dbus/dbus-message.c (decode_header_data): reject messages that
contain no name field
(_dbus_message_get_client_serial): rename to
dbus_message_get_serial and make public
(_dbus_message_set_serial): rename from set_client_serial
(_dbus_message_set_reply_serial): make public
(_dbus_message_get_reply_serial): make public

* bus/connection.c (bus_connection_foreach): allow stopping
iteration by returning FALSE from foreach function.

* dbus/dbus-connection.c (dbus_connection_send_preallocated)
(dbus_connection_free_preallocated_send)
(dbus_connection_preallocate_send): new API for sending a message
without possibility of malloc failure.
(dbus_connection_send_message): rename to just
dbus_connection_send (and same for whole function family)

* dbus/dbus-errors.c (dbus_error_free): make this reinit the
error

* dbus/dbus-sysdeps.c (_dbus_exit): new function

* bus/activation.c: handle/return errors

* dbus/dbus-errors.h: add more DBUS_ERROR #define

* dbus/dbus-sysdeps.c (_dbus_directory_open)
(_dbus_file_get_contents)
(_dbus_directory_get_next_file): use DBusError instead of
DBusResultCode
(_dbus_result_from_errno): move to this file

```

2003-03-10 Anders Carlsson <andersca@codefactory.se>

```

* dbus/dbus-marshal.c:
(_dbus_marshal_set_string):

```

Take a length argument so we can marshal the correct string length.

```
(_dbus_marshal_dict), (_dbus_demarshal_dict),
(_dbus_marshal_get_arg_end_pos), (_dbus_marshal_validate_arg),
(_dbus_marshal_test):
* dbus/dbus-marshal.h:
Add support for marshalling and demarshalling dicts.

* dbus/dbus-message-builder.c: (_dbus_message_data_load):
Add support for TYPE_DICT.

* dbus/dbus-message.c: (set_string_field):
Adjust header padding.

(dbus_message_append_args_valist), (dbus_message_append_dict),
(dbus_message_get_args_valist), (dbus_message_iter_get_arg_type),
(dbus_message_iter_get_dict),
(_dbus_message_loader_return_buffer),
(check_message_handling), (check_have_valid_message):
* dbus/dbus-message.h:
Add functions for setting and getting dicts.

* dbus/dbus-protocol.h:
Add DBUS_TYPE_DICT.

* dbus/dbus.h:
Add dbus-dict.h

* doc/dbus-specification.sgml:
Add information about how dicts are marshalled.

* test/data/invalid-messages/dict-with-nil-value.message:
* test/data/invalid-messages/too-short-dict.message:
* test/data/valid-messages/dict-simple.message:
* test/data/valid-messages/dict.message:
Add sample messages containing dicts.
```

2003-03-08 Anders Carlsson <andersca@codefactory.se>

```
* dbus/dbus-dict.h: Add DBUS_END_DECLS.
```

2003-03-07 Anders Carlsson <andersca@codefactory.se>

```
* dbus/Makefile.am:
* dbus/dbus-dict.c: (dbus_dict_entry_free), (dbus_dict_new),
(dbus_dict_get_keys), (insert_entry), (dbus_dict_set_boolean),
(dbus_dict_set_int32), (dbus_dict_set_uint32),
(dbus_dict_set_double), (dbus_dict_set_string),
(dbus_dict_set_boolean_array), (dbus_dict_set_int32_array),
(dbus_dict_set_uint32_array), (dbus_dict_set_double_array),
(dbus_dict_set_string_array), (_dbus_dict_test):
```

* dbus/dbus-dict.h:
Fix according to comments from Havoc.

2003-03-06 Michael Meeks <michael@server.home>

* configure.in: if we don't have kde-config, disable have_qt.

2003-03-07 Anders Carlsson <andersca@codefactory.se>

* dbus/Makefile.am:
Add dbus-dict.[ch]

* dbus/dbus-dict.c: (dbus_dict_entry_free), (dbus_dict_new),
(dbus_dict_ref), (dbus_dict_unref), (dbus_dict_contains),
(dbus_dict_remove), (dbus_dict_get_value_type),
(dbus_dict_get_keys), (dbus_dict_put_boolean),
(dbus_dict_put_int32), (dbus_dict_put_uint32),
(dbus_dict_put_double), (dbus_dict_put_string),
(dbus_dict_put_boolean_array), (dbus_dict_put_int32_array),
(dbus_dict_put_uint32_array), (dbus_dict_put_double_array),
(dbus_dict_put_string_array), (dbus_dict_get_boolean),
(dbus_dict_get_int32), (dbus_dict_get_uint32),
(dbus_dict_get_double), (dbus_dict_get_string),
(dbus_dict_get_boolean_array), (dbus_dict_get_int32_array),
(dbus_dict_get_uint32_array), (dbus_dict_get_double_array),
(dbus_dict_get_string_array), (_dbus_dict_test):

* dbus/dbus-dict.h:
Add DbusDict implementation

* dbus/dbus-test.c: (dbus_internal_do_not_use_run_tests):
* dbus/dbus-test.h:
Add _dbus_dict_test

2003-03-04 Havoc Pennington <hp@pobox.com>

* test/data/auth/*: adapt to changes

* dbus/dbus-auth-script.c (_dbus_auth_script_run): add
USERID_BASE64 and change USERNAME_BASE64 to put in username not
userid

* dbus/dbus-keyring.c (_dbus_keyring_validate_context): prevent
more stuff from being in a context name, to make the protocol
simpler to deal with

* dbus/dbus-errors.c (dbus_error_has_name): new function
(dbus_error_is_set): new function

* dbus/dbus-auth.c: replace DBUS_STUPID_TEST_MECH auth
with DBUS_COOKIE_SHA1, implement DBUS_COOKIE_SHA1

* dbus/dbus-connection.c (dbus_connection_flush): also read

messages during a flush operation

* dbus/Makefile.am: remove dbus-md5 since it isn't currently used.

2003-03-05 Anders Carlsson <andersca@codefactory.se>

* configure.in: Check for gethostbyname on Solaris.

* dbus/dbus-transport.c: (_dbus_transport_open):
Remove duplicate "tcp" entry.

* doc/dbus-specification.sgml:
Clarify some things.

2003-03-05 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-auth.c: (send_rejected), (process_test_subdir):

* dbus/dbus-keyring.c: (_dbus_keyring_new_homedir),
(_dbus_keyring_test):

* dbus/dbus-md5.c: (_dbus_md5_compute):

* dbus/dbus-sha.c: (_dbus_sha_compute):

Plug memory leaks.

2003-03-05 Anders Carlsson <andersca@codefactory.se>

* README: Add some things.

2003-03-04 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-message.c (dbus_message_append_args_valist): Add a
break;

after case DBUS_TYPE_BOOLEAN.

2003-03-02 Havoc Pennington <hp@pobox.com>

* test/break-loader.c (randomly_set_extreme_ints): add test that
sets really huge and small integers

* dbus/dbus-marshal.c (_dbus_marshal_validate_arg): add check
that length of boolean array fits in the string, and that
string has room for boolean value in single-bool case.

* dbus/dbus-message-builder.c (_dbus_message_data_load): add
optional value to "ALIGN" command which is what to fill the
alignment with.

* test/data/valid-messages/no-padding.message: add regression
test for the message padding problem

2003-03-02 Havoc Pennington <hp@pobox.com>

* dbus/dbus-message.c (decode_header_data): fix to always init message_padding, from Benjamin Dauvergne

2003-03-02 Havoc Pennington <hp@pobox.com>

* configure.in: 0.5

* NEWS: Update.

2003-03-01 Joe Shaw <joe@assbarn.com>

* configure.in: Check for "struct cmsgcred" and try to access its members for BSD-like unices.

* dbus/dbus-sysdeps.c (read_credentials_byte): Fold this back into

_dbus_read_credentials_unix_socket().

(_dbus_read_credentials_unix_socket): Use recvmsg() instead of read() for reading the credential byte off the unix socket. Use struct cmsgcred on systems that support it.

2003-02-27 Alexander Larsson <alexl@redhat.com>

* glib/Makefile.am:

* configure.in:

Make gthreads-2.0 dependency optional. Don't build thread test if its not found.

2003-02-27 Havoc Pennington <hp@pobox.com>

* dbus/dbus-connection.c

(dbus_connection_send_message_with_reply_and_block): fix doh! doh! doh! bug that resulted in never removing a reply from the queue, no wonder we called get_reply_serial so much ;-)

* dbus/dbus-message.c (struct DBusMessage): cache reply serial and client serial instead of demarshaling them every time

2003-02-27 Havoc Pennington <hp@pobox.com>

* dbus/dbus-marshal.c (_dbus_demarshal_int32): rewrite to be much more inlined, using dbus-string-private.h, speeds things up substantially

* dbus/dbus-string.c (_dbus_string_free): apply align offset when freeing the string

(_dbus_string_steal_data): fix for align offset

(undo_alignment): new function

2003-02-26 Havoc Pennington <hp@redhat.com>

All kinds of audit fixes from Owen, plus initial attempt to

handle unaligned memory returned from malloc.

- * dbus/dbus-string.c (`_dbus_string_init`): clamp max length to leave room for `align_offset` and nul byte
- (`fixup_alignment`): function to track an `align_offset` and ensure `real->str` is aligned
- (`DBUS_GENERIC_STRING_PREAMBLE`): len must be less than allocated, to allow a nul byte plus align offset
- (`_dbus_string_lock`): fix overflow issue
- (`_dbus_string_init_const_len`): add assertions on sanity of len, assign allocated to be `ALLOCATION_PADDING` larger than len
- (`set_length`): fixup the overflow handling
- (`_dbus_string_get_data_len`): fix overflow in assertion
- (`open_gap`): detect overflow in size of gap to be opened
- (`_dbus_string_lengthen`): add overflow check
- (`_dbus_string_align_length`): fix overflow with `_DBUS_ALIGN_VALUE`
- (`_dbus_string_append`): add overflow check
- (`_dbus_string_append_unichar`): overflow
- (`_dbus_string_delete`): fix overflow in assertion
- (`_dbus_string_copy_len`): overflow in assertion
- (`_dbus_string_replace_len`): overflows in assertions
- (`_dbus_string_find`): change to implement in terms of `_dbus_string_find_to`
- (`_dbus_string_find_to`): assorted fixage
- (`_dbus_string_equal_c_str`): assert `c_str != NULL`, fix logic so the function works
- (`_dbus_string_ends_with_c_str`): fix overflow thingy
- (`_dbus_string_base64_encode`): overflow fix
- (`_dbus_string_validate_ascii`): overflow
- (`_dbus_string_validate_nul`): overflow

2003-02-26 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-marshal.c (`_dbus_marshall_test`): fix to work with `DISABLE_ASSERTS`

2003-02-26 Alexander Larsson <alexl@redhat.com>

- * `configure.in`:
Set `DBUS_GLIB_THREADS_LIBS` for apps using `gthread-2.0`
- * `dbus/dbus-connection.c`:
* `dbus/dbus-connection.h`:
Fix `_dbus_connection_acquire_io_path` and `_dbus_connection_acquire_dispatch`.
Add `_dbus_connection_set_wakeup_main_function` and use it when queueing incoming and outgoing messages.
- * `dbus/dbus-dataslot.c`:
Threadsafe usage of `DBusDataSlotAllocator`

- * dbus/dbus-message.c: (dbus_message_get_args_iter):
dbus_new can fail.
- * dbus/dbus-server-unix.c:
Add todo comment
- * glib/dbus-gmain.c:
Implement the new wakeup functions for glib.
- * glib/Makefile.am:
- * glib/test-thread-client.c:
- * glib/test-thread-server.c:
- * glib/test-thread.h:
Initial cut at some thread test code. Not really done yet.

2003-02-26 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-connection.c
(dbus_connection_send_message_with_reply_and_block): fix crash
where we ref'd the outgoing message instead of the returned reply
- * dbus/dbus-transport-unix.c (do_authentication): check read
watch
at the end of this function, so if we didn't need to read for
authentication, we reinstall it for receiving messages
- * dbus/dbus-message.c (dbus_message_new_reply): allow replies to
a NULL sender for peer-to-peer case
- * dbus/dbus-transport-unix.c (check_read_watch): handle
!authenticated case correctly
- * glib/dbus-gmain.c: add support for DBusServer
- * dbus/dbus-server.c: add data slot support
- * glib/dbus-gmain.c (dbus_connection_setup_with_g_main): check
return values and handle errors
- * dbus/dbus-dataslot.c: factor out the data slot stuff from
DBusConnection
- * Doxyfile.in (INPUT): add glib subdir
- * glib/dbus-gmain.c (dbus_connection_setup_with_g_main): rename
setup_with_g_main instead of hookup_with_g_main; write docs

2003-02-24 Anders Carlsson <andersca@codefactory.se>

- * dbus/dbus-marshal.c: (_dbus_marshal_validate_arg):
- * dbus/dbus-message-builder.c: (_dbus_message_data_load):

- * dbus/dbus-message.c: (dbus_message_append_boolean),
(dbus_message_append_boolean_array),
(dbus_message_get_args_valist), (_dbus_message_test):
- * dbus/dbus-message.h:
- * doc/dbus-specification.sgml:
Various fixes as pointed out by Havoc.

- * test/data/invalid-messages/bad-boolean-array.message:
- * test/data/invalid-messages/bad-boolean.message:
Add invalid boolean value test cases.

2003-02-24 Anders Carlsson <andersca@codefactory.se>

- * dbus/dbus-internals.c: (_dbus_type_to_string):
- * dbus/dbus-marshal.c: (_dbus_marshall_get_arg_end_pos),
(_dbus_marshall_validate_arg):
- * dbus/dbus-message-builder.c: (_dbus_message_data_load):
- * dbus/dbus-message.c: (dbus_message_append_args_valist),
(dbus_message_append_boolean),
(dbus_message_append_boolean_array),
(dbus_message_get_args_valist), (dbus_message_iter_get_boolean),
(dbus_message_iter_get_int32), (dbus_message_iter_get_uint32),
(dbus_message_iter_get_double),
(dbus_message_iter_get_boolean_array), (message_iter_test):
- * dbus/dbus-message.h:
- * dbus/dbus-protocol.h:
- * doc/dbus-specification.sgml:
- * test/data/valid-messages/lots-of-arguments.message:
Add support for boolean and boolean array types.

2003-02-23 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-keyring.c: finish most of this implementation and
simple unit test

- * dbus/dbus-errors.c (dbus_set_error_const, dbus_set_error): make
these barf if the error isn't cleared to NULL

- * dbus/dbus-sysdeps.c (_dbus_delete_file): set error on failure
(_dbus_create_directory): new function

- * dbus/dbus-errors.c (dbus_set_error): fix warning

- * dbus/dbus-string.c (_dbus_string_hex_encode): new function
(_dbus_string_hex_decode): new function
(test_hex_roundtrip): test code

- * dbus/dbus-sha.c (_dbus_sha_compute): use dbus_string_hex_encode

- * dbus/dbus-md5.c (_dbus_md5_compute): use dbus_string_hex_encode

- * dbus/dbus-sysdeps.c (_dbus_string_save_to_file): make this use

the save-to-temp/rename trick to atomically write the new file
(_dbus_string_parse_uint): new function

2003-02-22 Havoc Pennington <hp@pobox.com>

* test/Makefile.am (dist-hook): fix dist for test/data/sha-1

2003-02-22 Havoc Pennington <hp@pobox.com>

* dbus/dbus-message.c (dbus_message_iter_get_string_array):
(dbus_message_iter_get_byte_array): Fix up doxygen warnings

* dbus/dbus-sha.c: add implementation of SHA-1 algorithm

* dbus/test/data/sha-1: add US government test suite for SHA-1

2003-02-21 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-marshal.c: (_dbus_demarshal_string_array):
Make string arrays NULL-terminated.

* dbus/dbus-memory.c: (dbus_free_string_array):

* dbus/dbus-memory.h:

New function for freeing NULL-terminated string arrays.

* dbus/dbus-message-builder.c: (append_quoted_string),
(_dbus_message_data_load):
Add support for array types.

* dbus/dbus-message.c: (check_message_handling):
Add more types as test cases.

* dbus/dbus-sysdeps.c: (_dbus_string_parse_int),
(_dbus_string_parse_double):
Add the start offset to the end offset.

* test/data/valid-messages/lots-of-arguments.message:
New test message with lots of arguments.

2003-02-21 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-message.c: (dbus_message_append_nil),
(dbus_message_append_int32), (dbus_message_append_uint32),
(dbus_message_append_double), (dbus_message_append_string),
(dbus_message_append_int32_array),
(dbus_message_append_uint32_array),
(dbus_message_append_double_array),
(dbus_message_append_byte_array),
(dbus_message_append_string_array):
Fix all out-of-memory handling in these functions.

2003-02-21 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-message.c: (dbus_message_append_nil):
Fix a silly.

2003-02-21 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-message.c: (dbus_message_append_args_valist),
(dbus_message_append_nil), (dbus_message_append_int32_array),
(dbus_message_append_uint32_array),
(dbus_message_append_double_array),
(dbus_message_append_byte_array),
(dbus_message_append_string_array),
(dbus_message_get_args_valist),
(dbus_message_iter_get_int32_array),
(dbus_message_iter_get_uint32_array),
(dbus_message_iter_get_double_array),
(dbus_message_iter_get_byte_array),
(dbus_message_iter_get_string_array):

* dbus/dbus-message.h:
Add functions for appending and getting arrays.

2003-02-21 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-mempool.c (_dbus_mem_pool_new): Make the
element size at least 8 bytes, fixes mempool tests on
64-bit machines.

2003-02-20 Alexander Larsson <alexl@redhat.com>

* dbus/dbus-transport-unix.c (unix_do_iteration):
Unlock the connection mutex during a blocking select call.
Add todo about how we need a way to wake up the select.

* dbus/dbus-connection-internal.h:
* dbus/dbus-connection.c:
Add _dbus_connection_lock and _dbus_connection_unlock.

2003-02-19 Havoc Pennington <hp@pobox.com>

* Doxyfile.in (PREDEFINED): put DOXYGEN_SHOULD_SKIP_THIS in
Doxyfile.in, not Doxyfile

* dbus/dbus-keyring.c: do some hacking on this

* dbus/dbus-sysdeps.c (_dbus_delete_file): new

* dbus/dbus-errors.c (dbus_set_error_const): do not call
dbus_error_init
(dbus_set_error): remove dbus_error_init, check for message ==
NULL *before* we sprintf into it, and add @todo about including
system headers in this file

- * dbus/dbus-sysdeps.c (`_dbus_create_file_exclusively`): new
- * dbus/dbus-errors.h (`DBUS_ERROR_FAILED`): add
- * dbus/dbus-sysdeps.c (`get_user_info`): break this function out to get various bits of user information based on either username or user ID
- (`_dbus_homedir_from_username`): new function

2003-02-19 Anders Carlsson <andersca@codefactory.se>

- * `configure.in`:
Add check for nonposix `getpwnam_r`
- * dbus/dbus-mempool.c: (`_dbus_mem_pool_new`):
Align the pool element size to a `sizeof (void *)` boundary.
- * dbus/dbus-sysdeps.c: (`_dbus_setenv`),
(`_dbus_connect_unix_socket`),
(`_dbus_listen_unix_socket`), (`_dbus_credentials_from_username`):
General Solaris fixes.
- * `test/data/valid-messages/simplest-manual.message`:
Explicitly state that we want little-endian packing.

2003-02-19 Mikael Hallendal <micke@codefactory.se>

- * dbus/dbus-server.c (`dbus_server_listen`): Support tcp: addresses.
- * dbus/dbus-transport-unix.c
(`_dbus_transport_new_for_tcp_socket`):
Added to create a transport connecting using a tcp/ip socket.
- * dbus/dbus-sysdeps.c (`_dbus_connect_tcp_socket`): Added to connect
to a tcp socket at given host and port.
(`_dbus_listen_tcp_socket`): added to listen on tcp socket for
given
hostname and port.
- * dbus/dbus-server.c (`dbus_server_listen`): Support tcp: addresses.
- * dbus/dbus-server-unix.c (`_dbus_server_new_for_tcp_socket`):
Added to create a server listening on a TCP/IP socket.

2003-02-19 Havoc Pennington <hp@pobox.com>

Throughout: mop up all the Doxygen warnings and undocumented stuff.

* dbus/dbus-sysdeps.c (do_exec): do not use execvp, we don't want to search any paths.

* dbus/dbus-threads.c: move global mutex initializers to dbus-internals.h, multiple prototypes was confusing doxygen besides being kind of ugly

* Doxyfile (PREDEFINED): have Doxygen define DOXYGEN_SHOULD_SKIP_THIS so we can exclude things from docs with #ifndef DOXYGEN_SHOULD_SKIP_THIS (do not abuse the feature! it's for stuff like the autogenerated macros in dbus-md5.c, not just for things you don't feel like documenting...)

2003-02-18 Havoc Pennington <hp@pobox.com>

* dbus/dbus-string.c (_dbus_string_zero): new function

* dbus/dbus-md5.c: include MD5 implementation by L. Peter Deutsch, wrap it in some dbus-friendly API

* dbus/dbus-types.h: add 16-bit types

2003-02-18 Joe Shaw <joe@assbarn.com>

* dbus/dbus-auth.c (handle_server_data_stupid_test_mech): Just get credentials from our currently running process. (get_word): Fix a buglet where we were copying the entire length instead of relative to our position.

* dbus/dbus-hash.c (_dbus_hash_test): Don't try to allocate the keys on the stack... it's 640k of data.

* dbus/dbus-sysdeps.c (_dbus_read_credentials_unix_socket): Always read the credentials byte off the socket, even if we don't have SO_PEERCREC. (_dbus_poll): Implement poll() using select() for systems which don't have it.

* glib/test-dbus-glib.c (main): Print out an error if no parameters are given.

* test/data/auth/fallback.auth-script: Added. Tests that a client can fallback to a secondary auth mechanism if the first fails.

2003-02-18 Havoc Pennington <hp@pobox.com>

* AUTHORS: add Alex

2003-02-17 Havoc Pennington <hp@pobox.com>

* doc/dbus-specification.sgml: lots of cosmetic cleanups/rearrangement, add assorted FIXME, change DBUS_ADDRESS env variable to DBUS_BUS_ADDRESS, s/client/application/, s/server/bus/ (except in authentication section). Add a section "Message Bus Message Routing"

2003-02-17 Anders Carlsson <andersca@codefactory.se.>

Release 0.4

* NEWS: Update

2003-02-17 Anders Carlsson <andersca@codefactory.se>

* doc/dbus-specification.sgml:
Specification updates.

2003-02-17 Anders Carlsson <andersca@codefactory.se>

* bus/activation.c: (bus_activation_init), (child_setup),
(bus_activation_activate_service):

* bus/activation.h:

* bus/main.c: (main):

Set DBUS_ADDRESS environment variable.

* dbus/dbus-errors.c: (dbus_set_error):

Don't use va_copy since that's a C99 feature.

* dbus/dbus-sysdeps.c: (_dbus_setenv), (do_exec),
(_dbus_spawn_async):

* dbus/dbus-sysdeps.h:

Add child_setup_func to _dbus_spawn_async.

* doc/dbus-specification.sgml:

Update specification.

* test/spawn-test.c: (setup_func), (main):

Fix test.

2003-02-17 Alexander Larsson <alexl@redhat.com>

* dbus/dbus-connection.c

(_dbus_connection_handler_destroyed_locked):

Added todo.

2003-02-17 Anders Carlsson <andersca@codefactory.se>

* doc/.cvsignore:

* doc/Makefile.am:
* doc/dbus-test-plan.sgml:
Add test plan document.

* test/Makefile.am:
Fix distcheck.

2003-02-17 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-message.c: (decode_header_data),
(_dbus_message_loader_return_buffer):
Set the header padding amount when loading a message.

2003-02-16 Anders Carlsson <andersca@codefactory.se>

* bus/dispatch.c: (send_one_message):
Only send broadcast messages to registered connections.

* dbus/dbus-message.c: (dbus_message_name_is):
* dbus/dbus-message.h:
New convenience function.

* dbus/dbus-transport-debug.c: (do_reading):
Only dispatch one message per run.

* test/Makefile.am:
* test/bus-test.c: (new_connection_callback), (die),
(test_hello_client1_handler), (test_hello_client2_handler),
(test_hello_replies), (main):

* test/bus-test-loop.[ch]:
Add these.

2003-02-16 Havoc Pennington <hp@pobox.com>

* dbus/dbus-connection.c (dbus_connection_dispatch_message): fix
backward conditional

2003-02-16 Alexander Larsson <alex1@redhat.com>

* dbus/dbus-connection.c:
Implement sent_message_with_reply. (with_reply_and_block is still
busted).
Made dispatch_message not lose message if OOM.

* dbus/dbus-errors.h:
Add NoReply error (for reply timeouts).

2003-02-16 Alexander Larsson <alex1@redhat.com>

* dbus/dbus-hash.c (_dbus_hash_table_unref):
Actually free keys and values when destroying hashtable.

2003-02-16 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-auth.c: (client_try_next_mechanism):
Plug a leak.

* dbus/dbus-threads.c: (dbus_condvar_wait_timeout):
Return TRUE if there's no thread implementation around.

* glib/dbus-gmain.c: (free_source),
(dbus_connection_hookup_with_g_main):
Make sure to remove the GSource when the connection is finalized.

2003-02-16 Anders Carlsson <andersca@codefactory.se>

* bus/dispatch.c: (bus_dispatch_message_handler):
* dbus/dbus-errors.h:
Return an error if someone tries to send a message to a service
that doesn't exist.

2003-02-16 Anders Carlsson <andersca@codefactory.se>

* bus/activation.c: (load_directory), (bus_activation_init),
(bus_activation_activate_service):
* bus/activation.h:
* bus/driver.c:
(bus_driver_handle_activate_service),
(bus_driver_handle_message):
More work on the activation handling.

* dbus/dbus-errors.h:
Add some error messages

* dbus/dbus-message.c: (dbus_message_new_error_reply):
* dbus/dbus-message.h:
New function that creates an error message.

* dbus/dbus-protocol.h:
Add ACTIVATE_SERVER message.

* dbus/dbus-server-unix.c: (unix_handle_watch),
(_dbus_server_new_for_domain_socket):
Call _dbus_fd_set_close_on_exec.

* dbus/dbus-sysdeps.c: (make_pipe), (do_exec),
(_dbus_spawn_async), (_dbus_disable_sigpipe),
(_dbus_fd_set_close_on_exec):
* dbus/dbus-sysdeps.h:
Add _dbus_fd_set_close_on_exec function. Also add function that
checks
that all open fds are set to close-on-exec and warns otherwise.

```
* dbus/dbus-transport-unix.c:
(_dbus_transport_new_for_domain_socket):
Call _dbus_fd_set_close_on_exec.
```

2003-02-16 Havoc Pennington <hp@pobox.com>

```
* dbus/dbus-connection.c (dbus_connection_set_change_sigpipe):
allow people to avoid setting SIGPIPE to SIG_IGN
(_dbus_connection_new_for_transport): disable SIGPIPE unless
we've been asked not to
```

2003-02-15 Anders Carlsson <andersca@codefactory.se>

```
* dbus/dbus-list.c: (_dbus_list_append_link),
(_dbus_list_prepend_link):
* dbus/dbus-memory.c: (dbus_malloc), (dbus_malloc0),
(dbus_realloc):
Warning fixes.
```

2003-02-15 Anders Carlsson <andersca@codefactory.se>

```
* bus/Makefile.am:
* bus/activation.c: (bus_activation_entry_free),
(add_desktop_file_entry), (load_directory),
(bus_activation_init):
* bus/activation.h:
* bus/main.c: (main):
Add simple activation support, doesn't work yet though.
```

2003-02-15 Zack Rusin <zack@kde.org>

```
* qt/dbus-qthread.cpp: small casting fix
```

2003-02-15 Anders Carlsson <andersca@codefactory.se>

```
* dbus/dbus-errors.c: (dbus_set_error):
* dbus/dbus-errors.h:
Add a few errors and make dbus_set_error void.

* dbus/dbus-sysdeps.c:
(_dbus_errno_to_string), (close_and_invalidate), (make_pipe),
(write_err_and_exit), (read_ints), (do_exec),
(_dbus_spawn_async):
* dbus/dbus-sysdeps.h:
Add _dbus_spawn_async.

* test/spawn-test.c: (main):
Test for _dbus_spawn_async.
```

2003-02-15 Anders Carlsson <andersca@codefactory.se>

```
* dbus/dbus-internals.h:
```

Fix build without tests.

* dbus/dbus-list.c: (alloc_link):
Fix a segfault when a malloc fails.

* dbus/dbus-memory.c: (initialize_malloc_debug), (dbus_malloc),
(dbus_malloc0), (dbus_realloc):
Add support for malloc debugging.

2003-02-15 Alexander Larsson <alexl@redhat.com>

* dbus/dbus-threads.c:
* dbus/dbus-threads.h:
Add condvars. Remove static mutext from API.
Implement static mutexes by initializing them from threads_init.

* glib/dbus-gthread.c:
* qt/dbus-qthread.cpp:
Update with the thread api changes.

* dbus/dbus-list.c:
* dbus/dbus-list.h:
Turn StaticMutex into normal mutex + init function.
Export new functions _dbus_list_alloc_link, _dbus_list_free_link,
_dbus_list_append_link, _dbus_list_prepend_link

* dbus/dbus-sysdeps.c:
* dbus/dbus-sysdeps.h:
New type dbus_atomic_t, and new functions _dbus_atomic_inc,
_dbus_atomic_dec. Only slow fallback implementation at the
moment.

* dbus/dbus-protocol.h:
Add DBUS_MESSAGE_LOCAL_DISCONNECT define

* dbus/dbus-message.c:
Make ref/unref atomic.
Fix some docs.

* dbus/dbus-connection-internal.h:
* dbus/dbus-connection.c:
* dbus/dbus-connection.h:
Make threadsafe.
Change _peek to _borrow, _return & _steal_borrowed.
Change disconnect callback to event.
Make dbus_connection_dispatch_messages reentrant.

* dbus/dbus-transport.c:
Don't ref the connection on calls to the transport
implementation.

```
* dbus/dbus-message-handler.c:
Make threadsafe.

* glib/dbus-gmain.c:
Don't use peek_message anymore

* test/Makefile.am:
* test/debug-thread.c:
* test/debug-thread.h:
Simple thread implementation that asserts() on deadlocks in
single-threaded code.

* test/bus-test.c:
(main) Call debug_threads_init.

* test/watch.c:
Use disconnect message instead of disconnect callback.

* bus/connection.c:
* bus/connection.h:
Don't call dbus_connection_set_disconnect_function. Instead
export
bus_connection_disconnect.

* bus/dispatch.c:
Call bus_connection_disconnect when we get a disconnected
message.

2003-02-15 Havoc Pennington <hp@pobox.com>

* dbus/dbus-message.c (dbus_message_new): fool around with the
docs

2003-02-14 Havoc Pennington <hp@pobox.com>

* dbus/dbus-mempool.c: fail if the debug functions so indicate

* dbus/dbus-memory.c: fail if the debug functions indicate we
should

* dbus/dbus-internals.c (_dbus_set_fail_alloc_counter)
(_dbus_decrement_fail_alloc_counter): debug functions to
simulate memory allocation failures

2003-02-14 Havoc Pennington <hp@pobox.com>

* dbus/dbus-errors.h (struct DBusError): add a word of padding
to DBusError

2003-02-13 Anders Carlsson <andersca@codefactory.se>
```

```
* bus/driver.c: (bus_driver_handle_hello):
* bus/driver.h:
* bus/services.c: (bus_service_lookup):
Reorder message sending so we get a more sane order.

* test/bus-test.c: (message_handler):
Fix tyop.
```

2003-02-13 Anders Carlsson <andersca@codefactory.se>

```
* bus/driver.c: (bus_driver_send_service_deleted),
  (bus_driver_send_service_created),
(bus_driver_send_service_lost),
  (bus_driver_send_service_acquired), (bus_driver_handle_hello),
  (bus_driver_send_welcome_message),
  (bus_driver_handle_list_services),
  (bus_driver_handle_acquire_service),
  (bus_driver_handle_service_exists):
* dbus/dbus-bus.c: (dbus_bus_register_client),
  (dbus_bus_acquire_service), (dbus_bus_service_exists):
* dbus/dbus-errors.c: (dbus_result_to_string):
* dbus/dbus-errors.h:
* dbus/dbus-message.c: (dbus_message_append_args),
  (dbus_message_append_args_valist), (dbus_message_get_args),
  (dbus_message_get_args_valist), (dbus_message_get_args_iter),
  (dbus_message_iter_get_arg_type), (dbus_message_iter_get_string),
  (dbus_message_iter_get_byte_array),
  (dbus_message_iter_get_string_array), (message_iter_test),
  (check_message_handling), (_dbus_message_test):
* dbus/dbus-message.h:
* test/bus-test.c: (main):
Change fields to arguments in messages, so that they won't be
confused with header fields.

* glib/test-dbus-glib.c: (main):
Remove append_fields from hello message.
```

2003-02-13 Anders Carlsson <andersca@codefactory.se>

```
* dbus/dbus-errors.c:
* dbus/dbus-message.c:
* dbus/dbus-string.c:
Documentation fixes.
```

2003-02-13 Anders Carlsson <andersca@codefactory.se>

```
* glib/dbus-gmain.c: (timeout_handler), (add_timeout),
  (remove_timeout):
Implement support for timeouts in dbus-glib.
```

2003-02-13 Anders Carlsson <andersca@codefactory.se>

- * dbus/dbus-message-builder.c: (_dbus_message_data_load):
- * dbus/dbus-message.c: (process_test_subdir):
- * test/break-loader.c: (find_breaks_based_on):

Plug some memory leaks.

2003-02-13 Richard Hult <rhult@codefactory.se>

- * bus/main.c: Fix build.
- * dbus/dbus-errors.h:
- * dbus/dbus-errors.c: Fix copyright for Anders.

2003-02-13 Anders Carlsson <andersca@codefactory.se>

- * bus/Makefile.am:
Add utils.[ch]
- * bus/connection.c: (bus_connection_foreach):
Fix a warning.
- * bus/desktop-file.c: (grow_lines_in_section), (grow_sections),
(unescape_string), (new_section), (parse_section_start),
(parse_key_value), (report_error), (bus_desktop_file_load),
(bus_desktop_file_get_string):
- * bus/desktop-file.h:
Use DBusError for error reporting.
- * bus/dispatch.c: (send_one_message),
(bus_dispatch_message_handler):
- * bus/driver.c: (bus_driver_send_service_deleted),
(bus_driver_send_service_created),
(bus_driver_send_service_lost),
(bus_driver_send_service_acquired), (bus_driver_handle_hello),
(bus_driver_send_welcome_message),
(bus_driver_handle_list_services),
(bus_driver_handle_acquire_service),
(bus_driver_handle_service_exists):
- * bus/loop.c: (bus_loop_run):
- * bus/main.c:
Use BUS_HANDLE_OOM instead of _DBUS_HANDLE_OOM.
- * bus/utils.c: (bus_wait_for_memory):
- * bus/utils.h:
New files with general utility functions.
- * dbus/dbus-internals.h:
Remove _DBUS_HANDLE_OOM.

2003-02-13 Anders Carlsson <andersca@codefactory.se>

- * dbus/dbus-errors.c: (dbus_result_to_string), (dbus_error_init),
(dbus_error_free), (dbus_set_error_const), (dbus_set_error):

* dbus/dbus-errors.h:
Add DBusError structure.

2003-02-13 Anders Carlsson <andersca@codefactory.se>

* test/data/valid-messages/standard-acquire-service.message:
* test/data/valid-messages/standard-hello.message:
* test/data/valid-messages/standard-list-services.message:
* test/data/valid-messages/standard-service-exists.message:
Add some standard messages.

2003-02-13 Anders Carlsson <andersca@codefactory.se>

* bus/driver.c: (bus_driver_send_welcome_message),
(bus_driver_handle_list_services),
(bus_driver_handle_acquire_service),
(bus_driver_handle_service_exists), (bus_driver_handle_message):
Update for API changes in libdbus.

* dbus/dbus-message.c: (dbus_message_new_reply):
* dbus/dbus-message.h:
Remove the name argument. The spec states that replies shouldn't
have a name.

2003-02-13 Anders Carlsson <andersca@codefactory.se>

* bus/desktop-file.c: (parse_section_start), (parse_key_value),
(report_error), (bus_desktop_file_load), (lookup_section),
(lookup_line), (bus_desktop_file_get_raw),
(bus_desktop_file_get_string):
* bus/desktop-file.h:
Some fixes, and new functions for getting a key value from a
section.

2003-02-13 Havoc Pennington <hp@pobox.com>

* test/data/auth/fail-after-n-attempts.auth-script: new test

* dbus/dbus-auth.c (send_rejected): shutdown_mech() when we
reject the client.

2003-02-13 Havoc Pennington <hp@pobox.com>

* dbus/dbus-auth.c (handle_server_data_external_mech): args to
dbus_credentials_match were backward

* dbus/dbus-auth-script.c (_dbus_auth_script_run): support
NO_CREDENTIALS and ROOT_CREDENTIALS

* dbus/dbus-auth.c (_dbus_auth_do_work): move get_state() routine
into here. Never process more commands after we've reached an
end state; store further data as unused bytes.

- * test/data/auth/*: add more auth tests
- * dbus/dbus-auth-script.c (_dbus_auth_script_run): support EXPECT command to match exact string and EXPECT_UNUSED to match unused bytes
- * test/Makefile.am (dist-hook): fix to dist all the test stuff

2003-02-12 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-string.c (_dbus_string_pop_line): fix to also strip \r off of popped lines
- * dbus/dbus-auth.c (_dbus_auth_test): write code to run auth scripts
- * dbus/dbus-auth-script.c (_dbus_auth_script_run): when doing a SEND, append \r\n

2003-02-12 Havoc Pennington <hp@pobox.com>

- * dbus/Makefile.am: remove break-loader from the build, since it moved.
- * configure.in: add --enable-gcov to turn on coverage profiling flags and disable optimization

2003-02-10 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-auth-script.c, dbus/dbus-auth-script.h: sync initial cut at test framework for DBusAuth from laptop. Doesn't quite work yet but it compiles and I need to get it off the 266mhz laptop. ;-)
- * dbus/dbus-server-debug.c (_dbus_server_debug_accept_transport): fix a memleak in error case

2003-02-12 Anders Carlsson <andersca@codefactory.se>

- * bus/Makefile.am:
 - * bus/desktop-file.c:
 - * bus/desktop-file.h:
- Add a desktop file parser.

2003-02-11 Zack Rusin <zack@kde.org>

- * qt/message.[h|cpp]: sample implementation of the KDE wrapper for DBusMessage

2003-02-09 Zack Rusin <zack@kde.org>

- * test/bus-test.c: make_it_compile
- * doc/dbus-specification.sgml: minimal semantic fix

2003-02-06 Anders Carlsson <andersca@codefactory.se>

Release 0.3

- * NEWS: Update

2003-02-06 Anders Carlsson <andersca@codefactory.se>

- * dbus/Makefile.am:
 - * dbus/dbus-break-loader.c:
 - * test/Makefile.am:
 - * test/break-loader.c:
- Move dbus-break-loader to test/ and rename it to break-loader.

2003-02-02 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-keyring.c, dbus/dbus-keyring.h: template files for code to manage cookies in your home directory
- * dbus/dbus-sysdeps.c (_dbus_generate_random_bytes): new function
- * dbus/dbus-auth.c (get_state): impose a maximum number of tries to authenticate, then disconnect the client.

2003-02-03 Alexander Larsson <alexl@redhat.com>

- * dbus/dbus-message.c (dbus_message_append_fields): Correct docs.

2003-02-02 Anders Carlsson <andersca@codefactory.se>

- * doc/dbus-specification.sgml: Update address format section.

2003-02-02 Anders Carlsson <andersca@codefactory.se>

- * test/Makefile.am:
- * test/bus-test.c: (get_time), (add_timeout), (remove_timeout), (message_handler), (new_connection_callback), (loop_quit), (loop_run), (main): Add bus test.

2003-02-02 Anders Carlsson <andersca@codefactory.se>

- * bus/driver.c: (bus_driver_handle_service_exists): Simplify the code a bit.
- * dbus/dbus-bus.c: (dbus_bus_service_exists): Fix a silly.

2003-02-02 Anders Carlsson <andersca@codefactory.se>

- * bus/Makefile.am:
Add libdbus-daemon.la and link to it.

2003-02-01 James Willcox <jwillcox@gnome.org>

- * bus/driver.c: (bus_driver_handle_own_service):
Actually include the service reply code in the message.

2003-02-02 Anders Carlsson <andersca@codefactory.se>

- * bus/driver.c: (bus_driver_handle_service_exists):
Don't unref the incoming message.

2003-02-02 Anders Carlsson <andersca@codefactory.se>

- * dbus/dbus.h: Add dbus-address.h and dbus-bus.h

2003-02-02 Anders Carlsson <andersca@codefactory.se>

- * dbus/dbus-server.c: (dbus_server_listen):
- * dbus/dbus-transport.c: (_dbus_transport_open):
ifdef out the calls to the debug transport and server.

2003-02-02 Alexander Larsson <alexl@redhat.com>

- * dbus/dbus-watch.c (dbus_watch_get_flags):
Add note in the docs that ERROR or HANGUP won't be returned
and are assumed always on.
- * glib/dbus-gmain.c (add_watch):
Always add IO_ERR | IO_HUP
- * dbus/dbus-message.h:
Add semicolon after dbus_message_iter_get_string_array().
Makes qt code build again

2003-02-01 Anders Carlsson <andersca@codefactory.se>

- * bus/driver.c: (create_unique_client_name),
(bus_driver_handle_hello):
Don't take a name, just use a numeric id to identify
each client.
- * dbus/Makefile.am:
- * dbus/dbus-bus.c: (dbus_bus_register_client),
(dbus_bus_acquire_service), (dbus_bus_service_exists):
- * dbus/dbus-bus.h:
Add new convenience functions for communicating with the bus.

* dbus/dbus-message.h:

* dbus/dbus-protocol.h:
Fix a typo.

2003-02-01 Alexander Larsson <alexl@redhat.com>

* dbus/dbus-message.c (dbus_message_append_fields):
Add some more doc comments.

2003-02-01 Havoc Pennington <hp@pobox.com>

* dbus/dbus-break-loader.c (randomly_modify_length): change
a 4-byte value in the message as if it were a length

* dbus/dbus-sysdeps.c (_dbus_string_save_to_file): don't set
execute bit on saved files

2003-02-01 Havoc Pennington <hp@pobox.com>

* dbus/dbus-break-loader.c (main): new program to find messages
that break the loader.

* dbus/dbus-sysdeps.c (_dbus_string_append_uint): new function

* dbus/dbus-sysdeps.c (_dbus_string_save_to_file): new function

* dbus/dbus-string.c (_dbus_string_set_byte): new

2003-01-31 Havoc Pennington <hp@pobox.com>

* dbus/dbus-message.c: refactor the test code to be more general,
in preparation for writing a "randomly permute test cases to
try to break the loader" program.

2003-01-31 Havoc Pennington <hp@pobox.com>

* doc/dbus-specification.sgml: work on the specification

* dbus/dbus-message.c (_dbus_message_loader_return_buffer): check
the protocol version of the message.

* dbus/dbus-protocol.h: drop special _REPLY names, the spec
no longer specifies that.

(DBUS_SERVICE_REPLY_SERVICE_EXISTS): fix flags (1/2/4/8 not
1/2/3/4)

* dbus/dbus-marshal.c (_dbus_marshall_get_arg_end_pos): add
missing

"break" for DBUS_TYPE_NIL, remove @todo

2003-01-31 Havoc Pennington <hp@pobox.com>

* dbus/dbus-message.c (dbus_message_set_is_error_reply): rename just set_is_error/get_is_error as this is a commonly-used function, and write docs.

2003-01-31 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-address.c: (dbus_address_entry_free):
Free key and value lists.

* dbus/dbus-internals.c: (_dbus_type_to_string):
Add the types we didn't have.

* dbus/dbus-marshal.c: (_dbus_marshal_get_arg_end_pos),
(_dbus_marshal_validate_arg):
Add NIL types.

* dbus/dbus-message.c: (dbus_message_set_sender):
Remove todo about being able to set sender to NULL.

(dbus_message_set_is_error_reply),
(dbus_message_get_is_error_reply):

* dbus/dbus-message.h:
New functions.

* dbus/dbus-protocol.h:
Add error reply flag.

* test/data/valid-messages/opposite-endian.message:
Add NIL type to test.

2003-01-31 Havoc Pennington <hp@pobox.com>

* doc/dbus-specification.sgml: fully specify the header. Add flags and major protocol version, and change header/body len to unsigned.

* dbus/dbus-message-builder.c (append_saved_length): append
length
as uint32

* dbus/dbus-message.c (dbus_message_create_header): change header length and body length to unsigned. Add the new fields from the spec
(_dbus_message_loader_return_buffer): unsigned header/body len

2003-01-30 Havoc Pennington <hp@pobox.com>

* dbus/dbus-auth.c: rework to use only REJECTED, no MECHANISMS

* doc/dbus-sasl-profile.txt: drop MECHANISMS and just use REJECTED, suggested by Mark McLoughlin

2003-01-30 Havoc Pennington <hp@pobox.com>

* dbus/dbus-server.c (dbus_server_listen): @todo about how we need

a better way to report errors here. e.g. "unix address lacks path" or something. also "no such file" when the path doesn't exist, etc.

* dbus/dbus-address.c (dbus_address_entries_free): add @todo about

leaking list nodes

(dbus_parse_address): add @todo about documenting address format, and allowing , and ; to be escaped

2003-01-30 Anders Carlsson <andersca@codefactory.se>

* dbus/Makefile.am:
Add dbus-address.[ch]

* dbus/dbus-address.c: (dbus_address_entry_free),
(dbus_address_entries_free), (create_entry),
(dbus_address_entry_get_method), (dbus_address_entry_get_value),
(dbus_parse_address), (_dbus_address_test):

* dbus/dbus-address.h:
New files for dealing with address parsing.

* dbus/dbus-connection.c:
Document timeout functions.

* dbus/dbus-message.c:
Document dbus_message_new_from_message.

* dbus/dbus-server-debug.c:
Document.

* dbus/dbus-server.c: (dbus_server_listen):
Parse address and use correct server implementation.

* dbus/dbus-string.c: (_dbus_string_find_to),
(_dbus_string_test):

* dbus/dbus-string.h:
New function with test.

* dbus/dbus-test.c: (dbus_internal_symbol_do_not_use_run_tests):
* dbus/dbus-test.h:
Add address tests.

* dbus/dbus-transport-debug.c:
Document.

* dbus/dbus-transport.c: (_dbus_transport_open):

Parse address and use correct transport implementation.

2003-01-30 Havoc Pennington <hp@pobox.com>

* dbus/dbus-message.c: use message->byte_order instead of DBUS_COMPILER_BYTE_ORDER throughout.

(dbus_message_create_header): pad header to align the start of the body of the message to 8-byte boundary

* dbus/dbus-marshal.h: make all the demarshalers take const DBusString arguments.

* dbus/dbus-message.c (_dbus_message_loader_return_buffer): validate message args here, so we don't have to do slow validation later, and so we catch bad messages as they are incoming. Also add

better checks on header_len and body_len. Also fill in message->byte_order

* dbus/dbus-string.c (_dbus_string_validate_utf8): new (not implemented properly)

(_dbus_string_validate_nul): new function to check all-nul

* dbus/dbus-marshal.c (_dbus_marshal_get_field_end_pos): rename get_arg_end_pos and remove all validation

(_dbus_marshal_validate_arg): actually do validation here.

2003-01-29 Havoc Pennington <hp@pobox.com>

* dbus/dbus-message.c (check_message_handling): fix assertion failure on set_client_serial

2003-01-28 Havoc Pennington <hp@pobox.com>

* dbus/dbus-server-debug.c: Add doc section comments

* dbus/dbus-transport-debug.c: add doc section comments

2003-01-28 Havoc Pennington <hp@redhat.com>

* dbus/dbus-string.c (_dbus_string_base64_decode): append bytes in

the reverse order from how I had it

(_dbus_string_base64_encode): reverse encoding order. I was basically byteswapping everything during encoding.

2003-01-28 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-connection-internal.h:

* dbus/dbus-connection.c: (_dbus_connection_add_timeout), (_dbus_connection_remove_timeout):

Add functions for adding and removing timeouts.

* dbus/dbus-message.c: (dbus_message_new_from_message):
Add new function that takes a message and creates an exact
copy of it, but with the refcount set to 1.

(check_message_handling):

Fix build error.

* dbus/dbus-server-protected.h:

* dbus/dbus-server.c: (_dbus_server_init_base),
(_dbus_server_finalize_base), (_dbus_server_add_timeout),
(dbus_server_set_timeout_functions):

(_dbus_server_remove_timeout):

New functions so that a server can add and remove timeouts.

(dbus_server_listen):

Add commented out call to dbus_server_debug_new.

* dbus/dbus-timeout.c: (_dbus_timeout_new):

Actually set the handler, doh.

* dbus/dbus-transport.c: (_dbus_transport_open):

Add commented out call to dbus_transport_debug_client_new.

* dbus/Makefile.am:

Add dbus-transport-debug.[ch] and dbus-server-debug.[ch]

2003-01-28 Havoc Pennington <hp@pobox.com>

* dbus/dbus-message.c (check_message_handling): function to check
on the loaded message, iterates over it etc.

2003-01-28 Havoc Pennington <hp@pobox.com>

* test/Makefile.am (dist-hook): fix make distdir

* dbus/Makefile.am (TESTS_ENVIRONMENT): fix make check

2003-01-27 Havoc Pennington <hp@pobox.com>

* dbus/dbus-mempool.c (time_for_size): replace printf with
_dbus_verbose

* dbus/dbus-message-builder.c (_dbus_message_data_load): allow
empty lines; fix the SAVE_LENGTH stuff to be
START_LENGTH/END_LENGTH so it actually works; couple other
bugfixes

* test/Makefile.am (dist-hook): add dist-hook for .message files

* dbus/dbus-string.c (DBUS_STRING_COPY_PREAMBLE): source of a

copy

can be constant or locked.
(_dbus_string_free): allow freeing a const string as documented/intended

* dbus/dbus-sysdeps.c (_dbus_concat_dir_and_file): utility

* dbus/dbus-test-main.c (main): take an argument which is the directory containing test data

* dbus/dbus-message.c (_dbus_message_test): pass a test_data_dir argument to this and load all the messages in test/data/ checking that they can be loaded or not loaded as appropriate.

2003-01-27 Anders Carlsson <andersca@codefactory.se>

* bus/dispatch.c: (bus_dispatch_message_handler): Dispatch messages sent to services.

* bus/driver.c: (bus_driver_send_service_deleted),
(bus_driver_send_service_created),
(bus_driver_send_service_lost),
(bus_driver_send_service_acquired):
Add helper functions for sending service related messages.

(bus_driver_send_welcome_message):
Send HELLO_REPLY instead of WELCOME.

(bus_driver_handle_list_services):
Send LIST_SERVICES_REPLY instead of SERVICES.

(bus_driver_handle_own_service),
(bus_driver_handle_service_exists):
New message handlers.

(bus_driver_handle_message):
Invoke new message handlers.

(bus_driver_remove_connection):
Don't remove any services here since that's done automatically by bus_service_remove_owner now.

* bus/driver.h:
New function signatures.

* bus/services.c: (bus_service_add_owner):
Send ServiceAcquired message if we're the only primary owner.

(bus_service_remove_owner):
Send ServiceAcquired/ServiceLost messages.

(bus_service_set_prohibit_replacement),
(bus_service_get_prohibit_replacement):

Functions for setting prohibit replacement.

(bus_service_has_owner):

New function that checks if a connection is in the owner queue of a certain service.

* bus/services.h:

Add new function signatures.

* dbus/dbus-list.c: (_dbus_list_test):

Add tests for _dbus_list_remove_last and traversing the list backwards.

* dbus/dbus-list.h:

Fix a typo in _dbus_list_get_prev_link, if we're at the first element we can't go further, so return NULL then.

* dbus/dbus-protocol.h:

Add new messages, service flags and service replies.

2003-01-26 Havoc Pennington <hp@pobox.com>

* dbus/dbus-message-builder.c: implement, completely untested.

* test/data/*: add data to be used in testing.

".message" files are our simple loadable text format.

".message-raw" will be binary dumps of messages.

* dbus/dbus-string.c (_dbus_string_starts_with_c_str): new

2003-01-26 Havoc Pennington <hp@pobox.com>

* dbus/dbus-sysdeps.c (_dbus_file_get_contents): new function

* dbus/dbus-errors.c (dbus_result_to_string): add file errors

* dbus/dbus-message-builder.c: new file, will contain code to load up messages from files. Not implemented yet.

2003-01-26 Havoc Pennington <hp@pobox.com>

* dbus/dbus-message.c (dbus_message_set_sender): support deleting the sender by setting to NULL

2003-01-26 Havoc Pennington <hp@pobox.com>

The unit tests pass, but otherwise untested. If it breaks, the tests should have been better. ;-)

* bus/driver.c (bus_driver_handle_hello): return if we disconnect the connection.

* dbus/dbus-message.c: redo everything so we maintain message->header as the only copy of the various fields. This avoids the possibility of out-of-memory in some cases, for example dbus_message_lock() can't run out of memory anymore, and avoids extra copying. Figured I may as well go ahead and do this since it was busted for dbus_message_lock to not return failure on OOM, and dbus_message_write_header was totally unchecked for OOM. Also fixed some random other bugs.

* dbus/dbus-marshal.c (_dbus_marshal_get_field_end_pos): verify that strings are nul-terminated. Also, end_pos can be equal to string length just not greater than, I think.

(dbus_marshal_set_int32): new function

(dbus_marshal_set_uint32): new function

(dbus_marshal_set_string): new function

* dbus/dbus-connection.c (_dbus_connection_new_for_transport):

fix

a warning, init timeout_list to NULL

(dbus_connection_send_message): don't use uninitialized variable "serial"

* dbus/dbus-string.c (_dbus_string_replace_len): new function

2003-01-26 Anders Carlsson <andersca@codefactory.se>

* bus/driver.c: (bus_driver_handle_hello),

(bus_driver_send_welcome_message):

Plug leaks

2003-01-26 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-auth.c: (process_auth), (_dbus_auth_unref):

* dbus/dbus-connection.c: (_dbus_connection_new_for_transport),

(dbus_connection_unref):

* dbus/dbus-marshal.c: (_dbus_marshal_test):

* dbus/dbus-message.c: (dbus_message_unref),

Plug memory leaks.

(dbus_message_get_fields):

Remove debugging printout.

(dbus_message_loader_return_buffer):

Don't store the header string.

(dbus_message_test):

Plug leaks.

2003-01-26 Richard Hult <rhult@codefactory.se>

* glib/dbus-gmain.c (dbus_connection_dispatch): Traverse a copy of the file descriptor list, since it can change under us.

2003-01-25 Anders Carlsson <andersca@codefactory.se>

* glib/dbus-gmain.c: (dbus_connection_prepare), (dbus_connection_check), (dbus_connection_dispatch), (add_watch), (remove_watch), (dbus_connection_hookup_with_g_main): Rewrite the glib handling to use its own GSource instead of a GIOChannel so we can catch messages put in the queue while waiting for a reply.

2003-01-25 Anders Carlsson <andersca@codefactory.se>

* bus/Makefile.am:
* bus/connection.c: (connection_disconnect_handler), (connection_watch_callback), (bus_connection_setup):
* bus/dispatch.c: (send_one_message), (bus_dispatch_broadcast_message), (bus_dispatch_message_handler), (bus_dispatch_add_connection), (bus_dispatch_remove_connection):
* bus/dispatch.h:
* bus/driver.c: (bus_driver_send_service_deleted), (bus_driver_send_service_created), (bus_driver_handle_hello), (bus_driver_send_welcome_message), (bus_driver_handle_list_services), (bus_driver_remove_connection), (bus_driver_handle_message):
* bus/driver.h:
Refactor code, put the message dispatching in its own file. Use _DBUS_HANDLE_OOM. Also send ServiceDeleted messages when a client is disconnected.

2003-01-25 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-internals.h:
Add _DBUS_HANDLE_OOM macro, it doesn't do anything currently.

* dbus/dbus-message.c: (dbus_message_get_sender):
* dbus/dbus-message.h:
Implement dbus_message_get_sender.

* dbus/dbus-protocol.h:
Add message and service defines.

2003-01-25 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-connection.c: (dbus_connection_send_message):
* dbus/dbus-message-internal.h:

* dbus/dbus-message.c: (_dbus_message_get_client_serial),
(dbus_message_write_header):
Remove _dbus_message_unlock and don't set the client serial on a
message if one already exists.

2003-01-24 Havoc Pennington <hp@pobox.com>

* dbus/dbus-list.c (alloc_link): put a thread lock on the global
list_pool

* bus/driver.c (bus_driver_handle_list_services): fix a leak
on OOM

2003-01-25 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-list.c: (alloc_link), (free_link):
Use a memory pool for the links.

2003-01-25 Anders Carlsson <andersca@codefactory.se>

* bus/connection.c: (bus_connection_foreach):
* bus/connection.h:
Add new bus_connection_foreach function.

* bus/driver.c: (send_one_message),
(bus_driver_broadcast_message):
Add function that broadcasts a message to all clients.

(bus_driver_send_service_created), (bus_driver_handle_hello),
(bus_driver_send_welcome_message),
(bus_driver_handle_list_services), (bus_driver_message_handler):
Implement functions that take care of listing services, and
notifying
clients when new services are created.

* bus/services.c: (bus_services_list):
* bus/services.h:
Add new function that returns an array of strings with the
currently
registered services.

* glib/dbus-glib.h:
* glib/dbus-gmain.c:
Update copyright year.

2003-01-25 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-connection.c: (dbus_connection_send_message):
Unlock the message in case it was sent earlier.

(dbus_connection_send_message_with_reply_and_block):
Remove the reply message from the list.

```
* dbus/dbus-marshal.c: (_dbus_demarshal_string_array):
Set array_len and new_pos correctly.

(_dbus_marshall_test):
Remove debug output.

* dbus/dbus-message-internal.h:
* dbus/dbus-message.c: (_dbus_message_get_reply_serial):
New function that returns the reply serial.

(_dbus_message_unlock):
New function that unlocks a message and resets its header.

(dbus_message_append_string_array),
(dbus_message_get_fields_valist),
(dbus_message_iter_get_field_type),
(dbus_message_iter_get_string_array),
(dbus_message_get_fields),
(dbus_message_append_fields_valist):
Handle string arrays.

(dbus_message_set_sender):
Make this function public since the bus daemon needs it.

(decode_header_data):
Set the reply serial to -1 initially.

* dbus/dbus-message.h:
Add dbus_message_set_sender.
```

2003-01-24 Havoc Pennington <hp@pobox.com>

```
* doc/dbus-specification.sgml: add some stuff
```

2003-01-22 Havoc Pennington <hp@pobox.com>

```
* doc/dbus-specification.sgml: Start to document the protocol.
```

2003-01-22 Havoc Pennington <hp@pobox.com>

```
* dbus/dbus-connection.c
(dbus_connection_send_message_with_reply_and_block): add some
@todo
```

```
* bus/driver.c (bus_driver_add_connection): add a FIXME about
memleak
```

2003-01-21 Havoc Pennington <hp@pobox.com>

```
(patch untested because can't compile)
```

* bus/driver.c (create_unique_client_name): make this function never recycle client names. Also, caller should initialize the DBusString.

* dbus/dbus-sysdeps.c (_dbus_get_current_time): new function

2003-01-21 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-marshal.c: (_dbus_marshal_double),
(_dbus_marshal_int32), (_dbus_marshal_uint32),
(_dbus_marshal_int32_array), (_dbus_marshal_uint32_array),
(_dbus_marshal_double_array), (_dbus_marshal_string_array),
(_dbus_demarshal_int32_array), (_dbus_demarshal_uint32_array),
(_dbus_demarshal_double_array), (_dbus_demarshal_string_array),
(_dbus_marshal_get_field_end_pos), (_dbus_marshal_test):
* dbus/dbus-marshal.h:
* dbus/dbus-protocol.h:
Add support for marshalling and demarshalling integer, double and string arrays.

2003-01-21 Anders Carlsson <andersca@codefactory.se>

* bus/Makefile.am:
Add driver.[ch]

* bus/connection.c: (connection_disconnect_handler):
Remove the connection from the bus driver's list.

(connection_watch_callback): Dispatch messages.

(free_connection_data): Free connection name.

(bus_connection_setup): Add connection to the bus driver's list.

(bus_connection_remove_owned_service):

(bus_connection_set_name), (bus_connection_get_name):

Add functions for setting and getting the connection's name.

* bus/connection.h:
Add function headers.

* bus/driver.c: (create_unique_client_name),
(bus_driver_handle_hello_message),
(bus_driver_send_welcome_message), (bus_driver_message_handler),
(bus_driver_add_connection), (bus_driver_remove_connection):

* bus/driver.h:

* bus/main.c:

* bus/services.c: (bus_service_free):

* bus/services.h:

New file that handles communication and registration with the

bus

itself.

2003-01-21 Anders Carlsson <andersca@codefactory.se>

- * dbus/dbus-connection.c: (dbus_connection_send_message):
Add a new client_serial parameter.
- (dbus_connection_send_message_with_reply):
Remove a @todo since we've implemented the blocking function.
- (dbus_connection_send_message_with_reply_and_block):
New function that sends a message and waits for a reply and then returns the reply.
- * dbus/dbus-connection.h:
Add new functions.
- * dbus/dbus-errors.c: (dbus_result_to_string):
- * dbus/dbus-errors.h:
Add new DBUS_RESULT.
- * dbus/dbus-message-internal.h:
- * dbus/dbus-message.c: (_dbus_message_get_reply_serial),
(_dbus_message_set_sender), (dbus_message_write_header),
(dbus_message_new_reply), (decode_header_data),
(_dbus_message_loader_return_buffer), (_dbus_message_test):
- * dbus/dbus-message.h:
Add new functions that set the reply serial and sender.
Also marshal and demarshal them correctly and add test.
- * dbus/dbus-protocol.h:
Add new DBUS_MESSAGE_TYPE_SENDER.
- * glib/dbus-glib.h:
- * glib/dbus-gmain.c: (watch_callback), (free_callback_data),
(add_watch), (remove_watch), (add_timeout), (remove_timeout),
(dbus_connection_hookup_with_g_main):
- * glib/test-dbus-glib.c: (main):
Rewrite to use GIOChannel and remove the GSource crack.
- * test/echo-client.c: (main):
- * test/watch.c: (check_messages):
Update for changed APIs

2003-01-19 Anders Carlsson <andersca@codefactory.se>

- * dbus/Makefile.am: Add dbus-timeout.[cÄ\$]
- * dbus/dbus-connection.c: (_dbus_connection_new_for_transport):
Create a DBusTimeoutList.
(dbus_connection_set_timeout_functions): Add new function to set timeout callbacks
- * dbus/dbus-connection.h: Add public DBusTimeout API.

- * dbus/dbus-message.c: (dbus_message_get_service):
- * dbus/dbus-message.h: New function.
- * dbus/dbus-server.c: Fix small doc typo.
- * dbus/dbus-timeout.[ch]: New files for mainloop timeouts.

2003-01-19 Anders Carlsson <andersca@codefactory.se>

- * dbus/dbus-string.c (_dbus_string_move_len): Don't delete all of the string, just as long as specified.

2003-01-19 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-connection.c (dbus_connection_get_is_authenticated): new function
- * dbus/dbus-server.c (dbus_server_set_max_connections) (dbus_server_get_max_connections, dbus_server_get_n_connections): keep track of current number of connections, and add API for setting a max (but haven't implemented enforcing the max yet)

2003-01-18 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-transport-unix.c (unix_do_iteration): only do the reading/writing if read_watch != NULL or write_watch != NULL.
- * dbus/dbus-message.c (_dbus_message_loader_return_buffer): fix the message loader code to actually load message->header and message->body into the newly-created message.
- * dbus/dbus-transport-unix.c (check_write_watch): fix a mem leak in OOM case
- * dbus/dbus-connection.c (dbus_connection_set_max_message_size) (dbus_connection_get_max_message_size) (dbus_connection_set_max_live_messages_size) (dbus_connection_get_max_live_messages_size): implement some resource limitation functions
- * dbus/dbus-resources.c: new file implementing some of the resource limits stuff
- * dbus/dbus-message.c (dbus_message_iter_get_byte_array): add missing docs, add @todo to handle OOM etc.
- * dbus/dbus-marshal.c (_dbus_demarshal_byte_array): add missing docs

2003-01-18 Havoc Pennington <hp@pobox.com>

* dbus/dbus-connection.c (dbus_connection_unref): disconnect the connection if it hasn't been already.

* dbus/dbus-connection.h: kill off the idea of an ErrorFunction, replace with DisconnectFunction.

2003-01-18 Havoc Pennington <hp@pobox.com>

Building --disable-verbose-mode --disable-asserts --disable-tests

cuts the library from 112K to 45K or so

* configure.in: check for varargs macro support, add --enable-verbose-mode, --enable-asserts.

* dbus/dbus-internals.h (_dbus_assert): support DBUS_DISABLE_ASSERT (_dbus_verbose): support DBUS_ENABLE_VERBOSE_MODE

2003-01-18 Havoc Pennington <hp@pobox.com>

* dbus/dbus-test.c: include config.h so that tests actually run

* dbus/dbus-string.c: add assertions that stuff is 8-byte aligned, so the failure mode when that assumption fails will be plenty obvious.

2003-01-18 Havoc Pennington <hp@pobox.com>

* configure.in: default --enable-tests to \$USE_MAINTAINER_MODE

* dbus/Makefile.am: fix it up so dbus-test-main.c is included in the distribution

* test/Makefile.am: don't use special variable "TESTS" for echo-* since we don't want to use those in make check

2003-01-15 Havoc Pennington <hp@redhat.com>

Release 0.2

* NEWS: update

2003-01-15 Havoc Pennington <hp@redhat.com>

* test/Makefile.am: fix so that test source code ends up in the distribution on make distcheck

2003-01-15 Havoc Pennington <hp@redhat.com>

Release 0.1.

* NEWS: update

2003-01-15 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-test.c (dbus_internal_symbol_do_not_use_run_tests):
fix build when --disable-tests
- * Makefile.am (EXTRA_DIST): put HACKING in here
- * HACKING: document procedure for making a tarball release.

2003-01-14 Anders Carlsson <andersca@codefactory.se>

- * bus/connection.c: (connection_error_handler),
(bus_connection_setup):
- * bus/main.c: (main):

Make sure that the DBusConnectionData struct is NULled out to prevent a segfault.

- * dbus/dbus-errors.c: (dbus_result_to_string):
- * dbus/dbus-errors.h:
- * dbus/dbus-message.c: (dbus_message_get_fields),
(dbus_message_get_fields_valist), (_dbus_message_test):
- * dbus/dbus-message.h:

Make dbus_message_get_fields return a result code so we can track invalid fields as well as oom.

2003-01-11 Havoc Pennington <hp@pobox.com>

- * configure.in: change --enable-test/--enable-ansi action-if-given
to enable_foo=\$enableval instead of enable_foo=yes

2003-01-08 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-string.c (_dbus_string_align_length): new function
- * dbus/dbus-test-main.c: move main() for test app here
- * dbus/dbus-test.c
(dbus_internal_symbol_do_not_use_run_tests): we have to export a symbol to run tests, because dbus-test isn't in the main library

Code review nitpicks.

- * dbus/dbus-message.c (dbus_message_write_header): add newlines for people with narrow emacs ;-). Assert client_serial was filled in. Assert message->name != NULL.
- (dbus_message_append_fields): have "first_field_type" arg separate from va list, needed for C++ binding that also uses varargs IIRC

and helps with type safety
(dbus_message_new): add @todo about using DBusString to store service/name internally
(dbus_message_new): don't leak ->service and ->name on OOM later in the function
(dbus_message_unref): free the service name
(dbus_message_get_fields): same change to varargs i.e. first_field_type
(_dbus_message_loader_return_buffer): assert that the message data is aligned (if not it's a bug in our code). Put in verbose griping about why we set corrupted = TRUE.
(decode_header_data): add FIXME that char* is evil. Was going to add FIXME about evil locale-specific string.h strncmp, but just switched to wacky string-as-uint32 optimization. Move check for "no room for field name" above get_const_data_len() to avoid assertion failure in get_const_data_len if we have trailing 2 bytes or the like. Check for service and name fields being provided twice. Don't leak service/name on error. Require field names to be aligned to 4 bytes.

* dbus/dbus-marshal.c: move byte swap stuff to header
(_dbus_pack_int32): uscore-prefix
(_dbus_unpack_int32): uscore-prefix
(_dbus_unpack_uint32): export
(_dbus_demarshal_string): add @todo complaining about use of memcpy()
(_dbus_marshall_get_field_end_pos): add @todo about bad error handling allowing corrupt data to go unchecked

2003-01-08 Havoc Pennington <hp@redhat.com>

* dbus/dbus-transport-unix.c (unix_do_iteration): add read/write to the select() as needed for authentication. (should be using _dbus_poll() not select, but for another day)

* dbus/dbus.h: include dbus/dbus-protocol.h

2003-01-08 Anders Carlsson <andersca@codefactory.se>

* dbus/Makefile.am (dbusinclude_HEADERS): Install dbus-connection.h

2003-01-08 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-internals.c: (_dbus_type_to_string):
New function that returns a string describing a type.

* dbus/dbus-marshal.c: (_dbus_demarshal_byte_array):
* dbus/dbus-marshal.h:
* dbus/dbus-message.c: (dbus_message_get_fields_valist),

```
(dbus_message_iter_get_field_type),
(dbus_message_iter_get_double),
(dbus_message_iter_get_byte_array):
* dbus/dbus-message.h:
Add new convenience functions for appending and getting message
fields.
```

Also add demarshalling routines for byte arrays.

2003-01-07 Anders Carlsson <andersca@codefactory.se>

```
* dbus/dbus-connection-internal.h:
* dbus/dbus-connection.c: (_dbus_connection_new_for_transport),
(_dbus_connection_get_next_client_serial),
(dbus_connection_send_message):
* dbus/dbus-internals.h:
* dbus/dbus-marshal.c: (unpack_uint32), (dbus_unpack_int32),
(dbus_pack_int32), (_dbus_marshall_double), (_dbus_marshall_int32),
(_dbus_marshall_uint32), (_dbus_demarshal_double),
(_dbus_demarshal_int32), (_dbus_demarshal_uint32),
(_dbus_demarshal_string), (_dbus_marshall_get_field_end_pos),
(_dbus_verbose_bytes), (_dbus_marshall_test):
* dbus/dbus-marshal.h:
* dbus/dbus-message-internal.h:
* dbus/dbus-message.c: (_dbus_message_set_client_serial),
(dbus_message_write_header), (_dbus_message_lock),
(dbus_message_new), (dbus_message_ref), (dbus_message_unref),
(dbus_message_get_name), (dbus_message_append_int32),
(dbus_message_append_uint32), (dbus_message_append_double),
(dbus_message_append_string), (dbus_message_append_byte_array),
(dbus_message_get_fields_iter), (dbus_message_iter_ref),
(dbus_message_iter_unref), (dbus_message_iter_has_next),
(dbus_message_iter_next), (dbus_message_iter_get_field_type),
(dbus_message_iter_get_string), (dbus_message_iter_get_int32),
(dbus_message_iter_get_uint32), (dbus_message_iter_get_double),
(decode_header_data), (_dbus_message_loader_return_buffer),
(message_iter_test), (_dbus_message_test):
* dbus/dbus-message.h:
* dbus/dbus-protocol.h:
* dbus/dbus-test.c: (main):
* dbus/dbus-test.h:
* glib/test-dbus-glib.c: (message_handler), (main):
* test/echo-client.c: (main):
* test/watch.c: (check_messages):
Make messages sendable and receivable for real.
```

2003-01-07 Anders Carlsson <andersca@codefactory.se>

```
* dbus/dbus-marshal.c: (_dbus_marshall_double),
(_dbus_marshall_string), (_dbus_marshall_byte_array):
* dbus/dbus-message.c: (dbus_message_append_int32),
(dbus_message_append_uint32), (dbus_message_append_double),
(dbus_message_append_string), (dbus_message_append_byte_array):
```

Handle OOM restoration.

2003-01-07 Anders Carlsson <andersca@codefactory.se>

- * dbus/dbus-marshal.c: (`_dbus_marshall_string`), (`_dbus_demarshal_string`), (`_dbus_marshall_test`):
- * dbus/dbus-marshal.h:
- * dbus/dbus-message.c: (`dbus_message_get_name`), Document these functions.

- (`dbus_message_append_int32`), (`dbus_message_append_uint32`), (`dbus_message_append_double`), (`dbus_message_append_string`), (`dbus_message_append_byte_array`):

- * dbus/dbus-message.h: Add functions for adding message fields of different types.

- * dbus/dbus-protocol.h: Add the different types.

2003-01-05 Havoc Pennington <hp@pobox.com>

- * bus/connection.c: implement routines for handling connections, first thing is keeping a list of owned services on each connection and setting up watches etc.

- * bus/services.c: implement a mapping from service names to lists of connections

- * dbus/dbus-hash.c: add `DBUS_HASH_POINTER`

- * dbus/dbus-threads.c (`dbus_static_mutex_lock`): add functions to use static mutexes for global data

- * dbus/dbus-connection.c (`dbus_connection_set_data`): add new collection of functions to set/get application-specific data on the `DBusConnection`.

2003-01-04 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-sysdeps.c (`_dbus_sleep_milliseconds`): new function (`_dbus_poll`): new function

- * dbus/dbus-internals.h (`_DBUS_STRUCT_OFFSET`): new macro copied from GLib

- * bus/loop.c: initial code for the daemon main loop

2003-01-04 Havoc Pennington <hp@pobox.com>

- * test/watch.c (`error_handler`): make it safe if the error handler is called multiple times (if we s/error handler/disconnect

handler/ we should just guarantee it's called only once)

* dbus/dbus-transport.c (`_dbus_transport_disconnect`): call the error handler on disconnect (it's quite possible we should just change the error handler to a "disconnect handler," I'm not sure we have any other meaningful errors)

* configure.in: check for `getpwnam_r`

* dbus/dbus-transport.c, dbus/dbus-transport-unix.c, dbus/dbus-auth.c: add credentials support, add EXTERNAL auth mechanism as in SASL spec, using socket credentials

* dbus/dbus-sysdeps.c (`_dbus_read_credentials_unix_socket`): new function

(`_dbus_send_credentials_unix_socket`): new function

* dbus/dbus-sysdeps.c (`_dbus_accept_unix_socket`): rename just `dbus_accept()`

(`_dbus_write`): only check `errno` if `<0` returned

(`_dbus_write_two`): ditto

2003-01-02 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-marshal.c: (`_dbus_marshall_utf8_string`), (`_dbus_marshall_byte_array`), (`_dbus_demarshal_utf8_string`), (`_dbus_marshall_test`):

* dbus/dbus-marshal.h:

Add `_dbus_marshall_byte_array` and rename `_dbus_marshall_string` to `_dbus_marshall_utf8_string`. Also fix some tests.

2002-12-28 Harri Porten <porten@kde.org>

* configure.in: added check for C++ compiler and a very cheesy check for the Qt integration

* Makefile.am (SUBDIRS): compile qt subdir if support is enabled

* qt/Makefile.am: added

* qt/.cvsignore: added

* qt/dbus-qthread.cc, qt/dbus-qthread.cpp: renamed former to latter, added `#ifdef QT_THREAD_SUPPORT` guard.

* dbus/Makefile.am: added missing headers for make dist

2002-12-28 Kristian Rietveld <kris@gtk.org>

* dbus/Makefile.am: fixup `export-symbols-regex`.

2002-12-27 Anders Carlsson <andersca@codefactory.se>

* acinclude.m4: Add this file and put the
PKG_CHECK_MODULE macro in it.

2002-12-27 Anders Carlsson <andersca@codefactory.se>

* dbus/dbus-marshal.c: (_dbus_marshall_string),
(_dbus_demarshal_double), (_dbus_demarshal_int32),
(_dbus_demarshal_uint32), (_dbus_demarshal_string),
(_dbus_marshall_test):
Make the demarshalling routines align the pos argument.
Add string marshalling tests and fix the obvious bugs
discovered.

2002-12-26 Havoc Pennington <hp@pobox.com>

* dbus/dbus-auth.c: fixes fixes fixes

* dbus/dbus-transport-unix.c: wire up support for
encoding/decoding data on the wire

* dbus/dbus-auth.c (_dbus_auth_encode_data)
(_dbus_auth_decode_data): append to target string
instead of nuking it.

2002-12-26 Havoc Pennington <hp@pobox.com>

* dbus/dbus-marshal.h (DBUS_COMPILER_BYTE_ORDER): #ifdef
WORDS_BIGENDIAN then compiler byte order is DBUS_BIG_ENDIAN,
doh

* dbus/dbus-marshal.c: Add macros to do int swapping in-place and
avoid swap_bytes() overhead (ignoring possible assembly stuff for
now). Main point is because I wanted unpack_uint32 to implement
_dbus_verbose_bytes
(_dbus_verbose_bytes): new function

* dbus/dbus-string.c (_dbus_string_validate_ascii): new function

* dbus/dbus-message.c (_dbus_message_loader_get_is_corrupted):
add
mechanism to handle a corrupt message stream
(_dbus_message_loader_new): fix preallocation to only prealloc,
not prelengthen

* dbus/dbus-string.c (_dbus_string_skip_blank): fix this function
(_dbus_string_test): enhance tests for copy/move and fix the
functions

* dbus/dbus-transport-unix.c: Hold references in more places to
avoid reentrancy problems

- * dbus/dbus-transport.c: ditto
- * dbus/dbus-connection.c (dbus_connection_dispatch_message):
don't leak reference count in no-message case
- * test/watch.c (do_mainloop): handle adding/removing watches during iteration over the watches. Also, ref the connection/server stored on a watch, so we don't try to mangle a destroyed one.
- * dbus/dbus-transport-unix.c (do_authentication): perform authentication
- * dbus/dbus-auth.c (get_state): add a state AUTHENTICATED_WITH_UNUSED_BYTES and return it if required (_dbus_auth_get_unused_bytes): append the unused bytes to the passed in string, rather than prepend
- * dbus/dbus-transport.c (_dbus_transport_init_base): create the auth conversation DBusAuth
- * dbus/dbus-transport-unix.c (_dbus_transport_new_for_fd) (_dbus_transport_new_for_domain_socket): when creating a transport, pass in whether it's a client-side or server-side transport so we know which DBusAuth to create

2002-12-03 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-transport-unix.c (unix_finalize): finalize base _after_ finalizing the derived members (unix_connection_set): unref watch if we fail to add it
- * dbus/dbus-connection.c (dbus_connection_unref): delete the transport first, so that the connection owned by the transport will be valid as the transport finalizes.
- * dbus/dbus-transport-unix.c (unix_finalize): free the write_watch if necessary, and remove watches from the connection.
- * dbus/dbus-watch.c (_dbus_watch_list_free): improve a comment

2002-12-26 Anders Carlsson <andersca@codefactory.se>

- * dbus/dbus-marshal.c: (_dbus_marshal_string), (_dbus_demarshal_double), (_dbus_demarshal_int32), (_dbus_demarshal_uint32), (_dbus_demarshal_string), (_dbus_marshal_test):
- * dbus/dbus-marshal.h: Add string marshal functions and have the demarshal functions return the new position.

2002-12-25 Havoc Pennington <hp@pobox.com>

- * doc/dbus-sasl-profile.txt: docs on the authentication protocol, it is a simple protocol that just maps directly to SASL.

- * dbus/dbus-auth.h, dbus/dbus-auth.c: authentication protocol initial implementation, not actually used yet.

- * dbus/dbus-string.c (_dbus_string_find): new function
- (_dbus_string_equal): new function
- (_dbus_string_base64_encode): new function
- (_dbus_string_base64_decode): new function

2002-12-25 Anders Carlsson <andersca@codefactory.se>

- * dbus/Makefile.am:
- * dbus/dbus-marshal.c: (swap_bytes), (_dbus_marshall_double), (_dbus_marshall_int32), (_dbus_marshall_uint32), (_dbus_demarshall_double), (_dbus_demarshall_int32), (_dbus_demarshall_uint32), (_dbus_marshall_test):

- * dbus/dbus-marshal.h:

- * dbus/dbus-protocol.h:

- * dbus/dbus-test.c: (main):

- * dbus/dbus-test.h:

Add un-optimized marshalling/demarshalling routines.

2002-12-25 Harri Porten <porten@kde.org>

- * qt/dbus-qt.h: adjusted ctor and getter to KDE/Qt conventions

2002-12-24 Zack Rusin <zack@kde.org>

- * qt/dbus-qthread.cc: adding - integrates QMutex into Dbus

- * qt/dbus-qt.h: skeleton with two sample implemenatation of the main loop stuff

2002-12-24 Havoc Pennington <hp@pobox.com>

- * glib/dbus-gthread.c: fix include

- * glib/dbus-glib.h: rename DBusMessageHandler for now.

I think glib API needs to change, though, as you don't

want to use DBusMessageFunction, you want to use the

DBusMessageHandler object. Probably

dbus_connection_open_with_g_main_loop()

and dbus_connection_setup_g_main_loop() or something like that

(but think of better names...) that just create a connection

that has watch/timeout functions etc. already set up.

- * dbus/dbus-connection.c

- (dbus_connection_send_message_with_reply): new function just to

show how the message handler helps us deal with replies.

- * dbus/dbus-list.c (_dbus_list_remove_last): new function
- * dbus/dbus-string.c (_dbus_string_test): free a string that wasn't
- * dbus/dbus-hash.c: use memory pools for the hash entries (rebuild_table): be more paranoid about overflow, and shrink table when we can (_dbus_hash_test): reduce number of sprintfs and write valid C89. Add tests for case where we grow and then shrink the hash table.
- * dbus/dbus-mempool.h, dbus/dbus-mempool.c: memory pools
- * dbus/dbus-connection.c (dbus_connection_register_handler) (dbus_connection_unregister_handler): new functions
- * dbus/dbus-message.c (dbus_message_get_name): new
- * dbus/dbus-list.c: fix docs typo
- * dbus/dbus-message-handler.h, dbus/dbus-message-handler.c: an object representing a handler for messages.

2002-12-16 Anders Carlsson <andersca@codefactory.se>

- * glib/dbus-glib.h:
- * glib/dbus-gthread.c: (dbus_gthread_init):
Don't use the gdbus prefix for public functions.

2002-12-16 Anders Carlsson <andersca@codefactory.se>

- * Makefile.am:
- * configure.in:
Add GLib checks and fixup .pc files
- * glib/Makefile.am:
- * glib/dbus-glib.h:
- * glib/dbus-gmain.c: (gdbus_connection_prepare), (gdbus_connection_check), (gdbus_connection_dispatch), (gdbus_add_connection_watch), (gdbus_remove_connection_watch), (dbus_connection_gsource_new):
- * glib/dbus-gthread.c: (dbus_gmutex_new), (dbus_gmutex_free), (dbus_gmutex_lock), (dbus_gmutex_unlock), (dbus_gthread_init):
- * glib/test-dbus-glib.c: (message_handler), (main):
Add GLib support.

2002-12-15 Harri Porten <porten@kde.org>

- * autogen.sh: check for libtoolize before attempting to use it

- * dbus/dbus-transport-unix.c: include <sys/time.h> for timeval struct.
- * .cvsignore: ignore more stamp files
- * dbus/dbus-watch.c (_dbus_watch_list_new): fixed doc error
- * test/Makefile.am: added -I\$(top_srcdir) to be able to compile without make install.

2002-12-15 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-threads.c: add thread stubs that a higher library layer can fill in. e.g. the GLib wrapper might fill them in with GThread stuff. We still need to use this thread API to thread-safe-ize the library.

2002-12-12 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-transport-unix.c, dbus/dbus-server-unix.c: use the below new interfaces and include fewer system headers.
- * dbus/dbus-sysdeps.c (_dbus_read): new function
(_dbus_write): new function
(_dbus_write_two): new function
(_dbus_connect_unix_socket): new function
(_dbus_listen_unix_socket): new function
- * dbus/dbus-message-internal.h: change interfaces to use DBusString

2002-12-11 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-types.h: add dbus_unichar
- * dbus/dbus-internals.c (_dbus_verbose): use _dbus_getenv
- * dbus/dbus-connection.c (dbus_connection_send_message): return TRUE on success
- * dbus/dbus-transport.c: include dbus-watch.h
- * dbus/dbus-connection.c: include dbus-message-internal.h
- * HACKING: add file with coding guidelines stuff.
- * dbus/dbus-string.h, dbus/dbus-string.c: Encapsulate all string handling here, for security purposes (as in vsftpd). Not actually using this class yet.
- * dbus/dbus-sysdeps.h, dbus/dbus-sysdeps.c: Encapsulate all

system/libc usage here, as in vsftpd, for ease of auditing (and should also simplify portability). Haven't actually moved all the system/libc usage into here yet.

2002-11-25 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-internals.c (_dbus_verbose): fix to not always print the first verbose message.

2002-11-24 Havoc Pennington <hp@pobox.com>

- * test/echo-client.c, test/echo-server.c: cheesy test clients.

- * configure.in (AC_CHECK_FUNCS): check for writev

- * dbus/dbus-message.c (_dbus_message_get_network_data): new function

- * dbus/dbus-list.c (_dbus_list_foreach): new function

- * dbus/dbus-internals.c (_dbus_verbose): new function

- * dbus/dbus-server.c, dbus/dbus-server.h: public object representing a server that listens for connections.

- * dbus/.cvsignore: create

- * dbus/dbus-errors.h, dbus/dbus-errors.c: public API for reporting errors

- * dbus/dbus-connection.h, dbus/dbus-connection.c: public object representing a connection that sends/receives messages. (Same object used for both client and server.)

- * dbus/dbus-transport.h, dbus/dbus-transport.c: Basic abstraction for different kinds of stream that we might read/write messages from.

2002-11-23 Havoc Pennington <hp@pobox.com>

- * dbus/dbus-internals.h (_DBUS_INT_MAX): add _DBUS_INT_MIN _DBUS_INT_MAX

- * dbus/dbus-test.c (main): add list test, and include dbus-test.h as intended

- * dbus/dbus-hash.c (_dbus_hash_table_remove_string) (_dbus_hash_table_remove_int): return value indicates whether the entry existed to remove

* dbus/dbus-list.c: add linked list utility class,
with docs and tests

* dbus/dbus-hash.c: add TODO item about shrinking the hash bucket
array sometimes.

2002-11-23 Havoc Pennington <hp@pobox.com>

* Doxyfile.in (INCLUDE_FILE_PATTERNS): expand DBUS_BEGIN_DECLS/
DBUS_END_DECLS to nothing, that should fix this once and for all

* Doxyfile.in (JAVADOC_AUTOBRIEF): set to YES

* dbus/dbus-message.c, dbus/dbus-hash.c:
add some missing @brief

2002-11-23 Havoc Pennington <hp@pobox.com>

* dbus/dbus-message.h: put semicolons after DEBUG_BEGIN_DECLS
to avoid confusing Doxygen

* dbus/dbus-hash.c: @} not }@

* dbus/dbus-message.c (struct DbusMessage): split out
internals docs

2002-11-23 Havoc Pennington <hp@pobox.com>

* configure.in: pile on more warning flags if using gcc

* Doxyfile.in (EXTRACT_STATIC): set to NO, so we don't have
to document static functions

* configure.in: add summary to end of configure so it
looks nice and attractive

* dbus/dbus-hash.c: finish implementation and write unit
tests and docs

* configure.in: add --enable-tests to enable unit tests

* dbus/dbus-test.c: test program to run unit tests
for all files in dbus/*, initially runs a test for
dbus-hash.c

* dbus/dbus-internals.h: file to hold some internal utility stuff

2002-11-22 Havoc Pennington <hp@redhat.com>

* dbus/dbus-hash.c: copy in Tcl hash table, not yet
"ported" away from Tcl

* dbus/dbus-types.h: header for types such as dbus_bool_t

2002-11-22 Havoc Pennington <hp@redhat.com>

* dbus/dbus.h: fixups for doc warnings

* Doxyfile.in (FILE_PATTERNS): we need to scan .h to pick up macros
(QUIET): make it quiet so we can see warnings

* dbus/dbus-memory.c: teach D-BUS to allocate and free memory

2002-11-22 Havoc Pennington <hp@redhat.com>

* Makefile.am: include "Doxyfile" target in all-local

* configure.in: generate the Doxyfile

* Doxyfile.in: move Doxyfile here, so we can use configure to generate a Doxyfile with the right version number etc.

2002-11-22 Havoc Pennington <hp@redhat.com>

* dbus/dbus-message.c: move inline docs into .c file

* Doxyfile (OUTPUT_DIRECTORY): move output to doc/api so all docs are under doc/
(MAN_EXTENSION): generate man pages. Use extension ".3dbus" which matches ".3qt" on my system, I guess this is OK, I don't know really.
(FILE_PATTERNS): look for .c files not .h, makes sense for plain C I think

2002-11-22 Havoc Pennington <hp@pobox.com>

* Makefile.am (SUBDIRS): rename subdir "server" to "bus" because any app can be a server, and any app can be a client, the bus is a special kind of server.

Thu Nov 21 23:35:31 2002 Zack Rusin <zack@kde.org>

* Doxyfile : adding. Still needs Makefile rules to be generated automatically (just run "doxygen" in the toplevel dir for now to generate docs)

* dbus/dbus-message.h : Adding sample docs (javadoc since resembles gtk-doc a little more)

* dbus/dbus.h : Adding sample docs

2002-11-21 Havoc Pennington <hp@redhat.com>

- * dbus/Makefile.am (INCLUDES): define DBUS_COMPILATION so we can allow ourselves to include files directly, instead of having to use dbus.h
- * dbus/dbus.h: fill in
- * dbus/dbus-message.h: sketch out a sample header file. Include griping if you include it directly instead of via dbus.h
- * dbus/dbus-macros.h: new file with macros for extern "C", TRUE/FALSE, NULL, etc.
- * doc/file-boilerplate.c: put include guards in here

2002-11-21 Havoc Pennington <hp@redhat.com>

- * doc/file-boilerplate.c: include both AFL and GPL boilerplate.
- * COPYING: include the GPL as well, and license code under both AFL and GPL.

2002-11-21 Havoc Pennington <hp@redhat.com>

- * acconfig.h: get rid of this
- * autogen.sh (run_configure): add --no-configure option
- * configure.in: remove AC_ARG_PROGRAM to make autoconf complain less. add AC_PREREQ. add AC_DEFINE third arg.

2002-11-21 Anders Carlsson <andersca@codefactory.se>

- * doc/Makefile.am: Fix references so we can distcheck.

2002-11-21 Havoc Pennington <hp@redhat.com>

- * Initial module creation

File = ChangeLog.pre-1-2

2008-04-04 John (J5) Palmieri <johnp@redhat.com>

- * Released 1.2.1

2008-04-03 John (J5) Palmieri <johnp@redhat.com>

Patch from Sumit <sumitskj_20@yahoo.com>, comments added

* dbus/dbus-transport.c(_dbus_transport_open): fix mem leak

2008-04-03 John (J5) Palmieri <johnp@redhat.com>

* dbus/dbus-connection.c (dbus_connection_send): add documentation to describe when to call dbus_connection_flush and dbus_connection_unref after a call to dbus_connection_send is made
Initial wording by Stanislav Brabec <sbrabec at suse.cz> (fd.o bug#13558)

2008-04-03 John (J5) Palmieri <johnp@redhat.com>

Patch from Kimmo Hämmäläinen <kimmo.hamalainen at nokia.com>

* bus/expirelist.c (do_expiration_with_current_time): calculate correct min wait time and next interval (bus_expire_list_add, bus_expire_list_add_link): if the timeout is disabled when we add an item to the expire list, enable the timeout (do_expiration_with_current_time): only set timeout if there are items to expire

2008-04-01 Timo Hoenig <thoenig@suse.de>

Patch from Frederic Crozat <fcrozat@mandriva.com>

* bus/dir-watch-inotify.c (bus_watch_directory): Only monitor IN_CLOSE_WRITE, IN_DELETE, IN_MOVE_TO and IN_MOVE_FROM events. This way, only atomic changes to configuration file are monitored.
* bus/dir-watch-inotify.c (_handle_inotify_watch): Fix typo in _dbus_verbose function call
* bus/dir-watch-inotify.c (bus_drop_all_directory_watches): Use _dbus_strerror instead of perror

2008-03-04 Havoc Pennington <hp@redhat.com>

* bus/connection.c, bus/expirelist.c: Make the BusExpireList struct opaque, adding accessors for manipulating the list. In this commit there should be no change in functionality or behavior. The

purpose of this change is to improve encapsulation prior to fixing some bugs Kimmo Härmäläinen found where the timeout is not properly updated, since we need to e.g. take some action whenever adding and removing stuff from the expire list.

2008-03-31 Colin Walters <walters@verbum.org>

Patch from Owen Taylor <otaylor@redhat.com>

* tools/dbus-launch-x11.c: Check for X11 events before selecting (FDO bug #15293)

2008-03-31 Colin Walters <walters@verbum.org>

Patch from Owen Taylor <otaylor@redhat.com>

* tools/dbus-launch-x11.c: Make sure we call XFlush() on all code paths (FDO bug #15293)

2008-03-27 Havoc Pennington <hp@redhat.com>

* tools/dbus-send.c (append_dict): Do not provide a signature to dbus_message_iter_open_container() when opening a dict entry.

2008-03-26 Colin Walters <walters@verbum.org>

Patch from Scott James Remnant <scott@netsplit.com>

* dbus/dbus-bus.c: Set default exit_on_disconnect after registration with the bus, not before. This ensures that programs which wish to set exit_on_disconnect to FALSE will not be terminated if the bus exits during registration. (FDO Bug #15112)

2008-03-04 John (J5) Palmieri <johnp@redhat.com>

* fix broken poll on Mac OSX - build patch by Benjamin Reed
* configure.in: check for OSX's deadlocking poll
* dbus/dbus-sysdeps-unix.c (_dbus_poll): if we have a broken poll don't use poll

2008-03-04 John (J5) Palmieri <johnp@redhat.com>

* check if the linker supports a flag instead of just checking for GNU ld
* configure.in: move AM_PROG_LIBTOOL to the top

(ld_supports_flag): new function for checking if the linker supports a given flag

2008-03-04 John (J5) Palmieri <johnp@redhat.com>

* add a changelog for Benjamin Reed's git patch RANT: Change Logs are handled by git and having an external changelog just screws up merging. We should write down rules for doing git commit messages and leave it at that.

* configure.in: Platform build fixes for Mac OS X the Darwin linker does not understand the -z option; wrap it in a check for \$with_gnu_ld. environ is only available at runtime, so you need to make a reference to _NSGetEnviron instead for symbols to resolve properly.

2008-03-04 John (J5) Palmieri <johnp@redhat.com>

* configure.in: add \$THREAD_LIBS to DBUS_LAUNCHER_LIBS so we link correctly

2008-03-04 John (J5) Palmieri <johnp@redhat.com>

* tools/dbus-launch.c: wrap X'ism in #ifdef so we can compile without X

2008-02-28 John (J5) Palmieri <johnp@redhat.com>

* dbus/dbus-sysdeps-unix.c: define _AI_ADDRCONFIG as 0 if not defined so that we can compile with an older glibc

2008-02-26 John (J5) Palmieri <johnp@redhat.com>

* Released 1.1.20

2008-02-26 John (J5) Palmieri <johnp@redhat.com>

* CVE-2008-0595 - security policy of the type <allow send_interface="some.interface.WithMethods"/> work as an implicit allow for messages sent without an interface bypassing the default deny rules and potentially allowing restricted methods exported on the bus to be

executed by unauthorized users. This patch fixes the issue.

* bus/policy.c (bus_client_policy_check_can_send, bus_client_policy_check_can_receive): skip messages without an interface when evaluating an allow rule, and thus pass it to the

default deny rules

2008-02-26 John (J5) Palmieri <johnp@redhat.com>

- * correctly unref connections without guids during shutdown
- * dbus/dbus-connection.c (close_connection_on_shutdown): new method
- split out from shared_connections_shutdown
- (shared_connections_shutdown): shutdown all shared connections without guids
- (_dbus_connection_ref_unlocked): handle OOM when prepending no guid
- connections to the shared_connections_no_guid list
- * Patch by Kimmo Hämmäläinen <kimmo dot hamalainen at nokia dot com>

2008-02-21 John (J5) Palmieri <johnp@redhat.com>

- * fix build against the latest gcc/glibc
- * dbus/dbus-sysdeps-unix.c: define _GNU_SOURCE
- * bus/selinux.c: include limits.h
- * Patch by Matthias Clasen <mclasen at redhat.com>

2008-02-21 John (J5) Palmieri <johnp@redhat.com>

- * fixes dbus-launch so the bus goes away when X does (Red Hat Bug #430412)
- * tools/dbus-launch.c (main): set xdisplay = NULL
- * Patch by Matthias Clasen <mclasen at redhat.com>

2008-01-17 John (J5) Palmieri <johnp@redhat.com>

- * Released 1.1.4

2008-01-17 Timo Hoenig <thoenig@suse.de>

- * fix inotify support
- * bus/dir-watch-inotify.c (_handle_inotify_watch): fix reading of the inotify events. Also, use ssize_t not size_t for 'ret'.
- * bus/dir-watch-inotify.c (bus_watch_directory): watch not only for IN_MODIFY but also for IN_CREATE and IN_DELETE
- * bus/dir-watch-inotify.c (bus_drop_all_directory_watches): drop the inotify watches more elegantly by closing inotify:_fd, set inotify_fd to -1 after dropping the watches

2008-01-15 John (J5) Palmieri <johnp@redhat.com>

- * configure.in: post-release version bump

2008-01-15 John (J5) Palmieri <johnp@redhat.com>

* Released 1.1.3 (1.2.0RC1)

2008-01-15 John (J5) Palmieri <johnp@redhat.com>

* fix hacking to say git instead of cvs

2008-01-15 John (J5) Palmieri <johnp@redhat.com>

* patch by SÃ©bastien Couret <10function at gmail dot com>

* dbus/dbus-marshall-recursive.c (all_reader_classes[]): wrap in #ifndef DBUS_DISABLE_ASSERT since it is only used in asserts which are noop

2008-01-15 John (J5) Palmieri <johnp@redhat.com>

* patch by Magnus Henoch <henoch plus bfdo at dtek dot chalmers dot se>

* dbus/dbus-auth.c (handle_server_data_external_mech): handle SASL EXTERNAL's initial empty response (FDO Bug #9945)

2008-01-15 John (J5) Palmieri <johnp@redhat.com>

* bus/messagebus.in: add lsb headers (FDO Bug #11491)

2008-01-15 John (J5) Palmieri <johnp@redhat.com>

* patch by Peter O'Gorman <pogma at thewrittenword dot com>

* dbus/dbus-spawn.c (babysit_signal_handler): check write return value so we don't hang (FDO Bug #11665)

2008-01-15 John (J5) Palmieri <johnp@redhat.com>

* patch by Peter O'Gorman <pogma at thewrittenword dot com>

* dbus/dbus-sysdeps.h: support for AIX poll implementation (FDO Bug #11666)

2008-01-15 John (J5) Palmieri <johnp@redhat.com>

* tests/name-test/run-test.sh: make more portable (FDO Bug #11667)

2008-01-15 John (J5) Palmieri <johnp@redhat.com>

* patch by Kimmo Härmäläinen <kimmo dot hamalainen at nokia dot com>

* dbus/dbus-connection.c
(_dbus_connection_get_next_client_serial):
don't check for < 0 on an unsigned variable (FDO Bug #12924)

2008-01-15 John (J5) Palmieri <johnp@redhat.com>

* patch by Kimmo Härmäläinen <kimmo dot hamalainen at nokia dot com>

* bus/bus.c (setup_server): check failed allocation (FDO Bug #12920)

2008-01-15 John (J5) Palmieri <johnp@redhat.com>

* patch by Kimmo Härmäläinen <kimmo dot hamalainen at nokia dot com>

* dbus/dbus-spawn.c (_dbus_spawn_async_with_babysitter): the API contract says sitter_p can be NULL, so let's check it (FDO Bug #12919)

2008-01-15 John (J5) Palmieri <johnp@redhat.com>

* patch by Kimmo Härmäläinen <kimmo dot hamalainen at nokia dot com>

* dbus/dbus-spawn.c (read_ints, read_pid): use correct ssize_t type instead of size_t (FDO Bug #12862)

2008-01-15 John (J5) Palmieri <johnp@redhat.com>

* patch by Kimmo Härmäläinen <kimmo dot hamalainen at nokia dot com>

* dbus/dbus-errors.c (dbus_set_error): make sure to call va_end if we hit an OOM error inside va_start (FDO Bug #12846)

2008-01-15 John (J5) Palmieri <johnp@redhat.com>

* patch by Kimmo Härmäläinen <kimmo dot hamalainen at nokia dot com>

* dbus/dbus-connection.c (dbus_connection_send_with_reply): fix possible crash if pending_return is NULL (FDO Bug #12673)

2008-01-15 John (J5) Palmieri <johnp@redhat.com>

* portions of patch submitted by Tim Mooney
<enchanter at users dot sourceforge dot net>

* configure.in: never auto-select libxml (FDO Bug #12479)

2008-01-15 John (J5) Palmieri <johnp@redhat.com>

* patches by Kimmo Härmäläinen <kimmo dot hamalainen at nokia dot com>

* dbus/dbus-sysdeps-unix (_dbus_get_autolaunch_address): handle OOM
(FDO Bug #12945)

* dbus/dbus-uuidgen.c (return_uuid): handle OOM (FDO Bug #12928)

* dbus/dbus-misc.c (dbus_get_local_machine_id): handle OOM, fix return value to return NULL not FALSE (FDO Bug #12946)

2008-01-15 John (J5) Palmieri <johnp@redhat.com>

* bus/bus.c (bus_context_check_security_policy): rewrite selinux error handling to not abort due to a NULL read and to set the error only if it is not already set (Based off of FDO Bug #12430)

2008-01-15 John (J5) Palmieri <johnp@redhat.com>

* patch by Kimmo Härmäläinen <kimmo dot hamalainen at nokia dot com>

* dbus/dbus-internals.c (_dbus_read_uuid_file_without_creating, _dbus_create_uuid_file_exclusively): add OOM handling (FDO Bug #12952)

2008-01-15 John (J5) Palmieri <johnp@redhat.com>

* patch by Kimmo Härmäläinen <kimmo dot hamalainen at nokia dot com>

* dbus/dbus-spawn.c (babysit, babysitter_iteration): add error handling when polling (FDO Bug #12954)

2008-01-15 John (J5) Palmieri <johnp@redhat.com>

* patch by Kimmo Härmäläinen <kimmo dot hamalainen at nokia dot com>

* bus/config-parser.c (locate_attributes): remove dead code which

always evaluated to TRUE

* dbus/dbus-shell.c (_dbus_shell_quote): remove unused code

2008-01-14 John (J5) Palmieri <johnp@redhat.com>

* patch by Kimmo Härmäläinen <kimmo dot hamalainen at nokia dot com>

* bus/connection.c (bus_connection_complete): plug a possible BusClientPolicy leak (FDO Bug #13242)

2008-01-14 John (J5) Palmieri <johnp@redhat.com>

* patch by Frederic Crozat <fcrozat at mandriva dot com> (FDO Bz# 13268)

* add inotify support

* bus/Makefile.am: add inotify module to the build

* bus/dir-watch-inotify.c: inotify module based off the dnotify and kqueue modules

* configure.in: add checks and switch for inotify also add a printout at the end of configure if inotify and kqueue support is being built in (dnotify already had this)

2008-01-14 John (J5) Palmieri <johnp@redhat.com>

* patch by Frederic Crozat <fcrozat at mandriva dot com>

* bus/dir-watch-dnotify.c (bus_watch_directory): watch for file creates also

2008-01-14 John (J5) Palmieri <johnp@redhat.com>

* patch by Kimmo Härmäläinen <kimmo dot hamalainen at nokia dot com>

* dbus/dbus-transport-socket.c(do_reading): return message loader buffer in case of OOM (FDO Bug#12666)

2008-01-14 John (J5) Palmieri <johnp@redhat.com>

* configure.in: add warning to output when libxml is selected since we don't have a libxml maintainer and expat works perfectly fine for what we need an xml parser for

2008-01-14 John (J5) Palmieri <johnp@redhat.com>

* Patch by Andrea Luzzardi <scox at sig11 dot org>: creates a `_dbus_geteuid` function to fix EXTERNAL authentication in setuid applications

* `dbus/dbus-sysdeps-unix.c` (`_dbus_geteuid`): used to get the effective uid of the running program
(`_dbus_credentials_add_from_current_process`): use `geteuid` instead of `getuid`
(`_dbus_append_user_from_current_process`): use `geteuid` instead of `getuid`

* `dbus/dbus-sysdeps-util-unix.c` (`_dbus_change_to_daemon_user`): use `geteuid` instead of `getuid`
(`_dbus_unix_user_is_at_console`): use `geteuid` instead of `getuid`

* `dbus/dbus-sysdeps-win.c` (`_dbus_geteuid`): add a windows equivalent that returns `DBUS_UID_UNSET`

2007-12-18 Havoc Pennington <hp@redhat.com>

* `dbus/dbus-connection.c` (`_dbus_connection_block_pending_call`): fix location of curly braces

2007-11-23 Sjoerd Simons <sjoerd@luon.net>

* `tools/dbus-launch.c`: let both a normal `dbus-launch` and an autolaunched bus save their parameters in X11 if possible. This makes the autolaunch and non-autolaunch behaviour more similar. With the exception that on a normal launch there will always be a new session bus and not being able to save parameters is not fatal. This also enables to launch programs directly with autolaunch (not very usefull though).

2007-10-31 Havoc Pennington <hp@redhat.com>

* `bus/selinux.c` (`log_audit_callback`): rewrite to use `_dbus_string_copy_to_buffer_with_nul()`

* `dbus/dbus-string.c` (`_dbus_string_copy_to_buffer`): change to NOT nul-terminate the buffer; fail an assertion if there is not enough space in the target buffer. This fixes two bugs where `copy_to_buffer` was used to copy the binary bytes in a UUID, where

nul termination did not make sense. Bug reported by David Castelow.

(dbus_string_copy_to_buffer_with_nul): new function that always nul-terminates the buffer, and fails an assertion if there is not enough space in the buffer.

2007-10-23 Havoc Pennington <hp@redhat.com>

* bus/bus.c (bus_context_new): use the new name here

* bus/selinux.c (bus_selinux_audit_init): rename from audit_init() to avoid possible libc conflict, and declare it in .h file to avoid a warning

2007-10-19 Havoc Pennington <hp@redhat.com>

* bus/bus.c (bus_context_new): put audit_init() in HAVE_SELINUX

2007-10-19 Havoc Pennington <hp@redhat.com>

* bus/bus.c (bus_context_new): put the audit_init() in here instead, which I believe ends up being the same as where it was before, though I'm not sure I understand why it goes here.

* dbus/dbus-sysdeps-util-unix.c (dbus_change_to_daemon_user): remove audit_init() from here, this file can't depend on code in bus/ directory

2007-10-16 Simon McVittie <simon.mcvittie@collabora.co.uk>

* configure.in: *Actually* fix detection of i486 atomic ops - my previous attempt at a fix would always enable them due to wrong quoting. Patch from Colin Walters <walters@verbum.org>

2007-10-11 Simon McVittie <simon.mcvittie@collabora.co.uk>

* configure.in: enable Autoconf's AC_C_INLINE to avoid compilation failure with gcc -ansi
* dbus/dbus-macros.h, dbus/dbus-arch-deps.h.in: Use new macro _DBUS_GNUC_EXTENSION (the same as G_GNUC_EXTENSION) to avoid -ansi warnings about use of "long long".
* dbus/dbus-server-socket.c: remove unused variable when assertions are disabled
* dbus/dbus-marshall-validate.c: avoid empty statements by removing stray semicolons

```
* tools/dbus-launch.c: convert C++-style comment to C-style, add
{}
for clarity
* .gitignore: ignore vi swapfiles
* dbus/dbus-errors.h, dbus/dbus-errors.c: Add DBUS_ERROR_INIT
macro,
equivalent to calling dbus_error_init() on an uninitialized
DBusError
* dbus/dbus-address.c, dbus/dbus-auth-script.c, dbus/dbus-auth-
util.c,
dbus/dbus-connection.c, dbus/dbus-internals.c, dbus/dbus-
keyring.c,
dbus/dbus-message-util.c, dbus/dbus-server.c, dbus/dbus-sha.c,
dbus/dbus-spawn-win.c, dbus/dbus-spawn.c,
dbus/dbus-sysdeps-util-win.c, dbus/dbus-transport-socket.c,
dbus/dbus-transport.c, dbus/dbus-userdb.c: use that macro instead
of
calling dbus_error_init() where it's clearly equivalent
* configure.in, dbus/dbus-sysdeps.h, dbus/dbus-sysdeps-unix.c:
Fix
detection of i486 atomic ops. Previously, the attempts to
determine
support at compile-time on Darwin were causing the i486 atomic
ops to
be used on *all* i386 or x86-64 GCC builds (AH_VERBATIM can't be
conditionalized like we were trying to).
```

2007-10-10 Simon McVittie <simon.mcvittie@collabora.co.uk>

```
* dbus/dbus-errors.c, dbus/dbus-protocol.h: Add new error
org.freedesktop.DBus.Error.ObjectPathInUse
* dbus/dbus-object-tree.h, dbus/dbus-object-tree.c,
dbus/dbus-connection.c, dbus/dbus-connection.h: add new functions
dbus_connection_try_register_object_path and
dbus_connection_try_register_fallback, which raise
ObjectPathInUse
rather than asserting, to make object path registration less
painful
for bindings
* .gitignore: add various things that weren't in .cvsignore
because
CVS implicitly ignored them; generally bring up to date
```

2007-10-09 John (J5) Palmieri <johnp@redhat.com>

```
* tools/run-with-tmp-session-bus.sh: Fix env exports for better
portability (#9280)
* tools/dbus-send.1: Document syntax for container types in dbus-
send
man file (#9553) - patch from Jack Spaar <jspaar at
users.sourceforge.net>
```

[Both OK for MIT/X11 relicensing -smcv]

2007-10-09 Simon McVittie <simon.mcvittie@collabora.co.uk>

- * doc/dbus-specification.xml: Specifically forbid empty structs (#7969)
- * doc/dbus-specification.xml: Patches from Kristoffer Lund to clarify description of DBUS_COOKIE_SHA1 (#10184) and allowable contents of a variant (#10185, amended as per Havoc's comments)

[All of the above are OK for MIT/X11 licensing]

2007-10-03 John (J5) Palmieri <johnp@redhat.com>

- * dbus/dbus-internals.h: fd.o bug #11678 Don't error out if compiler does not support vararg macros. `_dbus_verbose` is the only function that does this so make it a noop if vararg macros are not supported
- * bus/selinux.c, dbus/dbus-sysdeps-util-unix.c: fd.o bug #12429 Reverse check to setpcap and only init audit if we were root (patch by Dan Walsh <dwalsh@redhat.com>, https://bugs.freedesktop.org/show_bug.cgi?id=12429). Reverse `we_were_root` check to setpcap if we were root. Also only init audit if we were root. So error dbus message will not show up when policy reload happens. `dbus -session` will no longer try to send audit message, only system will.
- * configure.in: fd.o bug #11872 improve linker test for `--gc-sections`. Patch by Tim Mooney <enchanter at users.sourceforge.net>
- * configure.in, dbus/dbus-sysdeps.c: fd.o bug #11872 fix `clearenv` for systems that do not have it. Patch from Brian Cameron <brian.cameron at sun.com>
- * tools/dbus-launch.c: fd.o bug #12547 remove superfluous `if`. Also convert tabs to spaces
- * configure.in, bus/Makefile.am, dbus/Makefile.am: Correctly implement `-fPIC` and `-fPIE`. For security reasons we want position independent code for libraries and position independent executable for executables. Before we were just enabling `-fPIC`. Now we correctly enable `-fPIC` and `-PIE` for `libdbus` and the bus respectively.

Proper `LD_FLAGS` are set for each also.

2007-09-20 Ryan Lortie <desrt@desrt.ca>

Add argument path matching support. Bug #11066.

* dbus/signals.c (struct DBusMatchRule, bus_match_rule_new, bus_match_rule_set_arg, bus_match_rule_parse_arg_match, match_rule_matches): Add support for parsing and matching on arg0path='/some/path' type rules.

* dbus/signals.h (bus_match_rule_set_arg): change to take const DBusString instead of const char * for the string to match against.

* dbus/dbus-bus.c: add a quick note to dbus_bus_add_match documentation about the path matching.

* doc/dbus-specification.xml: add a more detailed description of the changes here.

2007-09-19 Ryan Lortie <desrt@desrt.ca>

Add support for compacting DBusStrings to release wasted memory.

* dbus/dbus-string.[ch] (compact, _dbus_string_compact, _dbus_string_lock): new compact function to free up allocated memory that is no longer used.

* dbus/dbus-message.c (load_message): call _dbus_string_compact on the message loader buffer.

* dbus/dbus-transport-socket.c (do_reading, do_writing): call _dbus_string_compact on the incoming/outgoing "encoded" buffers.

* dbus/dbus-string-util.c (_dbus_string_test): add a few tests for string compacting.

2007-09-13 Ryan Lortie <desrt@desrt.ca>

* HACKING: add more explicit git branch/tag instructions

2007-09-13 Ryan Lortie <desrt@desrt.ca>

migrate from cvs to git (cvs2svn -> git-svnimport).

* HACKING: update release/branch/tag instructions
* */.cvsignore: rename to .gitignore

also, clean up tags and branch names to conform to HACKING

2007-08-17 William Jon McCann <mccann@jhu.edu>

* update-dbus-docs.sh: upload DTD to server

2007-08-17 Havoc Pennington <hp@redhat.com>

* tools/dbus-launch-x11.c (set_address_in_x11): fix from Michael Lorenz to use long not int with XChangeProperty format 32

* dbus/dbus-sysdeps-util-unix.c
(_dbus_write_pid_to_file_and_pipe): factor this out, and use the same code in _dbus_become_daemon (where the parent writes the pid file and to the pid pipe) and in bus_context_new (where the daemon writes its own pid file and to its own pid pipe)

* bus/bus.c (bus_context_new): close the pid pipe after we print to it. Also, don't write the pid to the pipe twice when we fork, someone reported this bug a long time ago.

2007-08-03 Havoc Pennington <hp@redhat.com>

* configure.in: add major/minor/micro version number AC_SUBST

* dbus/dbus-arch-deps.h.in (DBUS_MAJOR_VERSION, DBUS_MINOR_VERSION, DBUS_MICRO_VERSION, DBUS_VERSION_STRING, DBUS_VERSION): collection of macros to get version of library we are compiled against.

* dbus/dbus-misc.c (dbus_get_version): new function, to get version of library we are linked against at runtime.

2007-07-30 Havoc Pennington <hp@redhat.com>

* bus/activation-helper.c (check_bus_name): don't use _dbus_check_valid_bus_name() which is only around with --enable-checks, instead use _dbus_validate_bus_name(). Bug #11766 from Diego <diego@pemas.net>

2007-07-27 Havoc Pennington <hp@redhat.com>

* configure.in: post-release version bump

2007-07-27 Havoc Pennington <hp@redhat.com>

* release 1.1.2

2007-07-26 Havoc Pennington <hp@redhat.com>

* bus/config-parser-trivial.c (check_return_values): disable a test that hardcoded the bus user's name

* bus/dispatch.c (bus_dispatch_test_conf): remove the "if (!use_launcher)" around the tests, they were only failing because we didn't pass through all the expected errors from the helper.

* bus/activation-exit-codes.h
(BUS_SPAWN_EXIT_CODE_CHILD_SIGNALED): add a code for child segfaulting
(BUS_SPAWN_EXIT_CODE_GENERIC_FAILURE): make "1" be a generic failure code, so if a third party launch helper were written it could just always return 1 on failure.

2007-07-24 Daniel P. Berrange <dan@berrange.com>

* bus/dbus-daemon.1: Add docs on new syntax options for the bus address strings

* dbus/dbus-address.c: Allow * in addresses (for binding to all addresses).

* dbus/dbus-sysdeps.h:

* dbus/dbus-sysdeps-unix.c: Re-write to use getaddrinfo instead of gethostbyname to enable protocol independant name lookup, making IPv6 work

* dbus/dbus-server-socket.h:

* dbus/dbus-server-socket.c: Add support for 'family' in the address string to specify ipv4 vs ipv6. Use a port string to allow for service resolution. Allow for binding to multiple sockets at once in case of dual IPv4 & IPv6 stacks.

* dbus/dbus-server-unix.c: Pass in an array of file descriptors instead of a single one.

* dbus/dbus-transport-socket.h:

* dbus/dbus-transport-socket.c: Add support for 'family' in the address string to specify ipv4 vs ipv6. Use a port string to allow for service resolution.

2007-07-24 Havoc Pennington <hp@redhat.com>

* configure.in: add AM_PROG_CC_C_O to allow per-target CPPFLAGS

* bus/dispatch.c (bus_dispatch_test_conf): Fix up setting TEST_LAUNCH_HELPER_CONFIG to include the full path, and enable test_shell_fail_service_auto_start when use_launcher==TRUE

* bus/activation-helper-bin.c (convert_error_to_exit_code): pass through the INVALID_ARGS error so the test suite works

* bus/activation.c (handle_activation_exit_error): return DBUS_ERROR_NO_MEMORY if we get BUS_SPAWN_EXIT_CODE_NO_MEMORY

* dbus/dbus-spawn.c (_dbus_babysitter_get_child_exit_status):
return only the exit code of the child, not the entire thingy
from
waitpid(), and make the return value indicate whether the child
exited normally (with a status code)

* bus/bus.c (process_config_first_time_only): _dbus_strdup works
on NULL so no need to check
(process_config_every_time): move servicehelper init here, so we
reload it on HUP or config file change

* bus/Makefile.am (install-data-hook): remove comment because
Emacs make mode seems to be grumpy about it

2007-07-24 Richard Hughes <richard@hughsie.com>

* bus/Makefile.am:
* bus/test-system.c: (die), (check_memleaks), (test_pre_hook),
(test_post_hook), (main):
Add back the test-system.c file - not sure now this got ignored
in the
diff. I blame git.

2007-07-24 Richard Hughes <richard@hughsie.com>

* configure.in:
Use ustar to generate the tarball; this fixes the make distcheck
problem when the data files do not fit in the archive:
tar: dbus-1.1.2/test/data/valid-service-
files/org.freedesktop.DBus.
TestSuiteShellEchoServiceFail.service.in: file name is too
long (max 99); not dumped

We have to have the 'long' names as the service helper matches by
filename rather than by the name in the service file.

2007-07-24 Richard Hughes <richard@hughsie.com>

* configure.in:
* test/Makefile.am:
* test/data/invalid-service-files-

files/org.freedesktop.DBus.TestSuiteShell
EchoServiceFail.service.in:
* test/data/valid-service-
files/org.freedesktop.DBus.TestSuiteShell
EchoServiceSuccess.service.in:
Add the data files needed by the system activation unit checks.
```

2007-07-24 Richard Hughes <richard@hughsie.com>

```
* bus/dispatch.c: (check_segfault_service_no_auto_start),
(check_launch_service_file_missing),
(check_launch_service_user_missing),
(check_launch_service_exec_missing),
(check_launch_service_service_missing), (bus_dispatch_test_conf),
(bus_dispatch_test_conf_fail), (bus_dispatch_test):
Add unit tests for system activation. Most are copied from the
session activation tests, but some didn't apply when using a
launcher.
```

2007-07-24 Richard Hughes <richard@hughsie.com>

```
* bus/activation.c: (bus_activation_activate_service):
If the bus uses a service-launcher, then use the setuid launcher.
```

2007-07-24 Richard Hughes <richard@hughsie.com>

* configure.in:
Add the needed library exports for the new laucher.

2007-07-24 Richard Hughes <richard@hughsie.com>

* configure.in:
Check for `-Wl,--gc-sections` so we can really reduce the size of
the
setuid binary.

2007-07-24 Richard Hughes <richard@hughsie.com>

* bus/activation.c: (handle_activation_exit_error),
(babysitter_watch_callback):
Map the child exit status integer to a proper dbus error.

2007-07-24 Richard Hughes <richard@hughsie.com>

* bus/bus.c: (process_config_first_time_only),
(process_config_every_time), (bus_context_unref),
(bus_context_get_servicehelper):
* bus/bus.h:
Add the concept of a service-helper and allow it's value to be
read.

2007-07-24 Richard Hughes <richard@hughsie.com>

* bus/activation.c: (bus_activation_entry_unref),
(update_desktop_file_entry):
Add the concept of, and read the value of user from the desktop
file.
The user string is not required unless we are using system
activation.

2007-07-24 Richard Hughes <richard@hughsie.com>

* bus/activation.c:
* bus/desktop-file.h:
Move the defines into the header file, as we use these in the
lauch
helper as well as the desktop file parsing.

2007-07-24 Richard Hughes <richard@hughsie.com>

* bus/.cvsignore:
Add the autogenerated binary files.

2007-07-24 Richard Hughes <richard@hughsie.com>

* bus/Makefile.am:

* bus/test.h:
Add the build glue for the launch helper, and also add the launch-helper
OOM checks into make check. I've probably broken the build, give me 2.

2007-07-24 Richard Hughes <richard@hughsie.com>

* bus/test-launch-helper.c: (die), (check_memleaks),
(test_post_hook), (bus_activation_helper_oom_test), (main):
Add a test wrapper to allow OOM checks on the launch helper.

2007-07-24 Richard Hughes <richard@hughsie.com>

* bus/activation-helper-bin.c: (convert_error_to_exit_code),
(main):
* bus/activation-helper.c: (desktop_file_for_name),
(clear_environment), (check_permissions), (check_service_name),
(get_parameters_for_service), (switch_user),
(exec_for_correct_user), (check_bus_name), (get_correct_parser),
(launch_bus_name), (check_dbus_user), (run_launch_helper):
* bus/activation-helper.h:
Add the initial launch-helper. This is split into a main section
and a
binary loader that allows us to launch the main section in another
test
harness to do stuff like OOM testing. No build glue yet.

2007-07-24 Richard Hughes <richard@hughsie.com>

* bus/Makefile.am:
* bus/config-parser.c: (bus_config_parser_unref),
(start_busconfig_child), (bus_config_parser_end_element),
(servicehelper_path), (bus_config_parser_content),
(bus_config_parser_finished),
(bus_config_parser_get_servicehelper),
(test_default_session_servicedirs),
(test_default_system_servicedirs), (bus_config_parser_test):
* bus/config-parser.h:
Make the config-parser code use the common config code.
Also add the session and systemd dirs stuff, and make the config
parser
aware of the servicehelper field.

2007-07-24 Richard Hughes <richard@hughsie.com>

* bus/system.conf.in:
Add new servicehelper fields to the default system.conf file.

2007-07-24 Richard Hughes <richard@hughsie.com>

* bus/config-parser-trivial.c: (service_dirs_find_dir),

```
(service_dirs_append_link_unique_or_free),
(bus_config_parser_new),
  (bus_config_parser_unref), (bus_config_parser_start_element),
  (bus_config_parser_end_element), (bus_config_parser_content),
  (bus_config_parser_finished), (bus_config_parser_get_user),
  (bus_config_parser_get_type),
(bus_config_parser_get_service_dirs),
  (check_return_values), (do_load), (check_loader_oom_func),
  (process_test_valid_subdir), (make_full_path),
(check_file_valid),
  (bus_config_parser_trivial_test):
* bus/config-parser-trivial.h:
  Add a security sensitive stripped down config parser for the
setuid
  launcher. This file only reads what it needs, and doesn't try to
do
  anything remotely clever like including external files.
  It is not intended to validate the config file; it is expected
that
  config-parser will do that before the setuid program tries to
read it.
```

2007-07-24 Richard Hughes <richard@hughsie.com>

```
* bus/config-parser-common.c:
  (bus_config_parser_element_name_to_type),
  (bus_config_parser_element_type_to_name):
* bus/config-parser-common.h:
  We don't want to run the whole config parser with all it's deps
in the
  setuid program. We need to implement a stripped down config
parser just
  for the launcher, and to do so I need some common functions and
defines; add them here.
```

2007-07-24 Richard Hughes <richard@hughsie.com>

```
* dbus/dbus-sysdeps-unix.c:
  (_dbus_get_standard_system_servicedirs):
* dbus/dbus-sysdeps-win.c:
  Provide a way to get the standard system servicedirs, just like
we do
  for the session service dirs. These should be separate, as there
may
  be a security issue starting up some session stuff as root.
  The use-case for the same binary starting up per-system_and_
per-session is also not valid.
```

2007-07-24 Richard Hughes <richard@hughsie.com>

```
* bus/dbus-daemon.1.in:
```

Add standard_system_servicedirs and servicehelper into the man file and explain what each does.

2007-07-24 Richard Hughes <richard@hughsie.com>

* doc/busconfig.dtd:
Add servicehelper into the dtd, it will soon be a valid part of the config file.

2007-07-24 Richard Hughes <richard@hughsie.com>

* dbus/dbus-spawn.c: (read_data),
(_dbus_babysitter_get_child_exit_status):
* dbus/dbus-spawn.h:
Add a function so we can get access to the exit status of the launch helper.
By providing the return code and not the error we can leave the 'what does this mean?' to the bus launch code and not include it in the dbus directory.

2007-07-24 Richard Hughes <richard@hughsie.com>

* bus/activation-exit-codes.h:
Add defines which specify the output codes of the launch helper.
We have to use exit codes as this is the only way we can return failure type without going grotty things like redirecting possibly-nonsecure stderr into the error.

2007-07-24 Richard Hughes <richard@hughsie.com>

* dbus/dbus-protocol.h:
Add new error names needed for the launch helper.

2007-07-24 Richard Hughes <richard@hughsie.com>

* dbus/dbus-sysdeps.c: (_dbus_clearenv):
* dbus/dbus-sysdeps.h:
Add a wrapper for clearenv.

2007-07-24 Richard Hughes <richard@hughsie.com>

* doc/system-activation.txt:
Add design document for the system activation parts. I'll shortly be committing many patches that add system activation using a setuid launcher into CVS, so expect things to be broken for a few hours.

2007-07-19 Ralf Habacker <ralf.habacker@freenet.de>

- * cmake/modules/FindKDEWIN.cmake: fixed comment
- * cmake/modules/FindKDEWIN32.cmake: removed obsolete cmake module

2007-07-18 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-message.c (dbus_message_get_cached) (dbus_message_cache_or_finalize): don't mess with message from message cache outside of the cache lock. Bug #9164 from Jonathan Matthew.

2007-07-13 Havoc Pennington <hp@redhat.com>

- * Add indent-tabs-mode: nil to all file headers.

2007-07-12 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-sysdeps-util.c (_dbus_sysdeps_test): invert the test for parsing hex as double to be sure it fails to work
- * dbus/dbus-sysdeps.c (_dbus_string_parse_double): don't allow hex numbers.

2007-07-10 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-connection.c (struct DBusConnection): Fix from Olivier Hochreutiner to avoid trying to protect individual bits in a word with different locks (make dispatch_acquired and io_path_acquired dbus_bool_t rather than bitfields)

2007-07-09 Ralf Habacker <ralf.habacker@freenet.de>

- * dbus/dbus-sysdeps-win.c, dbus-sysdeps-win.h, dbus-sysdeps-win-util.c, dbus-sysdeps-spawn-win.c: synced with windbus sources

2007-07-07 Ralf Habacker <ralf.habacker@freenet.de>

- * dbus/dbus-sysdeps-win.c
 (_dbus_getsid): remove unused jump label
 (_dbus_read_credentials_socket): _dbus_string_init could fail,
 check initialisation
 (_dbus_get_working_dir, _dbus_init_working_dir): remove unused
 functions

2007-07-04 Ralf Habacker <ralf.habacker@freenet.de>

* cmake/modules/FindKDEWIN.cmake: search in <program files
dir>\win32libs
for windows supplementary packages too

2007-06-30 Ralf Habacker <ralf.habacker@freenet.de>

* cmake/dbus/CMakeLists.txt: handle userdb as unix file

2007-06-30 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-sysdeps-win.c, dbus/dbus-sysdeps-win.h: removed
obsolete
DBusUserInfo code

2007-06-30 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-sysdeps-win.c (_dbus_daemon_init): reduced compiler
warnings

2007-06-23 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-auth-script.c (_dbus_auth_script_run): added
UNIX_ONLY and
WIN_ONLY commands for auth scripts
* test/data/auth/external-root.auth-script: limit execution to
unix

2007-06-21 Havoc Pennington <hp@redhat.com>

* dbus/dbus-transport.c (auth_via_default_rules): made the verbose
spam
cross-platform

2007-06-21 Havoc Pennington <hp@redhat.com>

* dbus/dbus-watch.c (dbus_watch_get_fd): 1) its behavior should
not be the same as before, the ABI has never been declared stable
on Windows and 2) do not commit to cross-platform files without
posting the exact patch to the mailing list

* dbus/dbus-sysdeps-util.c (_dbus_sysdeps_test): as I have
pointed
out before, either 0xff needs to work on both platforms, or none
of the dbus code can rely on it working. That means the options
are 1) audit the code for anywhere that relies on 0xff working,
if
none found ideally add a test that it *doesn't* work and make
unix
reject it explicitly, but in any case this test would go away or
2) make it work on Windows also, then we don't have to figure out
whether we rely on it.

And in either case, post the exact patch to the mailing list and don't just commit.

2007-06-21 Ralf Habacker <ralf.habacker@freenet.de>

* cmake/CMakeLists.txt: added VERSION_PATCH to be able to distinguish win32 binary release from dbus versioning

2007-06-21 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-sysdeps-win.c: deleted local DBusCredentials structure
 (_dbus_getsid): new function
 (_dbus_read_credentials_socket): used correct function
 (_dbus_append_user_from_current_process,
 _dbus_credentials_add_from_current_process): added real
 sid reading
 (_dbus_credentials_parse_and_add_desired, _dbus_parse_uid):
 deleted

2007-06-21 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-sysdeps-util.c (_dbus_sysdeps_test): don't check 0xff as floating point, this isn't supported on win32 math implementation

2007-06-21 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-sysdeps-win.c (_dbus_homedir_from_username,
 _dbus_homedir_from_current_process,
 _dbus_append_desired_identity):
 removed obsolete functions

2007-06-21 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-sysdeps-win.c, dbus/dbus-sysdeps-util-win.c,
 dbus/dbus-sysdeps-win.h: disabled uid/sid conversation stuff
 implementation by Peter Kueimmel

2007-06-21 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-watch.c (dbus_watch_get_fd): this function is deprecated and its behavior should be as before until all client code is migrated.

2007-06-19 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-sysdeps-util-win.c, tools/dbus-launch-win.c:
 msvc7.1 fixes by Jaroslaw Staniek tested with mingw

2007-06-19 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-sysdeps-win.c, dbus/dbus-sysdeps-spawn-win.c,
dbus/dbus-sysdeps-win.h: disabled DBusSocket implementation
by Peter Kuemmel

2007-06-18 Ralf Habacker <ralf.habacker@freenet.de>

* dbus-win.patch: removed obsolete patches

2007-06-18 Havoc Pennington <hp@redhat.com>

* configure.in: bump version to 1.1.2 so CVS is higher than last
release (this is not the 1.1.2 release)

2007-06-18 Havoc Pennington <hp@redhat.com>

* Release 1.1.1

2007-06-18 Havoc Pennington <hp@redhat.com>

* doc/dbus-specification.xml: document
org.freedesktop.DBus.GetId()

* bus/driver.c (bus_driver_handle_get_id): implement
org.freedesktop.DBus.GetId()

* bus/bus.c (bus_context_new): generate a unique ID for each bus
context

* dbus/dbus-connection.c (dbus_connection_get_server_id): new
function

* dbus/dbus-bus.c (dbus_bus_get_id): new function

* dbus/dbus-server.c (dbus_server_get_id): new function

2007-06-18 Havoc Pennington <hp@redhat.com>

* dbus/dbus-sysdeps-unix.c (_dbus_read_credentials_socket): clean
this up a little bit, to try and understand why telnet'ing to a
server and sending a non-nul byte didn't disconnect immediately;
now it seems that it does disconnect immediately as it should,
though I don't understand what has changed.

2007-06-18 Havoc Pennington <hp@redhat.com>

* dbus/dbus-watch.c (dbus_watch_get_socket)
(dbus_watch_get_unix_fd): new API to match DBusConnection
(dbus_watch_get_fd): deprecate this

Throughout: just s/dbus_watch_get_fd/dbus_watch_get_socket/g for
now since all the transports use sockets anyway

2007-06-16 Ralf Habacker <ralf.habacker@freenet.de>

- * dbus/dbus-macros.h, dbus/dbus-message.c, dbus/dbus-message.h: renamed DBUS_GNUC_DEPRECATED to DBUS_DEPRECATED and extended to msvc compiler

2007-06-15 Ralf Habacker <ralf.habacker@freenet.de>

- * cmake/CMakeLists.txt: use local include header first
- * dbus/dbus-sysdeps-win.c: mingw fix of DbusCredential struct

2007-06-15 Ralf Habacker <ralf.habacker@freenet.de>

- * cmake/ConfigureChecks.cmake, cmake/config.h.cmake: added check for HAVE_ERRNO_H
- * cmake/dbus/CMakeLists.txt: added missing files
- * dbus/dbus-transport-win.c/.h: new files
- * dbus/dbus-sysdeps-win.c,.h: added required _unix functions to make dbus compilable on win32
- * dbus/dbus-sysdeps-win-utils.c,.h: moved some functions to dbus-sysdeps-win.c
- * dbus-win.patch: removed applied or obsolete patches

Note: dbus-win32 is now compilable, no guarantee that it runs without any problems

2007-06-15 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-sysdeps-unix.c (_dbus_append_session_config_file) (_dbus_append_system_config_file): new functions
- * bus/main.c (main): use _dbus_append_system_config_file() and _dbus_append_session_config_file()
- * dbus/Makefile.am (INCLUDES): move DBUS_SYSTEM_CONFIG_FILE and DBUS_SESSION_CONFIG_FILE into this makefile

2007-06-15 Havoc Pennington <hp@redhat.com>

- * dbus/dbus-sysdeps.c (_dbus_set_errno_to_zero) (_dbus_get_is_errno_nonzero, _dbus_get_is_errno_eintr) (_dbus_strerror_from_errno): family of functions to abstract errno, though these are somewhat bogus (really we should make our socket wrappers not use errno probably - the issue is that any usage of errno that isn't socket-related probably is not cross-platform, so should either be in a unix-only file that can

use errno directly, or is a bug - these general errno wrappers hide issues of this nature in non-socket code, while socket-specific API changes would not since sockets are allowed cross-platform)

2007-06-14 Havoc Pennington <hp@redhat.com>

* bus/dispatch.c (check_get_connection_unix_process_id): mop up getpid() (noticed by Peter KÄmmel) and adapt the test to expect a "pid unknown" error when running on Windows.

2007-06-14 Havoc Pennington <hp@redhat.com>

* dbus/dbus-sysdeps-unix.c
(_dbus_credentials_parse_and_add_user):
delete this function since it was effectively the same as
_dbus_credentials_add_from_username()

2007-06-14 Havoc Pennington <hp@redhat.com>

* dbus/dbus-auth.c: adapt to keyring changes

* dbus/dbus-keyring.c: change to avoid using user ID and home directory directly; instead use a keyring-location-from-credentials function in dbus-sysdeps

* fix to use _dbus_append_user_from_current_process() instead of _dbus_username_from_current_process() or _dbus_append_desired_identity().

2007-06-14 Ralf Habacker <ralf.habacker@freenet.de>

* reverted global rename of function
_dbus_username_from_current_process.
It needs too much tests to verify that the change does not break anything.
I had overseen that the signatures are different and requires non trivial changes.
This is one *major* disadvantage of emulating oop functionality with c.
You are responsible for cleaning every object on every function return point
which could be a nightmare if you are not working with dbus all the days.

2007-06-14 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-auth.c
(handle_client_initial_response_cookie_shal_mech):
fixed usage of _dbus_append_desired_identity()

* dbus/dbus-sysdeps.h (_dbus_username_from_current_process):
removed prototype

2007-06-14 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-sysdeps.c: moved global lock system_users from dbus-userdb.c

2007-06-14 Ralf Habacker <ralf.habacker@freenet.de>

* global rename of function _dbus_username_from_current_process
to _dbus_append_desired_identity.
Approved by Havoc Pennington

2007-06-14 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-sysdeps-win.c: disabled DBusUserInfo related code
(_dbus_append_desired_identity,
_dbus_windows_user_is_process_owner):
new win32 functions as counterpart of unix related

(_dbus_send_credentials_socket, _dbus_read_credentials_socket):
renamed from ..._unix_socket
(_dbus_send_credentials_unix_socket): removed obsolete
function

* dbus/dbus-sysdeps-win-util.c: disabled DBusGroupInfo related
code

(_dbus_verify_daemon_user, _dbus_change_to_daemon_user):
new win32 functions as counterpart of unix related

2007-06-14 Simon McVittie <simon.mcvittie@collabora.co.uk>

* doc/dbus-specification.xml: say the protocol version is 1
instead of
0 (patch from Kristoffer LundÃ©n, fd.o#10033) and remove the
FIXME
about removing protocol version from messages (as per Havoc's
comment
on that bug)

2007-06-14 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-sysdeps-win.c (_dbus_pid_for_log, _dbus_flush_caches):
new win32 functions as counterpart of unix related

2007-06-14 Ralf Habacker <ralf.habacker@freenet.de>

* cmake/modules/FindKDEWIN.cmake,
cmake/modules/FindKDEWIN_Packager.cmake,
cmake/modules/Win32Macros.cmake: new files from the
kdewin32 project

* cmake/CMakeLists.txt: cleaned support for kdewin installer and win32 explorer wrapper

2007-06-13 Havoc Pennington <hp@redhat.com>

* dbus/dbus-message.c (dbus_message_iter_open_container): Fix broken return_if_fail (kind of scary that test suite does not cover this)

2007-06-13 Havoc Pennington <hp@redhat.com>

* dbus/dbus-server-socket.c (_dbus_server_listen_socket): support all_interfaces=true|false for tcp servers

* dbus/dbus-sysdeps-unix.c (_dbus_listen_tcp_socket): support inaddr_any flag

* bus/selinux.c: fix some missing includes

* dbus/dbus-server-socket.c (_dbus_server_listen_socket): allow port to simply be omitted in addition to specifying 0

2007-06-13 Havoc Pennington <hp@redhat.com>

* configure.ac, bus/selinux.c, dbus/dbus-sysdeps-unix-util.c: add libaudit support, no clue what this means really but now we have it. Patches from Fedora package.

* bus/bus.c (bus_context_new): move selinux initialization after changing to daemon user, patch from Fedora package

* dbus/dbus-transport.c (auth_via_unix_user_function): fix a typo

2007-06-12 Havoc Pennington <hp@redhat.com>

* dbus/dbus-message.c (dbus_message_iter_open_container): improve the checks/warnings for contained_signature a bit

2007-06-12 Havoc Pennington <hp@redhat.com>

* dbus/dbus-marshal-recursive.c (write_or_verify_typecode): improve the warning a bit if you write extra data into a message

2007-06-12 Havoc Pennington <hp@redhat.com>

* dbus/dbus-auth.c (sha1_handle_second_client_response) (handle_server_data_anonymous_mech): add the process ID from socket credentials, if available, even if not using EXTERNAL

* dbus/dbus-transport.c (auth_via_default_rules): support allow_anonymous flag

* dbus/dbus-connection.c (dbus_connection_get_is_anonymous) (dbus_connection_set_allow_anonymous): new API for controlling anonymous access

2007-06-09 Havoc Pennington <hp@redhat.com>

* dbus/dbus-string.c (_dbus_string_pop_line): fix this not to think an empty line is the end of the file. Also, fix some whitespace.

* dbus/dbus-string-util.c: add more tests for _dbus_string_pop_line() revealing that it thinks an empty line is the end of the file, which broke dbus-auth-script.c so it didn't really run the scripts

* dbus/dbus-auth.c: add ANONYMOUS mechanism

* dbus/dbus-auth-script.c (_dbus_auth_script_run): fix to detect an empty/no-op auth script; add commands to check that we have or don't have the expected credentials

2007-06-09 Havoc Pennington <hp@redhat.com>

* bus/policy.c (bus_policy_create_client_policy): gracefully continue if the connection has no unix user - just don't apply any unix user dependent rules.

* bus/config-parser.c: remove dbus-userdb.h usage

* bus/bus.c: remove dbus-userdb.h usage

* dbus/dbus-transport.c (_dbus_transport_get_is_authenticated): support Windows user function; also, fix the logic for checking auth as root in the default auth code (broken in the previous commit)

* dbus/dbus-connection.c (dbus_connection_set_windows_user_function): new function (dbus_connection_get_windows_user): new function

2007-06-09 Havoc Pennington <hp@redhat.com>

* bus/dispatch.c (check_get_connection_unix_process_id): adapt since sysdeps-unix.h stuff isn't included anymore

* bus/bus.c (bus_context_new): use more abstract functions to change user, so they can be no-ops on Windows

* dbus/dbus-credentials.c, dbus/dbus-credentials.h, dbus/dbus-credentials-util.c: new files containing a fully opaque DBusCredentials data type to replace the old not opaque one.

* configure.in (DBUS_UNIX): define DBUS_UNIX to match DBUS_WIN on windows

* dbus/dbus-userdb.h: prohibit on Windows, next step is to clean up the uses of it in bus/*.c and factor out the parts of cookie auth that depend on it

2007-06-07 Havoc Pennington <hp@redhat.com>

* dbus/dbus-message.c: improve some docs related to reading values from a message iter

2007-06-02 Ralf Habacker <ralf.habacker@freenet.de>

* cmake: added cygwin compile support

2007-06-01 Ralf Habacker <ralf.habacker@freenet.de>

* tools/dbus-launch-win.c: new file, replaces script wrapper on win32.

* cmake/dbus-launch.bat.cmake: removed obsolete file

2007-05-31 Ralf Habacker <ralf.habacker@freenet.de>

* bus/main.c (main): uses _dbus_get_config_file_name() to detect session.conf location on win32.

* dbus-sysdeps-win.h
(_dbus_get_config_file_name, _dbus_file_exists):
new prototyp, undefined interface after including windows.h
because
it makes trouble when a paramater is named interface.

* dbus-sysdeps-win.c (_dbus_get_install_root,
_dbus_get_config_file_name, _dbus_file_exists): new functions.

2007-05-27 Ralf Habacker <ralf.habacker@freenet.de>

* bus/policy.c, dbus/dbus-internals.c: fixed inconsistant line endings
as reported by Peter Kämmel.

2007-05-25 John (J5) Palmieri <johnp@redhat.com>

* Released 1.1.0

2007-05-25 John (J5) Palmieri <johnp@redhat.com>

* Split NEWS and ChangeLog into a .pre-1-0 file as per HACKING
We forgot to do this during the 1.0 release and it makes sense

now as we get ready to release the first 1.1.0 development tarball

2007-05-25 John (J5) Palmieri <johnp@redhat.com>

- * create directory test/data/valid-config-files/session.d so that make check passes

2007-05-25 John (J5) Palmieri <johnp@redhat.com>

- * INSTALL: remove dependancies for bindings since they no longer are a part of core

2007-05-25 Ralf Habacker <ralf.habacker@freenet.de>

- * dbus/dbus-server-win.c, dbus/dbus-server-win.h: new file with empty function `_dbus_server_listen_platform_specific()`.

- * dbus/dbus-server.c (listen_funcs): uses `_dbus_server_listen_platform_specific` on any platform.

2007-05-25 Ralf Habacker <ralf.habacker@freenet.de>

- * dbus/dbus-sysdeps-win.c (fill_win_user_info_homedir): not getting user info from a domain controller isn't an error, the computer may run in a non domain context.

2007-05-25 Ralf Habacker <ralf.habacker@freenet.de>

- * dbus/dbus-sysdeps-win.c (`_dbus_full_duplex_pipe`): fixed assertion.

2007-05-24 Simon McVittie <simon.mcvittie@collabora.co.uk>

- * bus/config-parser.c (test_service_dir_matches): fixed ordering for unix.

- * bus/config-parser.c (test_default_session_servicedirs): made allocation of `_progs` platform independent.

2007-05-23 Havoc Pennington <hp@redhat.com>

- * bus/Makefile.am (install-data-hook): create session.d

- * bus/session.conf.in: add session.d for the session bus, so security policy can be extended

2007-05-22 Ralf.Habacker <ralf.habacker@freenet.de>

- * cmake/CMakeLists.txt: fixed creating of `TEST_..._BINARY` to make

bus-test able to find the binaries.

2007-05-21 Simon McVittie <simon.mcvittie@collabora.co.uk>

* acinclude.m4, configure.in: In recent autotools, `{datadir}` is defined in terms of `{datarootdir}`, so `EXPANDED_DATADIR` needs to be expanded recursively. Rather than fixing `configure.in` to do this, I grabbed the `AS_AC_EXPAND` macro from `autostars.sf.net`, which seems to be commonly used.

2007-05-21 Simon McVittie <simon.mcvittie@collabora.co.uk>

* `update-dbus-docs.sh`: Assorted improvements:
- Default user if `$FDUSER` is not set is the ssh default (set in `~/.ssh/config` or based on the local username), not a hard-coded "johnp"
- Temporary checkout directory is created securely (preventing symlink attacks), if `mktemp(1)` is available
- Use `make -C` rather than `cd && make && cd ..`

2007-05-21 Simon McVittie <simon.mcvittie@collabora.co.uk>

* HACKING: Point to correct mailing list

2007-05-21 Simon McVittie <simon.mcvittie@collabora.co.uk>

* `doc/dbus-specification.xml`: explicitly specify that `STRING` cannot contain embedded NULs.

2007-05-20 Ralf.Habacker <ralf.habacker@freenet.de>

* `dbus/dbus-internal.c`: fix inline problem on win32.

2007-05-20 Ralf.Habacker <ralf.habacker@freenet.de>

* `dbus/dbus-sysdeps-win.c` (`fill_win_user_info_homedir`): not reaching domain controller isn't an error, converted error message to verbose message.

2007-05-19 Ralf.Habacker <ralf.habacker@freenet.de>

* `dbus/dbus-test.c` (`dbus_internal_do_not_use_run_tests`): disabled tests not running on wince.

2007-05-19 Ralf.Habacker <ralf.habacker@freenet.de>

* dbus/dbus-internals.c (_dbus_verbose_init): win32 requires 'varname=' to unset a environment variable.

2007-05-19 Ralf.Habacker <ralf.habacker@freenet.de>

* dbus/dbus-sysdeps.c (_dbus_setenv): win32 requires 'varname=' to unset a environment variable.

2007-05-19 Ralf.Habacker <ralf.habacker@freenet.de>

* bus/policy.c (bus_policy_create_client_policy): win32 temporary fix until the userdb stuff is ported completly.

2007-05-19 Ralf.Habacker <ralf.habacker@freenet.de>

* dbus/dbus-server.c (listen_funcs):
_dbus_server_listen_platform_specific is empty on win32,
limited to unix only.

* dbus/dbus-server.c (valid_addresses): limit unix
only addresses to unix.

2007-05-18 Havoc Pennington <hp@redhat.com>

* doc/dbus-specification.xml: add a GetAll to the Properties
interface.

2007-05-17 Ralf.Habacker <ralf.habacker@freenet.de>

* bus\config-parser.c (test_default_session_servicedirs):
win32 fix.

2007-05-17 Ralf.Habacker <ralf.habacker@freenet.de>

* configure.in: define constant DBUS_UNIX.

2007-05-14 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-sysdeps-win.c (_dbus_printf_string_upper_bound):
compile fix for MS Platform SDK 6
patch from Michael Luschas <mluschas@gmail.com>

2007-05-10 John (J5) Palmieri <johnp@redhat.com>

* dbus-1.pc.in: add daemondir to pc file
patch from Brian Cameron <brian.cameron at sun.com>

2007-05-04 Simon McVittie <simon.mcvittie@collabora.co.uk>

* doc/dbus-specification.xml: mention the reserved
o.fd.DBus.Local
interface and the corresponding /o/fd/DBus/Local object path;
describe them as reserved and forbid using them in a sent
message,
mentioning that in the reference implementation this will cause
the
connection to be dropped. Patch approved by Havoc.

2007-04-28 Ralf Habacker <ralf.habacker@freenet.de>

* cmake/: don't install test applications and service files,
moved CMAKE_DEBUG_POSTFIX to top level CMakeLists.txt

2007-04-27 Havoc Pennington <hp@redhat.com>

* dbus/dbus-sysdeps-unix.c (_dbus_open_socket): fix #10781 from
Tobias Nygren, checking pointer to fd vs. 0 rather than checking
the fd itself

2007-04-26 Ralf Habacker <ralf.habacker@freenet.de>

* cmake/: added debug postfixes to debug exe's for
easier debugging.
* dbus/dbus-sysdeps-win.c (_dbus_win_set_error_from_win_error):
print error code in case no string message is available.

2007-04-06 Simon McVittie <simon.mcvittie@collabora.co.uk>

* dbus/dbus-message-util.c, dbus/dbus-message.c,
dbus/dbus-message.h: Add API to convert a DBusMessage to/from a
byte array. Patch from Dafydd Harries
<dafydd.harries@collabora.co.uk>,
approved by Havoc Pennington.

2007-04-03 Timo Hoenig <thoenig@suse.de>

* dbus/dbus-address.c (dbus_parse_address): Do not accept zero-
length address.
* dbus/dbus-address.c (_dbus_address_test): Add test for zero-
length address.

2007-03-25 Ralf.Habacker <ralf.habacker@freenet.de>

* cmake/dbus/CMakeLists.txt: debug postfix also for mingw.

2007-03-16 Ralf.Habacker <ralf.habacker@freenet.de>

* cmake/modules/FindExpat.cmake: fix package detection on win32.
* README.win: update install instructions.

2007-03-16 Ralf.Habacker <ralf.habacker@freenet.de>

- * dbus/dbus-sysdeps.h (_dbus_split_paths_and_append): new prototyp
(_DBUS_PATH_SEPARATOR): new macro.

- * dbus/dbus-sysdeps.c (_dbus_split_paths_and_append): merged from dbus/dbus-sysdeps-unix.c and dbus/dbus-sysdeps-win.c.

2007-03-15 Ralf.Habacker <ralf.habacker@freenet.de>

- * bus/config-parser.c, bus/policy.c, bus/policy.h, bus/dbus-daemon.1.in, bus/session.conf.in: added eavesdrop support for replies - patch by olli.salli at collabora.co.uk approved by Havoc Pennington.

2007-03-15 Ralf.Habacker <ralf.habacker@freenet.de>

- * dbus\dbus-sysdeps-win-thread.c: renamed to dbus-sysdeps-thread-win.c, it is a platform depending file similar to dbus-sysdeps-pthread.c.

2007-03-15 Ralf.Habacker <ralf.habacker@freenet.de>

- * cmake\doc\CMakeLists.txt: added preliminary xml doc support, needs cmake Find script.

2007-03-14 Ralf.Habacker <ralf.habacker@freenet.de>

- * cmake: add doxygen support

2007-03-14 Ralf.Habacker <ralf.habacker@freenet.de>

- * cmake/config.h.cmake: WINCE fixes, defined DBUS_UNIX.

2007-03-13 Ralf.Habacker <ralf.habacker@freenet.de>

- * dbus/dbus-sysdeps-util-win.c (dbus_become_daemon): win32 compile fix.

2007-03-13 Ralf.Habacker <ralf.habacker@freenet.de>

- * dbus-win.patch: removed obsolete patches.

2007-03-13 Ralf.Habacker <ralf.habacker@freenet.de>

- * dbus/dbus-sysdeps-win.c: added zero byte sending and receiving after connection start up

2007-03-11 Havoc Pennington <hp@redhat.com>

* tools/dbus-launch.c (do_close_stderr): fix C89 problem and formatting problem

* Mostly fix the DbusPipe mess.
- put line break after function return types
- put space before parens
- do not pass structs around by value
- don't use dbus_strerror after calling supposedly cross-platform api
- don't name pipe variables "fd"
- abstract special fd numbers like -1 and 1

2007-03-12 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-sysdeps-win.h, dbus/dbus-sysdeps-win.c, dbus/dbus-sysdeps-util-win.c: renamed functions _dbus_xxx_file() to _dbus_file_xxx() to reflect struct name DBusFile.

2007-03-12 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-sysdeps-util-unix.c (_dbus_become_daemon): fix _dbus_pid_fd check.

2007-03-10 Ralf Habacker <ralf.habacker@freenet.de>

* tools/dbus-print-message.c (print_message): added printing of the reply serial to method returns and errors, so you can actually figure out the message/reply pairs - patch by olli.salli at collabora.co.uk.

2007-03-10 Ralf Habacker <ralf.habacker@freenet.de>

* dbus-win.patch: removed committed patches.

2007-03-10 Ralf Habacker <ralf.habacker@freenet.de>

* bus/bus.c, bus/bus.h, bus/main.c, bus/test.c, dbus/dbus-sysdeps-unix.c, dbus/dbus-sysdeps-util-unix.c, dbus/dbus-sysdeps-util-win.c, dbus/dbus-sysdeps-win.c, dbus/dbus-sysdeps.h: renamed _dbus_xxx_pipe to _dbus_pipe_xxx, completed _dbus_pipe support.

2007-03-10 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-sysdeps.h (_dbus_listen_tcp_socket): changed type or port to pointer, because the port is given back.

* dbus/dbus-server-socket.c (_dbus_server_new_for_tcp_socket): implemented returning tcp port. Skipping port parameter and non integer port values in config <listen> statement needs more effort.

* dbus/dbus-sysdeps-unix.c, dbus/dbus-sysdeps-win.c
(_dbus_listen_tcp_socket): return the real used tcp port.

* bus/dbus-daemon.1.in: added <listen> tcp examples

2007-03-09 Ralf Habacker <ralf.habacker@freenet.de>

* cmake/config.h.cmake: win32 msvc bug fix

2007-03-09 Ralf Habacker <ralf.habacker@freenet.de>

* cmake/config.h.cmake: fixed DBUS_WINxx defines,
using _WINCE does not work.

2007-03-08 Ralf Habacker <ralf.habacker@freenet.de>

* dbus-win.patch: removed _dbus_write_pipe() patch, it is now
committed.

2007-03-08 Ralf Habacker <ralf.habacker@freenet.de>

* bus/bus.c, dbus/dbus-sysdeps-unix.c, dbus/dbus-sysdeps.h:
rename pipe related write() function calls to _dbus_write_pipe().

2007-03-08 Ralf Habacker <ralf.habacker@freenet.de>

* dbus-win.patch: added bus/config-loader-libexpat.c patch,
uses DBUS_WIN for alls win32 related #ifdefs,
some minor cleanups

2007-03-08 Ralf Habacker <ralf.habacker@freenet.de>

* dbus-win.patch: updated patch for bus/dispatch.c.

2007-03-08 Ralf Habacker <ralf.habacker@freenet.de>

* dbus-win.patch: dbus-connection.c
(dbus_connection_get_unix_user,
dbus_connection_get_unix_process_id): Let return them valid user
id's,
otherwise bus-test fails. How to replace on win32 ?.

* dbus/dbus-sysdeps-win.c (fill_win_user_info_homedir):
fix memory leak.

2007-03-08 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-sysdeps-win.c (_dbus_win_set_error_from_win_error):
use dbus friendly error name.
(fill_win_user_info_homedir): print user name in error case too.

2007-03-08 Ralf Habacker <ralf.habacker@freenet.de>
* cmake/ConfigureChecks.cmake: fixed socketpair check

2007-03-08 Ralf Habacker <ralf.habacker@freenet.de>
* bus/dispatch.c: disabled segfault test on win32 for now

2007-03-08 Ralf Habacker <ralf.habacker@freenet.de>
* configure.in, cmake/ConfigureChecks.cmake: added check for setrlimit.
* test/test-segfault.c: only include setrlimit stuff only when available.

2007-03-07 Ralf Habacker <ralf.habacker@freenet.de>
* test/test-segfault.c: unix compile fix.
* dbus-win.patch: removed obsolete patches.

2007-03-07 Ralf Habacker <ralf.habacker@freenet.de>
* bus/activation.c: removed obsolete include header.
* test/test-segfault.c: win32 compile fix, rlimit isn't available on win32.
* dbus-win.patch: removed some more patches, they are applied or obsolete

2007-03-06 Ralf Habacker <ralf.habacker@freenet.de>
* bus-win.patch: fixes unix listen problems, dbus-test now runs.

2007-03-06 Ralf Habacker <ralf.habacker@freenet.de>
* cmake/dbus/CMakeLists.txt, cmake/bus/CMakeLists.txt, cmake/CMakeLists.txt: win32 compile fix

2007-03-04 Ralf Habacker <ralf.habacker@freenet.de>
* dbus-win.patch, README.win: added available win32 patches from windbus project (<http://sf.net/projects/windbus>)

2007-03-04 Ralf Habacker <ralf.habacker@freenet.de>
* bus/activation.c: (bus_activation_activate_service): fixed call to _dbus_spawn_async_with_babysitter().

2007-03-04 Ralf Habacker <ralf.habacker@freenet.de>
* dbus/dbus-spawn.c, dbus/dbus-spawn.h (_dbus_spawn_async_with_babysitter):

added environment pointer as function parameter, used on win32.

* test/spawn-test.c: fixed call to above mentioned function.

2007-03-04 Ralf Habacker <ralf.habacker@freenet.de>

* configure.in, test/test-sleep-forever.c, test/test-names.c:
added configure check for unistd.h.

2007-03-04 Ralf Habacker <ralf.habacker@freenet.de>

* test/Makefile.am: fixed test data copy problem in
out of source build, when sources came from svn or cvs.

2007-03-03 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/*-win.*, bus/*-win.*: added win32 platform related
files. These files are only added to the cmake build system.
The missing dbus-win.patch file will be added later.

2007-03-03 Ralf Habacker <ralf.habacker@freenet.de>

* cmake: new directory, contains cmake build support.
See <http://www.cmake.org> for more informations.
Currently only unix will be buildable because some
win32 required files are still missing.

2007-03-03 Thiago Macieira <thiago@kde.org>

* dbus/dbus-sysdeps-unix.c: capture the dbus-launch stderr
output and add it to the DBusError message we return.

* tools/dbus-launch.1:

* tools/dbus-launch.c: Add option --close-stderr to, well,
close stderr before starting dbus-daemon.

2007-01-31 Havoc Pennington <hp@redhat.com>

* bus/dbus-daemon.1.in: write a section in the man page on
running
a test daemon for debugging purposes

2007-01-26 Havoc Pennington <hp@redhat.com>

* bus/session.conf.in: override all the default limits with much
higher limits on the session bus, there is no reason the session
bus should have low limits

* bus/config-parser.c (bus_config_parser_new): increase default
limits so they are less likely to be hit; in particular the max
replies per connection was way too low

2006-01-25 Simon McVittie <simon.mcvittie@collabora.co.uk>

* doc/dbus-tutorial.xml: Replace Python section of tutorial with a pointer to the tutorial maintained as part of dbus-python

2006-12-31 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-sysdeps-unix.c: unix compile fix, moved atomic_exchange_and_add() from dbus/dbus-sysdeps.c to here, it's used by _dbus_atomic_inc() and _dbus_atomic_dec().

2006-12-31 Ralf Habacker <ralf.habacker@freenet.de>

* tools/dbus-monitor.c: gettimeofday() is not available on windows so we have to provide our own. It's taken from lgpl'd kdedwin32 package. - Patches from Christian Ehrlicher

2006-12-31 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-sysdeps-unix.c: moved _dbus_atomic_inc/dec() from dbus/dbus-sysdeps.c, windows version of _dbus_atomic_inc/dec() is in dbus-sysdeps-win.c (not in this patch).

* dbus/dbus-sysdeps.h: DBusAtomic::value is long on windows to fit with InterlockedInc/Decrement. - Patches from Christian Ehrlicher

2006-12-31 Ralf Habacker <ralf.habacker@freenet.de>

* tools/dbus-send.c, tools/dbus-monitor.c: win32 compile fix.

2006-12-31 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-marshal-recursive.c (type DBusTypeReaderClass): fix mispaced const statement. - Patch from KÄmmel

2006-12-19 Ray Strobe <rstroke@redhat.com>

* bus/bus.c (process_config_every_time): don't overwrite existing bus context activation object until after we've checked that the new activation is valid.

* bus/main.c (signal_handler), (handle_reload_watch): don't call exit() on failure, instead make do and keep going. (close_reload_pipe): new function to turn off hangup-causes-config-reload behavior if an unexpected error occurs

2006-12-13 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-sysdeps-win-thread.c (_dbus_condvar_wait_win32):
correctness fix. - Patch from Christian Ehrlicher

2006-12-13 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-internals.h: msvc also knows about __FUNCTION__,
we should also use it. - Patch from Christian Ehrlicher

2006-12-13 Ralf Habacker <ralf.habacker@freenet.de>

* dbus-sysdeps-util.c: added win32 related tests

2006-12-12 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-string.c (_dbus_string_pop_line),
bus/desktop-file.c (parse_section_start,
parse_comment_or_blank,parse_key_value,): uses
_dbus_string_find_eol() to support platform independent eol
style.

2006-12-12 Ralf Habacker <ralf.habacker@freenet.de>

* dbus/dbus-string.[ch] (_dbus_string_find_eol): new function.
* dbus/dbus-string-util.c (_dbus_string_test): added testcases
for
_dbus_string_find_eol().
Approved by: Havoc Pennington.

2006-12-12 Tim Dijkstra <tim@famdijkstra.org>

* configure.in: Added switch to disable user_database caching.
* dbus/dbus-userdb-util.c, dbus/dbus-userdb.c: Add ifdefs to
be able disable user_database caching.

2006-12-12 Tim Dijkstra <tim@famdijkstra.org>

* bus/bus.c, bus/bus.h: Remove DBusUserDatabase from the
BusContext
struct. It is unnecessary we have a global one already. Also
remove
bus_context_get_user_database function, it is no longer needed.
Flush the global database on reload.

* dbus/dbus-userdb-util.c: Replace _dbus_user_database_get_groups
with _dbus_groups_from_uid. It no longer needs a
DBusUserDatabase.

* dbus/dbus-userdb.c, dbus/dbus-userdb.h:

Add `_dbus_user_database_flush_system`.
Make more functions `DBUS_USERDB_INCLUDES_PRIVATE`.
Small unrelated change in `_dbus_is_a_number`: change
`_dbus_string_parse_int` to `_dbus_string_parse_uint`.

* `bus/connection.c`: Change call to `_dbus_user_database_get_groups`
to
`_dbus_groups_from_uid`.

* `bus/policy.c`, `bus/policy.h`: Change call to
`_dbus_user_database_get_groups` to `_dbus_groups_from_uid`. Remove
`DBusUserDatabase` from `bus_policy_allow_user` prototype, it no
longer
needs it.

2006-12-12 John (J5) Palmieri <johnp@redhat.com>

* `bus/signal.c`: Fix `match_rule_equal` errata
(CVE-2006-6107 - Patch from Kimmo Hamalainen
<kimmo.hamalainen@nokia.com>)

2006-11-19 Thiago Macieira <thiago@kde.org>

* `dbus/dbus-sysdeps-pthread.c` (`_dbus_pthread_mutex_lock`,
`_dbus_pthread_condvar_wait`,
`_dbus_pthread_condvar_wait_timeout`): set `pmutex->holder` to
`pthread_self()` after coming back from a conditional variable
wait as well as in one codepath where it was forgotten.
Approved by: Havoc Pennington.

2006-11-17 Havoc Pennington <hp@redhat.com>

* `update-dbus-docs.sh`: allow setting `fd.org` username via env
variable. Make it run autogen with `--enable-xml-docs=yes`
`--enable-doxygen-docs=yes` so configure will fail if the required
tools are missing.

2006-11-17 Havoc Pennington <hp@redhat.com>

* `doc/dbus-faq.xml`: minor FAQ tweaks

2006-11-14 Havoc Pennington <hp@redhat.com>

* `dbus/dbus-misc.c`, `dbus/dbus-misc.h`: Move
`dbus_get_local_machine_id()` to its own file, no substantive
changes. There are a couple other things we might want to add
that
are "misc" so moving out of `dbus-connection.[hc]` which is big
enough already.

2006-11-14 Havoc Pennington <hp@redhat.com>

* dbus/dbus-internals.c (`_dbus_generate_uuid`): The spec said the UUID had the timestamp last, but the implementation had it first; move it to last since I think it's a tiny bit nicer (easier to compare at a glance, faster to sort, less code), and will not cause any practical compatibility problems. Also, always convert the timestamp to big endian.

* doc/dbus-specification.xml: Clean up the docs on the UUID.

* tools/dbus-uuidgen.1: more prominently say it is not suitable as a replacement for regular `uuidgen/RFC4122`.

2006-11-14 John (J5) Palmieri <johnp@redhat.com>

* dbus/dbus-threads.h: fix `DBUS_THREAD_FUNCTIONS_ALL_MASK` to have the correct value so we don't assert when initializing recursive threads

* test/name-test/test-thread-init.c: call `dbus_threads_init_default` instead of `_dbus_threads_init_debug` since it is more of a real world test

File = ChangeLog.~1~

2008-04-16 John (J5) Palmieri <johnp@redhat.com>

* tools/dbus-monitor.c: take out the trailing comma in the `ProfileAttributeFlags` enum as it isn't in our style guides and causes some compilers to error out

File = CheckForAbstractSockets.c

```
#include <stdlib.h>
#include <string.h>
#include <stdio.h>
#include <sys/socket.h>
#include <sys/un.h>
#include <errno.h>
```

```
int main() {
    int listen_fd;
    struct sockaddr_un addr;

    listen_fd = socket (PF_UNIX, SOCK_STREAM, 0);
```

```

if (listen_fd < 0)
{
    fprintf (stderr, "socket() failed: %s\n", strerror (errno));
    exit (1);
}

memset (&addr, '\0', sizeof (addr));
addr.sun_family = AF_UNIX;
strcpy (addr.sun_path, "X/tmp/dbus-fake-socket-path-used-in-
configure-test");
addr.sun_path[0] = '\0'; /* this is what makes it abstract */

if (bind (listen_fd, (struct sockaddr*) &addr, SUN_LEN (&addr)) < 0)
{
    fprintf (stderr, "Abstract socket namespace bind() failed:
%s\n",
            strerror (errno));
    exit (1);
}
else
    exit (0);
}

```

# Windows CE (>= 5.0.0)
#
# WinCE support now relies on the presence of platform files, found in
cmake/modules/platform
# Cmake 2.8.0 doesn't include WinCE platform files by default, but
working ones can be found
# on CMake's bugtracker :
# http://public.kitware.com/Bug/view.php?id=7919
#
# for cmake 2.8.0 get the following patch only :
#
http://public.kitware.com/Bug/file_download.php?file_id=2944&type=bug
#
# after applying the patch, you can enable the WinCE build by
specifying :
# cmake [...] -DCMAKE_SYSTEM_NAME=WinCE -DCMAKE_SYSTEM_VERSION=X.XX
# (where X.XX is your actual WinCE version, e.g. 5.02 for Windows
Mobile 6)
#
# Note that you should have a proper cross-compilation environment set
up prior to running
# cmake, ie. the PATH, INCLUDE and LIB env vars pointing to your CE
SDK/toolchain.

# CC_FOR_BUILD -- compiler used by this script. Note that the use of a
# compiler to aid in system detection is discouraged as it requires
# temporary files to be created and, as you can see below, it is a
# headache to deal with in a portable fashion.

# Historically, `CC_FOR_BUILD' used to be named `HOST_CC'. We still
# use `HOST_CC' if defined, but it is deprecated.

# Portable tmp directory creation inspired by the Autoconf team.

#
# Configuration subroutine to validate and canonicalize a
configuration type.
# Supply the specified configuration type as an argument.
# If it is invalid, we print an error message on stderr and exit with
code 1.
# Otherwise, we print the canonical config type on stdout and succeed.

# You can get the latest version of this script from:
#
http://git.savannah.gnu.org/gitweb/?p=config.git;a=blob\_plain;f=config
.sub;hb=HEAD

# This file is supposed to be the same for all GNU packages
# and recognize all the CPU types, system types and aliases
```

```
# that are meaningful with *any* GNU software.
# Each package is responsible for reporting which valid configurations
# it does not support.  The user should be able to distinguish
# a failure to support a valid configuration from a meaningless
# configuration.
```

```
# The goal of this file is to map all the various variations of a
given
# machine specification into a single specification in the form:
#   CPU_TYPE-MANUFACTURER-OPERATING_SYSTEM
# or in some cases, the newer four-part form:
#   CPU_TYPE-MANUFACTURER-KERNEL-OPERATING_SYSTEM
# It is wrong to echo any other type of specification.

# Please send patches to <config-patches@gnu.org>. Submit a context
# diff and a properly formatted GNU ChangeLog entry.
#
# Configuration subroutine to validate and canonicalize a
configuration type.
# Supply the specified configuration type as an argument.
# If it is invalid, we print an error message on stderr and exit with
code 1.
# Otherwise, we print the canonical config type on stdout and succeed.
```

```
# You can get the latest version of this script from:
#
http://git.savannah.gnu.org/gitweb/?p=config.git;a=blob\_plain;f=config
.sub;hb=HEAD
```

```
# This file is supposed to be the same for all GNU packages
# and recognize all the CPU types, system types and aliases
# that are meaningful with *any* GNU software.
# Each package is responsible for reporting which valid configurations
# it does not support. The user should be able to distinguish
# a failure to support a valid configuration from a meaningless
# configuration.
```

```
# The goal of this file is to map all the various variations of a
given
```

```

# machine specification into a single specification in the form:
#   CPU_TYPE-MANUFACTURER-OPERATING_SYSTEM
# or in some cases, the newer four-part form:
#   CPU_TYPE-MANUFACTURER-KERNEL-OPERATING_SYSTEM
# It is wrong to echo any other type of specification.

  cat <<_ACEOF
\`configure' configures dbus-glib 0.100.2 to adapt to many kinds of
systems.

```

Usage: \$0 [OPTION]... [VAR=VALUE]...

To assign environment variables (e.g., CC, CFLAGS...), specify them as VAR=VALUE. See below for descriptions of some of the useful variables.

Defaults for the options are specified in brackets.

Configuration:

-h, --help	display this help and exit
--help=short	display options specific to this package
--help=recursive	display the short help of all the included packages
-V, --version	display version information and exit
-q, --quiet, --silent	do not print '\`checking ...' messages
--cache-file=FILE	cache test results in FILE [disabled]
-C, --config-cache	alias for '\`--cache-file=config.cache'
-n, --no-create	do not create output files
--srcdir=DIR	find the sources in DIR [configure dir or '\`..']

Installation directories:

```

--prefix=PREFIX          install architecture-independent files in
PREFIX
                          [$ac_default_prefix]
--exec-prefix=EPREFIX    install architecture-dependent files in
EPREFIX
                          [PREFIX]

```

By default, `\`make install'` will install all the files in `\`$ac_default_prefix/bin'`, `\`$ac_default_prefix/lib'` etc. You can specify an installation prefix other than `\`$ac_default_prefix'` using `\`--prefix'`, for instance `\`--prefix=~$HOME'`.

For better control, use the options below.

Fine tuning of the installation directories:

```

--bindir=DIR             user executables [EPREFIX/bin]
--sbindir=DIR           system admin executables [EPREFIX/sbin]
--libexecdir=DIR       program executables [EPREFIX/libexec]
--sysconfdir=DIR       read-only single-machine data [PREFIX/etc]
--sharedstatedir=DIR   modifiable architecture-independent data
[PREFIX/com]
--localstatedir=DIR    modifiable single-machine data [PREFIX/var]
--libdir=DIR           object code libraries [EPREFIX/lib]
--includedir=DIR      C header files [PREFIX/include]
--oldincludedir=DIR   C header files for non-gcc [/usr/include]
--datarootdir=DIR     read-only arch.-independent data root
[PREFIX/share]
--datadir=DIR         read-only architecture-independent data
[DATAROOTDIR]
--infodir=DIR        info documentation [DATAROOTDIR/info]
--localedir=DIR     locale-dependent data [DATAROOTDIR/locale]
--mandir=DIR        man documentation [DATAROOTDIR/man]
--docdir=DIR        documentation root [DATAROOTDIR/doc/dbus-
glib]
--htmldir=DIR       html documentation [DOCDIR]
--dvidir=DIR        dvi documentation [DOCDIR]
--pdfdir=DIR        pdf documentation [DOCDIR]
--psdir=DIR         ps documentation [DOCDIR]

Optional Features:

```
--disable-option-checking  ignore unrecognized --enable/--with
options
--disable-FEATURE          do not include FEATURE (same as --enable-
FEATURE=no)
--enable-FEATURE[=ARG]    include FEATURE [ARG=yes]
--enable-maintainer-mode  enable make rules and dependencies not
useful (and
                           sometimes confusing) to the casual installer
--enable-silent-rules     less verbose build output (undo: "make V=1")
--disable-silent-rules   verbose build output (undo: "make V=0")
--enable-dependency-tracking
                           do not reject slow dependency extractors
--disable-dependency-tracking
                           speeds up one-time build
--enable-tests            enable unit test code
--enable-ansi             enable -ansi -pedantic gcc flags
--enable-verbose-mode    support verbose debug mode
--enable-asserts         include assertion checks
--enable-checks          include sanity checks on public API
--enable-gcov            compile with coverage profiling
instrumentation (gcc
                           only)
--enable-bash-completion  install bash completion scripts
--enable-shared[=PKGS]   build shared libraries [default=yes]
--enable-static[=PKGS]   build static libraries [default=yes]
--enable-fast-install[=PKGS]
                           optimize for fast installation [default=yes]
--disable-libtool-lock   avoid locking (might break parallel builds)
--enable-gtk-doc         use gtk-doc to build documentation
[[default=no]]
--enable-gtk-doc-html    build documentation in html format
[[default=yes]]
--enable-gtk-doc-pdf     build documentation in pdf format
[[default=no]]
```

Optional Packages:

```

--with-PACKAGE[=ARG]    use PACKAGE [ARG=yes]
--without-PACKAGE      do not use PACKAGE (same as --with-
PACKAGE=no)
--with-test-socket-dir=dirname
                        Where to put sockets for make check
--with-introspect-xml=filename
                        Pass in a pregenerated dbus daemon
introspection xml
                        file (as generated by 'dbus-daemon --
introspect') to
                        use instead of querying the installed dbus
daemon
--with-dbus-binding-tool=filename
                        Use external dbus-binding-tool program
--with-pic[=PKGS]      try to use only PIC/non-PIC objects
[default=use
                        both]
--with-gnu-ld           assume the C compiler uses GNU ld
[default=no]
--with-libtool-sysroot=DIR Search for dependent libraries within DIR
                        (or the compiler's sysroot if not specified).
--with-html-dir=PATH   path to installed docs

```

Some influential environment variables:

```

CC          C compiler command
CFLAGS      C compiler flags
LDFLAGS     linker flags, e.g. -L<lib dir> if you have libraries in
a
            nonstandard directory <lib dir>
LIBS        libraries to pass to the linker, e.g. -l<library>
CPPFLAGS    (Objective) C/C++ preprocessor flags, e.g. -I<include
dir> if
            you have headers in a nonstandard directory <include
dir>
CPP         C preprocessor
PKG_CONFIG  path to pkg-config utility
PKG_CONFIG_PATH
            directories to add to pkg-config's search path
PKG_CONFIG_LIBDIR
            path overriding pkg-config's built-in search path
DBUS_CFLAGS C compiler flags for DBUS, overriding pkg-config
DBUS_LIBS   linker flags for DBUS, overriding pkg-config
DBUS_GLIB_CFLAGS
            C compiler flags for DBUS_GLIB, overriding pkg-config
DBUS_GLIB_LIBS
            linker flags for DBUS_GLIB, overriding pkg-config
DBUS_GLIB_THREADS_CFLAGS
            C compiler flags for DBUS_GLIB_THREADS, overriding pkg-
config
DBUS_GLIB_THREADS_LIBS
            linker flags for DBUS_GLIB_THREADS, overriding pkg-
config

```

```
GTKDOC_DEPS_CFLAGS
    C compiler flags for GTKDOC_DEPS, overriding pkg-config
GTKDOC_DEPS_LIBS
    linker flags for GTKDOC_DEPS, overriding pkg-config
```

Use these variables to override the choices made by `configure' or to help it to find libraries and programs with nonstandard names/locations.

Report bugs to

<https://bugs.freedesktop.org/enter_bug.cgi?product=dbus&component=GLib>.

# include_expsyms should be a list of space-separated symbols to be
*always*
# included in the symbol list
include_expsyms=
# exclude_expsyms can be an extended regexp of symbols to exclude
# it will be wrapped by ` (' and `)'$', so one must not match
beginning or
# end of line. Example: `a|bc|.*d.*' will exclude the symbols `a'
and `bc',
# as well as any symbol that contains `d'.
exclude_expsyms='_GLOBAL_OFFSET_TABLE_|_GLOBAL__F[ID]_.*'
# Although _GLOBAL_OFFSET_TABLE_ is a valid symbol C name, most
a.out
# platforms (ab)use it in PIC code, but their linkers get confused
if
# the symbol is explicitly referenced. Since portable code cannot
# rely on this symbol name, it's probably fine to never include it
in
# preloaded symbol tables.
# Exclude shared library initialization/finalization symbols.

TP_COMPILER_WARNINGS([WARNING_CFLAGS],
    dnl Use -Werror by default if:
    dnl - we're not on Windows (too many warnings), and
    dnl - we're in developer mode (a D-Bus developer, not a distro or
end-user)
    dnl Override with --enable-Werror or --disable-Werror
    [test x$dbus_win != xyes -a x$dbus_cygwin != xyes -a
x$enable_developer = xyes],

    dnl Enable these warnings if possible:
    [all \
extra \

```

```

char-subscripts \
missing-declarations \
missing-prototypes \
nested-externs \
pointer-arith \
cast-align \
no-address \
float-equal \
declaration-after-statement \
],

dnl Disable these warnings if possible, make them non-fatal if
possible,
dnl and don't enable -Werror unless we succeeded.
dnl
dnl Intentional:
dnl - $DISABLE_UNUSED_WARNINGS disables unused-label warnings if not
dnl   checking or not asserting
dnl - missing field initializers being 0 is a C feature, not a bug
dnl - unused-parameter is to make writing callbacks less annoying
dnl
dnl To be fixed one day:
dnl - sign-compare and pointer-sign are workarounds for fd.o #17433
dnl - type-limits is probably a bug too, but having the rest of -
Wextra
dnl   is better than nothing
[$DISABLE_UNUSED_WARNINGS \

    cat <<_ACEOF
\`configure' configures dbus 1.6.8 to adapt to many kinds of systems.

Usage: $0 [OPTION]... [VAR=VALUE]...

To assign environment variables (e.g., CC, CFLAGS...), specify them as
VAR=VALUE.  See below for descriptions of some of the useful
variables.

Defaults for the options are specified in brackets.

Configuration:
  -h, --help                display this help and exit
    --help=short            display options specific to this package
    --help=recursive        display the short help of all the included
packages
  -V, --version             display version information and exit
  -q, --quiet, --silent    do not print `checking ...' messages
    --cache-file=FILE      cache test results in FILE [disabled]
  -C, --config-cache        alias for `--cache-file=config.cache'

```

```
-n, --no-create          do not create output files
--srcdir=DIR             find the sources in DIR [configure dir or
\`..'']
```

Installation directories:

```
--prefix=PREFIX         install architecture-independent files in
PREFIX
                        [$ac_default_prefix]
--exec-prefix=EPREFIX   install architecture-dependent files in
EPREFIX
                        [PREFIX]
```

By default, `\`make install'` will install all the files in `\`$ac_default_prefix/bin'`, `\`$ac_default_prefix/lib'` etc. You can specify an installation prefix other than `\`$ac_default_prefix'` using `\`--prefix'`, for instance `\`--prefix=$HOME'`.

For better control, use the options below.

Fine tuning of the installation directories:

```
--bindir=DIR            user executables [EPREFIX/bin]
--sbindir=DIR           system admin executables [EPREFIX/sbin]
--libexecdir=DIR        program executables [EPREFIX/libexec]
--sysconfdir=DIR        read-only single-machine data [PREFIX/etc]
--sharedstatedir=DIR    modifiable architecture-independent data
[PREFIX/com]
--localstatedir=DIR     modifiable single-machine data [PREFIX/var]
--libdir=DIR            object code libraries [EPREFIX/lib]
--includedir=DIR        C header files [PREFIX/include]
--oldincludedir=DIR     C header files for non-gcc [/usr/include]
--datarootdir=DIR       read-only arch.-independent data root
[PREFIX/share]
--datadir=DIR           read-only architecture-independent data
[DATAROOTDIR]
--infodir=DIR           info documentation [DATAROOTDIR/info]
--localedir=DIR         locale-dependent data [DATAROOTDIR/locale]
--mandir=DIR            man documentation [DATAROOTDIR/man]
--docdir=DIR            documentation root [DATAROOTDIR/doc/dbus]
--htmldir=DIR           html documentation [DOCDIR]
--dvidir=DIR            dvi documentation [DOCDIR]
--pdfdir=DIR            pdf documentation [DOCDIR]
--psdir=DIR             ps documentation [DOCDIR]
```

`_ACEOF`

```
cat <<\`_ACEOF
```

Program names:

```
--program-prefix=PREFIX      prepend PREFIX to installed
program names
```

--program-suffix=SUFFIX append SUFFIX to installed
program names
--program-transform-name=PROGRAM run sed PROGRAM on installed
program names

X features:

--x-includes=DIR X include files are in DIR
--x-libraries=DIR X library files are in DIR

System types:

--build=BUILD configure for building on BUILD [guessed]
--host=HOST cross-compile to build programs to run on HOST

[BUILD]

_ACEOF

fi

```
if test -n "$ac_init_help"; then
  case $ac_init_help in
    short | recursive ) echo "Configuration of dbus 1.6.8:";;
    esac
  cat <<\_ACEOF
```

Optional Features:

--disable-option-checking ignore unrecognized --enable/--with
options
--disable-FEATURE do not include FEATURE (same as --enable-
FEATURE=no)
--enable-FEATURE[=ARG] include FEATURE [ARG=yes]
--disable-maintainer-mode disable make rules and dependencies not
useful (and
 sometimes confusing) to the casual installer
--enable-silent-rules less verbose build output (undo: "make V=1")
--disable-silent-rules verbose build output (undo: "make V=0")
--enable-dependency-tracking do not reject slow dependency extractors
--disable-dependency-tracking speeds up one-time build
--enable-shared[=PKGS] build shared libraries [default=yes]
--enable-static[=PKGS] build static libraries [default=yes]
--enable-fast-install[=PKGS] optimize for fast installation [default=yes]
--disable-libtool-lock avoid locking (might break parallel builds)
--enable-compiler-coverage Enable generation of coverage data
--disable-compiler-optimisations Disable compiler optimisations
--enable-developer set defaults to be appropriate for a D-Bus
developer
 instead of a distribution/end-user
--enable-ansi enable -ansi -pedantic gcc flags
--enable-verbose-mode support verbose debug mode

```

--enable-asserts      include assertion checks
--enable-checks       include sanity checks on public API
--enable-xml-docs     build XML documentation (requires xmlto)
--enable-doxygen-docs build DOXYGEN documentation (requires
Doxygen)
--enable-abstract-sockets
                        use abstract socket namespace (linux only)
--enable-selinux      build with SELinux support
--enable-libaudit     build audit daemon support for SELinux
--enable-dnotify      build with dnotify support (linux only)
--enable-inotify      build with inotify support (linux only)
--enable-kqueue       build with kqueue support
--enable-console-owner-file
                        enable console owner file
--enable-userdb-cache build with userdb-cache support
--enable-launchd      build with launchd auto-launch support
--enable-systemd      build with systemd at_console support
--enable-embedded-tests enable unit test code in the library and
binaries
--enable-modular-tests enable modular regression tests (requires
GLib)
--enable-tests        enable/disable all tests, overriding
                        embedded-tests/modular-tests
--enable-installed-tests
                        enable unit test code in the library and
binaries
--enable-epoll        use epoll(4) on Linux
--enable-x11-autolaunch build with X11 auto-launch support
--disable-Werror      compile without -Werror (normally enabled in
                        development builds)
--enable-stats        enable bus daemon usage statistics

Optional Packages:
--with-PACKAGE[=ARG]  use PACKAGE [ARG=yes]
--without-PACKAGE     do not use PACKAGE (same as --with-
PACKAGE=no)
--with-pic[=PKGS]    try to use only PIC/non-PIC objects
[default=use
both]
--with-gnu-ld         assume the C compiler uses GNU ld
[default=no]
--with-libtool-sysroot=DIR Search for dependent libraries within DIR
                        (or the compiler's sysroot if not specified).
--with-xml=libxml/expat XML library to use (libxml may be named
libxml2 on
                        some systems)
--with-init-scripts=redhat
                        Style of init scripts to install
--with-session-socket-dir=dirname
                        Where to put sockets for the per-login-
session
                        message bus

```

```

--with-test-socket-dir=dirname
                        Where to put sockets for make check
--with-system-pid-file=pidfile
                        PID file for systemwide daemon
--with-system-socket=filename
                        UNIX domain socket for systemwide daemon
--with-console-auth-dir=dirname
                        directory to check for console ownership
--with-console-owner-file=filename
                        file whose owner determines current console
owner
--with-launchd-agent-dir=dirname
                        directory to put the launchd agent (default:
                        /Library/LaunchAgents)
--with-dbus-user=<user> User for running the DBUS daemon
(messagebus)
--with-dbus-daemon-dir=dirname
                        Directory for installing the DBUS daemon
--with-dbus-session-bus-default-address=nonce-
tcp:/autolaunch:/tcp:host:port
                        Transport Type to be used (default: nonce-
tcp:)
--without-64-bit       If you have to use this option, please
report it as
                        a bug
--with-valgrind        Add instrumentation to help valgrind to
understand
                        our allocator
--with-x               use the X Window System
--with-systemdsystemunitdir=DIR
                        Directory for systemd service files
--with-dbus-test-dir=dirname
                        path where the tests tools are available

```

Some influential environment variables:

```

CC          C compiler command
CFLAGS      C compiler flags
LDFLAGS     linker flags, e.g. -L<lib dir> if you have libraries in
a
            nonstandard directory <lib dir>
LIBS        libraries to pass to the linker, e.g. -l<library>
CPPFLAGS    (Objective) C/C++ preprocessor flags, e.g. -I<include
dir> if
            you have headers in a nonstandard directory <include
dir>
CXX         C++ compiler command
CXXFLAGS    C++ compiler flags
CPP         C preprocessor
CXXCPP      C++ preprocessor
PKG_CONFIG  path to pkg-config utility
GLIB_CFLAGS C compiler flags for GLIB, overriding pkg-config
GLIB_LIBS   linker flags for GLIB, overriding pkg-config

```

```

DBUS_GLIB_CFLAGS
    C compiler flags for DBUS_GLIB, overriding pkg-config
DBUS_GLIB_LIBS
    linker flags for DBUS_GLIB, overriding pkg-config
PYTHON
    the Python interpreter
LIBXML_CFLAGS
    C compiler flags for LIBXML, overriding pkg-config
LIBXML_LIBS
    linker flags for LIBXML, overriding pkg-config
SYSTEMD_CFLAGS
    C compiler flags for SYSTEMD, overriding pkg-config
SYSTEMD_LIBS
    linker flags for SYSTEMD, overriding pkg-config
VALGRIND_CFLAGS
    C compiler flags for VALGRIND, overriding pkg-config
VALGRIND_LIBS
    linker flags for VALGRIND, overriding pkg-config
MAN2HTML
    Path to man2html (optional)

```

Use these variables to override the choices made by `configure' or to help it to find libraries and programs with nonstandard names/locations.

Report bugs to

<https://bugs.freedesktop.org/enter_bug.cgi?product=dbus>.
